Housing Needs Assessment Kingfisher County

Prepared For:

Oklahoma Housing Finance Agency Oklahoma Department of Commerce 100 NW 63rd Street, Ste. 200 Oklahoma City, OK 73116

Effective Date of the Analysis:

June 25, 2015

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Integra Realty Resources Tulsa/OKC 1323 E. 71st. Street Suite 105 Tulsa, OK 74136 T 918.492.4844 F 918.493.7155 www.irr.com

December 31, 2015

Mr. Dennis Shockley, Executive Director Oklahoma Housing Finance Agency 100 NW 63rd Street, Ste. 200 Oklahoma City, OK 73116

SUBJECT: Housing Needs Assessment Kingfisher County IRR - Tulsa/OKC File No. 140-2015-0050

Dear Mr. Shockley:

As per our Agreement with Oklahoma Housing Finance Agency (OHFA), we have completed a residential housing market analysis (the "Analysis") for use by OHFA and the Oklahoma Department of Commerce (ODOC). Per our Agreement, OHFA and ODOC shall have unrestricted authority to publish, disclose, distribute and otherwise use, in whole or in part, the study and reports, data or other materials included in the Analysis or otherwise prepared pursuant to the Agreement and no materials produced in whole, or in part, under the Agreement shall be subject to copyright in the United States or any other country. Integra Realty Resources – Tulsa/OKC will cause the Analysis (or any part thereof) and any other publications or materials produced as a result of the Agreement to include substantially the following statement on the first page of said document:

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Attached hereto, please find the Kingfisher County Residential Housing Market Analysis. Analyst Lora Gwartney personally inspected the Kingfisher County area during the month of June 2015 to collect the data used in the preparation of the Kingfisher County Market Analysis. The University of Oklahoma College of Architecture Division of Regional and City Planning provided consultation, assemblage and analysis of the data for IRR-Tulsa/OKC. Mr. Dennis Shockley Oklahoma Housing Finance Agency December 31, 2015 Page 2

This market study is true and correct to the best of the professional's knowledge and belief, and there is no identity of interest between Owen S. Ard, MAI, David A. Puckett, or Integra Realty Resources – Tulsa/OKC and any applicant, developer, owner or developer.

If you have any questions or comments, please contact the undersigned. Thank you for the opportunity to be of service.

Respectfully submitted,

Integra Realty Resources - Tulsa/OKC

Introduction and Executive Summary

This report is part of a Statewide Affordable Housing Market Study commissioned by the Oklahoma Department of Commerce (ODOC) in partnership with the Oklahoma Housing Finance Agency (OHFA), as an outgrowth of the 2013 tornado outbreak in Oklahoma. It was funded by the U.S. Department of Housing and Urban Development (USHUD) through the Community Development Block Grant – Disaster Recovery program (CDBG-DR). This study was conducted by a public/private partnership between Integra Realty Resources – Tulsa/OKC, the University of Oklahoma College of Architecture, Division of Regional and City Planning, and DeBruler Inc. IRR-Tulsa/OKC, The University of Oklahoma, and DeBruler Inc. also prepared a prior statewide study in 2001, also commissioned by ODOC in partnership with OHFA.

This study is a value-added product derived from the original 2001 statewide housing study that incorporates additional topics and datasets not included in the 2001 study, which impact affordable housing throughout the state. These topic areas include:

- Disaster Resiliency
- Homelessness
- Assessment of Fair Housing
- Evaluation of Residential Lead-Based Paint Hazards

These topics are interrelated in terms of affordable housing policy, housing development, and disaster resiliency and recovery. Homeless populations are more vulnerable in the event of a disaster, as are many of the protected classes under the Fair Housing Act. Lead-based paint is typically more likely to be present in housing units occupied by low-to-moderate income persons, and can also present an environmental hazard in the wake of a disaster. Effective affordable housing policy can mitigate the impact of natural and manmade disasters by encouraging the development and preservation of safe, secure, and disaster-resilient housing for Oklahoma's most vulnerable populations.

Housing Market Analysis Specific Findings:

- 1. The population of Kingfisher County is projected to grow by 0.81% per year over the next five years, the same annual rate as the State of Oklahoma.
- 2. Kingfisher County is projected to need a total of 195 housing units for ownership and 57 housing units for rent over the next five years.
- 3. Median Household Income in Kingfisher County is estimated to be \$58,494 in 2015, compared with \$47,049 estimated for the State of Oklahoma. Household income growth in Kingfisher County has outpaced inflation for the last fifteen years. The poverty rate in Kingfisher County is estimated to be 8.31%, compared with 14.72% for Oklahoma.
- 4. Homeowner and rental vacancy rates in Kingfisher County are lower than the state averages, especially the homeowner vacancy rate.
- 5. Home values in Kingfisher County are somewhat higher than the state averages, while rental rates are somewhat lower.

- 6. Median sale price for homes in Kingfisher was \$138,750 in 2015, with a median price per square foot of \$90.06. The median sale price to list price ratio was 98.3%, with median days on market of 33 days.
- 7. Approximately 31.27% of renters and 17.42% of owners are housing cost overburdened.

Disaster Resiliency Specific Findings:

- 1. Tornadoes (1959-2014): Number: 69 Injuries: 242 Fatalities: 12 Damages (1996-2014): \$18,750,000.00
- 2. Social Vulnerability: Below state score at the county level; at the census tract level, the north and northeastern tracts of the county have elevated scores
- 3. Floodplain: Hennessey and Kingfisher (town) have notable development within or near the floodplain.

Homelessness Specific Findings

- 1. Kingfisher County is located in the Oklahoma Balance of State Continuum of Care.
- 2. There are an estimated 295 homeless individuals in this area, 154 of which are identified as sheltered.
- 3. Homeless children under the age of 18 are more likely to be unsheltered than sheltered.
- 4. Many homeless persons are victims of domestic violence, totaling 75 people.
- 5. Very few units are available for occupation by families with children (14), and there is a need to grow the number of units that are available for this group of homeless and the children in their care.

Fair Housing Specific Findings

- 1. Units in immigrant enclaves: 8
- 2. Units in limited English neighborhoods: 8
- 3. Units further than 15 miles from a hospital: 8
- 4. Units located in a food desert: 8
- 5. Units that lack readily available transit: 40

Lead-Based Paint Specific Findings

- 6. We estimate there are 1,074 occupied housing units in Kingfisher County with lead-based paint hazards.
- 7. 424 of those housing units are estimated to be occupied by low-to-moderate income households.
- 8. We estimate that 146 of those low-to-moderate income households have children under the age of 6 present.

Report Format and Organization

The first section of this report comprises the housing market analysis for Kingfisher County. This section is divided into general area information, followed by population, household and income trends and analysis, then followed by area economic conditions. The next area of analysis concerns the housing stock of Kingfisher County, including vacancy rates, construction activity and trends, and

analyses of the homeowner and rental markets. This section is followed by five-year forecasts of housing need for owners and renters, as well as specific populations such as low-to-moderate income households, the elderly, and working families.

The next section of this report addresses special topics of concern:

- Disaster Resiliency
- Homelessness
- Fair Housing
- Lead-Based Paint Hazards

This last section is followed by a summary of the conclusions of this report for Kingfisher County.

General Information

Purpose and Function of the Market Study

The purpose of this market study is to evaluate the need for affordable housing units in Kingfisher County, Oklahoma. The analysis will consider existing supply and projected demand and overall market trends in the Kingfisher County area.

Effective Date of Consultation

The Kingfisher County area was inspected and research was performed during June, 2015. The effective date of this analysis is June 25, 2015. The date of this report is December 31, 2015. The market study is valid only as of the stated effective date or dates.

Scope of the Assignment

- 1. The Kingfisher County area was inspected during June, 2015. The inspection included visits to all significant population centers in the county and portions of the rural county areas.
- 2. Regional, city and neighborhood data is based on information retained from national, state, and local government entities; various Chambers of Commerce, news publications, and other sources of economic indicators.
- 3. Specific economic data was collected from all available public agencies. Population and household information was collected from national demographic data services as well as available local governments. Much data was gathered regarding market specific items from personal interviews.
- 4. Development of the applicable analysis involved the collection and interpretation of verified data from local property owners/managers, realtors, and other individuals active within the area real estate market.
- 5. The analyst's assemblage and analysis of the defined data provided a basis from which conclusions as to the supply of and demand for residential housing were made.

Data Sources

Specific data sources used in this analysis include but are not limited to:

- 1. The 2000 and 2010 Decennial Censuses of Population and Housing
- 2. The 2009-2013 American Community Survey (ACS)
- 3. U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division
- 4. The United States Department of Labor, Bureau of Labor Statistics, including the Local Area Unemployment Statistics and the Quarterly Census of Employment and Wages programs
- 5. The U.S. Department of Housing and Urban Development, including the Comprehensive Housing Affordability Strategy (CHAS), and the 2013 Picture of Subsidized Households
- 6. Continuum of Care Assistance Programs

- 7. The National Oceanic and Atmospheric Administration
- 8. Nielsen SiteReports (formerly known as Claritas)
- 9. The Oklahoma State Department of Health
- 10. The Oklahoma Department of Human Services
- 11. The Federal Reserve Bank of Kansas City, Oklahoma City Branch
- 12. The Federal Reserve Bank of New York

Kingfisher County Analysis

Area Information

The purpose of this section of the report is to provide a basis for analyzing and estimating trends relating to Kingfisher County. The primary emphasis is concentrated on those factors that are of significance to residential development users. Residential and commercial development in the community is influenced by the following factors:

- 1. Population and economic growth trends.
- 2. Existing commercial supply and activity.
- 3. Natural physical elements.
- 4. Political policy and attitudes toward community development.

Location

Kingfisher County is located in central Oklahoma. The county is bordered on the north by Major and Garfield counties, on the west by Blaine County, on the south by Canadian County, and on the east by Logan County. The Kingfisher County Seat is Kingfisher, which is located in the southern part of the county. This location is approximately 119 miles southwest of Tulsa and 50.3 miles northwest of Oklahoma City.

Kingfisher County has a total area of 906 square miles (898 square miles of land, and 8 square miles of water), ranking 30th out of Oklahoma's 77 counties in terms of total area. The total population of Kingfisher County as of the 2010 Census was 15,034 persons, for a population density of 17 persons per square mile of land.

Access and Linkages

The county has average accessibility to state and national highway systems. Multiple highways intersect within Kingfisher. These are US-81, OK-51, OK-3, and OK-33. The nearest interstate highway is I-40, located 16.2 miles south. The county also has an intricate network of county roadways.

Public transportation is provided by the Cherokee Strip Transit, which operates a demand-response service. The local market perceives public transportation as average compared to other communities in the region of similar size. However, the primary mode of transportation in this area is private automobiles by far.

Kingfisher Airport is located just northwest of Kingfisher. Its primary concrete runway measure 2,800 feet in length. The nearest full-service commercial airport is the Will Rogers World Airport located 49.6 miles southeast in Oklahoma City.

Educational Facilities

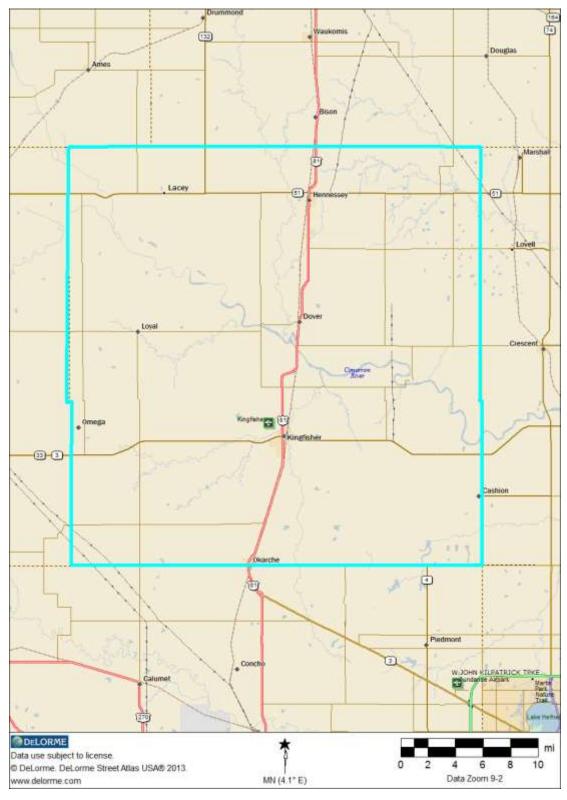

All of the county communities have public school facilities. Kingfisher is served by Kingfisher Public Schools which operates one high school, one middle school, and two elementary schools. Higher education offerings near Kingfisher include Redlands Community College, located 25.5 miles south in El Reno, Southern Nazarene University in Bethany, and the University of Central Oklahoma in Edmond.

Medical Facilities

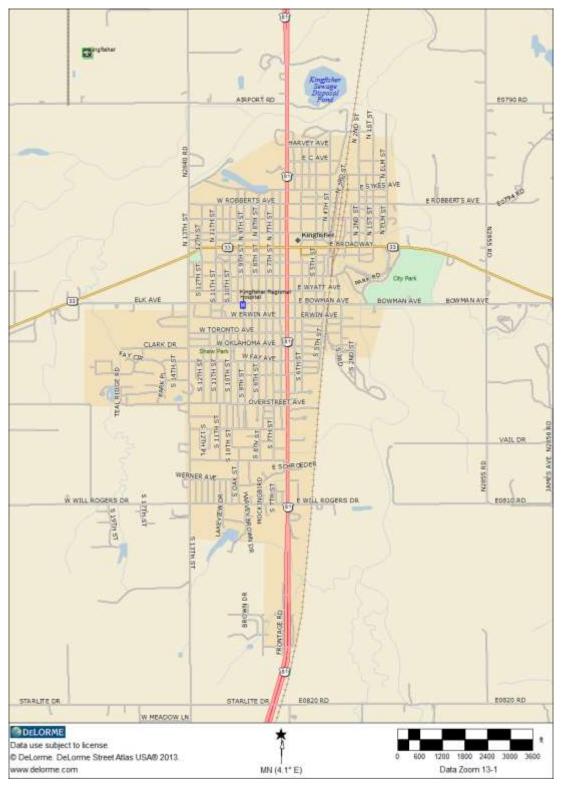

Medical services are provided by Mercy Hospital Kingfisher, an acute-care hospital and part of the Mercy Health Hospital Network. The hospital offers surgical, emergency, and in and outpatient's services. The smaller county communities typically have either small outpatient medical services or doctor's officing in the community.

Demographic Analysis

Population and Households

The following table presents population levels and annualized changes in Kingfisher County and Oklahoma. This data is presented as of the 2000 Census, the 2010 Census, with 2015 and 2020 estimates and forecasts provided by Nielsen SiteReports.

