January 26, 2016

Mr. Dennis Shockley, Executive Director Oklahoma Housing Finance Agency 100 NW 63rd Street, Ste. 200 Oklahoma City, OK 73116

SUBJECT: Housing Needs Assessment Kiowa County IRR - Tulsa/OKC File No. 140-2015-0051

Dear Mr. Shockley:

As per our Agreement with Oklahoma Housing Finance Agency (OHFA), we have completed a residential housing market analysis (the "Analysis") for use by OHFA and the Oklahoma Department of Commerce (ODOC). Per our Agreement, OHFA and ODOC shall have unrestricted authority to publish, disclose, distribute and otherwise use, in whole or in part, the study and reports, data or other materials included in the Analysis or otherwise prepared pursuant to the Agreement and no materials produced in whole, or in part, under the Agreement shall be subject to copyright in the United States or any other country. Integra Realty Resources – Tulsa/OKC will cause the Analysis (or any part thereof) and any other publications or materials produced as a result of the Agreement to include substantially the following statement on the first page of said document:

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Attached hereto, please find the Kiowa County Residential Housing Market Analysis. Analyst Derrick Wilson personally inspected the Kiowa County area during the month of June 2015 to collect the data used in the preparation of the Kiowa County Market Analysis. The University of Oklahoma College of Architecture Division of Regional and City Planning provided consultation, assemblage and analysis of the data for IRR-Tulsa/OKC.

Mr. Dennis Shockley Oklahoma Housing Finance Agency January 26, 2016 Page 2

This market study is true and correct to the best of the professional's knowledge and belief, and there is no identity of interest between Owen S. Ard, MAI, David A. Puckett, or Integra Realty Resources – Tulsa/OKC and any applicant, developer, owner or developer.

If you have any questions or comments, please contact the undersigned. Thank you for the opportunity to be of service.

Respectfully submitted,

Integra Realty Resources - Tulsa/OKC

Introduction and Executive Summary

This report is part of a Statewide Affordable Housing Market Study commissioned by the Oklahoma Department of Commerce (ODOC) in partnership with the Oklahoma Housing Finance Agency (OHFA), as an outgrowth of the 2013 tornado outbreak in Oklahoma. It was funded by the U.S. Department of Housing and Urban Development (USHUD) through the Community Development Block Grant – Disaster Recovery program (CDBG-DR). This study was conducted by a public/private partnership between Integra Realty Resources – Tulsa/OKC, the University of Oklahoma College of Architecture, Division of Regional and City Planning, and DeBruler Inc. IRR-Tulsa/OKC, The University of Oklahoma, and DeBruler Inc. also prepared a prior statewide study in 2001, also commissioned by ODOC in partnership with OHFA.

This study is a value-added product derived from the original 2001 statewide housing study that incorporates additional topics and datasets not included in the 2001 study, which impact affordable housing throughout the state. These topic areas include:

- Disaster Resiliency
- Homelessness
- Assessment of Fair Housing
- Evaluation of Residential Lead-Based Paint Hazards

These topics are interrelated in terms of affordable housing policy, housing development, and disaster resiliency and recovery. Homeless populations are more vulnerable in the event of a disaster, as are many of the protected classes under the Fair Housing Act. Lead-based paint is typically more likely to be present in housing units occupied by low-to-moderate income persons, and can also present an environmental hazard in the wake of a disaster. Effective affordable housing policy can mitigate the impact of natural and manmade disasters by encouraging the development and preservation of safe, secure, and disaster-resilient housing for Oklahoma's most vulnerable populations.

Housing Market Analysis Specific Findings:

- 1. The population of Kiowa County has declined in every decennial census since the 1930 Census, excepting the 1980 Census. This trend is likely to continue in the near term.
- 2. SKF, a major industrial employer in Hobart, has announced that it will be closing with initial layoffs to commence in early 2016, and full closure by 2017. This is anticipated to affect approximately 200 jobs.
- 3. Median Household Income in Kiowa County is estimated to be \$38,784 in 2015, compared with \$47,049 estimated for the State of Oklahoma. The poverty rate in Kiowa County is estimated to be 22.57%, compared with 14.72% for Oklahoma.
- 4. Homeowner and rental vacancy rates in Kiowa County are lower than the state averages, with a homeowner vacancy rate of 1.96%, and a rental vacancy rate of 0.70%.
- 5. Home values and rental rates in Kiowa County are also lower than the state averages.
- 6. Average sale price for homes in Hobart was \$53,093 in 2015, with an average price per square foot of \$35.35/SF. The average year of construction was 1954.

7. Approximately 30.32% of renters and 12.11% of owners are housing cost overburdened.

Disaster Resiliency Specific Findings:

- 1. Create a shelter registry for location of individual and business-based shelters (online or paper)
- 2. Tornadoes (1959-2014): Number:73 Injuries:9 Fatalities:2 Damages (1996-2014): \$740,000.00
- 3. Social Vulnerability: Similar to overall state level at county level; at the census tract level, the western tracts of the county have elevated scores
- 4. Floodplain: National Climatic Data Center storm event statistics record 27 flood events in Kiowa County and participating jurisdictions during the 10-year period 2000-2013. According to National Flood Insurance Program statistics, Kiowa County residents had four reported losses and received payments totaling \$360,000.00 as of January 2013.

Homelessness Specific Findings

- 1. Kiowa County is located in the Southwest Oklahoma Continuum of Care.
- 2. There are an estimated 239 homeless individuals in this area, 177 of which are identified as sheltered.
- 3. There are at least 8 homeless households comprised of children only.
- 4. There is also a high homeless veteran population (25) in this region.
- 5. Investment should be made for more temporary and permanent housing for homeless veterans.

Fair Housing Specific Findings

1. No fair housing issues noted.

Lead-Based Paint Specific Findings

- 1. We estimate there are 1,096 occupied housing units in Kiowa County with lead-based paint hazards.
- 2. 553 of those housing units are estimated to be occupied by low-to-moderate income households.
- 3. We estimate that 131 of those low-to-moderate income households have children under the age of 6 present.

Report Format and Organization

The first section of this report comprises the housing market analysis for Kiowa County. This section is divided into general area information, followed by population, household and income trends and analysis, then followed by area economic conditions. The next area of analysis concerns the housing stock of Kiowa County, including vacancy rates, construction activity and trends, and analyses of the homeowner and rental markets. This section is followed by five-year forecasts of housing need for owners and renters, as well as specific populations such as low-to-moderate income households, the elderly, and working families.

The next section of this report addresses special topics of concern:

• Disaster Resiliency

- Homelessness
- Fair Housing

•

• Lead-Based Paint Hazards

This last section is followed by a summary of the conclusions of this report for Kiowa County.

3

General Information

Purpose and Function of the Market Study

The purpose of this market study is to evaluate the need for affordable housing units in Kiowa County, Oklahoma. The analysis will consider existing supply and projected demand and overall market trends in the Kiowa County area.

Effective Date of Consultation

The Kiowa County area was inspected and research was performed during June, 2015. The effective date of this analysis is June 23, 2015. The date of this report is January 26, 2016. The market study is valid only as of the stated effective date or dates.

Scope of the Assignment

- 1. The Kiowa County area was inspected during June, 2015. The inspection included visits to all significant population centers in the county and portions of the rural county areas.
- 2. Regional, city and neighborhood data is based on information retained from national, state, and local government entities; various Chambers of Commerce, news publications, and other sources of economic indicators.
- 3. Specific economic data was collected from all available public agencies. Population and household information was collected from national demographic data services as well as available local governments. Much data was gathered regarding market specific items from personal interviews.
- 4. Development of the applicable analysis involved the collection and interpretation of verified data from local property owners/managers, realtors, and other individuals active within the area real estate market.
- 5. The analyst's assemblage and analysis of the defined data provided a basis from which conclusions as to the supply of and demand for residential housing were made.

Data Sources

Specific data sources used in this analysis include but are not limited to:

- 1. The 2000 and 2010 Decennial Censuses of Population and Housing
- 2. The 2009-2013 American Community Survey (ACS)
- 3. U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division
- 4. The United States Department of Labor, Bureau of Labor Statistics, including the Local Area Unemployment Statistics and the Quarterly Census of Employment and Wages programs
- 5. The U.S. Department of Housing and Urban Development, including the Comprehensive Housing Affordability Strategy (CHAS), and the 2013 Picture of Subsidized Households
- 6. Continuum of Care Assistance Programs

- 7. The National Oceanic and Atmospheric Administration
- 8. Nielsen SiteReports (formerly known as Claritas)
- 9. The Oklahoma State Department of Health
- 10. The Oklahoma Department of Human Services
- 11. The Federal Reserve Bank of Kansas City, Oklahoma City Branch
- 12. The Federal Reserve Bank of New York

Kiowa County Analysis

Area Information

The purpose of this section of the report is to provide a basis for analyzing and estimating trends relating to Kiowa County. The primary emphasis is concentrated on those factors that are of significance to residential development users. Residential and commercial development in the community is influenced by the following factors:

- 1. Population and economic growth trends.
- 2. Existing commercial supply and activity.
- 3. Natural physical elements.
- 4. Political policy and attitudes toward community development.

Location

Kiowa County is located in southwestern Oklahoma. The county is bordered on the north by Beckham and Washita counties, on the west by Jackson and Greer counties, on the south by Jackson, Tillman, and Comanche counties, and on the east by Comanche and Caddo counties. The Kiowa County Seat is Hobart, which is located in the northwest part of the county. This location is approximately 227 miles southwest of Tulsa and 121 miles southwest of Oklahoma City.

Kiowa County has a total area of 1,031 square miles (1,015 square miles of land, and 16 square miles of water), ranking 18th out of Oklahoma's 77 counties in terms of total area. The total population of Kiowa County as of the 2010 Census was 9,446 persons, for a population density of 9 persons per square mile of land.

Access and Linkages

The county has average accessibility to state and national highway systems. Multiple major highways intersect within Kiowa. These are US-183, US-62, OK-9, OK-44, OK-54, OK-19, OK-115, and OK-49. The nearest interstate highway is I-40, located 19.7 miles north. The county also has an intricate network of county roadways.

Public transportation is provided by Red River Transportation Service (a service of Community Action Development Corporation), with service in Beckham, Caddo, Carter, Comanche, Cotton, Custer, Dewey, Ellis, Jefferson, Kiowa, Roger Mills, Stephens, Tillman, Washita and Woodward counties. RRTS has regularly scheduled routes in select cities as well as demand-response service, and also offers the SoonerRide program for Medicaid recipients. The local market perceives public transportation as average compared to other communities in the region of similar size. However, the primary mode of transportation in this area is private automobiles by far. Additionally, the BNSF Railroad operates hubs throughout the county, transporting goods throughout the state of Oklahoma. Hobart Regional Airport is located just southeast of Kiowa. The airport operates three asphalt runways measuring 5,507, 5,293, and 4,000 feet in length. The nearest full-service commercial airport is Will Rogers World Airport located 121 miles northeast in Oklahoma City.