Population Levels and Annual Changes										
	2000	2010	Annual	2015	Annual	2020	Annual			
	Census	Census	Change	Estimate	Change	Forecast	Change			
Kingfisher	4,380	4,633	0.56%	4,899	1.12%	5,026	0.51%			
Kingfisher County	13,926	15,034	0.77%	15,491	0.60%	16,129	0.81%			
State of Oklahoma	3,450,654	3,751,351	0.84%	3,898,675	0.77%	4,059,399	0.81%			

The population of Kingfisher County was 15,034 persons as of the 2010 Census, a 0.77% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Kingfisher County to be 15,491 persons, and projects that the population will show 0.81% annualized growth over the next five years.

The population of Kingfisher was 4,633 persons as of the 2010 Census, a 0.56% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Kingfisher to be 4,899 persons, and projects that the population will show 0.51% annualized growth over the next five years.

The next table presents data regarding household levels in Kingfisher County over the same periods of time. This data is presented both for all households (family and non-family) as well as family households alone.

Households Levels and Annual Changes									
Total Households	2000	2010	Annual	2015	Annual	2020	Annual		
	Census	Census	Change	Estimate	Change	Forecast	Change

No Disability	2,515	82.62%	8,228	82.15%	2,002,279	82.30%

Source: 2009-2013 American Community Survey, Table C21007

Within Kingfisher County, the Census Bureau estimates there are 859 veterans, 39.93% of which have one or more disabilities (compared with 32.86% at a statewide level). In Kingfisher, there are an estimated 202 veterans, 49.50% of which are estimated to have a disability. Compared with the rest of the state, veterans in Kingfisher County, and especially the city of Kingfisher, are more likely to have one or more disabilities.

Group Quarters Population

The next table presents data regarding the population of Kingfisher County living in group quarters, such as correctional facilities, skilled-nursing facilities, student housing and military quarters.

	Kingfisher		Kingfisher Count	
	No.	Percent	No.	Percent
Total Population	4,633		15,034	
Group Quarters Population	129	2.78%	155	1.03%
Institutionalized Population	123	2.65%	149	0.99%
Correctional facilities for adults	35	0.76%	35	0.23%
Juvenile facilities	0	0.00%	0	0.00%
Nursing facilities/Skilled-nursing facilities	88	1.90%	114	0.76%
Other institutional facilities	0	0.00%	0	0.00%
Noninstitutionalized population	6	0.13%	6	0.04%
College/University student housing	0	0.00%	0	0.00%
Military quarters	0	0.00%	0	0.00%
Other noninstitutional facilities	6	0.13%	6	0.04%

The percentage of the Kingfisher County population in group quarters is somewhat lower than the statewide figure, which was 2.99% in 2010.

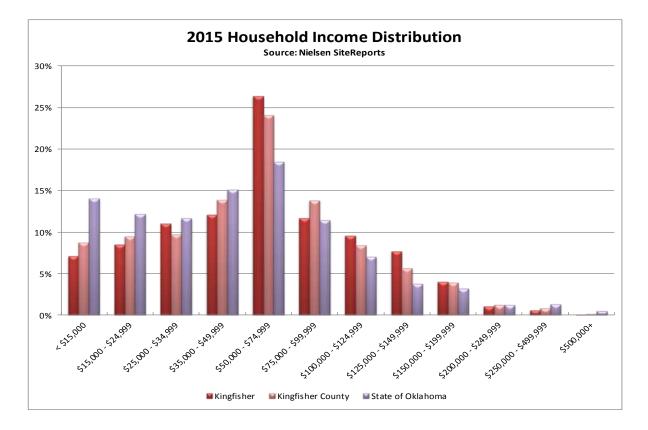

Household Income Levels

Data in the following chart shows the distribution of household income in Kingfisher County, as well as median and average household income. Data for Oklahoma is included as a basis of comparison. This data is provided by Nielsen SiteReports for 2015.

Average Household Income	\$70,535		\$69,216		\$63,390	
Source: Nielsen SiteReports						

As shown, median household income for Kingfisher County is estimated to be \$58,494 in 2015. By way of comparison, the median household income of Oklahoma is estimated to be \$47,049. For Kingfisher, median household income is estimated to be \$60,600. Compared with the rest of the state, Kingfisher County households have relatively higher incomes, with a significantly higher proportion of persons in the income bracket between \$50,000 and \$75,000. The income distribution can be better visualized by the following chart.

Household Income Trend

Next we examine the long-term growth of incomes in Kingfisher County, from the results of the 2000 Census (representing calendar year 1999), through the current 2015 estimates provided by Nielsen SiteReports. This data is then annualized into a compounded annual growth rate to estimate nominal annual household income growth over this period of time. We then compare the rate of annual growth with the rate of inflation over the same period of time (measured using the Consumer Price Index for all urban consumers, South Region, Size Class D, from May 1999 through May 2015). Subtracting the annual rate of inflation from the nominal rate of annual income growth yields a "real" rate of income growth which takes into account the effect of increasing prices of goods and services.

Household Incon	ne Trend				
	1999 Median	2015 Median	Nominal	Inflation	Real
	HH Income	HH Income	Growth	Rate	Growth
Kingfisher	\$36,059	\$60,600	3.30%	2.40%	0.90%
Kingfisher County	\$36,676	\$58,494	2.96%	2.40%	0.56%
State of Oklahoma	\$33,400	\$47,049	2.16%	2.40%	-0.23%

Sources: 2000 Decennial Census, Summary File 3, Table P53; Nielsen SiteReports; CPI All Urban Consumers, South Region, Size Class D

As shown, both Kingfisher County and Kingfisher saw positive growth in "real" median household income, once inflation is taken into account. Although data from the 2000 Census showed median household income in the city and county to be greater than the state as a whole, income growth over

the last fifteen years was significantly faster than the rest of the state, and consequently the gap in median household income grew significantly over this period of time. Over the same period, the national median household income increased from \$41,994 to \$53,706 (for a nominal annualized growth rate of 1.55%) while the Consumer Price Index increased at an annualized rate of 2.26%, for a "real" growth rate of -0.72%.

Poverty Rates

Overall rates of poverty in Kingfisher County and Oklahoma are shown in the following table. This data is included from the 2013 American Community Survey, as well as the 2000 Census to show how these rates have changed over the last decade. We also include poverty rates for single-parent families by gender of householder.

Poverty Rates					
	2000	2013	Change	2013 Poverty Rates for	Single-Parent Families
	Census	ACS	(Basis Points)	Male Householder	Female Householder
Kingfisher	11.31%	5.81%	-550	N/A	60.16%
Kingfisher County	10.80%	8.31%	-249	4.51%	39.37%
State of Oklahoma	14.72%	16.85%	213	22.26%	47.60%
Sources: 2000 Decennial Ce	nsus Table P87, 2	2009-2013 Amer	ican Community Survey	/Tables B17001 & B17023	

The poverty rate in Kingfisher County is estimated to be 8.31% by the American Community Survey. This is a decrease of -249 basis points since the 2000 Census. Within Kingfisher, the poverty rate is estimated to be 5.81%. Poverty rates in Kingfisher County were already below the state and national averages in 2000, and in part due to strong household income growth, the poverty rates of the city and county are now dramatically lower than state and national figures. It should be noted that increasing poverty rates over this period of time is a national trend: between the 2000 Census and the 2013 American Community Survey, the poverty rate of the United States increased from 12.38% to 15.37%, an increase of 299 basis points.

Economic Conditions

Employment and Unemployment

The following table presents total employment figures and unemployment rates for Kingfisher County, with figures for Oklahoma and the United States for comparison. This data is as of May 2015.

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As of May 2015, total employment in Kingfisher County was 8,312 persons. Compared with figures from May 2010, this represents annualized employment growth of 3.41% per year. The unemployment rate in May was 3.3%, a decrease of -190 basis points from May 2010, which was 5.2%. Over the last five years, both the statewide and national trends have been improving employment levels and declining unemployment rates, and Kingfisher County has outperformed the rest of the state nation in these statistics, with very high growth in total employment coupled with one of the lowest unemployment rates in the state.

Employment Level Trends

The following chart shows total employment and unemployment levels in Kingfisher County from January 2000 through May 2015, as reported by the Bureau of Labor Statistics, Local Area Unemployment Statistics program.

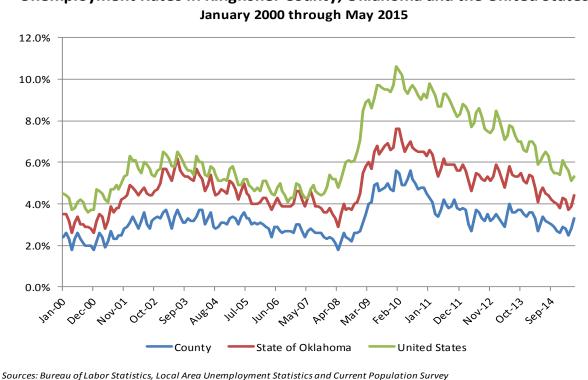

As shown, total employment levels have generally trended upward from 2000 through the 3rd quarter of 2008, when employment levels began to decline due to the national economic recession. Employment growth resumed in early 2010, and has continued to grow to its current level of 8,312 persons. The number of unemployed persons in May 2015 was 283, out of a total labor force of 8,595 persons.

Unemployment Rate Trends

The next chart shows historic unemployment rates for Kingfisher County, as well as Oklahoma and the United States for comparison. This data covers the time period of January 2000 through May 2015, and has not been seasonally adjusted.

Unemployment Rates in Kingfisher County, Oklahoma and the United States

As shown, unemployment rates in Kingfisher County increased moderately from 2000 through 2003, and then generally declined until the 4th quarter of 2008 as the effects of the national economic recession were felt. Unemployment rates began to decline again in 2010, to their current level of 3.3%. On the whole, unemployment rates in Kingfisher County track very well with statewide figures but are typically below the state. Compared with the United States, unemployment rates in Kingfisher County and Oklahoma are and have historically been well below the national average.

Employment and Wages by Industrial Supersector

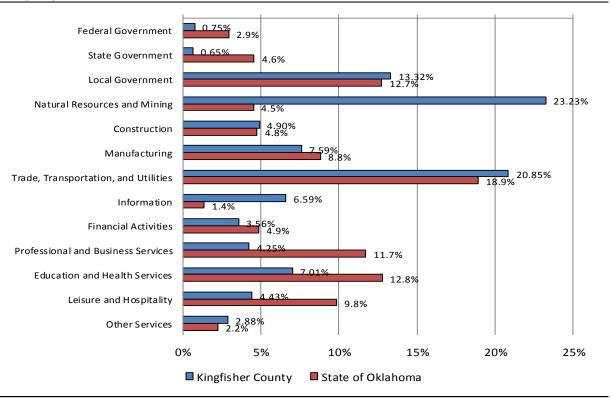

The next table presents data regarding employment in Kingfisher County by industry, including total number of establishments, average number of employees in 2014, average annual pay, and location quotients for each industry compared with the United States. This data is furnished by the Bureau of Labor Statistics, Quarterly Census of Employment and Wages program.

Employees and Wages by Supersector - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Employment Sectors - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

irr

Among private employers, the largest percentage of persons (23.23%) are employed in Natural Resources and Mining. The average annual pay in this sector is \$71,898 per year. The industry with the highest annual pay is Natural Resources and Mining, with average annual pay of \$71,898 per year.

The rightmost column of the previous table provides location quotients for each industry for Kingfisher County, as compared with the United States. Location quotients (LQs) are ratios used to compare the concentration of employment in a given industry to a larger reference, in this case the United States. They are calculated by dividing the percentage of employment in a given industry in a given geography (Kingfisher County in this instance), by the percentage of employment in the same industry in the United States. For example, if manufacturing in a certain county comprised 10% of total employment, while in the United States manufacturing comprised 5% of total employment, the location quotient would be 2.0:

10% (county manufacturing %) / 5% (U.S. manufacturing %) = 2.0

Location quotients greater than 1.0 indicate a higher concentration of employment compared with the nation, and suggest that the industry in question is an important contributor to the local economic base. Quotients less than 1.0 indicate that the industry makes up a smaller share of the local economy than the rest of the nation.

Within Kingfisher County, among all industries the largest location quotient is in Natural Resources and Mining, with a quotient of 15.31. This sector includes oil and gas related employment, as well as agricultural employment. Information is another key sector, with a location quotient of 3.30.

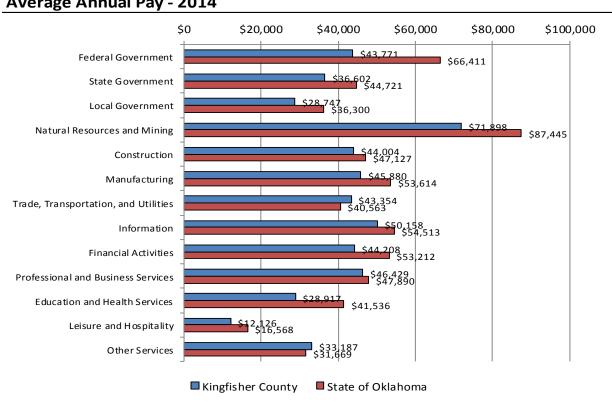

The next table presents average annual pay in Kingfisher County by industry, in comparison with Oklahoma as a whole and the United States.

24

Average Annual Pay - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

In comparison with the rest of Oklahoma, Kingfisher County has higher average wages in trade, transportation and utilities, and lower average wages in all other sectors. When considering the fact that incomes of persons living in Kingfisher County are much higher than the rest of the state, it is likely that the highest income earners in the county commute to other labor markets in the Oklahoma City area, as well as Enid.

Without Children <18 Years:	353	40.11%	1,517	45.71%	361,841	48.90%

Survey, Table B23

Within Kingfisher County, there are 3,319 working families, 54.29% of which have children under the age of 18 present. This compares with 51.10% in Oklahoma as a whole.

Major Employers

Major employers in Kingfisher are primarily in the energy sector as well as agriculture, with some employment in manufacturing and retail services.

Commuting Patterns

Travel Time to Work

The next table presents data regarding travel time to work in Kingfisher County.

	Kingfisher		Kingfishe	er County	State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Commuting Workers:	1,844		6,958		1,613,364	
Less than 15 minutes	1,055	57.21%	3,390	48.72%	581,194	36.02%
15 to 30 minutes	332	18.00%	1,503	21.60%	625,885	38.79%
30 to 45 minutes	114	6.18%	972	13.97%	260,192	16.13%
45 to 60 minutes	92	4.99%	510	7.33%	74,625	4.63%
60 or more minutes	251	13.61%	583	8.38%	71,468	4.43%

Within Kingfisher County, the largest percentage of workers (48.72%) travel fewer than 15 minutes to work. Although Kingfisher County has an active labor market, it also serves to some extent as a bedroom community to the greater Oklahoma City metro area.

Means of Transportation

Data in the following table presents data regarding means of transportation for employed persons in Kingfisher County.

	Kingfishe	Kingfisher		Kingfisher County		lahoma
	No.	Percent	No.	Percent	No.	Percent
Total Workers Age 16+	1,956		7,216		1,673,026

Drove Alone	1,614	89.72%	6,088	90.64%	1,373,407	88.52%
Carpooled	185	10.28%	629	9.36%	178,054	11.48%
Public Transportation	0	0.00%	4	0.06%	8,092	0.48%
Taxicab	0	0.00%	0	0.00%	984	0.06%
Motorcycle	0	0.00%	4	0.06%	3,757	0.22%
Bicycle	0	0.00%	0	0.00%	4,227	0.25%
Walked	0	0.00%	76	1.05%	30,401	1.82%
Other Means	45	2.30%	157	2.18%	14,442	0.86%
Worked at Home	112	5.73%	258	3.58%	59,662	3.57%

As shown, the vast majority of persons in Kingfisher County commute to work by private vehicle, with a small percentage of persons working from home.

Housing Stock Analysis

Existing Housing Units

The following table presents data regarding the total number of housing units in Kingfisher County. This data is provided as of the 2000 Census, the 2010 Census, with a 2015 estimate furnished by Nielsen SiteReports.

Total Housing Ur	nits				
	2000	2010	Annual	2015	Annual
	Census	Census	Change	Estimate	Change
Kingfisher	1,935	2,035	0.51%	2,118	0.80%
Kingfisher County	5,879	6,409	0.87%	6,614	0.63%
State of Oklahoma	1,514,400	1,664,378	0.95%	1,732,484	0.81%
Sources: 2000 and 2010 Dec	ennial Censuses,	Nielsen SiteRep	orts		

Since the 2010, Nielsen estimates that the number of housing units in Kingfisher County grew by 0.63% per year, to a total of 6,614 housing units in 2015. In terms of new housing unit construction, Kingfisher County underperformed Oklahoma as a whole between 2010 and 2015.

Housing by Units in Structure

The next table separates housing units in Kingfisher County by units in structure, based on data from the Census Bureau's American Community Survey.

	Kingfish	Kingfisher		Kingfisher County		dahoma
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	2,051		6,411		1,669,828	
1 Unit, Detached	1,678	81.81%	5,025	78.38%	1,219,987	73.06%
1 Unit, Attached	0	0.00%	8	0.12%	34,434	2.06%
Duplex Units	16	0.78%	16	0.25%	34,207	2.05%
3-4 Units	80	3.90%	89	1.39%	42,069	2.52%

Built 1970 to 1979	0	0.00%	257	19.65%	104,609	22.01%	
Built 1960 to 1969	92	19.66%	172	13.15%	64,546	13.58%	
Built 1950 to 1959	91	19.44%	188	14.37%	54,601	11.49%	
Built 1940 to 1949	0	0.00%	33	2.52%	31,217	6.57%	
Built 1939 or Earlier	63	13.46%	234	17.89%	39,089	8.22%	
Median Year Built:		1969 1971		1975			
Overall Median Year Built:		1971		1975		1976	

Within Kingfisher County, 12.79% of housing units were built after the year 2000. This compares with 15.22% statewide. Within Kingfisher the percentage is 11.00%.

78.00% of housing units in Kingfisher County were built prior to 1990, while in Kingfisher the percentage is 78.76%. These figures compare with the statewide figure of 72.78%.

Substandard Housing

The next table presents data regarding substandard housing in Kingfisher County. The two most commonly cited figures for substandard housing are a lack of complete plumbing, and/or a lack of a complete kitchen. We have also included statistics regarding homes heated by wood, although this is a less frequently cited indicator of substandard housing since some homes (particularly homes for seasonal occupancy) are heated by wood but otherwise not considered substandard.

The Census Bureau definition of inadequate plumbing is any housing unit lacking any one (or more) of the following three items:

1. Hot and cold running water

- 2. A flush toilet
- 3. A bathtub or shower

Inadequate kitchens are defined by the Census Bureau as housing units lacking any of the three following items:

- 1. A sink with a faucet
- 2. A stove or range
- 3. A refrigerator

	Occupied	Inadequate Plumbing		Inadequate Kitchen		Uses Wood for Fuel	
	Units	Number	Percent	Number	Percent	Number	Percent
Kingfisher	1,836	0	0.00%	89	4.85%	0	0.00%
Kingfisher County	5,733	5	0.09%	99	1.73%	53	0.92%
State of Oklahoma	1,444,081	7,035	0.49%	13,026	0.90%	28,675	1.99%

Within Kingfisher County, 0.09% of occupied housing units have inadequate plumbing (compared with 0.49% at a statewide level), while 1.73% have inadequate kitchen facilities (compared with 0.90% at a statewide level). It is likely that there is at least some overlap between these two figures, among units lacking both complete plumbing and kitchen facilities.

Vacancy Rates

The next table details housing units in Kingfisher County by vacancy and type. This data is provided by the American Community Survey.

	Kingfishe	Kingfisher		Kingfisher County		klahoma
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	2,051		6,411		1,669,828	
Total Vacant Units	215	10.48%	678	10.58%	225,747	13.52%
For rent	83	38.60%	116	17.11%	43,477	19.26%
Rented, not occupied	0	0.00%	5	0.74%	9,127	4.04%
For sale only	0	0.00%	12	1.77%	23,149	10.25%
Sold, not occupied	0	0.00%	11	1.62%	8,618	3.82%
For seasonal, recreationa	al,					
or occasional use	0	0.00%	51	7.52%	39,475	17.49%
For migrant workers	0	0.00%	0	0.00%	746	0.33%
Other vacant	132	61.40%	483	71.24%	101,155	44.81%
Homeowner Vacancy Rate	0.00%		0.27%		2.31%	
Rental Vacancy Rate	15.06%		8.12%		8.24%	

Source: 2009-2013 American Community Survey, Tables B25001, B25003 & B25004

Within Kingfisher County, the overall housing vacancy rate is estimated to be 10.58%. The homeowner vacancy rate is estimated to be 0.27%, while the rental vacancy rate is estimated to be 8.12%.

In Kingfisher, the overall housing vacancy rate is estimated to be 10.48%. The homeowner vacancy rate is estimated to be 0.00%, while the rental vacancy rate is estimated to be 15.06%.

Countywide, the rental vacancy rate is slightly lower than the statewide figure of 8.24%, however the vacancy rate among housing units for ownership is very nearly zero. This suggests extraordinarily high demand for housing units for purchase, with very little available on the market.

Building Permits

The next series of tables present data regarding new residential building permits issued in Kingfisher. This data is furnished by the U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division. Please note that average costs reported only represent physical construction costs for the housing units, and do not include land prices, most soft costs (such as finance fees), or builder's profit.

New Residential Building Permits Issued, 2004-2014							
Si	ngle Family	Avg. Construction	Multifamily	Avg. Multifamily			
Year U	nits	Cost	Units	Construction Cost			
2004 9		\$140,000	0	N/A			
2005 11	1	\$171,409	0	N/A			
2006 14	4	\$187,929	0	N/A			
2007 8		\$191,750	0	N/A			
2008 11	1	\$212,364	0	N/A			
2009 0		N/A	0	N/A			
2010 14	4	\$219,929	8	\$103,500			
2011 6		\$285,046	0	N/A			
2012 6		\$248,833	2	\$87,000			
2013 8		\$198,625	10	\$82,500			
2014 19	Э	\$232,368	0	N/A			

Source: United States Census Bureau Building Permits Survey

In Kingfisher, building permits for 126 housing units were issued between 2004 and 2014, for an average of 11 units per year. 84.13% of these housing units were single family homes, and 15.87% consisted of multifamily units. We note that the average permit cost is very high, suggesting that new construction in Kingfisher is of very high-end homes which would not be affordable to households earning less than median household income for the area.

33

New Construction Activity

For Ownership:

Much new home construction in Kingfisher County is on unplatted acreages in rural areas of the county, though there are several subdivisions in and around Kingfisher where there is ongoing new construction. These additions are mostly located on the south side of the city, and include:

- Ridgecrest
- Harvey Brown
- Hayden's Place
- Ridgecrest
- Chisholm Ridge (relatively more affordable homes)
- Vancoe
- Stonebrook (higher end homes on lots one-half to one acre in size)

Though there are some homes being built which are relatively affordable ("starter" homes), many homes are well outside of affordability for households with incomes at or less than median household income for Kingfisher. The median sale price of homes constructed since 2010 in Kingfisher is \$242,500, or \$111.00 per square foot, for homes sold since January 2014. A home of this price is not likely to be affordable to a household with an income of \$58,494 (median household income for Kingfisher County).

For Rent:

Apart from occasional construction of duplex units, there has been very little new construction of multifamily rental units in Kingfisher in many years. A 20-unit development was constructed in 2005 with the use of Affordable Housing Tax Credits (Meadow Glen, also known as Meeker Meadow), however no other new development has occurred since that time and none is currently planned or under construction to the best of our knowledge.

Homeownership Market

This section will address the market for housing units for purchase in Kingfisher County, using data collected from both local and national sources.

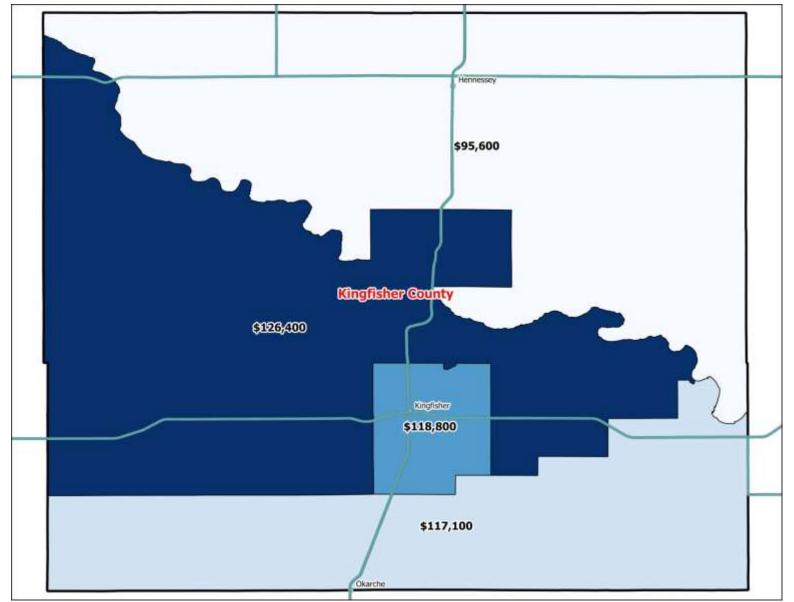

Housing Units by Home Value

The following table presents housing units in Kingfisher County by value, as well as median home value, as reported by the Census Bureau's American Community Survey.

	Kingfishe	er	Kingfishe	er County	State of O	klahoma

Median Home Value:	\$	115,800	\$	115,000	\$1	12,800

The median value of owner-occupied homes in Kingfisher County is \$115,000. This is 2.0% greater than the statewide median, which is \$112,800. The median home value in Kingfisher is estimated to be \$115,800. The geographic distribution of home values in Kingfisher County can be visualized by the following map.

Kingfisher County Median Home Values by Census Tract

Home Values by Year of Construction

The next table presents median home values in Kingfisher County by year of construction. Note that missing data fields indicate the Census Bureau had inadequate data to estimate a median value that age bracket.

	Kingfisher	Kingfisher County	State of Oklahoma	
	Median Value	Median Value	Median Value

Median Price/SF	\$72.58	\$71.66	\$77.65	\$78.08	\$90.06
Med. Days on Market	78	34	26	13	33
Source: OKC MLS					

Between 2011 and year-end 2014, the median list price declined by -1.93% per year, however this appears to be a statistical anomaly rather than an actual decline in home values, as the median size of homes declined during the same span, while median price per square foot increased from \$72.58 to \$78.08 per square foot. Year-to-date figures show a marked increase: the median sale price was \$138,750 in 2015, for a median price per square foot of \$90.06/SF. The median sale price to list price ratio was 98.3%, with median days on market of 33 days. This data suggests a strengthening market, with increasing prices per square foot, increasing sale price to list price ratios, and decreasing days on market.

Foreclosure Rates

The next table presents foreclosure rate data for Kingfisher County, compiled by the Federal Reserve Bank of New York. This data is effective as of May 2014.

Foreclosure Rates					
Geography	% of Outstanding Mortgages in Foreclosure, May 2014				
Kingfisher County	1.1%				
State of Oklahoma	2.1%				
United States	2.1%				
Rank among Counties in Oklahoma*:	53				
* Rank among the 64 counties for	r which foreclosure rates are available				
Source: Federal Reserve Bank of New Y	/ork, Community Credit Profiles				

According to the data provided, the foreclosure rate in Kingfisher County was 1.1% in May 2014. The county ranked 53 out of 64 counties in terms of highest foreclosure rates in Oklahoma. This rate compares with the statewide and nationwide foreclosure rates, both of which were 2.1%. With one of the lowest foreclosure rates in the state, foreclosures are unlikely to have a significant impact on the local property market.

Rental Market

This section will discuss supply and demand factors for the rental market in Kingfisher County, based on publicly available sources as well as our own surveys of landlords and rental properties in the area.

Gross Rent Levels

The following table presents data regarding gross rental rates in Kingfisher County. Gross rent is the sum of contract rent, plus all utilities such as electricity, gas, water, sewer and trash, as applicable (telephone, cable, and/or internet expenses are not included in these figures).

	Kingfish	er	Kingfishe	er County	State of C	Oklahoma

Built 1990 to 1999	\$568	\$566	\$715
Built 1980 to 1989	\$1,288	\$568	\$693
Built 1970 to 1979	-	\$721	\$662
Built 1960 to 1969	\$804	\$755	\$689
Built 1950 to 1959	\$921	\$804	\$714
Built 1940 to 1949	-	\$664	\$673
Built 1939 or Earlier	\$661	\$653	\$651

Source: 2009-2013 American Community Survey, Table 25111

The highest median gross rent in Kingfisher County is among housing units constructed after 2000, which is \$1,098 per month. In order to be affordable, a household would need to earn at least \$43,920 per year to afford such a unit.

Kingfisher Rental Survey Data

The next two tables show the results of our rental survey of Kingfisher.

Name	Туре	Year Built	Bedrooms	Bathrooms	Size (SF)	Rate	Rate/SF	Vacancy
	Project-Based - Elderly /							
Autumn Trace Apartments	Disabled	1989	Studio	1	365	\$563	\$1.542	7.00%
	Project-Based - Elderly /							
Autumn Trace Apartments	Disabled	1989	1	1	485	\$647	\$1.334	7.00%
Kingfisher Village Apartments	USDA / LIHTC - Family	1976	1	1	643	30%	N/A	N/A
Kingfisher Village Apartments	USDA / LIHTC - Family	1976	2	1	836	30%	N/A	N/A

There are three apartment complexes in Kingfisher, and all three are subsidized. Autumn Trace is a project-based facility for the elderly and/or disabled, and offers studio and one bedroom apartments. Kingfisher Village is a USDA / Tax Credit facility for families and offers one and two bedroom floor plans, rents are based on the tenant's income, and management was not willing to disclose their current occupancy. A third property, Meadow Glen Apartments, comprises 20 units under the USDA-Rural Development program as well as the Affordable Housing Tax Credit program. We were unable to reach management at this property.