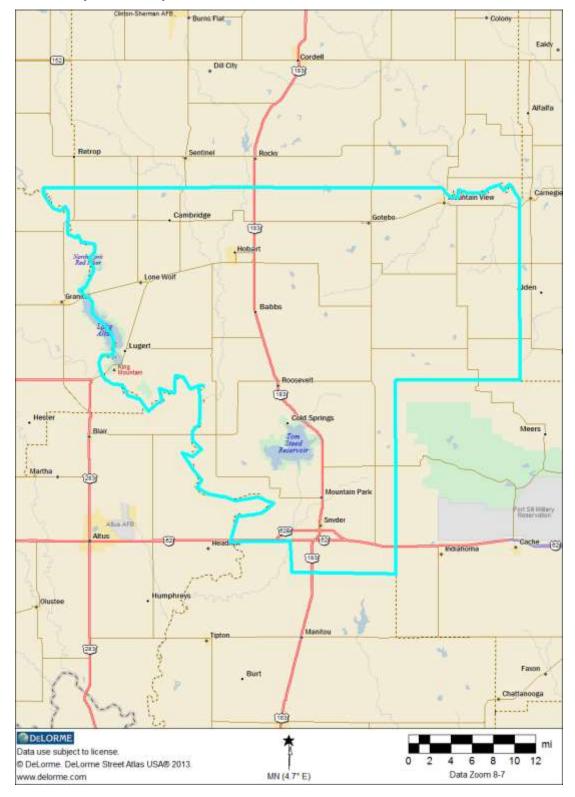

Educational Facilities

All of the county communities have public school facilities. Hobart is served by Hobart Public Schools which operates one high school, one middle school, and one elementary school. Higher education offerings near Hobart include Western Oklahoma State College in Altus, Southwestern Oklahoma State University in Weatherford, and Cameron University in Lawton.

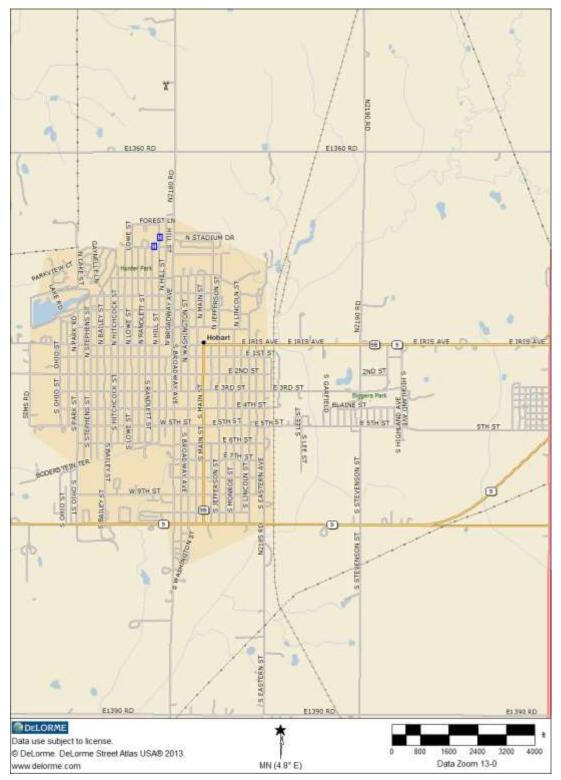

Medical Facilities

Medical services are provided by the Elkview General Hospital, a 38-bed acute care facility offering surgical, emergency, and in and outpatient's services. The smaller county communities typically have either small outpatient medical services or doctor's officing in the community.

Hobart Area Map

Demographic Analysis

Population and Households

The following table presents population levels and annualized changes in Kiowa County and Oklahoma. This data is presented as of the 2000 Census, the 2010 Census, with 2015 and 2020 estimates and forecasts provided by Nielsen SiteReports.

Population Level	s and Annual Changes 2000 2010 Annual 2015 Annual 2020							
	Census	Census	Change	Estimate	Change	Forecast	Change	
Hobart	3,997	3,756	-0.62%	3,821	0.34%	3,939	0.61%	
Kiowa County	10,227	9,446	-0.79%	9,313	-0.28%	9,348	0.08%	
State of Oklahoma	3,450,654	3,751,351	0.84%	3,898,675	0.77%	4,059,399	0.81%	

The population of Kiowa County was 9,446 persons as of the 2010 Census, a -0.79% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Kiowa County to be 9,313 persons, and projects that the population will show 0.08% annualized growth over the next five years.

The population of Hobart was 3,756 persons as of the 2010 Census, a -0.62% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Hobart to be 3,821 persons, and projects that the population will show 0.61% annualized growth over the next five years.

The next table presents data regarding household levels in Kiowa County over the same periods of time. This data is presented both for all households (family and non-family) as well as family households alone.

Population Levels and Annual Changes									
	2000	2010 A	Annual	2015	Annual	2020	Annual		
	Census	Census	Change	Estimate	Change	Forecast	Change		
Hobart	3,997	3,756	-0.62%	3,821	0.34%	3,939	0.61%		
Kiowa County	10,227	9,446	-0.79%	9,313	-0.28%	9,348	0.08%		
State of Oklahoma	3,450,654	3,751,351	0.84%	3,898,675	0.77%	4,059,399	0.81%		
Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports									

As of 2010, Kiowa County had a total of 3,978 households, representing a -0.56% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Kiowa County to have 3,932 households. This number is expected to experience a 0.13% annualized rate of growth over the next five years.

As of 2010, Hobart had a total of 1,550 households, representing a -0.22% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Hobart to have 1,591 households. This number is expected to experience a 0.79% annualized rate of growth over the next five years.

Population by Race and Ethnicity

The next table presents data regarding the racial and ethnic composition of Kiowa County based on the U.S. Census Bureau's American Community Survey.

Median Age	38.6		39.0		38.5		0.21%	-0.26%	
Source: Nielsen SiteReports	5								

As of 2015, Nielsen estimates that the median age of Hobart is 39.0 years. This compares with the statewide figure of 36.6 years. Approximately 6.88% of the population is below the age of 5, while 18.80% is over the age of 62. Over the next five years, the population age 62 and above is forecasted to grow by 2.16% per year.

Compared with the rest of the state, Kiowa County and Hobart have relatively older populations, and the population age 62 and over is projected to increase significantly over the next five years.

Families by Presence of Children

The next table presents data for Kiowa County regarding families by the presence of children.

2013 Family Type by Presence of Children Under 18 Years								
	Hobart		Kiowa C	ounty				
	No.	Percent	No.	Percent

No Disabilities	306	51.69%	914	55.33%	290,398	57.72%
Total Number of Persons with Disabilities:	724	20.29%	1,838	20.09%	577,160	15.59%

Within Kiowa County, 20.09% of the civilian non-institutionalized population has one or more disabilities, compared with 15.59% of Oklahomans as a whole. In Hobart the percentage is 20.29%. Compared with the rest of the state, persons living in Kiowa County are more likely to have one or more disabilities.

We have also compiled data for the veteran population of Kiowa County by presence of disabilities, shown in the following table:

	Hobart		Kiowa Co	ounty	State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Civilian Population Age 18+ For Wh	iom					
Poverty Status is Determined	2,547		6,956		2,738,788

No Disability	132	53.23%	488	60.02%	205,381	67.14%
Non-veteran:	2,299	90.26%	6,143	88.31%	2,432,889	88.83%
With a Disability	574	24.97%	1,447	23.56%	430,610	17.70%
No Disability	1,725	75.03%	4,696	76.44%	2,002,279	82.30%

Source: 2009-2013 American Community Survey, Table C21007

Within Kiowa County, the Census Bureau estimates there are 813 veterans, 39.98% of which have one or more disabilities (compared with 32.86% at a statewide level). In Hobart, there are an estimated 248 veterans, 46.77% of which are estimated to have a disability. Compared with the rest of the state, veterans living in Kiowa County are more likely to have at least one disability.

Group Quarters Population

The next table presents data regarding the population of Kiowa County living in group quarters, such as correctional facilities, skilled-nursing facilities, student housing and military quarters.

2010 Group Quarters Population				
	Hobart		Kiowa C	ounty
	No.	Percent	No.	Percent
Total Population	3,756		9,446	
Group Quarters Population	112	2.98%	171	1.81%
Institutionalized Population	100	2.66%	159	1.68%
Correctional facilities for adults	100	2.66%	100	1.06%
Juvenile facilities	0	0.00%	0	0.00%
Nursing facilities/Skilled-nursing facilities	0	0.00%	59	0.62%
Other institutional facilities	0	0.00%	0	0.00%

Median Household Income	\$39,735		\$38,784		\$47,049	
Average Household Income	\$52,938		\$53,755		\$63,390	
Source: Nielsen SiteReports						

As shown, median household income for Kiowa County is estimated to be \$38,784 in 2015. By way of comparison, the median household income of Oklahoma is estimated to be \$47,049. For Hobart, median household income is estimated to be \$39,735. Compared with the rest of the state, Kiowa County has a larger proportion of households with incomes less than \$25,000 per year. The income distribution can be better visualized by the following chart.

Household Income Trend

Next we examine the long-term growth of incomes in Kiowa County, from the results of the 2000 Census (representing calendar year 1999), through the current 2015 estimates provided by Nielsen SiteReports. This data is then annualized into a compounded annual growth rate to estimate nominal annual household income growth over this period of time. We then compare the rate of annual growth with the rate of inflation over the same period of time (measured using the Consumer Price Index for all urban consumers, South Region, Size Class D, from May 1999 through May 2015). Subtracting the annual rate of inflation from the nominal rate of annual income growth yields a "real" rate of income growth which takes into account the effect of increasing prices of goods and services.

Household Incon	ne Trend				
	1999 Median	2015 Median	Nominal	Inflation	Real
	HH Income	HH Income	Growth	Rate	Growth
Hobart	\$25,781	\$39,735	2.74%	2.40%	0.34%
Kiowa County	\$26,053	\$38,784	2.52%	2.40%	0.12%
State of Oklahoma	\$33,400	\$47,049	2.16%	2.40%	-0.23%

Sources: 2000 Decennial Census, Summary File 3, Table P53; Nielsen SiteReports; CPI All Urban Consumers, South Region, Size Class D

As shown, both Kiowa County and Hobart saw modestly positive growth in median household income, once inflation is taken into account. This is contrary to state and national trends which saw declines in income growth after adjusting for inflation, though median household income in Hobart and Kiowa

County as a whole remains well below statewide and national figures. Over the same period, the national median household income increased from \$41,994 to \$53,706 (for a nominal annualized growth rate of 1.55%) while the Consumer Price Index increased at an annualized rate of 2.26%, for a "real" growth rate of -0.72%.

Poverty Rates

Overall rates of poverty in Kiowa County and Oklahoma are shown in the following table. This data is included from the 2013 American Community Survey, as well as the 2000 Census to show how these rates have changed over the last decade. We also include poverty rates for single-parent families by gender of householder.