Rental Market Vacancy – Kingfisher

Autumn Trace Apartments is reportedly at 93% occupancy, we were unable to confirm occupancy at the other affordable housing developments in Kingfisher. There are no significant market-rate rental properties in Kingfisher, it appears the balance of the Kingfisher rental market is comprised of single family homes and very small properties such as duplexes. The overall market vacancy of rental housing units was reported at 15.06% by the Census Bureau as of the most recent American Community Survey.

Projected Housing Need

Consolidated Housing Affordability Strategy (CHAS)

This section will analyze data from the U.S. Department of Housing and Urban Development's Consolidated Housing Affordability Strategy (CHAS) dataset for Kingfisher County. This data is typically separated into household income thresholds, defined by HUD Area Median Family Income (HAMFI). HUD Area Median Family Income (HAMFI) is equivalent to Area Median Income (AMI) for the purposes of this report. This data is considered the best indicator of housing need available which separates need into household income thresholds as defined by HUD.

Cost Burden by Income Threshold

The next table presents CHAS data for Kingfisher County regarding housing cost burden as a percentage of household income. Renter costs are considered to be the sum of contract rent and any utilities not paid by the landlord (such as electricity, natural gas, and water, but not including telephone service, cable service, internet service, etc.). Homeowner costs include mortgage debt service (or similar debts such as deeds of trust or contracts for deed), utilities, property taxes and property insurance.

Households are considered to be cost overburdened if their housing costs (renter or owner) are greater than 30% of their gross household income. A household is "severely" overburdened if their housing costs are greater than 50% of their gross household income.

	C	Owners		Renters

Households by Income Threshold: Percentage with Housing Cost Over 30% of Income

Substandard Conditions / Overcrowding by Income Threshold

The following table summarizes data regarding substandard housing conditions and overcrowding, separated by owner/renter and HAMFI income threshold. Substandard housing conditions are defined by HUD as any housing unit lacking either complete plumbing or a complete kitchen.

A housing unit without "complete plumbing" is any housing unit lacking one or more of the following features (they do not need to all be present in the same room):

- 1. Hot and cold running water
- 2. A flush toilet
- 3. A bathtub or shower

A lack of a complete kitchen is any housing unit lacking any one or more of the three following items:

- 1. A sink with a faucet
- 2. A stove or range
- 3. A refrigerator

Households are considered to be "overcrowded" if the household has more than 1.0 persons per room (note that this definition is "room" including bedrooms, living rooms and kitchens, as opposed to only "bedrooms"), and is "severely overcrowded" if the household has more than 1.5 persons per room.

Households by Income Threshold: Percentage Lacking Complete Plumbing and/or Kitchen

Cost Burden by Household Type

The following table provides a breakdown of households by HAMFI, and by household type and size, and by housing cost burden. The categories of household type provided by HUD are:

- Elderly Family: Households with two persons, either or both age 62 or over. •
- Small Family: 2 persons, neither age 62 or over, or families with 3 or 4 persons of any age. •
- Large Family: families with 5 or more persons. •
- Elderly Non-Family (single persons age 62 or over, or unrelated elderly individuals) •
- Non-Elderly, Non-Family: all other households. •

Households Under 80% of AMI: Percentage Housing Cost Overburdened

Housing Problems by Household Type

The next set of tables presents data by household type and whether or not the household is experiencing any housing problems. Housing problems are defined by HUD as any household meeting any of the three following criteria:

- 1. Housing costs greater than 30% of income (cost-overburdened).
- 2. Living in a housing unit lacking complete plumbing or a complete kitchen (substandard housing unit).
- 3. Living in a housing unit with more than 1.0 persons per room (overcrowding).

Housing Problems by Race / Ethnicity

Data presented in the following tables summarizes housing problems (as previously defined), by HAMFI threshold, and by race/ethnicity, for Kingfisher County. Under CFR 91.305(b)(1)(ii)(2), racial or ethnic groups have disproportionate need if "the percentage of persons in a category of need who are members of a particular racial or ethnic group in a category of need is at least 10 percentage points higher than the percentage of persons in the category as a whole."

CHAS Conclusions

The previous data notes many areas of need (and severe need) among the existing population of Kingfisher County. The greatest needs are among households with incomes less than 30% of Area Median Income. Several other areas of note:

- Among households with incomes less than 50% of Area Median Income, there are 320 renter households that are cost overburdened, and 440 homeowners that are cost overburdened.
- Among **elderly** households with incomes less than 50% of Area Median Income, there are 99 renter households that are cost overburdened, and 224 homeowners that are cost overburdened.
- 100% of Native American renters with incomes less than 80% of Area Median Income have one or more housing problems, along with 77.27% of renters of Hispanic ethnicity.

Overall Anticipated Housing Demand

Future demand for housing units in Kingfisher County can be estimated from population and household growth. Population estimates are based on known factors such as noted increases in the city employment base and indications from demographic services. In this case we have considered data from both the U.S. Census Bureau and Nielsen SiteReports. The estimates of changes in households and population were presented in a previous section of this report. The anticipated future demand is estimated for Kingfisher, as well as Kingfisher County as a whole. The calculations are shown in the following tables.

Kingfisher Anticipated Demand

Households in Kingfisher grew at an annually compounded rate of 0.44% from 2000 to 2010. Nielsen SiteReports estimates households have grown 1.00% per year since that time, and that households will grow 0.50% per year through 2020. For these reasons we will rely on the Nielsen SiteReports forecast of 0.50% per year in forecasting future household growth for Kingfisher.

The percentage of owner households was estimated at 74.51% with renter households estimated at 25.49%, based on data from the U.S. Census Bureau. The estimated number of additional units needed to service increasing demand can be estimated by applying this percentage to the anticipated growth in households. It should be noted that this is an estimate of rental and owner requirements and should be relied upon only as a guideline for possible new demand. The calculations are shown below.

Future Housing Demand Estimates for Kingfisher							
Year		2015	2016	2017	2018	2019	2020
Household	Estimates	1,896	1,906	1,915	1,925	1,934	1,944
Owner %:	74.51%	1,413	1,420	1,427	1,434	1,441	1,448
Renter %:	25.49%	483	486	488	491	493	496
			٦	Fotal New O	wner House	eholds	36
			Total New Renter Households				12

Based on an estimated household growth rate of 0.50% per year, Kingfisher would require 36 new housing units for ownership, and 12 units for rent, over the next five years. Annually this equates to 7 units for ownership per year, and 2 units for rent per year.

Kingfisher County Anticipated Demand

Households in Kingfisher County grew at an annually compounded rate of 0.89% from 2000 to 2010. Nielsen SiteReports estimates households have grown 0.62% per year since that time, and that households will grow 0.84% per year through 2020. For these reasons we will rely on the Nielsen SiteReports forecast of 0.84% per year in forecasting future household growth for Kingfisher County.

The percentage of owner households was estimated at 77.18% with renter households estimated at 22.82%, based on data from the U.S. Census Bureau. The estimated number of additional units needed to service increasing demand can be estimated by applying this percentage to the anticipated growth

in households. It should be noted that this is an estimate of rental and owner requirements and should be relied upon only as a guideline for possible new demand. The calculations are shown below.

Future Housing Demand Estimates for Kingfisher County								
Year		2015	2016	2017	2018	2019	2020	
Household	Estimates	5 <i>,</i> 911	5,961	6,011	6,061	6,112	6,163	
Owner %:	77.18%	4,562	4,601	4,639	4,678	4,717	4,757	
Renter %:	22.82%	1,349	1,360	1,371	1,383	1,394	1,406	
			-	Total New O	wner House	holds	195	
			-	Total New R	enter House	eholds	57	

Based on an estimated household growth rate of 0.84% per year, Kingfisher County would require 195 new housing units for ownership, and 57 units for rent, over the next five years. Annually this equates to 39 units for ownership per year, and 11 units for rent per year.

Housing Demand – Population Subsets

This section will address 5-year forecasted needs and trends for population special population subsets for Kingfisher County. These forecasts are based on the previously forecasted overall trends for the next five years.

Housing Needs by Income Thresholds

The first table will address future housing needs and trends for households in Kingfisher County by income threshold: households within incomes below 30%, 50%, 60% and 80% of Area Median Income, by tenure (owner/renter). These forecasts are primarily based on HUD Consolidated Housing Affordability Strategy data presented previously. Households with incomes below 60% of Area Median Income (AMI) are estimated at 120% of the households at 50% of AMI. Note that these figures are cumulative and should not be added across income thresholds.

Less than 80% AMI	33.45%	53.09%	65	31	96

Elderly Housing Needs

The next table will address future housing needs and trends for households with elderly persons (age 62 and up). Like the previous table, this data is based on the overall trends previously defined, and the 2008-2012 CHAS data previously discussed (specifically CHAS Table 16). It is further broken down by income threshold and tenure.

Kingfisher County: 2015-2020 Housing Needs Age 62 and Up						
	Owner	Renter	Elderly	Elderly	Elderly	
	Subset %	Subset %	Owners	Renters	Total	
Total New Elderly (62+) Demand: 2015-2020	31.24%	19.56%	61	11	72	
Elderly less than 30% AMI	2.90%	5.82%	6	3	9	
Elderly less than 50% AMI	8.25%	10.18%	16	6	22	
Elderly less than 60% AMI	9.90%	12.22%	19	7	26	
Elderly less than 80% AMI	13.94%	16.00%	27	9	36	

Housing Needs for Persons with Disabilities / Special Needs

The following table will address future trends and needs for households with at least one household member with at least one disability as identified by HUD CHAS Table 6 (hearing or vision impairments, ambulatory limitations, cognitive limitations, self-care limitations, or independent living limitations). As with the previous tables, this data is also further broken down by income threshold and tenure.

Kingfisher County: 2015-2020 Housing Needs for Persons with Disabilities							
	Owner	Renter	Disabled	Disabled	Disabled		
	Subset %	Subset %	Owners	Renters	Total		
Total New Disabled Demand (2015-2020)	33.53%	30.91%	65	18	83		
Disabled less than 30% AMI	3.02%	3.64%	6	2	8		
Disabled less than 50% AMI	7.77%	9.82%	15	6	21		
Disabled less than 60% AMI	9.33%	11.78%	18	7	25		
Disabled less than 80% AMI	14.04%	14.18%	27	8	35		

c.

Housing Needs for Veterans

This section will address housing needs for households with at least one veteran. This data is not available through HUD's Consolidated Housing Affordability Strategy, so we have instead relied on data from the U.S. Census Bureau, specifically the 2009-2013 American Community Survey, Table C21007. This data is further broken down by tenure, poverty status, and disability status.

Kingfisher County: 2015-2020 Housing Needs for Veterans						
	Owner	Renter	Veteran	Veteran	Veteran	
	Subset %	Subset %	Owners	Renters	Total	
Total New Demand (2015-2020)	100.00%	100.00%	195	57	252	
Total Veteran Demand	7.90%	7.90%	15	5	20	
Veterans with Disabilities	3.15%	3.15%	6	2	8	
Veterans Below Poverty	0.32%	0.32%	1	0	1	
Disabled Veterans Below Poverty	0.18%	0.18%	0	0	0	

Housing Needs for Working Families

The final table addresses housing needs for working families. Working families are in this case defined as families (households with at least two members related by blood or marriage) with at least one person employed. Like the forecasts for veteran needs, this data cannot be extracted from the HUD CHAS tables, so we have again relied on the Census Bureau's American Community Survey (table B23007 in this instance). The data is further broken down by the presence of children (below the age of 18).

Kingfisher County: 2015-2020 Housing Needs for Working Families								
	Owner	Renter						
	Subset %	Subset %	Owners	Renters	Total			
Total New Demand (2015-2020)	100.00%	100.00%	195	57	252			
Total Working Families	57.89%	57.89%	113	33	146			
Working Families with Children Present	31.43%	31.43%	61	18	79			

Population Subset Conclusions

Based on population and household growth over the next five years, a total of 252 housing units will be needed in Kingfisher County over the next five years. Of those units:

• 59 will be needed by households earning less than 60% of Area Median Income

- 26 will be needed by households age 62 and up, earning less than 60% of Area Median Income
- 25 will be needed by households with disabilities / special needs, earning less than 60% of Area Median Income
- One will be needed by veterans living below the poverty line
- 79 will be needed by working families with children present

This data suggests a strong need in Kingfisher County for housing units that are both affordable and accessible to persons with disabilities / special needs.

Special Topics

Kingfisher County Disaster Resiliency Assessment

The purpose of this section is to assess at the county level key components of disaster resiliency. Housing location and quality as well as planning activities can help reduce impacts from disaster events and allow for faster recovery. Disasters can include tornadoes, extreme weather, high winds, as well as man-made events. These events may largely be inevitable, but the ability to reduce damage and casualties as well recovery can be improved with good planning.

C.0 Comprehensive Plans & Hazard Mitigation Plans

There are 6 key cities within the county (Kingfisher, Okarche, Hennessey, Cashion, Dover, Loyal). No comprehensive plans were found.

Comprehensive plans are the guiding documents for cities of various sizes to address key aspects of their community from land use, transportation, environment, housing, and economic development.

The other key plan for a city to manage, mitigate and plan for recovery related to disasters is a Hazard Mitigation Plan (or Emergency Management Plan). Often low density counties, the Hazard Mitigation Plan is done at the county level, though some cities may augment the county plan with a city plan.

Kingfisher County does have a Hazard Mitigation Plan, but was unavailable for this study.

C.2.1.1. Historical Data on Natural Disasters and Other Hazards

Data on historical damages and casualties is typically collected as part of a Hazard Mitigation Plan preparation to determine the appropriate planning measures and actions to take before and after an event.

Flooding

All parts of the county may be subject to flash flooding, freeze-thaw flooding and extreme precipitation that can cause flooding, unrelated to the streams and rivers. Development in the floodplain, however, increases risk of damages and property loss potentially repeatedly.

NOAA data shows the following historic data on disaster events for the county:

Historic data on tornados between 1950-2014 there are 69 tornados documented. There were 242 injuries that occurred connected to these tornados, with 181 of those injuries happening in the 2011 tornado. There were 12 fatalities connected to tornadoes during this time period, 9 of which occurred in 2011. Property losses between 1950-1996 ranged from \$857,602.00 to \$8,576,100.00. (The accounting methods used for losses changed in 1996.) The losses estimated between 1996-2014 was \$18,750,000.00.

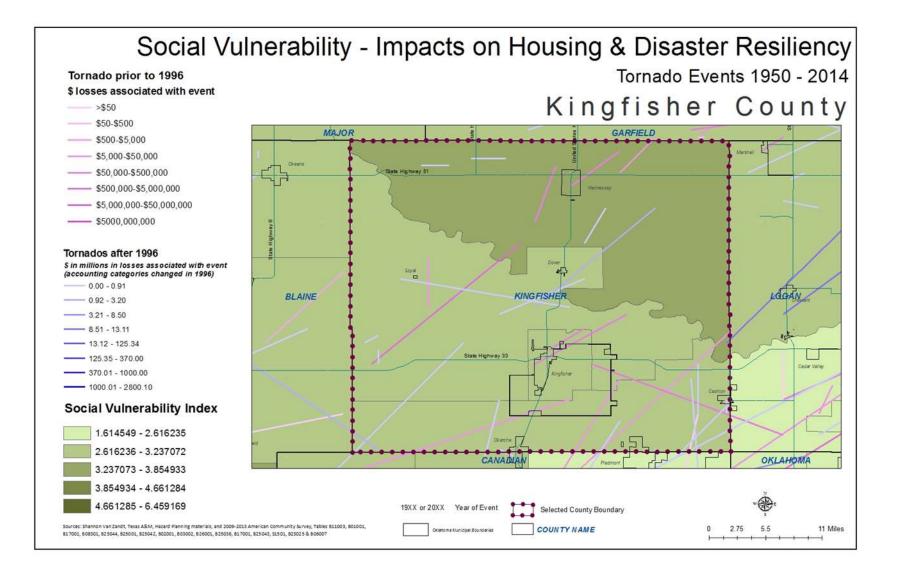

C.2.1.2; C.2.1.6; C.2.1.7;C.2.1.8 Shelters from Disaster Event

Public shelter in Kingfisher County Annex Building, 124 E Sheridan (<u>http://newsok.com/article/1453988</u>) and Kingfisher County Sheriff's Office, 119 S Main; Hennessey has one public shelter located next to the old gymnasium at 601 S. Main

Social Vulnerability Analysis - Kingfisher County

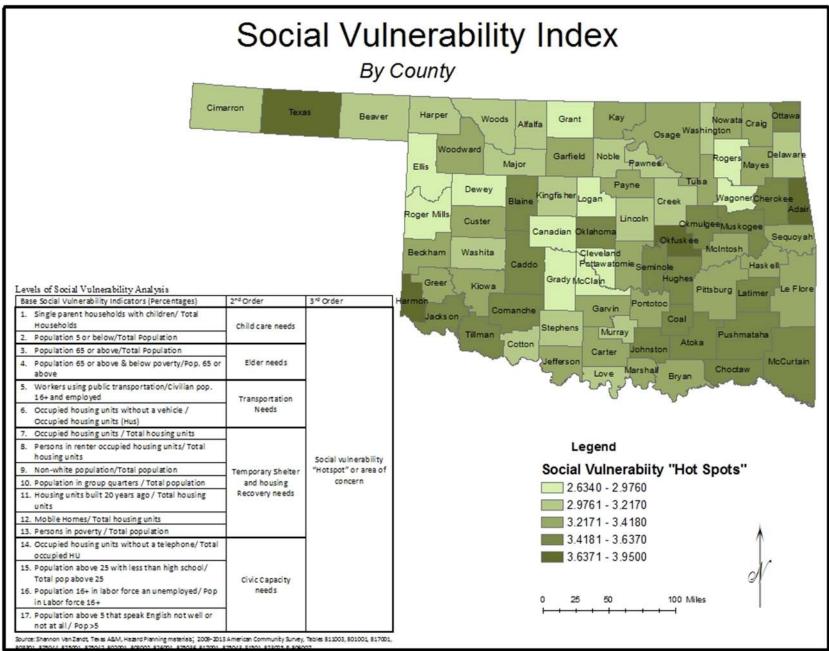

Social Vulnerability

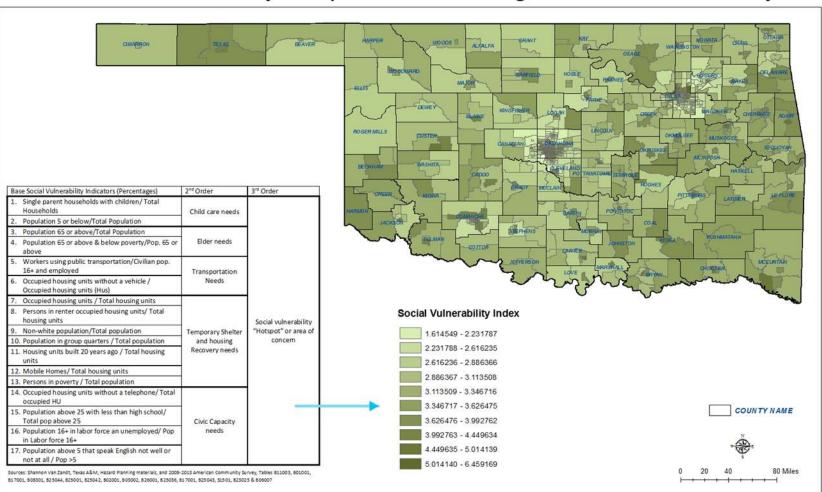

Based on the research work done by the Texas A&M University Hazard Reduction and Recovery Center, an added component is being included in this section. Social vulnerability can place households at a further disadvantage during and after a disaster. This analysis is assessing for the county the levels of social vulnerability based on demographic indicators to highlight 'hotspots' or counties that have higher social vulnerability. That combined with Hazard Mitigation Plans – or lack thereof – can highlight places where additional work is needed to reduce impacts on households.

Base Social Vulnerability Indicators			
(%)		2nd Order	3rd Order
1.) Single Parent Households	12.39%	0.193	
2.) Population Under 5	6.95%	(Child Care Needs)	
3.) Population 65 or Above	15.31%	0.243	
4.) Population 65 or Above & Below		(Elder Needs)

Social Vulnerability - Impacts on Housing & Disaster Resiliency

irr.

Social vulnerability combined with the devastating impacts of a natural or man-made disaster can compound a household's ability to recover and in fact can place those individuals at an even great gap or disadvantage prior to the event (Shannon Van Zandt, Texas A&M, Hazard Planning).

This county falls below the state score per this index for social vulnerability when comparing as a county to other counties in the state. Looking at the census tract level, the north and northeastern tracts of the county have elevated scores for social vulnerability.

Recommendations for this county:

- Continue to maintain the county HMP and include attention to areas within the county that in addition to physical vulnerability may have compounding social vulnerability factors.
- Efforts to strengthen building codes related to tornadoes and natural disasters should be considered.
- Planning for shelters from disaster events for multifamily, HUD and LIHTC units, in addition to all housing in the community should be incorporated with any effort to increase housing.

Homelessness

By Continuum of Care

Oklahoma is comprised of eight Continuums of Care (CoC). These entities manage the provision of services to the homeless, among other functions. By definition, CoCs involve nonprofit homeless providers; victim service providers; faith-based organizations; governments; businesses; advocates; public housing agencies; school districts; social service providers; mental health agencies; hospitals; universities; affordable housing developers; law enforcement and other organizations that serve the homeless and those at risk of becoming homeless (Continuum of Care Network pamphlet, 2015). These entities are governed by a community plan that helps them deliver services to the homeless and/or to prevent a return to the homeless. CoCs provide a variety of services aimed at outreach, engagement and assessment, including emergency shelter, rapid re-housing, transitional housing, and permanent housing, among others (Continuum of Care Network pamphlet, 2015).

The data below describes the characteristics of those receiving or eligible for the CoC in which Kingfisher County is located. This data is collected by the CoCs on last day of January each year and reported on an annual basis. It is currently the best source of data available at the State level of understanding the demographics of these populations.

OK 503 Oklahoma Balance of State

OK 503 represents the regions of Oklahoma that are not included in a regional or local COC's. Essentially, this COC accounts for the "rest" of the state. Most homeless people are sheltered in this data set, but not in statistically significant way. Out of the 198 total homeless households, 112 are sheltered to 86 unsheltered. Similar to that of the Tulsa region, "persons in households without children," above the age of 24 are significantly more homeless (127 to 10 persons age 18 to 24). Of note, "persons in households with at least one adult and one child," children under the age of 18 are more homeless than persons 18 and up. There are 87 homeless children under the age of 18 compared to the 71 combined total of persons above the age of 18. Also, these children are more unsheltered than sheltered. Lastly about this COC data set is that most homeless persons are victims of domestic violence, totaling 75 people. Since this COC accounts for all of the "leftovers" of the state in rural areas that are not included in the other COC's, possessing such a high number of homeless domestic violence victims is not unusual. There is the tendency in these rural areas to have a high amount of domestic violence issues, and homelessness is usually a step away for victims. The next most homeless subpopulation is the chronically homeless coming in at 40 people.

The majority of housing options available in this region are emergency shelters and transitional housing. These units are all open year around. Very few units are available for occupation by families with children (14). Given the prevalence of victims of domestic violence in this area, there is a need to grow the number of units that are available for this group of homeless and the children in their care.

OK 503 Oklahoma Balance of State	Emergency	Transitional	Unsheltered	Total

COC Conclusion

Each of the CoC's represents a unique area. It's important to note that the Point In Time data serves as a baseline. It is likely that the homeless population is much larger than counted. Generally, the State's homeless population is over the age of 24. In some areas of the State, there is a disproportionately high rate of homeless youth. More detailed exploration is necessary to understand the reasons which led them to this State and the needs of homeless youth. Domestic violence victims comprise a significant portion of the homeless population in the State. In some areas, the presence of social service providers for this subpopulation has reduced homeless rates. The same is true with respect to homeless veterans. As anticipated, the majority of the homeless population across the state can be classified as: mentally ill, chronically homeless, and chronic substance abusers. The needs of these difficult to house homeless must remain a priority across the State.

A Snap Shot of Homelessness in the State

Point in Time data was last collected on January 29, 2015 across the State. On that date, counts revealed a homeless populations of more than 3,000 residents. The majority of those counted (2,603 individuals) were classified as households without children. The majority of this group lives in emergency shelters (1,652) or transitional housing (376) with 575 classified as unsheltered.

The number of households with children is seemingly small totaling 343. The vast majority of those in this classification live at emergency shelters (201) or transitional housing (104) with only 38 classified as unsheltered. Homeless service providers in Oklahoma City and Tulsa emphasized that this group was likely undercounted across the State because they are less visible than other categories of homeless. They emphasized that emergency shelters, as presently designed, do not meet the needs of families with children in terms of both privacy and safety.

The Point in Time data reveals less than 100 households comprised of only children. Of these 74 counted households, 35 live in emergency shelters and 39 are unsheltered. This population is likely significantly undercounted as youth who are homeless typically seek to avoid identification for fear of being returned to their homes. These young people often have specific needs for supportive services that are difficult to deliver because the population remains unseen. Homeless advocates in the State hold up Tulsa as a good example of the State for serving homeless youth. OKC's Be the Change is also a leader in identifying and providing needed service to homeless youth in the metropolitan region. The problem of homeless youth is not just isolated to large urban areas. Mid-sized and smaller cities also look for innovative ways to service. Cities like El Reno and Enid have their own drop in centers for homeless youth. Social networks in smaller cities fill similar functions.

Oklahoma City public schools also tracks homeless students within the district. There are homeless students attending 78 elementary and middle schools in Oklahoma City. This data suggests that the majority of the city's homeless students are African American or Hispanic. There are 664 homeless African American students, 724 homeless Hispanic students, and 254 homeless Caucasian students. There are ten high schools in OKC that have reported having homeless students. Douglass and Capitol Hill high schools have the highest homeless student populations. Douglass has 50 homeless African American students. Capitol Hill has 49 homeless Hispanic students. The majority of these students can be classified as "couch homeless" or doubled up, meaning that they are finding

shelter with extended family members, friends, and other non-relatives for a brief amount of time due to hardship.

The majority of Oklahoma's homeless population is over 24 years old. This classification system is not particularly useful in helping to assess the number and needs of the elderly population, which is reported to be a substantial subset of this population.

The Point in Time data categorizes the homeless population into two categories: Hispanic/Latino and Non-Hispanic/Non-Latino. The lion's share of homeless in Oklahoma are Non-Hispanic/Non-Latino (3,528). In Oklahoma City, 62% of the homeless served are classified a Caucasian. Twenty-five percent of the homeless population is African American. Seven percent of the homeless in OKC identify as Native American. Less than one percent of those identified as homeless in OKC are Asian. By contrast, a relative small fraction of the State's homeless population, including less than 250 individuals. This follows OKC counts that identify 7% of the city's homeless population as Hispanic. Homeless advocates in OKC indicate that social networks, including churches and extended families, keep the number of homeless in the Hispanic population proportionately lower than their Non-Hispanic/Non-Latino counterparts. However, these individual likely classify as "couch homeless" and are in a continued state of being vulnerable to becoming homeless.

The PIC data indicates that are more homeless males (2,237) than females (1,535). This follows national trends. Care should be taken when interpreting this data, as women are less likely to participate in Point in Time counts. There is a growing population of homeless in Oklahoma that identifies as transgender. PIC data identified 5 individuals identifying as transgender. This population is likely much higher and will continue to grow due to family and national attitudes about this population. Transgender populations may require special housing accommodations, especially in the emergency shelter context, to provide for their social and emotional needs.

Another group of homeless individuals that merits special consideration in the distribution of resources is those identified as having special needs. This classification includes persons with "physical, mental or behavioral disabilities, persons with HIV/AIS and/or persons with alcohol or drug addictions. The Point in Time data estimates that there are nearly 1300 homeless persons with special needs in OKC alone.

The Point in Time data is coarse and does not do an effectively track homeless populations with specific needs, such as those persons who are homeless and living with HIV/AIDS. This special population of homeless is likely growing in Oklahoma. According to the Oklahoma State Department of Health there were an estimated 5,375 cases of persons living with HIV/AIDS by the end of 2013. There were a total of 437 newly diagnosed HIV/AIDS cases in 2013 for the state of Oklahoma. The vast majority of populations living with HIV/AIDS (nearly 72%) reside in urban areas. In OKC alone, the Point in Time data identified at least 25 homeless individuals living with HIV/AIDS. This is likely an undercount. Based on this information and anecdotal data from homeless service providers, special effort must be made to understand the housing, medical, and supportive services needs of homeless persons living with HIV/AIDs.