Poverty Rates					
	2000	2013	Change	2013 Poverty Rates for	Single-Parent Families
	Census	ACS	(Basis Points)	Male Householder	Female Householder
Hobart	20.03%	27.19%	716	26.37%	55.14%
Kiowa County	19.28%	22.57%	329	23.13%	56.20%
State of Oklahoma	14.72%	16.85%	213	22.26%	47.60%
Sources: 2000 Decennial Ce	nsus Table P87, 2	2009-2013 Amer	ican Community Survey	/ Tables B17001 & B17023	

The poverty rate in Kiowa County is estimated to be 22.57% by the American Community Survey. This is an increase of 329 basis points since the 2000 Census. Within Hobart, the poverty rate is estimated to be 27.19%. The poverty rates of Hobart and Kiowa County have historically been above state and national figures and this remains the case as of the 2013 American Community Survey. It should be noted that increasing poverty rates over this period of time is a national trend: between the 2000 Census and the 2013 American Community Survey, the poverty rate of the United States increased from 12.38% to 15.37%, an increase of 299 basis points.

Economic Conditions

Employment and Unemployment

The following table presents total employment figures and unemployment rates for Kiowa County, with figures for Oklahoma and the United States for comparison. This data is as of May 2015.

al Area Unemployment Statistics and

As of May 2015, total employment in Kiowa County was 4,045 persons. Compared with figures from May 2010, this represents annualized employment growth of 0.01% per year. The unemployment rate in May was 4.8%, a decrease of -130 basis points from May 2010, which was 6.1%. Over the last five years, both the statewide and national trends have been improving employment levels and declining unemployment rates, and Kiowa County has underperformed both the state and nation in these statistics.

Employment Level Trends

The following chart shows total employment and unemployment levels in Kiowa County from January 2000 through May 2015, as reported by the Bureau of Labor Statistics, Local Area Unemployment Statistics program.

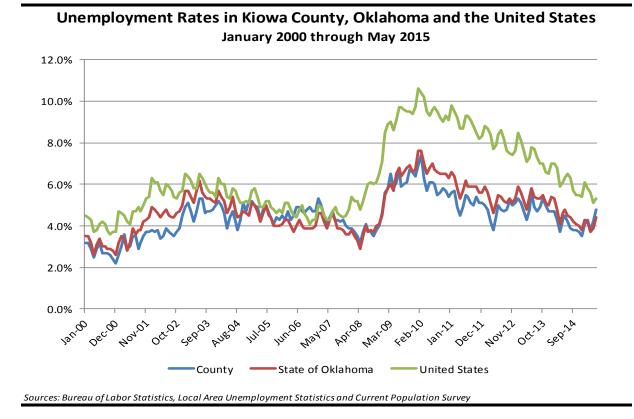

As shown, total employment in Kiowa County generally declined over the last fourteen years, with a short-lived upward trend in late 2008 through early 2010. There has been some slight improvement in employment figures over the last twelve months but it is unclear whether or not this trend will continue. Total employment currently sits at 4,045 persons. The number of unemployed persons in May 2015 was 202, out of a total labor force of 4,247 persons.

Unemployment Rate Trends

The next chart shows historic unemployment rates for Kiowa County, as well as Oklahoma and the United States for comparison. This data covers the time period of January 2000 through May 2015, and has not been seasonally adjusted.

As shown, unemployment rates in Kiowa County increased moderately from 2000 through 2003, and then generally declined until the 4th quarter of 2008 as the effects of the national economic recession were felt. Unemployment rates began to decline again in 2010, to their current level of 4.8%. On the whole, unemployment rates in Kiowa County track very well with statewide figures but are currently slightly above the state. Compared with the United States, unemployment rates in Kiowa County and Oklahoma are and have historically been well below the national average.

Employment and Wages by Industrial Supersector

The next table presents data regarding employment in Kiowa County by industry, including total number of establishments, average number of employees in 2014, average annual pay, and location quotients for each industry compared with the United States. This data is furnished by the Bureau of Labor Statistics, Quarterly Census of Employment and Wages program.

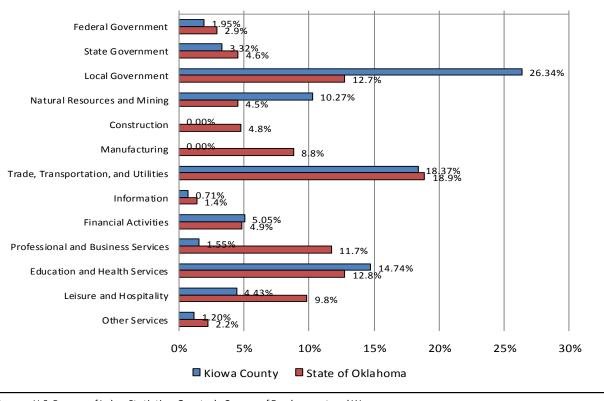

Employees and Wages by Supersector - 2014

		Avg. No. of	Percent of	Avg. Annual	Location

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Employment Sectors - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Among private employers, the largest percentage of persons (18.37%) are employed in Trade, Transportation, and Utilities. The average annual pay in this sector is \$25,616 per year. The industry

with the highest annual pay is Natural Resources and Mining, with average annual pay of \$56,954 per year.

The rightmost column of the previous table provides location quotients for each industry for Kiowa County, as compared with the United States. Location quotients (LQs) are ratios used to compare the concentration of employment in a given industry to a larger reference, in this case the United States. They are calculated by dividing the percentage of employment in a given industry in a given geography (Kiowa County in this instance), by the percentage of employment in the same industry in the United States. For example, if manufacturing in a certain county comprised 10% of total employment, while in the United States manufacturing comprised 5% of total employment, the location quotient would be 2.0:

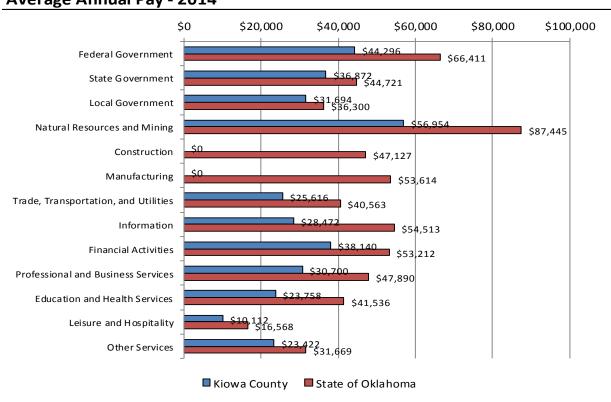

```
10% (county manufacturing %) / 5% (U.S. manufacturing %) = 2.0
```

Location quotients greater than 1.0 indicate a higher concentration of employment compared with the nation, and suggest that the industry in question is an important contributor to the local economic base. Quotients less than 1.0 indicate that the industry makes up a smaller share of the local economy than the rest of the nation.

Within Kiowa County, among all industries the largest location quotient is in Natural Resources and Mining, with a quotient of 6.77. This supersector includes the oil and gas industry as well as agricultural employment.

The next table presents average annual pay in Kiowa County by industry, in comparison with Oklahoma as a whole and the United States.

Comparison of 2014 Average Annual Pay by Supersector								
		State of	United	Percent of	Percent of

With Children <18 Years:	359	62.22%	879	48.32%	378,192	51.10%
Without Children <18 Years:	218	37.78%	940	51.68%	361,841	48.90%

Within Kiowa County, there are 1,819 working families, 48.32% of which have children under the age of 18 present. This compares with 51.10% in Oklahoma as a whole.

Major Employers

Major employers in the Kiowa County area are presented in the following table, as reported by the Cameron University School of Business.

Company	City/Town	Industry / Description	No. Employees
Community Action Development Corp.	Hobart	Community & Social	200-250
		Services	
Elkview General Hospital	Hobart	Health Care	200-250
SKF USA***	Hobart	Ball & Roller Bearing	100-150
		Manufacturer	
Searchlight Center, Inc.	Hobart	Group Home & Rehab	100-150
		Services	
Hobart Public Schools	Hobart	Education	100-150
Snyder Public Schools	Snyder	Education	50-100
Helmerich & Payne Int'l Drilling Co.	Hobart	Oil & Gas Services	50-100
Kiowa County	Hobart	Government	50-100
Ayers Nursing Home, Inc.	Snyder	Health Care	50-100
Hobart Living Center	Hobart	Health Care	50-100

.... . 17: _ . . _ .

Note: SKF USA has announced the closure of its Hobart plant, with layoffs to commence in the 1st quarter of 2016 and full closure by 2017.

Commuting Patterns

Travel Time to Work

The next table presents data regarding travel time to work in Kiowa County.

	Hobart		Kiowa Co	ounty	State of O	klahoma
	No.	Percent	No.	Percent	No.	Percent
Commuting Workers:	1,312		3,602		1,613,364	
Less than 15 minutes	905	68.98%	1,904	52.86%	581,194	36.02%
15 to 30 minutes	102	7.77%	545	15.13%	625,885	38.79%
30 to 45 minutes	149	11.36%	583	16.19%	260,192	16.13%
45 to 60 minutes	102	7.77%	290	8.05%	74,625	4.63%
60 or more minutes	54	4.12%	280	7.77%	71,468	4.43%

Within Kiowa County, the largest percentage of workers (52.86%) travel fewer than 15 minutes to work. Although Kiowa County has an active labor market, it appears some residents commute to other labor markets such as Lawton and Altus.

Means of Transportation

Data in the following table presents data regarding means of transportation for employed persons in Kiowa County.

	Hobart		Kiowa Co	ounty	State of Ok	State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent	
Total Workers Age 16+	1,438		3,904		1,673,026		
Car, Truck or Van:	1,211	84.21%	3,412	87.40%	1,551,461	92.73%	
Drove Alone	1,058	87.37%	3,061	89.71%	1,373,407	88.52%	
Carpooled	153	12.63%	351	10.29%	178,054	11.48%	
Public Transportation	1	0.07%	48	1.23%	8,092	0.48%	
Taxicab	5	0.35%	5	0.13%	984	0.06%	
Motorcycle	0	0.00%	0	0.00%	3,757	0.22%	
Bicycle	15	1.04%	15	0.38%	4,227	0.25%	
Walked	67	4.66%	84	2.15%	30,401	1.82%	
Other Means	13	0.90%	38	0.97%	14,442	0.86%	
Worked at Home	126	8.76%	302	7.74%	59,662	3.57%	

As shown, the vast majority of persons in Kiowa County commute to work by private vehicle. The percentage of persons in Kiowa County who work from home (7.74%) is over twice the percentage in Oklahoma as a whole.

Housing Stock Analysis

Existing Housing Units

The following table presents data regarding the total number of housing units in Kiowa County. This data is provided as of the 2000 Census, the 2010 Census, with a 2015 estimate furnished by Nielsen SiteReports.

Total Housing Ur	nits				
	2000	2010	Annual	2015	Annual
	Census	Census	Change	Estimate	Change
Hobart	1,979	1,921	-0.30%	1,953	0.33%
Kiowa County	5,304	5,216	-0.17%	5,229	0.05%
State of Oklahoma	1,514,400	1,664,378	0.95%	1,732,484	0.81%
Sources: 2000 and 2010 Dec	ennial Censuses,	Nielsen SiteRep	orts		

Since the 2010, Nielsen estimates that the number of housing units in Kiowa County grew by 0.05% per year, to a total of 5,229 housing units in 2015. In terms of new housing unit construction, Kiowa County underperformed Oklahoma as a whole between 2010 and 2015.

Housing by Units in Structure

The next table separates housing units in Kiowa County by units in structure, based on data from the Census Bureau's American Community Survey.

	Hobart		Kiowa Co	ounty	State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	1,747		5,186		1,669,828	
1 Unit, Detached	1,402	80.25%	4,204	81.06%	1,219,987	73.06%
1 Unit, Attached	46	2.63%	170	3.28%	34,434	2.06%
Duplex Units	60	3.43%	122	2.35%	34,207	2.05%
3-4 Units	145	8.30%	174	3.36%	42,069	2.52%
5-9 Units	71	4.06%	84	1.62%	59,977	3.59%
10-19 Units	0	0.00%	0	0.00%	57,594	3.45%
20-49 Units	0	0.00%	8	0.15%	29,602	1.77%
50 or More Units	0	0.00%	0	0.00%	30,240	1.81%
Mobile Homes	16	0.92%	417	8.04%	159,559	9.56%
Boat, RV, Van, etc.	7	0.40%	7	0.13%	2,159	0.13%
Total Multifamily Units	276	15.80%	388	7.48%	253,689	15.19%

Within Kiowa County, 81.06% of housing units are single-family, detached. 7.48% of housing units are multifamily in structure (two or more units per building), while 8.18% of housing units comprise mobile homes, RVs, etc.

Within Hobart, 80.25% of housing units are single-family, detached. 15.80% of housing units are multifamily in structure, while 1.32% of housing units comprise mobile homes, RVs, etc.

Housing Units Number of Bedrooms and Tenure

Data in the following table presents housing units in Kiowa County by tenure (owner/renter), and by number of bedrooms.

	Hobart		Kiowa C	ounty	State of O	dahoma
	No.	Percent	No.	Percent	No.	Percent
Total Occupied Housing Units	1,490		3,886		1,444,081	
Owner Occupied:	875	58.72%	2,643	68.01%	968,736	67.08%
No Bedroom	0	0.00%	24	0.91%	2,580	0.27%
1 Bedroom	13	1.49%	47	1.78%	16,837	1.74%
2 Bedrooms	249	28.46%	577	21.83%	166,446	17.18%
3 Bedrooms	482	55.09%	1,545	58.46%	579,135	59.78%
4 Bedrooms	119	13.60%	409	15.47%	177,151	18.29%
5 or More Bedrooms	12	1.37%	41	1.55%	26,587	2.74%
Renter Occupied:	615	41.28%	1,243	31.99%	475,345	32.92%
No Bedroom	28	4.55%	28	2.25%	13,948	2.93%
1 Bedroom	80	13.01%	168	13.52%	101,850	21.43%
2 Bedrooms	326	53.01%	612	49.24%	179,121	37.68%
3 Bedrooms	163	26.50%	340	27.35%	152,358	32.05%
4 Bedrooms	18	2.93%	86	6.92%	24,968	5.25%
5 or More Bedrooms	0	0.00%	9	0.72%	3,100	0.65%

The overall homeownership rate in Kiowa County is 68.01%, while 31.99% of housing units are renter occupied. In Hobart, the homeownership rate is 58.72%, while 41.28% of households are renters.

Housing Units Tenure and Household Income

The next series of tables analyze housing units by tenure, and by household income.

Household Income	Total	Total	Total		
	Households	Owners	Renters	% Owners	% Renters
Total	3,886	2,643	1,243	68.01%	31.99%
Less than \$5,000	113	37	76	32.74%	67.26%
\$5,000 - \$9,999	260	95	165	36.54%	63.46%
\$10,000-\$14,999	380	218	162	57.37%	42.63%
\$15,000-\$19,999	389	195	194	50.13%	49.87%
\$20,000-\$24,999	275	171	104	62.18%	37.82%
\$25,000-\$34,999	464	271	193	58.41%	41.59%
\$35,000-\$49,999	634	489	145	77.13%	22.87%
\$50,000-\$74,999	526	467	59	88.78%	11.22%
\$75,000-\$99,999	364	300	64	82.42%	17.58%
\$100,000-\$149,999	317	243	74	76.66%	23.34%
\$150,000 or more	164	157	7	95.73%	4.27%
Income Less Than \$25,000	1,417	716	701	50.53%	49.47%

Within Kiowa County as a whole, 49.47% of households with incomes less than \$25,000 are estimated to be renters, while 50.53% are estimated to be homeowners.

Hobart Owner/Renter P Household Income	Total	Total	Total		
	Households	Owners	Renters	% Owners	% Renters

Median Year Built:		1960		1960		1977
Renter Occupied:	615	41.28%	1,243	31.99%	475,345	32.92%
Built 2010 or Later	0	0.00%	0	0.00%	5,019	1.06%
Built 2000 to 2009	64	10.41%	64	5.15%	50,883	10.70%
Built 1990 to 1999	4	0.65%	65	5.23%	47,860	10.07%
Built 1980 to 1989	26	4.23%	56	4.51%	77,521	16.31%
Built 1970 to 1979	147	23.90%	297	23.89%	104,609	22.01%
Built 1960 to 1969	167	27.15%	271	21.80%	64,546	13.58%
Built 1950 to 1959	74	12.03%	167	13.44%	54,601	11.49%
Built 1940 to 1949	57	9.27%	146	11.75%	31,217	6.57%
Built 1939 or Earlier	76	12.36%	177	14.24%	39,089	8.22%
Median Year Built:		1966		1965		1975
Overall Median Year Built:		1960		1962		1976

Within Kiowa County, 3.53% of housing units were built after the year 2000. This compares with 15.22% statewide. Within Hobart the percentage is 4.30%.

91.61% of housing units in Kiowa County were built prior to 1990, while in Hobart the percentage is 95.44%. These figures compare with the statewide figure of 72.78%.

Compared with the rest of the state, Kiowa County has a much older stock of housing, with relatively little new construction and a much larger percentage of homes constructed prior to 1950.

Substandard Housing

The next table presents data regarding substandard housing in Kiowa County. The two most commonly cited figures for substandard housing are a lack of complete plumbing, and/or a lack of a complete kitchen. We have also included statistics regarding homes heated by wood, although this is a less frequently cited indicator of substandard housing since some homes (particularly homes for seasonal occupancy) are heated by wood but otherwise not considered substandard.

The Census Bureau definition of inadequate plumbing is any housing unit lacking any one (or more) of the following three items:

- 1. Hot and cold running water
- 2. A flush toilet
- 3. A bathtub or shower

Inadequate kitchens are defined by the Census Bureau as housing units lacking any of the three following items:

- 1. A sink with a faucet
- 2. A stove or range
- 3. A refrigerator

2013 Substandar	Occupied Inadequate Plumbing Inadequate Kitchen Uses Wood for						
	Units	Number	Percent	Number	Percent	Number	Percent
Hobart	1,490	0	0.00%	0	0.00%	6	0.40%
Kiowa County	3,886	35	0.90%	22	0.57%	31	0.80%
State of Oklahoma	1,444,081	7,035	0.49%	13,026	0.90%	28,675	1.99%

Within Kiowa County, 0.90% of occupied housing units have inadequate plumbing (compared with 0.49% at a statewide level), while 0.57% have inadequate kitchen facilities (compared with 0.90% at a statewide level). It is likely that there is at least some overlap between these two figures, among units lacking both complete plumbing and kitchen facilities.

Vacancy Rates

The next table details housing units in Kiowa County by vacancy and type. This data is provided by the American Community Survey.

	Hobart		Kiowa Co	ounty	State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	1,747		5,186		1,669,828	
Total Vacant Units	257	14.71%	1,300	25.07%	225,747	13.52%
For rent	0	0.00%	9	0.69%	43,477	19.26%
Rented, not occupied	0	0.00%	27	2.08%	9,127	4.04%
For sale only	30	11.67%	53	4.08%	23,149	10.25%
Sold, not occupied	0	0.00%	8	0.62%	8,618	3.82%
For seasonal, recreationa	al,					
or occasional use	8	3.11%	183	14.08%	39,475	17.49%
For migrant workers	0	0.00%	0	0.00%	746	0.33%
Other vacant	219	85.21%	1,020	78.46%	101,155	44.81%
Homeowner Vacancy Rate	3.31%		1.96%		2.31%	
Rental Vacancy Rate	0.00%		0.70%		8.24%	

Within Kiowa County, the overall housing vacancy rate is estimated to be 25.07%. The homeowner vacancy rate is estimated to be 1.96%, while the rental vacancy rate is estimated to be 0.70%.

In Hobart, the overall housing vacancy rate is estimated to be 14.71%. The homeowner vacancy rate is estimated to be 3.31%, while the rental vacancy rate is estimated to be 0.00%.

Building Permits

The next table presents data regarding new residential building permits issued in Hobart. This data is furnished by the U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division. Please note that average costs reported only represent physical construction costs for the housing units, and do not include land prices, most soft costs (such as finance fees), or builder's profit.

Hohart

S	ingle Family	Avg. Construction	Multifamily	Avg. Multifamily
(ear U	Inits	Cost	Units	Construction Cost
2004 2		\$142,000	0	N/A
2005 0	1	N/A	0	N/A
2006 0	l.	N/A	0	N/A
2007 0	l.	N/A	0	N/A
2008 0	l.	N/A	0	N/A
009 0	1	N/A	0	N/A
010 0	l.	N/A	0	N/A
011 0	l.	N/A	0	N/A
012 0	l.	N/A	0	N/A
013 0	l.	N/A	0	N/A
014 0	I	N/A	0	N/A

In Hobart, building permits for 2 housing units were issued between 2004 and 2014, both single family homes.

New Construction Activity

For Ownership:

New housing construction in Kiowa County largely consists of larger, custom-built homes on rural acreages, priced well above what could be afforded by households earning at or below area median income. Some new homes have been constructed intended for seasonal or recreational occupancy. A small handful of homes have been constructed on infill lots in Hobart.

The average price of homes constructed in Kiowa County since 2000 (for sales since January 2014) is \$253,111, or \$120.20 per square foot. This amount is far greater than what could be afforded by a household earning \$38,784 (median household income for Kiowa County).

For Rent:

To the best of our knowledge, no new rental property has been constructed in Hobart or Kiowa County in many years, and none is currently planned.