Shelter is crucial for homeless persons with HIV/AIDS in the management of this illness. However, traditional shelter setting(s) may not be suitable to house this population. Those with suppressed immune systems are vulnerable to the spread of infectious diseases which may be present in open shelters. In addition, shelter personally may not be properly trained in handling AIDS related issues. For these reasons, as well as resources made available by the federal government, homeless persons living with HIV/AIDs are often given housing choice vouchers, created by HOPWA, so that they secure housing on the private market. This can be challenging in constrained rental markets like Norman, for example, where affordable housing options are limited. It is estimated that more than 60 individuals living in OKC with HIV/AIDs are homeless because they have been unable to find a landlord that will accept their housing choice voucher.

Rural Areas

Homelessness in the rural areas of the State is much more difficult to calculate. Given the population density of the State, the majority of services that serve the homeless are concentrated in urban and semi-urban areas. Even if beds are available, many rural homeless lack knowledge about the services or a means to travel to receive the same. As a part of this study, OU students were dispatched into the 77 counties in the State to, among other issues, attempt to understand the degree to which there is rural homeless is difficult to identify and often ignored. For the purposes of this report, a literature review was prepared on the topic of rural homelessness in the States. The goals of this academic review is to assist policymakers and service providers in the State in uncovering the dimensions of this illusive population.

In the U.S., the rural homeless population is predominantly Caucasian. This population is comprised of single mothers, widowed wives and husbands, divorced and separated men and women, and young people. A study examining rural homelessness in Ohio found that nearly 40% of those who classify as homeless were divorced, separated, or widowed (First, Richard J., John C. Rife, and Beverly G. Toomey, 1994, pg. 101). Ohio's rural homeless were also relatively young. Close to 80% of homeless population in this study was between the ages of 18 and 39 years old (First et al, 1994, pg. 101). Rural homelessness is often less visible than urban homelessness because these populations commonly take shelter are at a friend's house, in their vehicles, or on abandoned properties. These populations can also be found on "...campgrounds or in hollows, desert canyons, farmers' fields, state parks, and highway rest areas" (Milbourne and Cloke, 2006, pg. 17).

The causes of rural homelessness mirror, in most ways, the plight of the urban homeless. The study of homelessness in rural Ohio revealed family problems and substance abuse issues as primary causes of rural homelessness. The incidence of homelessness resulting from situations of domestic violence is high in rural areas (Cummins et al, 1998). Substance abuse issues are a common cause for homelessness in rural America. The literature reveals that this population tends to be homeless because they have isolated themselves from family and people who want to help (First et al, 1994). In the case of both domestic violence and substance abuse, it is often difficult for these individuals to find shelter and the supportive services they require in rural areas where options are limited, if available at all. The thought of moving to an urban area to find both shelter and supportive services is sometimes not considered at all by these vulnerable populations.

Rural areas are also more prone to the kind of poverty that puts individuals and families at risk for homelessness. The number of people living at or below the poverty line in rural places is higher than anywhere else in the United States (Moore, 2001). The statement "rural homelessness is a microcosm of national economic and political developments" cannot be truer for American rural communities (Vissing, 1996, pg. 103). The disinvestment of small towns and their inability to attract long-term sustainable business development, cripples a small town's economy. In effect, this is a main contributor for why poverty is such a common theme for rural communities. As a result, the State should carefully consider its investments in rural Oklahoma. While there is a need for shelter in these places, the construction of this housing type should be weighed with long term opportunities for employment in the area.

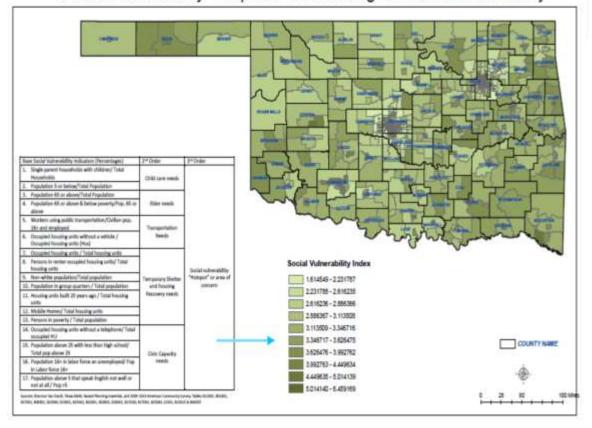

It is not surprising that rural areas typically lack both emergency shelters and temporary housing options. Services that provide temporary housing and provide relief and support services for those who cannot find food are virtually nonexistent in rural communities across the United States (Moore, 2001). Sheltering the homeless is undercapitalized in rural areas because communities do not see a concentration of homeless individuals (Vissing, 1996, pg. 146). As a result, the homeless must satisfice where they are. For instance, for families who are homeless, some of them use a friend's house to store clothes or to seek shelter, while some receive assistance from churches (Cummins et al, 1998). Others migrate to urban areas where services are available and more accessible (Rollinson, Paul A., and John T. Pardeck, 2006).

The absence of affordable housing in rural areas is a root cause of homelessness (Levinson, David, and Marcy Ross, 2007). In fact, it was noticed that many of the people were receiving monetary assistance or previously had some money saved up to spend on housing, but these measures were not enough to keep them afloat (First et al, 1994, pg. 101). Housing costs rise in rural areas typically rise as a result of competition for a limited amount of housing stock. In some rural areas, low income families are spending 70% of their household incomes on housing, sometimes substandard housing (Vissing, 1996, pg. 124). As Levinson et al explain, "housing costs are lower but so are incomes, with the result of placing a heavier rent burden in the community" (Levinson, David, and Marcy Ross, 2007, pg. 45). Renters in rural communities, as a result, are far more susceptible to becoming homeless than their urban or suburban counterparts because they do not have the financial safety net sometimes associated with homeownership (Fitchen, 1991, pg. 193).

While this brief review of the literature describes the state of homelessness across rural America, many of the lessons learned are easily translated to an Oklahoma context. The condition and supply of affordable housing units is relatively poor in many rural portions of the State. Rent burden, as more fully characterized in the Consolidated Housing Affordability Strategy (CHAS) section of this report, is high. This leaves families living and working in relatively weak economies vulnerable to homelessness. Once homeless, supportive services in these areas are relatively limited, especially for the chronically homeless, those with substance abuse problems, and victims of domestic violence. Services available to these populations in urban areas may not be attractive to individuals and families who are accustomed to life in rural communities. Where practicable, more consideration must be given to providing supportive services and temporary and permanent housing to homeless populations wishing to remain in rural areas.

At Risk For Homelessness

Poverty is the primary factor that places Oklahoma families at risk of being homeless. There are many factors experienced by those living in poverty which leave residents more or less vulnerable to homelessness. For the purposes of this study, a social vulnerability index has been constructed to measure the likelihood or risk that residents living in poverty might find themselves homeless. This index includes factors such as single headed households, concentration of young and elderly residents, the reliance on public transportation, private vehicle availability, racial composition, housing type, presence or absence of a telephone in the household, amongst other factors. This index is additive and seeks to understand the collective impact of these factors in estimating the vulnerability of a local population. While employed in more significant detail in the section of this report focusing on disaster resiliency, this tool is useful in identifying areas of the State where populations may be most vulnerable to homelessness. The index utilized in this section is different from the one crafted in the Disaster Resiliency chapter of this report in that it estimates social vulnerability at the county level, rather than by census tract. The decision to study vulnerability to homelessness at the county level was made to help policymakers understand, more generally, where resources and economic interventions are most necessary to stave off the potential effects of homelessness. This maps presents vulnerability to homelessness on the county level, depicting the most vulnerable counties in dark green.

Social Vulnerability - Impacts on Housing & Disaster Resiliency

The Oklahoma families most likely at risk are those living in public and subsidized housing. They live below the poverty line. Even those who are employed, remain vulnerable to homeless because an unexpected expense, like a medical emergency, threatens their ability to pay for their share of rent owed or utilities. A missed payment can easily lead to eviction and homeless.

Through the U.S. Department of Housing and Urban Development, Oklahoma service providers have been vested with more than 24,000 housing choice vouchers. Their spatial distribution is outlined below. Of significance is the size of the waiting lists for public housing units and housing choice vouchers in cities across the State. These individuals are the most vulnerable to being homeless.

			Dublic

Findings and Recommendations

The chronically homeless population remains high in Oklahoma and follows national trends. While this population does not appear to be growing, the needs of the chronically homeless merit continued attention. Ample emergency shelters and soup kitchens must be made available for these sizable population in both urban and rural contexts. Social service providers should be clustered, to the extent possible, where these groups of homeless populations cluster. Given the future projections for the increase in the number of cold and hot days in the region, social service providers must provide places that allow these individuals to seek refuge from the elements.

Those living with HIV/AIDS tend to underreport their status and needs. Given the cost of medical care these individuals face, the need for permanent and stable housing is critical. Housing providers must work to ensure that there are enough units for this undercounted population. Working with county health care providers, OHFA is much more likely to estimate the size and needs of this population of homeless and potentially homeless persons. Special care must be taken to ascertain the barriers these individuals face when using vouchers to secure housing in the marketplace.

Victims of domestic violence require temporary and transitional housing statewide. CoCs with high supportive services tend to better accommodate the housing needs for these population. Cleveland County provides a good model for the State. However, many homeless victims of domestic violence live in rural areas that are underserved. Efforts must be undertaken to work with social services provides, schools, churches, and the police to help identify these individuals and to lead them to available housing and supportive services.

While not mentioned in the PIC data, estimates must be prepared to calculate the number and needs of homeless populations with felonies. In particular, there has been a rise nationally in the number of homeless sex offenders. Zoning regulations and discrimination from the private market has pushed many registered sex offenders to the periphery of many communities. Given their criminal histories, this population of homeless is harder to house but should not be forgotten for health and safety of these individuals and the communities they inhabit.

The size of the homeless veteran population seems to be decreasing as a result of national initiatives to end homelessness for veterans in Oklahoma. The needs of homeless veterans are highest in areas of the State near VA facilities. Temporary and permanent housing should be constructed at a higher rate in these areas to meet demand. Care should be taken to make certain that the housing constructed is built to meet the psychological needs of veterans, particularly those suffering from PTSD.

Rural homelessness, in general, is a challenge to assess and characterize. The rate of homelessness in rural areas is most likely much higher than annual counts demonstrate. The majority of rural homeless likely find shelter out of public view. Some may shelter in their cars, in undeveloped areas or in the homes of those who allow them to stay. They are not likely to find their way to urban areas given their lack of transportation options and preferences for rural living. Programs that are developed to provide shelter to the rural homeless must be developed to allow sheltering in place where possible. Sheltering in place should only be allowed, however, in places where individuals are likely to be able to find what they need, including opportunities to work.

Very little is known about the age distribution of homeless over the age of 24. It is likely that the homeless population, including those who are chronically homeless, is aging. Elderly homeless individuals have special needs. Counts must be more sensitive to understanding the size and needs of this population. This does not mean arbitrarily building units to house this population unless a need can be demonstrated for the same.

Waiting lists for public housing and section 8 vouchers are high across the State. This is not uncommon to Oklahoma. However, when we are considering the size of the population that is at risk to homelessness, these waiting lists are an important factor to consider. Resources should be spent in a manner which is preventative so that these individuals' and families' needs are met before they become homeless.

The absence of affordable housing alternatives across some parts of the State is the largest threat to homelessness. In markets that are constrained by an aging housing stock or those that are rapidly growing, individuals and families who live on the economic margins are at risk for becoming homeless. Communities must work to ensure that zoning regulations promote the development of housing types serving all income levels, including the providing of temporary and permanent housing to meet the needs of the presently homeless and those at risk for becoming the same. Funding distributions should be targeted to communities with the highest needs who are willing to do what is necessary to meet the needs of the homeless and those at risk for the same.

Fair Housing

Summary

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity.

These findings are intended to aid the Oklahoma Housing Finance Agency (OHFA) determine the location of new affordable housing in relation to vulnerable populations and explore ways to expand the opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Key Findings:

- 70% of affordable housing units are located in census tracts marked by poverty
- 62% of affordable housing is located in census tracts where a majority of the residents are not white
- 13% of affordable housing units have no access to transit services and 56% have access to limited service, on-demand transit
- 2.6% of affordable housing units have limited access to a hospital
- 7.8% of affordable housing units are located in food deserts

Recommendations:

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

What is Fair Housing?

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. On one hand, this protects the ability of individuals to obtain housing regardless of personal characteristics such as race, skin color, national origin, gender, familial status, or disability. It also focuses attention on more subtle forms of discrimination that cluster low-income housing in ways that inhibit the ability of communities to access services and amenities that support self-sufficiency and autonomy.

Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity. In 2014, HUD released the Affirmatively Furthering Fair Housing (AFFH) rule for public comment. The draft rule

"directs HUD's program participants to take significant actions to overcome historic patterns of segregation, achieve truly balanced and integrated living patterns, promote fair housing choice, and foster inclusive communities that are free from discrimination" (HUD 2015). In 2015, the United States Supreme Court provided legal support for actions taken to remedy patterns that impede the upward mobility and opportunity of low-income individuals and communities. In the case of Texas Department of Housing and Community Affairs v. The Inclusive Communities Project the court reiterated the need to address disparate impacts in considering the location of affordable housing and reinforced the importance of AFFH (Bostic 2015). Housing discrimination from this perspective is not only felt by individual residents, it can also be the result of actions that work to limit the opportunities to improve the quality of life in local communities.

Approach

In Oklahoma, a combination of federal and state programs work to support the opportunities provided to individuals and families who rest safely and comfortably in an apartment or home. Here we use publicly available data for units that are part of the Low Income Housing Tax Credit (LIHTC) Program, the Rural Rental Housing Loans, or OHFA administered programs such as Oklahoma Affordable Housing Tax Credit (AHTC), the HOME investment partnership program, the Section 8 Housing Choice Voucher Program, and multi-family bonds. Collectively, these programs represent state efforts to assist individuals who are unable to afford housing.

Indicators of disparate impact vary but seem to contingent upon the contextual characteristics of a particular neighborhood. In an effort to help communities investigate and understand community level disparate impacts, HUD created a Fair Housing Assessment Tool (http://www.huduser.gov/portal/affht_pt.html#affh). The assessment tool includes measures on

(<u>http://www.huduser.gov/portal/affnt_pt.html#affn</u>). The assessment tool includes measures on indicators of disparate impacts based on the clustering of potentially vulnerable populations, including:

- Race/Ethnicity of Residents
- National Origin of Residents
- English Proficiency of Residents
- Job Accessibility
- Transit Accessibility
- Level of Poverty
- Environmental Exposure (e.g. pollution, crime, food, health care, etc.)
- Disability

This report uses the Fair Housing Assessment Tool in conjunction with readily available data to initiate a more thorough investigation of the potential for disparate impacts in the state. The findings are intended to aid the Oklahoma Housing Finance Agency regarding future location of new fair housing in relation to vulnerable populations and the future opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Data

Data for this report are compiled from a variety of sources including the United States Census, the University of Oklahoma Center for Spatial Analysis, and primary data collected as part of ongoing research efforts at the University of Oklahoma. Data are aggregated into census tracts and reported statewide as well as by county (see Appendix 1).