Homeownership Market

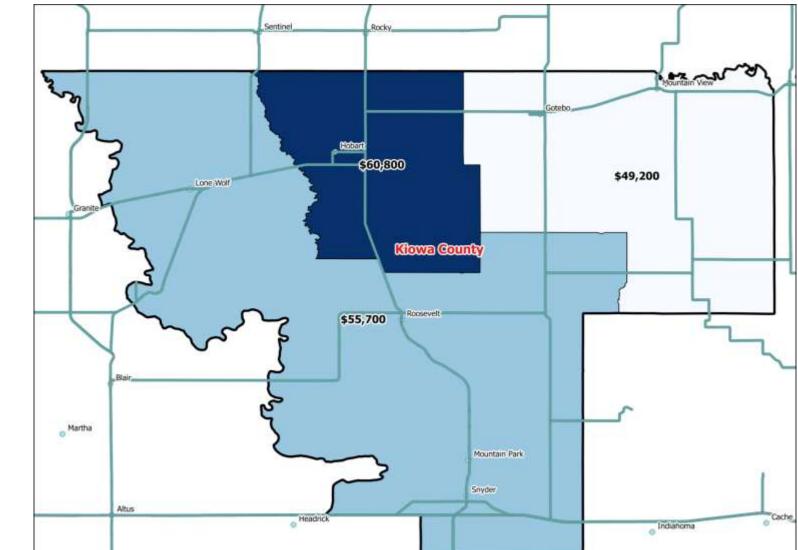

This section will address the market for housing units for purchase in Kiowa County, using data collected from both local and national sources.

Housing Units by Home Value

The following table presents housing units in Kiowa County by value, as well as median home value, as reported by the Census Bureau's American Community Survey.

	Hobart		Kiowa County		State of Oklahoma

Median Home Value:	\$	52,600	,	\$56,600	\$1	12,800

The median value of owner-occupied homes in Kiowa County is \$56,600. This is -49.8% lower than the statewide median, which is \$112,800. The median home value in Hobart is estimated to be \$52,600. The geographic distribution of home values in Kiowa County can be visualized by the following map. As can be seen, median home values are relatively evenly distributed throughout the county, with somewhat higher values in the area around Hobart and lower values in the eastern third of the county.

Kiowa County Median Home Values by Census Tract

37

Home Values by Year of Construction

The next table presents median home values in Kiowa County by year of construction. Note that missing data fields indicate the Census Bureau had inadequate data to estimate a median value that age bracket.

Average Year Built	1944	1948	1941	1945	1954			
Source: Kiowa County Ass	Source: Kiowa County Assessor, via County Records, Inc.							

Between 2011 and 2014, the average sale price grew by 4.81% per year, though it appears 2011 may have been unusually low. The average sale price in 2015 was \$53,093 for an average price per square foot of \$35.35/SF. The average year of construction is typically between 1940 and 1950, which agrees with data furnished by the Census Bureau.

Foreclosure Rates

The next table presents foreclosure rate data for Kiowa County, compiled by the Federal Reserve Bank of New York. This data is effective as of May 2014.

Foreclosure Rates						
Geography	% of Outstanding Mortgages in Foreclosure, May 2014					
Kiowa County	2.1%					
State of Oklahoma	2.1%					
United States	2.1%					
Rank among Counties in Oklahoma*:	30					
* Rank among the 64 counties for	r which foreclosure rates are available					
Source: Federal Reserve Bank of New Y	ork, Community Credit Profiles					

According to the data provided, the foreclosure rate in Kiowa County was 2.1% in May 2014. The county ranked 30 out of 64 counties in terms of highest foreclosure rates in Oklahoma. This rate compares with the statewide and nationwide foreclosure rates, both of which were 2.1%.

Rental Market

This section will discuss supply and demand factors for the rental market in Kiowa County, based on publicly available sources as well as our own surveys of landlords and rental properties in the area.

Gross Rent Levels

The following table presents data regarding gross rental rates in Kiowa County. Gross rent is the sum of contract rent, plus all utilities such as electricity, gas, water, sewer and trash, as applicable (telephone, cable, and/or internet expenses are not included in these figures).

	Hobart		Kiowa Co	ounty	State of C	Oklahoma
	No.	Percent	No.	Percent	No.	Percent

No cash rent	43	6.99%	209	16.81%	43,236	9.10%
Median Gross Rent		\$505		\$491		\$699

Median gross rent in Kiowa County is estimated to be \$491, which is -29.8% less than Oklahoma's median gross rent of \$699/month. Median gross rent in Hobart is estimated to be \$505.

Median Gross Rent by Year of Construction

The next table presents data from the American Community Survey regarding median gross rent by year of housing unit construction. Note that dashes in the table indicate the Census Bureau had insufficient data to provide a median rent figure for that specific data field.

	Hobart	Kiowa County	State of Oklahoma
	Median Rent	Median Rent	Median Rent
Total Rental Units:			
Built 2010 or Later	-	-	\$933
Built 2000 to 2009	\$318	\$318	\$841
Built 1990 to 1999	-	\$507	\$715
Built 1980 to 1989	\$243	\$325	\$693
Built 1970 to 1979	\$437	\$443	\$662
Built 1960 to 1969	\$479	\$481	\$689
Built 1950 to 1959	\$628	\$617	\$714
Built 1940 to 1949	\$681	\$617	\$673
Built 1939 or Earlier	\$590	\$561	\$651

Source: 2009-2013 American Community Survey, Table 25111

The highest median gross rent in Kiowa County is among housing units constructed between 1940 and 1959 (likely representing rental homes), which is \$617 per month. In order to be affordable, a household would need to earn at least \$24,680 per year to afford such a unit.

Hobart Rental Survey Data

The table shows the results of our rental survey of Hobart. All of the significant multifamily rental properties in Hobart are subsidized in one form or another, as project-based facilities (for families, the seniors, or the disabled), with Affordable Housing Tax Credits, or USDA rental assistance.

Name	Туре	Year Built	Bedrooms	Rate	Vacancy	
Arrowhead Village	USDA/LIHTC - Family	1984	1	30%	N/A	
Arrowhead Village	USDA/LIHTC - Family	1984	2	30%	N/A	
Arrowhead Village	USDA/LIHTC - Family	1984	3	30%	N/A	
Country Oaks (Elmwood Manor)	Project Based - Family	1971	Studio	30%	20.00%	
Country Oaks (Elmwood Manor)	Project Based - Family	1971	1	30%	20.00%	
Country Oaks (Elmwood Manor)	Project Based - Family	1971	2	30%	20.00%	
Country Oaks (Elmwood Manor)	Project Based - Family	1971	3	30%	20.00%	
Country Oaks (Elmwood Manor)	Project Based - Family	1971	4	30%	20.00%	
Cedar Park	Project Based - Elderly	N/A	1	30%	N/A	
Hill House / Park House	Project Based - Disabled	N/A	1	30%	N/A	

Rental rates at each of these properties are based on 30% of the tenant's income.

Rental Market Vacancy – Hobart

Country Oaks reported 80% occupancy, but noted that they are typically fully occupied with a waiting list. The overall market vacancy of rental housing units was reported at 0.00% by the Census Bureau as of the most recent American Community Survey, or 100% occupancy. We also note that data from HUD's Picture of Subsidized Households reports 97% overall occupancy among HUD-assisted housing units in Kiowa County. On the whole, it appears there is typically very little vacancy among rental housing units in Hobart or Kiowa County.

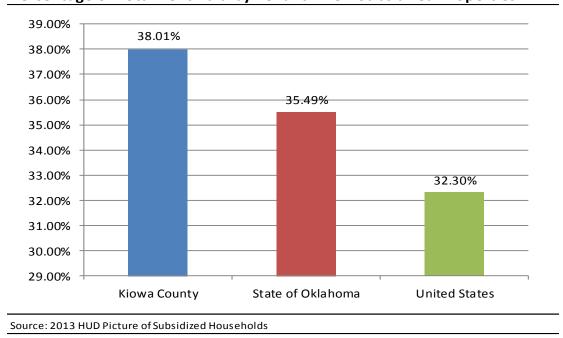

Summary of HUD Subsidized Properties

The following tables present data for housing units and households subsidized by the United States Department of Housing and Urban Development, for Kiowa County, the State of Oklahoma, and the United States. This data is taken from HUD's "Picture of Subsidized Households" data for 2013, the most recent year available.

Projected Housing Need

Consolidated Housing Affordability Strategy (CHAS)

This section will analyze data from the U.S. Department of Housing and Urban Development's Consolidated Housing Affordability Strategy (CHAS) dataset for Kiowa County. This data is typically separated into household income thresholds, defined by HUD Area Median Family Income (HAMFI). HUD Area Median Family Income (HAMFI) is equivalent to Area Median Income (AMI) for the purposes of this report. This data is considered the best indicator of housing need available which separates need into household income thresholds as defined by HUD.

Cost Burden by Income Threshold

The next table presents CHAS data for Kiowa County regarding housing cost burden as a percentage of household income. Renter costs are considered to be the sum of contract rent and any utilities not paid by the landlord (such as electricity, natural gas, and water, but not including telephone service, cable service, internet service, etc.). Homeowner costs include mortgage debt service (or similar debts such as deeds of trust or contracts for deed), utilities, property taxes and property insurance.

Households are considered to be cost overburdened if their housing costs (renter or owner) are greater than 30% of their gross household income. A household is "severely" overburdened if their housing costs are greater than 50% of their gross household income.

Households by Income Threshold: Percentage with Housing Cost Over 30% of Income

Substandard Conditions / Overcrowding by Income Threshold

The following table summarizes data regarding substandard housing conditions and overcrowding, separated by owner/renter and HAMFI income threshold. Substandard housing conditions are defined by HUD as any housing unit lacking either complete plumbing or a complete kitchen.

A housing unit without "complete plumbing" is any housing unit lacking one or more of the following features (they do not need to all be present in the same room):

- 1. Hot and cold running water
- 2. A flush toilet
- 3. A bathtub or shower

A lack of a complete kitchen is any housing unit lacking any one or more of the three following items:

- 1. A sink with a faucet
- 2. A stove or range
- 3. A refrigerator

Households are considered to be "overcrowded" if the household has more than 1.0 persons per room (note that this definition is "room" including bedrooms, living rooms and kitchens, as opposed to only "bedrooms"), and is "severely overcrowded" if the household has more than 1.5 persons per room.

Cost Burden by Household Type

The following table provides a breakdown of households by HAMFI, and by household type and size, and by housing cost burden. The categories of household type provided by HUD are:

- Elderly Family: Households with two persons, either or both age 62 or over. •
- Small Family: 2 persons, neither age 62 or over, or families with 3 or 4 persons of any age. •
- Large Family: families with 5 or more persons. •
- Elderly Non-Family (single persons age 62 or over, or unrelated elderly individuals) •
- Non-Elderly, Non-Family: all other households. •

Housing Problems by Household Type

The next set of tables presents data by household type and whether or not the household is experiencing any housing problems. Housing problems are defined by HUD as any household meeting any of the three following criteria:

- 1. Housing costs greater than 30% of income (cost-overburdened).
- 2. Living in a housing unit lacking complete plumbing or a complete kitchen (substandard housing unit).
- 3. Living in a housing unit with more than 1.0 persons per room (overcrowding).