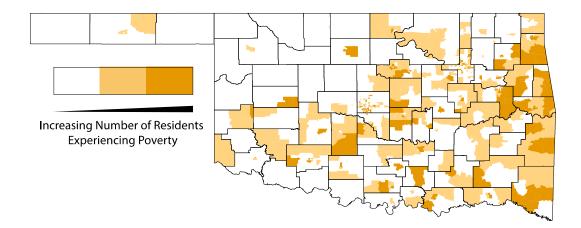

1. Urban/Rural

A majority of the affordable housing in Oklahoma is situated in rural communities. Urban communities including Edmond, Lawton, Norman, Oklahoma City, and Tulsa are home to just over 1/3 of the affordable housing units in the state.

	Total Affordable Housing Units	Situated an Urban Setting	Situated in a Rural Setting
OHFA	35,292	11,699 (33.1%)	23,593 (66.9%)
515	5,384	0	5,384 (100%)
LIHTC	23,537	8,255 (35.1%)	15,282 (64.9%)
Total	64,213	19,954 (31.1%)	44,259 (68.9%)

2. Poverty

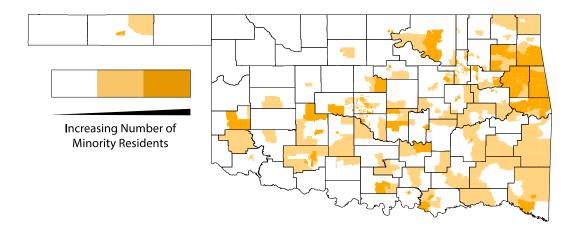

Approximately 70% of affordable housing units in Oklahoma are located in census tracts where the number of residents living in poverty is above the state average. About half of these units are located in areas of extreme poverty, where the number of individuals who are economically vulnerable exceeds 994, more than one standard deviation (411) from the mean (583).

	Total Affordable Housing Units	Situated in Poverty	Situated in Extreme Poverty
OHFA	35,292	12,295 (34.8%)	12,464 (35.3%)
515	5,384	2,093 (38.9%)	1,839 (34.2%)
LIHTC	23,537	7,483 (31.8%)	8,924 (38.0%)
Total	64,213	21,796 (33.9%)	23,227 (36.2%)

3. Non-white Enclaves

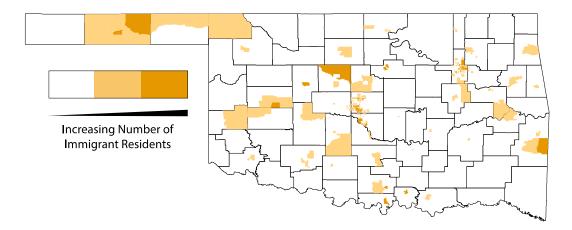

Just over 60% of affordable housing units in Oklahoma are located in census tracts where a majority of the residents are non-white. With just fewer than 24% of the total affordable housing units in census tracts heavily populated with residents who are not white – identified as census tracts where the number of non-white residents is more than 1,595 - one standard deviation (653) greater than the mean (542).

	Total Affordable Housing Units	Situated in Majority Non-White Community	Situated in Heavily Non-White Community
OHFA	35,292	12,814 (36.3%)	7,907 (22.4%)
515	5,384	2,229 (41.4%)	1,288 (23.9%)
LIHTC	23,537	10,285 (43.7%)	5,677 (24.1%)
Total	64,213	25,328 (39.4%)	14,872 (23.2%)

4. Immigrant Enclaves

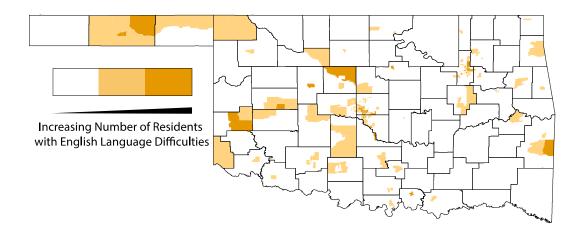

One-third of affordable housing units in Oklahoma are located in census tracts where more than the average number of residents are immigrants. About half of these units are located in areas dense with immigrants, where the number of individuals who are not citizen exceeds 349, more than one standard deviation (219) from the mean (130).

	Total Affordable Housing Units	Situated in Immigrant Enclave	Situated in Heavily Immigrant Enclave
OHFA	35,292	8,114 (23.0%)	3,358 (9.5%)
515	5,384	1,017 (18.9%)	159 (3.0%)
LIHTC	23,537	5,457 (23.2%)	3,364 (14.3%)
Total	64,213	14,588 (22.7%)	6,881 (10.7%)

5. Limited English Proficiency

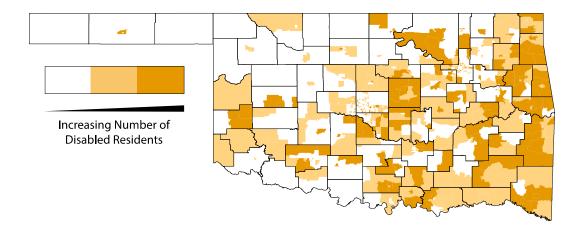

Almost 17,000 existing affordable housing units in Oklahoma are located in census tracts where more residents than average do not speak English very well. A little more than half of these units are located in areas dense with individuals with limited English proficiency, where the number of individuals who speak English less than very well exceeds 380, more than one standard deviation (240) from the mean (140).

	Total Affordable Housing Units	Community with more than average number of Limited English Speakers	Community dense with limited English Speakers
OHFA	35,292	6,250 (17.7%)	3,122 (8.8%)
515	5,384	799 (14.8%)	240 (4.5%)
LIHTC	23,537	4,034 (17.1%)	3,475 (14.8%)
Total	64,213	11,083 (17.3%)	6,837 (10.6%)

6. Disability

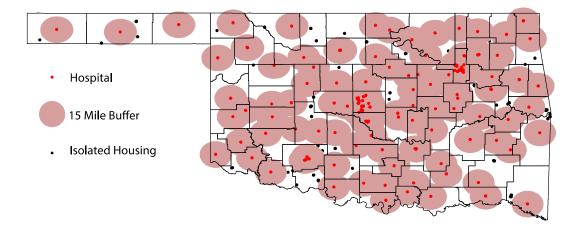

Almost 60% of existing affordable housing units in Oklahoma are located in census tracts where more residents than average have a disability. A little more than half of these units are located in areas dense with individuals with a disability, where the number of individuals who are disabled is greater than 831, more than one standard deviation (289) from the mean (542).

	Total	Community with more	Community dense with
	Affordable Housing	than average number	Disabled Residents
	Units	of Disabled Residents	
OHFA	35,292	10,098	10,722
		(28.6%)	(30.4%)
515	5,384	1,686	2,594
	,	(31.3%)	(48.8%)
LIHTC	23,537	7,074	6,289
		(30.1%)	(26.7%)
Total	64,213	18,858	19,605
		(29.4%)	(30.5%)

7. Hospitals

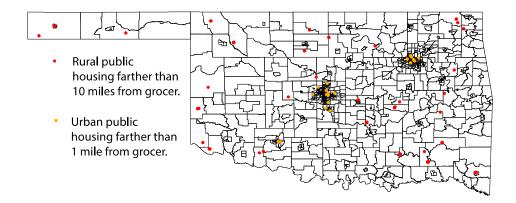

There are no affordable housing units more than 30 miles from a hospital. Approximately 2.6% of affordable housing units are farther than 15 miles from the nearest hospital. As indicated by the larger percentage of Rural Rental Housing Loan units, most of these are located in rural areas.

	Total Affordable Housing Units	More than 15 miles to nearest hospital	More than 30 miles to nearest hospital
OHFA	35,292	628 (1.8%)	0
515	5,384	500 (9.3%)	0
LIHTC	23,537	532 (2.3%)	0
Total	64,213	1,660 (2.6%)	0

8. Grocery Stores

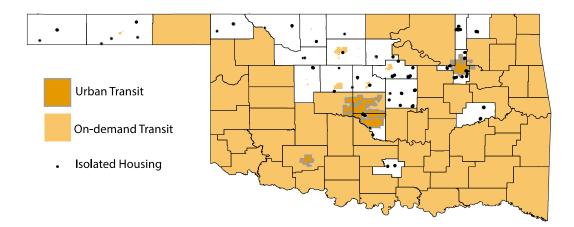

Approximately 7.8% of affordable housing units are in areas that are classified as food deserts. According to the United States Department of Agriculture, food deserts exist in urban environments further than 1 mile from a grocery store and in rural environments further than 10 miles from a grocery store (<u>https://apps.ams.usda.gov/fooddeserts/foodDeserts.aspx</u>).

	Total	Urban	Rural
	Affordable Housing	> 1 Mile from nearest	> 10 miles to nearest
	Units	Grocer	Grocer
OHFA	35,292	1,493	1,097
		(4.2%)	(3.1%)
515	5,384	0	466
			(8.7%)
LIHTC	23,537	1,175	769
		(5.0%)	(3.3%)
Total	64,213	2,668	2,332
		(4.2%)	(3.6%)

9. Transit

A little over 69% of affordable housing in Oklahoma is located in a census tract with limited or no access to transit services. This includes 8,367 affordable housing units in areas that lack public transit services all together as well as 36,363 units that are situated in areas that have on-demand transportation services that often have limited operation times and may only serve elderly and disabled populations or those going to a medical appointment.

	Total Affordabl e Housing Units	No Transit	Urban Transit	On-Demand Transit
OHFA	35,292	4,035 (11.4%)	11,265 (31.9%)	19,992 (56.6%)
515	5,384	767 (14.2%)	0	4,617 (85.8%)
LIHTC	23,537	3,565 (15.1%)	8,217 (34.9%)	11,755 (49.9%)
Total	64,213	8,367 (13.0%)	19,482 (30.3%)	36,363 (56.6%)

What does this mean for Oklahoma?

This report suggests a number of possible ways forward for the Oklahoma Housing Finance Agency as it continues to support quality low-income and workforce housing for residents of the state. Across a number of indicators of opportunity, affordable housing in the state clusters in ways that raise concerns about the opportunities available to affordable housing residents in comparison to other residents.

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

Moving ahead, Oklahoma should be wary of a narrowly focused vision focused solely on the problems of existing affordable housing and the integration of these residents into other communities. The relocation of residents harkens back to the physical and social destruction brought about by urban renewal. Such an approach pits efforts to enhance existing affordable housing through community development against efforts to build a more integrated and diverse society (Goetz 2015). Rather, Oklahoma has the opportunity to work closely with local municipalities to improve the conditions of current affordable housing communities while simultaneously advancing integration of low-income and workforce housing through the construction in new settings.

For future new development, a number of case studies and emerging scholarship on the importance of neighborhood effects provide guidance on possible ways forward for Oklahoma. For instance, in El Paso, Texas a public private partnership between the Housing Authority of the City of El Paso and private developers led to the development of a mixed income housing development. Eastside Crossings (http://www.hacep.org/about-us/eastside-crossings) provides 74 traditional affordable housing units, 79 affordable housing units, and 45 market rate units in partnership with the Texas Department of Housing and Community Affairs (Housing Authority of El Paso 2015). In Sacramento, partnership between private developers and the Capital Area Redevelopment Authority resulted in the adaptive reuse of a building listed on the National Register of Historic Buildings into affordable Housing (Vellinga 2015). Located in a dense, walkable, transit-oriented community, the Warehouse Artist Lofts (http://www.rstreetwal.com) are home to 116 units, 86 of which are affordable and 13,000 square feet of ground floor retail.

For existing affordable housing, strategies exist to help enhance localized opportunities and build a culture of community participation around housing. Across the nation, there is a need to refocus the discussion away from the deficits found in many communities to look for closely at opportunities (Lens 2015) and to think about the consequences of physical, social, and economic isolation (Clarke, Morenoff, Debbink, Golberstein, Elliott, & Lantz, 2014.).

The Oklahoma Housing Finance Agency may need to collaborate more closely with other governmental agencies to develop comprehensive strategies that not only improve existing housing but also work toward enhancing access to food, recreation, amenities, jobs, and quality schools. By doing so, OHFA could help build the social and physical resiliency of these communities so that residents would be empowered to choose for themselves whether or not they want to stay and be part of their existing community or move elsewhere in search of a better quality of life. A set of tools for doing some of this work is available through Policy Link (http://www.policylink.org/equity-tools/equitable-development-toolkit/about-toolkit). For those who are relocated due to circumstances that make staying in place impossible, intensive case management may be required to ensure that these residents avoid pitfalls and thrive in a new environment (Theodos, Popkin, Guernsey, & Getsinger, 2010). But evidence continues to suggest that stability, particularly in the lives of children, is an essential part of ensuring that everyone has the opportunity to succeed and thrive (HUD 2014).

Lead-Based Paint Hazards

Findings / Health and Well-being

Lead is known to be highly toxic particularly to young children 5 years of age and under. Excessive exposure results in reduced intelligence, impaired hearing, reduced stature and a host of other negative health effects. It is well documented that a common source of lead exposure for children is lead-based paint in older housing along with the dust and soil it generates. Children are exposed to lead-based paint most commonly by directly eating paint chips or indirectly by ingesting lead-contaminated house dust or soil through normal hand-to-mouth contact.

For purposes of this analysis, the federal definition of "lead-based paint hazard" at 24 CFR Part 35.86 was applied. Under this definition, lead-based paint hazard is defined as, "...any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as established by the appropriate Federal agency."

It is noteworthy estimates presented can only be stated as dwellings that "potentially" have LBP hazards because there are no real-time surveys or studies of residential structures built prior to 1978. However, there have been previous estimations provided in the state's Consolidated Plan.

Statewide Findings

Using methodology which will be discussed later in this section, we have estimated the number of housing units in Oklahoma with lead-based paint hazards as defined in 24 CFR Part 35.86. Our estimates are shown in the following table.

Number	Percent
1,432,730	
240,229	16.8%
159,861	66.5%
80,368	33.5%
113,931	47.4%
37,426	15.6%
19,761	52.8%
	1,432,730 240,229 159,861 80,368 113,931 37,426

As shown, we estimate that there are 240,229 housing units in Oklahoma containing lead-based paint hazards, representing 16.8% of Oklahoma's total housing stock. 66.5% of those units are owner-occupied, while 33.5% are renter-occupied. Of the 240,229 housing units containing lead-based paint hazards, 113,931 units, or 47.4%, are occupied by households with low-to-moderate incomes as defined by HUD. Among all housing units with lead-based paint hazards, 37,426 units have children under the age of six present, and 52.8% of those units, or 19,761 units total, are households with low-to-moderate incomes. Exhibits 2 through 6, found at the end of this section, graphically summarize our statewide findings at a county level.