Households Under 80% of AMI: Percentage with Housing Problems

Housing Problems by Race / Ethnicity

Data presented in the following tables summarizes housing problems (as previously defined), by HAMFI threshold, and by race/ethnicity, for Kiowa County. Under CFR 91.305(b)(1)(ii)(2), racial or ethnic groups have disproportionate need if "the percentage of persons in a category of need who are members of a particular racial or ethnic group in a category of need is at least 10 percentage points higher than the percentage of persons in the category as a whole."

CHAS Conclusions

The previous data notes many areas of need (and severe need) among the existing population of Kiowa County. The greatest needs are among households with incomes less than 30% of Area Median Income. Several other areas of note:

- 70.6% of renters with incomes less than 30% of Area Median Income have one or more • housing problems. 70.1% of homeowners with incomes less than 30% of Area Median Income have housing problems.
- Among households with incomes less than 50% of Area Median Income, there are 329 renter households that are cost overburdened, and 195 homeowners that are cost overburdened.

- Among **elderly** households with incomes less than 50% of Area Median Income, there are 64 renter households that are cost overburdened, and 60 homeowners that are cost overburdened.
- Among renters with incomes less than 80% of Area Median Income, 85.71% of African Americans, 100% of Asian, 55.56% of Pacific Islander, and 52.46% of Hispanic households have one or more housing problems.

Overall Anticipated Housing Demand

Future demand for housing units in Kiowa County can be estimated from population and household growth. Population estimates are based on known factors such as noted increases in the city employment base and indications from demographic services. In this case we have considered data from both the U.S. Census Bureau and Nielsen SiteReports. The estimates of changes in households and population were presented in a previous section of this report. The anticipated future demand is estimated for Hobart, as well as Kiowa County as a whole. The calculations are shown in the following tables.

Hobart Anticipated Demand

As indicated throughout the report, the population, households and number of housing units have historically been in decline. Although Nielsen SiteReports estimates some improvement in population and household counts over the last five years, the basis for this estimate is unclear. The most recent population estimate for Hobart shows 3,700 persons, a decline of 56 persons since the 2010 Census. Hobart has shown population decline in every decennial census since 1950 (excepting the 1980 census) and we do not believe it likely for this trend to reverse in the near future. We further add that a major employer in Hobart, SKF USA, has announced that it will be closing with layoffs to begin in early 2016 with full closure by 2017. The following table summarizes population, household, and housing unit changes between the 2000 Census, the 2010 Census, and the current Nielsen SiteReports estimate.

Hobart Historical Population and Housing Changes									
	2000 Census	2010 Census	% Change	2015 Estimate	% Change				
Population	3,997	3,756	-0.62%	3,821	0.34%				
Households	1,584	1,550	-0.22%	1,591	0.52%				
Housing Units	1,979	1,921	-0.30%	1,953	0.33%				
Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports									

As shown, the number of housing units and the population declined from 2000 to 2010. It is the opinion of this analyst that population decline will not be as rapid in the next several years but that the deterioration of the housing stock will continue at current rates. This will lead to reduced availability of housing units in the city of Hobart.

According to local officials, there is very high demand for rental units that is not currently satisfied in the market. This is evident from very high occupancy rates for market rate rental units. High occupancy rates reduce options for potential residents of Hobart and may lead people who are employed in Hobart to live outside the city limits. There also appears to be high demand for affordable owner-occupied property. There has been limited single-family development in the past decade. There is an adequate supply of housing units that are valued below \$60,000. Sporadic development of custom-built housing units priced above \$200,000 has also occurred. Households that prefer housing units valued between \$60,000 and \$80,000 have a limited product available in the city of Hobart. In general, there appears to be unsatisfied demand for median-income rental and owner-occupied property.

Kiowa County Anticipated Demand

As indicated throughout the report, the population, households and number of housing units have decreased over the last fifteen years. The following table summarizes population, household, and housing unit changes.

Kiowa County Historical Population and Housing Changes									
	2000 Census	2010 Census	% Change	2015 Estimate	e % Change				
Population	10,227	9,446	-0.79%	9,313	-0.28%				
Households	4,208	3,978	-0.56%	3,932	-0.23%				
Housing Units	5,304	5,216	-0.17%	5,229	0.05%				
Sources: 2000 and 20	Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports								

As mentioned previously, the population is declining at a rate faster than the number of housing units declined. The loss of housing units may be attributed to demolitions outpacing new construction. The percentage loss of households was not as high as the percentage population loss due to declining average household size. It is unlikely that the average household size will significantly decrease in the future.

Although a large portion of the housing stock was torn down during the 2000s, there were 1,238 more housing units than households in the county according to the 2010 Census. It is the opinion of this analyst that minimal demand exists for new housing units. This opinion is based on the projection that the population of Kiowa County will continue to decline in the future, and the closure of the SKF plant will certainly not help the situation. However, the housing stock of Kiowa County is rapidly aging and deteriorating. A small amount of affordable new housing would improve the county's housing infrastructure and give more housing options to current residents of Kiowa County.

Special Topics

Kiowa County Disaster Resiliency Assessment

The purpose of this section is to assess at the county level key components of disaster resiliency. Housing location and quality as well as planning activities can help reduce impacts from disaster events and allow for faster recovery. Disasters can include tornadoes, extreme weather, high winds, as well as man-made events. These events may largely be inevitable, but the ability to reduce damage and casualties as well recovery can be improved with good planning.

C.0 Comprehensive Plans & Hazard Mitigation Plans

There are 8 key cities within the county (Hobart, Mountain View, Snyder, Lone Wolf, Gotebo, Mountain Park, Roosevelt, Cooperton).

Comprehensive plans are the guiding documents for cities of various sizes to address key aspects of their community from land use, transportation, environment, housing, and economic development.

The other key plan for a city to manage, mitigate and plan for recovery related to disasters is a **Hazard Mitigation Plan** (or Emergency Management Plan). Often low density counties, the Hazard Mitigation Plan is done at the county level, though some cities may augment the county plan with a city plan.

Kiowa County does have a Hazard Mitigation Plan and an Emergency Operations Plan.

C.2.1.1. Historical Data on Natural Disasters and Other Hazards

Data on historical damages and casualties is typically collected as part of a **Hazard Mitigation Plan** preparation to determine the appropriate planning measures and actions to take before and after an event.

The Kiowa HMP first identified the key vulnerabilities for the county:

HAZARD VULNERABILITY BY JURISDICTION

HMP, p. 19

Dam Failures

"Dam failures have not occurred in any years between 1950 and 2013. Damages to personal property are estimated at \$0.00." P. 22

Flooding

"National Climatic Data Center storm event statistics record 27 flood events in Kiowa County and participating jurisdictions during the 10-year period 2000-2013. According to National Flood Insurance Program statistics, Kiowa County residents had four reported losses and received payments totaling \$360,000.00 as of January 2013." P. 32

"Flood Events

April 30, 2000 - Slow moving thunderstorms formed over portions of western and central Oklahoma during the late morning of the 30th and continued through mid-evening. These storms were responsible for isolated areas of wind damage, large hail, lightning damage, and flooding.

June 22, 2004 - Rainfall totals up to 5 inches in the Hobart, OK area during the evening and overnight hours of June 21-22 produced flash flooding along Frisco Creek. The creek overflowed its banks and flooded Third Street and Business Highway 9 in Hobart during the late morning hours of June 22.

August 22, 2005 - Storm total rainfall amounts of 2 to 5 inches fell over portions of the North Fork of the Red River basin in northwestern Kiowa County on August 21-22. As the heavy runoff from these rains eventually traveled from smaller tributaries (including Elk Creek) into the North Fork of the Red River, minor rural flooding occurred on the river along the Kiowa/Jackson County border near and at one river forecast point in the area. The North Fork of the Red River, 3 miles east of Headrick, crested at 15.2 feet, 1.2 feet above flood stage, at 6:30 am CST on August 23, and remained above flood stage from 7:00 pm CST on August 22 to 2:30 pm

CST on August 23. Only lowland areas along the river were flooded during this event. Further downstream on the North Fork of the Red River, the flood crest attenuated and was measured well below flood stage at the USGS river gage site near Tipton, OK on the Jackson/Tillman County border.

June 13, 2007 - The very wet pattern continued over Oklahoma on the 13th. An outflow boundary was situated northwest to southeast over parts of northern and central Oklahoma. Other outflow boundaries were scattered over the western half of the state as well. A very slow moving upper level storm system drifted toward western Oklahoma. This helped thunderstorms develop over much of western Oklahoma. The thunderstorms produced very large hail, strong winds, and tornadoes over parts of the area. Also, due to the slow movement of the thunderstorms, flash flooding continued to be a concern with several roads washed out. The event lasted well into the evening before finally ending during the early morning hours. Monetary damages were estimated. Two swift-water rescues were initiated due to high water in Hobart. Two bridges were heavily damaged. Thirty homes and eight businesses reported some kind

of flood damage. Four-hundred and fifty feet of railroad tracks along HWY 9 in Hobart were washed out. Monetary damages were estimated at \$150,000.

August 19, 2007 - Tropical Storm Erin, the fifth named storm of the 2007 Atlantic Hurricane season, developed quickly over the northeast Gulf of Mexico on the 15th, before moving onshore during the morning hours of the 16th. Low-level wind shear north and east of Erin increased throughout the evening, with several tornadoes reported in Kiowa, Washita, and Grady counties during the late afternoon and early evening hours. Damage was reported east of Hobart, and in Washita county south and east of Cordell. Wind gusts of 50 to 80 mph were also reported over parts of central Oklahoma at this time. As with the wind speeds, thunderstorms intensities increased, with two additional tornadoes reported over central Oklahoma Sunday morning. In addition to tornadoes and very strong winds, rainfall rates of over three inches per hour were common, with significant flash flooding reported in numerous counties. Rainfall amounts exceeded five inches over a large area, with some locations receiving eight to ten inches. Rivers and creeks easily exceeded their banks, with water also rising quickly in many towns. Dozens of people were rescued by boat and helicopter as numerous homes and businesses quickly took on water. Unfortunately, six people lost their lives due to the flooding. A house and two vehicles were washed away by the high water from Stinking Creek. The flood water was five feet deep near the location of the house. Monetary damages were estimated at \$60,000.

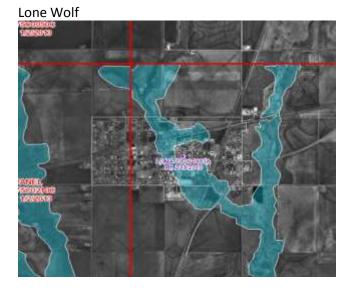

June 5, 2010 - A very moist, tropical air mass was in place over Oklahoma for several days of early July. Late on the 4th, a weak trough entered parts of southwest Oklahoma, with widespread precipitation developing along and just ahead of it. Intense rainfall developed over southwest Oklahoma, **especially over Hobart early**, and then east toward Caddo County later in the morning. Flash flooding quickly became a concern, as several roadways became flooded. Later in the afternoon, a stronger upper level disturbance moved across the central plains, with a weak cold front entering northwest Oklahoma. Thunderstorms developed along this boundary by mid afternoon and moved east into north-central Oklahoma.

All parts of the county may be subject to flash flooding, freeze-thaw flooding and extreme precipitation that can cause flooding, unrelated to the streams and rivers. Development in the floodplain, however, increases risk of damages and property loss potentially repeatedly.

Tornados

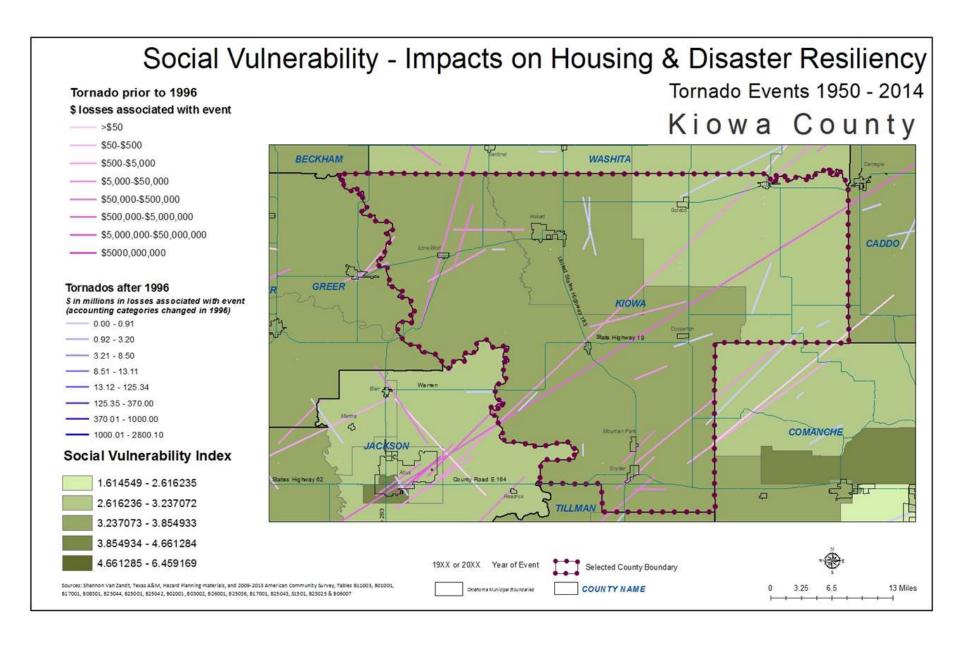

"In the last 13 years Kiowa County and participating jurisdictions had 19 tornado events and, resulting in an average of 1.46 tornado events per year. Therefore the probability of a tornado occurring within the participating jurisdictions each year is highly likely." (HMP, p46)

NOAA data shows the following historic data on disaster events for the county:

Historic data on tornados between 1950-2014 there are 73 tornados documented. There were 9 injuries that occurred connected to these tornados, with latest injury (one) happening in the 2001 tornado. There were 2 fatalities connected to tornadoes during this time period, one of which occurred in 1971 (the other in 1950). Property losses between 1950-1996 ranged from \$858,602.00 to \$8,586,100.00 . (The accounting methods used for losses changed in 1996.) The losses estimated between 1996-2014 was \$740,000.00 .

C.2.1.2; C.2.1.6; C.2.1.7;C.2.1.8 Shelters from Disaster Event

The Kiowa HMP recommends:

- Create database on citizens with existing storm shelters.(p. 58)
- Build safe rooms/storm shelters to protect from tornados and high winds (p.58)

C.2.1.3 Public Policy and Governance to Build Disaster Resiliency

Information not available.

C.2.1.4 Local Emergency Response Agency Structure

Information not available.

C.2.1.5 Threat & Hazard Warning Systems

The Kiowa HMP recommends:

- Improve Warning Systems (storm sirens, cell phone notification, fire alert, etc.) (p. 58)
- Purchase of storm sirens for Gotebo, Hobart, Lone Wolf, Mt. Park, Mt. View, Roosevelt, Snyder (p.66, 70, 73, 76, 79, 82, 86)

Google Mapped sirens in Oklahoma:

Social Vulnerability

Based on the research work done by the Texas A&M University Hazard Reduction and Recovery Center, an added component is being included in this section. Social vulnerability can place households at a further disadvantage during and after a disaster. This analysis is assessing for the county the levels of social vulnerability based on demographic indicators to highlight 'hotspots' or counties that have higher social vulnerability. That combined with Hazard Mitigation Plans – or lack thereof – can highlight places where additional work is needed to reduce impacts on households.

Social Vulnerability Analysis - Kiowa County						
Base Social Vulnerability Indicators (%)		2nd Order	3rd Order			
 Single Parent Households Population Under 5 	16.61% 6.24%	0.228 (Child Care Needs)

Casial Vulnershility Impacts on Housing & Disaster Desilionay

Social vulnerability combined with the devastating impacts of a natural or man-made disaster can compound a household's ability to recover and in fact can place those individuals at an even great gap or disadvantage prior to the event (Shannon Van Zandt, Texas A&M, Hazard Planning).

This county falls about average per this index for social vulnerability when comparing as a county to other counties in the state. Looking at the census tract level, the western tracts of the county have elevated scores for social vulnerability.

Recommendations for this county:

- Continue to maintain the county HMP and include attention to areas within the county that in addition to physical vulnerability may have compounding social vulnerability factors.
- Efforts to strengthen building codes related to tornadoes and natural disasters should be considered.
- Planning for shelters from disaster events for multifamily, HUD and LIHTC units, in addition to all housing in the community should be incorporated with any effort to increase housing.

Homelessness

By Continuum of Care

Oklahoma is comprised of eight Continuums of Care (CoC). These entities manage the provision of services to the homeless, among other functions. By definition, CoCs involve nonprofit homeless providers; victim service providers; faith-based organizations; governments; businesses; advocates; public housing agencies; school districts; social service providers; mental health agencies; hospitals; universities; affordable housing developers; law enforcement and other organizations that serve the homeless and those at risk of becoming homeless (Continuum of Care Network pamphlet, 2015). These entities are governed by a community plan that helps them deliver services to the homeless and/or to prevent a return to the homeless. CoCs provide a variety of services aimed at outreach, engagement and assessment, including emergency shelter, rapid re-housing, transitional housing, and permanent housing, among others (Continuum of Care Network pamphlet, 2015).

The data below describes the characteristics of those receiving or eligible for the CoC in which Kiowa County is located. This data is collected by the CoCs on last day of January each year and reported on an annual basis. It is currently the best source of data available at the State level of understanding the demographics of these populations.

OK 506 Southwest Oklahoma

OK 506 represents the southwest region of Oklahoma, including Roger Mills, Beckham, Washita, Kiowa, Tillman, Cotton, Jefferson, Stephens, Garvin, McClain, Grady, Caddo, Comanche, Greer, Harmon, and Jackson counties. This region of Oklahoma has a small homeless population generally. However, there are at least 8 homeless households comprised of children only. While these households are sheltered, additional analysis would be useful to understand the trend that may be leading to homeless youth in this region. There is also a high homeless veteran population (25) in this region. There may be a correlation between the number of homeless veterans in this CoC and the presence of a military base in Comanche County, as well as a Veterans' Hospital in the area. Given the presence of these services in this area, investment should be made for more temporary and permanent housing for homeless veterans. There are Veterans' Hospitals in this COC where veterans can receive services. This may play a big role on why there is a significant amount of homeless veterans in this COC.

COC Conclusion

Each of the CoC's represents a unique area. It's important to note that the Point In Time data serves as a baseline. It is likely that the homeless population is much larger than counted. Generally, the State's homeless population is over the age of 24. In some areas of the State, there is a disproportionately high rate of homeless youth. More detailed exploration is necessary to understand the reasons which led them to this State and the needs of homeless youth. Domestic violence victims comprise a significant portion of the homeless population in the State. In some areas, the presence of social service providers for this subpopulation has reduced homeless rates. The same is true with respect to homeless veterans. As anticipated, the majority of the homeless population across the state can be classified as: mentally ill, chronically homeless, and chronic substance abusers. The needs of these difficult to house homeless must remain a priority across the State.

A Snap Shot of Homelessness in the State

Point in Time data was last collected on January 29, 2015 across the State. On that date, counts revealed a homeless populations of more than 3,000 residents. The majority of those counted (2,603 individuals) were classified as households without children. The majority of this group lives in emergency shelters (1,652) or transitional housing (376) with 575 classified as unsheltered.

The number of households with children is seemingly small totaling 343. The vast majority of those in this classification live at emergency shelters (201) or transitional housing (104) with only 38 classified as unsheltered. Homeless service providers in Oklahoma City and Tulsa emphasized that this group was likely undercounted across the State because they are less visible than other categories of homeless. They emphasized that emergency shelters, as presently designed, do not meet the needs of families with children in terms of both privacy and safety.

The Point in Time data reveals less than 100 households comprised of only children. Of these 74 counted households, 35 live in emergency shelters and 39 are unsheltered. This population is likely significantly undercounted as youth who are homeless typically seek to avoid identification for fear of being returned to their homes. These young people often have specific needs for supportive services that are difficult to deliver because the population remains unseen. Homeless advocates in the State hold up Tulsa as a good example of the State for serving homeless youth. OKC's Be the Change is also a leader in identifying and providing needed service to homeless youth in the metropolitan region. The problem of homeless youth is not just isolated to large urban areas. Mid-sized and smaller cities also look for innovative ways to service. Cities like El Reno and Enid have their own drop in centers for homeless youth. Social networks in smaller cities fill similar functions.

Oklahoma City public schools also tracks homeless students within the district. There are homeless students attending 78 elementary and middle schools in Oklahoma City. This data suggests that the majority of the city's homeless students are African American or Hispanic. There are 664 homeless African American students, 724 homeless Hispanic students, and 254 homeless Caucasian students. There are ten high schools in OKC that have reported having homeless students. Douglass and Capitol Hill high schools have the highest homeless student populations. Douglass has 50 homeless African American students. Capitol Hill has 49 homeless Hispanic students. The majority of these students can be classified as "couch homeless" or doubled up, meaning that they are finding

84

shelter with extended family members, friends, and other non-relatives for a brief amount of time due to hardship.

The majority of Oklahoma's homeless population is over 24 years old. This classification system is not particularly useful in helping to assess the number and needs of the elderly population, which is reported to be a substantial subset of this population.