Disaster Resiliency/ Economy and Society, Infrastructure and Environment

While communities strive to address lead-based paint hazards through education and removal when detected in connection with federally funded local housing rehabilitation initiatives, hazard detection and mitigation may have special considerations in terms of disaster resiliency.

Many disasters are accompanied by widespread damage to residential structures often times scattering building material debris across the landscape necessitating removal by heavy equipment and disposal in landfills. When building materials contaminated with lead-based paint become part of non-contaminated debris disposal, it presents an environmental hazard that can span well beyond recovery and rebuilding efforts.

Leadership and Strategy

Given the albeit large but finite number of potential housing units with lead hazards, the state and local communities may wish to consider initiatives aimed at reducing and/or eventually eliminating residential lead-based paint hazards, particularly in housing occupied by low and moderate income households with young children present. One such initiative could be the use of the state's various federal and state housing programs' competitive funding selection criteria. By designing rating criteria that specifically awards points to applicants that purposefully seek out properties within counties known to have higher percentages of lead hazards, housing developers along with those engaged in rehabilitation may be incentivized to engage in hazard mitigation.

State and local governments may wish to capitalize on the results of this study by using the data to support competitive applications to the Federal Home Loan Bank Topeka's Affordable Housing Program funding for owner occupied rehabilitation which, among other competitive rating criteria, awards points for the "Abatement of Hazardous Environmental Conditions". Similarly, this report's data may be used to document hazards and need in applications for competitive health care grants offered at the federal level.

Similar to initiatives undertaken by USHUD, the state may want to consider undertaking a real-time sample survey of homes built prior to 1978 across the state's community sizes and counties to more accurately ascertain the extent of the hazard and/or conducting real-time surveys of LBP Risk Assessors licensed by the ODEQ.

Survey of Previous Lead-based Paint Studies

Using a combination of US Census Bureau and US Department of Housing and Urban Development Comprehensive Housing Affordability Strategy data and age of housing stock built prior to 1980, the Oklahoma Department of Commerce's, "State of Oklahoma Five-Year E-Consolidated Plan FY 2014 – 2018" estimated 59% of the owner occupied and 65% of the renter occupied housing had the potential of containing lead-based paint. To address lead paint hazards, the Consolidated Plan recommended assessment of hazard presence be conducted at the point dwelling rehabilitation is undertaken and that nonprofits advise persons receiving federal rehabilitating assistance regarding the dangers of lead exposure.

At the national level, between 1998 and 2000, USHUD Office of Health Homes and Lead Hazard Control staff and the National Institute of Environmental Health Sciences conducted a real-time random sampling of 831 permanently occupied housing units (multifamily, single family and mobile homes) taken from all 50 states and the District of Columbia. The results indicated an estimated 38 million (39% of the 96 million total housing units) of the nation's housing units had lead-based paint hazards. Of that total, 24 million had significant lead hazards with 1.2 million of those units occupied by low income families. It was further estimate that 35% of all low income housing had lead-based paint hazards. The study also noted the prevalence of lead-based paint increases with age of housing. However, most painted surfaces, even in older homes don't have lead paint. Geography was found to be related to the incidence of lead-based paint with the Northeast and Midwest having 2 times the prevalence of lead paint than the South and West. Finally, the study recommends "public-private sector resources be directed units posing the greatest risk" as a preventive measure to avoid lead poisoning.

In April 2011, the U.S. Department of Housing and Urban Development, Office of Healthy Homes and Lead Hazard Control updated its 1998-2000 nationwide report in its publication, "American Healthy Homes Survey, Lead and Arsenic Findings". This report, conducted from June 2005 through March 2006, estimated 37.1 million homes (34.9%) out of a total of 106 million total housing units have lead-based paint somewhere in the building. Of the 65.6 million homes built before 1978, 34.4 million (52%) have lead-based paint. The study reaffirmed the previous finding that the prevalence of lead-based paint is higher in the Northeast and Midwest parts of the United States than South and West. It also confirmed earlier finding that the incidence of lead-based paint increases with age of housing with 86% of the homes built prior to 1940 containing lead. An estimated 3.6 million homes with children less than 6 years of age have lead-based paint hazards of which 1.1 million are low income households. Of the 16.8 million homes with children under the age of 6, 5.7 million (34%) have lead-based paint, about the same incidence of lead-based paint in all homes.

In June 2006, the Oklahoma State Department of Health's Childhood Lead Poisoning Prevention Program (OCLPPP) received a 5-year project grant "Oklahoma Childhood Lead Poisoning Prevention Program Focusing in High Risk Groups". That program focused on communities evidencing high numbers of children 6-72 months of age who are at high risk for lead poisoning.

In order to more effectively target high-risk areas and populations, the OCLPPP identified 21 high-risk target area (HRTA) zip codes (see Exhibit #1) located within Oklahoma, Tulsa, Muskogee, Jackson, Okmulgee, Ottawa, Kay, Garfield, and Hughes counties. These 21 zip codes were narrowed from a list of 57 zip codes out of the state's approximately 700 zip codes that with populations of 5,000 or more persons; greater than or equal to 22% of housing stock built prior to 1950; and, greater than or equal to 18% of children under the age of 6 years living below the poverty level.

The 57 zip codes were further compared and evaluated based on selected characteristics such as EBLL cases and proportion of minority population. Zip codes with higher EBLL prevalence and/or minority populations (Hispanic/African American/American Indian) were ranked higher and given the designation as HRTA zip codes.

Kingfisher County Findings

The number of housing units in Kingfisher County containing lead-based paint hazards can be estimated by applying the percentages of housing units with such hazards reported by the American

Healthy Homes Survey, to the number of occupied homes in Kingfisher County, by year of construction. The following table presents the percentage of housing units in the Census Bureau South Region based on the AHHS findings.

Housing Units in the South Census Region with Lead-Based Paint Hazards by Year of Construction								
	No. of Housing	Units w/ LBP	Percent of Units					
Year of Construction	Units (000s)	Hazards (000s)	w/ LBP Hazards					
1978-2005	18,625	664	3.6%					
1960-1977	11,724	1,311	11.2%					
1940-1959	5,575	2,145	38.5%					
1939 or Earlier	3,072	1,947	63.4%					
Total	38,996	6,067	15.6%					
Source: U.S. Dept. of Housing and Urban Development, American Healthy Homes Survey, Table 5-1								

These percentages can then be applied to the number of housing units in Kingfisher County, by year of construction and by tenure (owner-occupied versus renter-occupied), as reported by HUD's Comprehensive Housing Affordability Strategy (CHAS) data for Kingfisher County.

1939 or Earlier	100	63.38%	63	
Total	970	17.92%	174	

. .

To conclude, we estimate that there are a total of 1,074 homes in Kingfisher County containing leadbased paint hazards, 792 owner-occupied and 282 renter-occupied. Of the 1,074 homes in the county estimated to have lead-based paint hazards, 250 are estimated to be occupied by households with low-incomes (incomes less than 50% of Area Median Income), and 174 are estimated to be occupied by households with moderate incomes (between 50% and 80% of Area Median Income), for a total of 424 housing units in Kingfisher County with lead-based paint hazards occupied by households with low or moderate incomes.

Lead-Based Paint Hazards in Homes with Children Present

~

Using the same methodology, we can estimate the number of housing units in Kingfisher County occupied by households with children under the age of six present. For this analysis we apply the leadbased paint hazards percentages from the American Healthy Homes Survey to the data in HUD CHAS Table 13, which details housing units by year of construction, household income, and presence of children under the age of six. The data is presented in the following table:

1.0.1.1.1

Conclusions

The previous analysis has attempted to describe the state of the residential housing market in Kingfisher County, Oklahoma. Where possible, information regarding the population centers of the county was included to assess need on a community level. Much of the information is based on demographic information from local authorities and national information services. However, personal interviews were performed with property owners and managers, real estate professionals, and community officials in an effort to substantiate information from the national organizations and understand current market conditions. Several important issues regarding housing have become apparent through this analysis and are identified below.

Kingfisher County has undergone steady growth over the last fifteen years, in terms of population, households and employment levels. New population and employment growth has been met with new housing construction for ownership; no new rental properties of any note have been constructed in the county in many years. Although some new single-family housing construction appears reasonably affordable (priced under \$175,000) the average price of homes constructed since 2010 is estimated to be \$221,175, which is above what could be afforded by a household earning at or less than median household income for Kingfisher County (\$58,494 in 2015).

Kingfisher County has a comparatively moderate rate of renters with high rent costs (31.27%) as well as homeowners with high ownership costs (17.42%). The county's poverty rate is well below the state, at 8.31% compared with 16.85% statewide, among the lowest poverty rates in Oklahoma.

In terms of disaster resiliency we note that 69 tornadoes have impacted the county between 1959 and 2014, with 242 injuries and 12 fatalities combined. Hennessey and Kingfisher have notable development within or near floodplains.

Kingfisher County is located within the Oklahoma Balance of State Continuum of Care (CoC), which provides services to the area's homeless populations among other functions. Throughout the entire Balance of State CoC, there are an estimated 295 homeless persons, 154 of which are estimated to be sheltered. Homeless children under the age of 18 are more likely to be unsheltered than sheltered.

In terms of fair housing issues, 40 affordable housing units lack readily available transit, and an 8-unit property is located in an immigrant enclave, in a food desert, in a neighborhood of limited English, and more than 15 miles from a hospital.

Due to the age of the county's housing stock, lead-based paint hazards are an issue, with an estimated 1,074 occupied housing units with such hazards, and 146 of those units occupied by low-to-moderate income households with children under the age of 6 present.

In summary, it is apparent that new housing in several categories is required in Kingfisher County. While the upper end of the market is being satisfied, the lower end of the population that requires rental and moderate cost ownership property has a more limited product available. As the population continues to grow in Kingfisher County as a whole, this demand will continue to increase. We estimate the county will need 195 housing units for ownership and 57 housing units for rent over the next five years, in order to accommodate projected population and household growth. These units should include a mixture of both market rate rental units, affordable housing units, and housing for ownership affordable to a range of incomes.

David A. Puckett

Experience

Senior Director with Integra Realty Resources - Oklahoma, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since May 2002, Mr. Puckett has performed appraisal services consisting of narrative and summary real estate appraisals. All types of real property are encompassed-apartments, garden office buildings, manufacturing and warehouse industrial buildings, mobile home parks, restaurants and retail structures. Valuations and market studies have been prepared on proposed and existing structures. Appraisals have been made for estates, mortgage financing, equity participation and due diligence support. Prior to his employ at Integra Realty Resources - Oklahoma, Mr. Puckett was an employee of the University of Oklahoma Center for Business and Economic Development, working as a data analyst for the All County Affordable Housing Study commissioned by the Oklahoma Department of Commerce. Responsibilities included demographic, economic and real estate data collection from federal, state and local sources, as well as interviews of regional planning district, county and municipal officials, real estate market experts and local economic development experts. Mr. Puckett was responsible for site visits of 23 of the 77 Oklahoma counties, and personally authored 18 of the final reports. As an employee of IRR-Oklahoma, Mr. Puckett also performed the site visits and authored the final reports for four of the nine entitlement cities: Tulsa, Broken Arrow, Shawnee and Lawton. Mr. Puckett has also completed numerous housing market studies for use in applications for Federal Low-Income Housing Tax Credits in Oklahoma, Kansas, Missouri and Arkansas, and has performed market studies and appraisals for use in H.U.D.'s Multifamily Accelerated Processing (M.A.P.) program. Clients served include corporations, financial institutions, investment firms and public/private agencies.

BACKGROUND SUMMARY

<u>Executive Manager</u> with extensive experience in public sector resource design, management and evaluation. Knowledge and skills include: structuring and design of state and local service programs and initiatives, developing written proposals for project financing, identifying community economic development resources and training.

EXPERIENCE

DeBruler, Inc.

Vice President, Oklahoma City, August 2001 to Present

Provide services including:

- Researching public and private resources and preparing applications for financial assistance in response to client requests for economic and community development projects.
- ✓ Technical assistance to nonprofits and units of local government regarding federal and state resources and structuring project-beneficial partnerships; preparing strategic and business plans for public and private sector entities.
- ✓ Group facilitation services.
- Technical training for nonprofits and units of local government regarding federal and state financial assistance programs. Conducting organizational assessments and developing capacity building curriculums.

Oklahoma Housing Finance Agency

<u>Team Leader, Housing Development Team</u>, Oklahoma City, July 1998 to July 2001 Provided direct supervision and oversight of sixteen staff engaged in the administration of multiple federal and state affordable housing program resources.

While employed by the agency:

- Reorganized state's Single Family Mortgage Revenue Bond, Low-income Housing Tax Credit, HOME Investment Partnerships and Housing Trust Fund Programs into a single work unit.
- ✓ Streamlined Low-income Housing Tax Credit Program administrative rules to provide for market responsive design flexibility.
- ✓ Streamlined affordable housing resources by developing a singular application package and process for the agency's affordable housing development resources and established e-information network.
- ✓ Facilitated the development of working partnerships between the state's nonprofit and forprofit housing development organizations and agency's mortgage revenue bond lenders.
- ✓ Financed the development of affordable housing by leveraging public sector development funds with private investments.

- ✓ Facilitated legislative task force on rural affordable housing issues and devised legislative and programmatic actions to spur rural development.
- ✓ Developed, financed and implemented the state's first statewide affordable housing market analysis in partnership with a major university center.
- ✓ Drafted enabling legislation, capitalized and implemented state's Housing Trust Fund.

Oklahoma Department of Commerce

Program Manager/Department Head, Oklahoma City, March 1988 to July 1998

- ✓ In response to market-based demand, directed a team of professional agency staff with diverse skills, in the redesign of the state's HOME Investment Partnerships Program from primarily rehabilitation services to the production of rural affordable housing units.
- ✓ Led HOME Program administrative team in the relocation of the Program from its state agency environment to the Oklahoma Housing Finance Agency, a public trust.
- ✓ Leveraged HOME Program development resources with other public and private debt capital to finance the development of rural affordable housing statewide.
- ✓ Formulated and implemented a legislative agenda to enact and capitalizing the state's Housing Trust Fund.
- Provided daily oversight and administration for several state administered federal programs including: U.S. Department of Energy State Energy Program, Community Development Block Grant, Home Investment Partnerships, Rental Rehabilitation, Solar Energy and Energy Conservation Bank, and State Appropriated Funds for regional councils of government.

City of Oklahoma City January 1984 to February 1988

<u>Division Head</u>, Code Inspections Division/Department of Environmental Services <u>Assistant Superintendent</u>, Utility Services Division/Water Department <u>Administrative Assistant</u>, Street Maintenance Division, Public Works Department Management Intern, Personnel Department

EDUCATION

Masters of Public Administration, University of Oklahoma 1983 Bachelor of Arts Political Science, University of Oklahoma, 1979