The Point in Time data categorizes the homeless population into two categories: Hispanic/Latino and Non-Hispanic/Non-Latino. The lion's share of homeless in Oklahoma are Non-Hispanic/Non-Latino (3,528). In Oklahoma City, 62% of the homeless served are classified a Caucasian. Twenty-five percent of the homeless population is African American. Seven percent of the homeless in OKC identify as Native American. Less than one percent of those identified as homeless in OKC are Asian. By contrast, a relative small fraction of the State's homeless population, including less than 250 individuals. This follows OKC counts that identify 7% of the city's homeless population as Hispanic. Homeless advocates in OKC indicate that social networks, including churches and extended families, keep the number of homeless in the Hispanic population proportionately lower than their Non-Hispanic/Non-Latino counterparts. However, these individual likely classify as "couch homeless" and are in a continued state of being vulnerable to becoming homeless.

The PIC data indicates that are more homeless males (2,237) than females (1,535). This follows national trends. Care should be taken when interpreting this data, as women are less likely to participate in Point in Time counts. There is a growing population of homeless in Oklahoma that identifies as transgender. PIC data identified 5 individuals identifying as transgender. This population is likely much higher and will continue to grow due to family and national attitudes about this population. Transgender populations may require special housing accommodations, especially in the emergency shelter context, to provide for their social and emotional needs.

Another group of homeless individuals that merits special consideration in the distribution of resources is those identified as having special needs. This classification includes persons with "physical, mental or behavioral disabilities, persons with HIV/AIS and/or persons with alcohol or drug addictions. The Point in Time data estimates that there are nearly 1300 homeless persons with special needs in OKC alone.

The Point in Time data is coarse and does not do an effectively track homeless populations with specific needs, such as those persons who are homeless and living with HIV/AIDS. This special population of homeless is likely growing in Oklahoma. According to the Oklahoma State Department of Health there were an estimated 5,375 cases of persons living with HIV/AIDS by the end of 2013. There were a total of 437 newly diagnosed HIV/AIDS cases in 2013 for the state of Oklahoma. The vast majority of populations living with HIV/AIDS (nearly 72%) reside in urban areas. In OKC alone, the Point in Time data identified at least 25 homeless individuals living with HIV/AIDS. This is likely an undercount. Based on this information and anecdotal data from homeless service providers, special effort must be made to understand the housing, medical, and supportive services needs of homeless persons living with HIV/AIDS.

Shelter is crucial for homeless persons with HIV/AIDS in the management of this illness. However, traditional shelter setting(s) may not be suitable to house this population. Those with suppressed immune systems are vulnerable to the spread of infectious diseases which may be present in open shelters. In addition, shelter personally may not be properly trained in handling AIDS related issues. For these reasons, as well as resources made available by the federal government, homeless persons living with HIV/AIDs are often given housing choice vouchers, created by HOPWA, so that they secure housing on the private market. This can be challenging in constrained rental markets like Norman, for example, where affordable housing options are limited. It is estimated that more than 60 individuals living in OKC with HIV/AIDs are homeless because they have been unable to find a landlord that will accept their housing choice voucher.

Rural Areas

Homelessness in the rural areas of the State is much more difficult to calculate. Given the population density of the State, the majority of services that serve the homeless are concentrated in urban and semi-urban areas. Even if beds are available, many rural homeless lack knowledge about the services or a means to travel to receive the same. As a part of this study, OU students were dispatched into the 77 counties in the State to, among other issues, attempt to understand the degree to which there is rural homeless is difficult to identify and often ignored. For the purposes of this report, a literature review was prepared on the topic of rural homelessness in the States. The goals of this academic review is to assist policymakers and service providers in the State in uncovering the dimensions of this illusive population.

In the U.S., the rural homeless population is predominantly Caucasian. This population is comprised of single mothers, widowed wives and husbands, divorced and separated men and women, and young people. A study examining rural homelessness in Ohio found that nearly 40% of those who classify as homeless were divorced, separated, or widowed (First, Richard J., John C. Rife, and Beverly G. Toomey, 1994, pg. 101). Ohio's rural homeless were also relatively young. Close to 80% of homeless population in this study was between the ages of 18 and 39 years old (First et al, 1994, pg. 101). Rural homelessness is often less visible than urban homelessness because these populations commonly take shelter are at a friend's house, in their vehicles, or on abandoned properties. These populations can also be found on "...campgrounds or in hollows, desert canyons, farmers' fields, state parks, and highway rest areas" (Milbourne and Cloke, 2006, pg. 17).

The causes of rural homelessness mirror, in most ways, the plight of the urban homeless. The study of homelessness in rural Ohio revealed family problems and substance abuse issues as primary causes of rural homelessness. The incidence of homelessness resulting from situations of domestic violence is high in rural areas (Cummins et al, 1998). Substance abuse issues are a common cause for homelessness in rural America. The literature reveals that this population tends to be homeless because they have isolated themselves from family and people who want to help (First et al, 1994). In the case of both domestic violence and substance abuse, it is often difficult for these individuals to find shelter and the supportive services they require in rural areas where options are limited, if available at all. The thought of moving to an urban area to find both shelter and supportive services is sometimes not considered at all by these vulnerable populations.

Rural areas are also more prone to the kind of poverty that puts individuals and families at risk for homelessness. The number of people living at or below the poverty line in rural places is higher than anywhere else in the United States (Moore, 2001). The statement "rural homelessness is a microcosm of national economic and political developments" cannot be truer for American rural communities (Vissing, 1996, pg. 103). The disinvestment of small towns and their inability to attract long-term sustainable business development, cripples a small town's economy. In effect, this is a main contributor for why poverty is such a common theme for rural communities. As a result, the State should carefully consider its investments in rural Oklahoma. While there is a need for shelter in these places, the construction of this housing type should be weighed with long term opportunities for employment in the area.

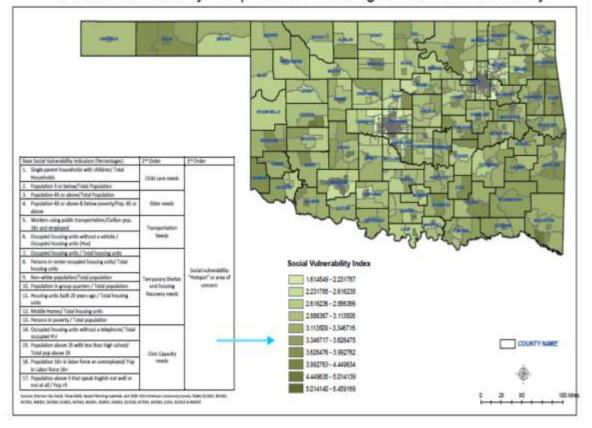

It is not surprising that rural areas typically lack both emergency shelters and temporary housing options. Services that provide temporary housing and provide relief and support services for those who cannot find food are virtually nonexistent in rural communities across the United States (Moore, 2001). Sheltering the homeless is undercapitalized in rural areas because communities do not see a concentration of homeless individuals (Vissing, 1996, pg. 146). As a result, the homeless must satisfice where they are. For instance, for families who are homeless, some of them use a friend's house to store clothes or to seek shelter, while some receive assistance from churches (Cummins et al, 1998). Others migrate to urban areas where services are available and more accessible (Rollinson, Paul A., and John T. Pardeck, 2006).

The absence of affordable housing in rural areas is a root cause of homelessness (Levinson, David, and Marcy Ross, 2007). In fact, it was noticed that many of the people were receiving monetary assistance or previously had some money saved up to spend on housing, but these measures were not enough to keep them afloat (First et al, 1994, pg. 101). Housing costs rise in rural areas typically rise as a result of competition for a limited amount of housing stock. In some rural areas, low income families are spending 70% of their household incomes on housing, sometimes substandard housing (Vissing, 1996, pg. 124). As Levinson et al explain, "housing costs are lower but so are incomes, with the result of placing a heavier rent burden in the community" (Levinson, David, and Marcy Ross, 2007, pg. 45). Renters in rural communities, as a result, are far more susceptible to becoming homeless than their urban or suburban counterparts because they do not have the financial safety net sometimes associated with homeownership (Fitchen, 1991, pg. 193).

While this brief review of the literature describes the state of homelessness across rural America, many of the lessons learned are easily translated to an Oklahoma context. The condition and supply of affordable housing units is relatively poor in many rural portions of the State. Rent burden, as more fully characterized in the Consolidated Housing Affordability Strategy (CHAS) section of this report, is high. This leaves families living and working in relatively weak economies vulnerable to homelessness. Once homeless, supportive services in these areas are relatively limited, especially for the chronically homeless, those with substance abuse problems, and victims of domestic violence. Services available to these populations in urban areas may not be attractive to individuals and families who are accustomed to life in rural communities. Where practicable, more consideration must be given to providing supportive services and temporary and permanent housing to homeless populations wishing to remain in rural areas.

At Risk For Homelessness

Poverty is the primary factor that places Oklahoma families at risk of being homeless. There are many factors experienced by those living in poverty which leave residents more or less vulnerable to homelessness. For the purposes of this study, a social vulnerability index has been constructed to measure the likelihood or risk that residents living in poverty might find themselves homeless. This index includes factors such as single headed households, concentration of young and elderly residents, the reliance on public transportation, private vehicle availability, racial composition, housing type, presence or absence of a telephone in the household, amongst other factors. This index is additive and seeks to understand the collective impact of these factors in estimating the vulnerability of a local population. While employed in more significant detail in the section of this report focusing on disaster resiliency, this tool is useful in identifying areas of the State where populations may be most vulnerable to homelessness. The index utilized in this section is different from the one crafted in the Disaster Resiliency chapter of this report in that it estimates social vulnerability at the county level, rather than by census tract. The decision to study vulnerability to homelessness at the county level was made to help policymakers understand, more generally, where resources and economic interventions are most necessary to stave off the potential effects of homelessness. This maps presents vulnerability to homelessness on the county level, depicting the most vulnerable counties in dark green.

Social Vulnerability - Impacts on Housing & Disaster Resiliency

The Oklahoma families most likely at risk are those living in public and subsidized housing. They live below the poverty line. Even those who are employed, remain vulnerable to homeless because an unexpected expense, like a medical emergency, threatens their ability to pay for their share of rent owed or utilities. A missed payment can easily lead to eviction and homeless.

Through the U.S. Department of Housing and Urban Development, Oklahoma service providers have been vested with more than 24,000 housing choice vouchers. Their spatial distribution is outlined below. Of significance is the size of the waiting lists for public housing units and housing choice vouchers in cities across the State. These individuals are the most vulnerable to being homeless.

			Public

Findings and Recommendations

The chronically homeless population remains high in Oklahoma and follows national trends. While this population does not appear to be growing, the needs of the chronically homeless merit continued attention. Ample emergency shelters and soup kitchens must be made available for these sizable population in both urban and rural contexts. Social service providers should be clustered, to the extent possible, where these groups of homeless populations cluster. Given the future projections for the increase in the number of cold and hot days in the region, social service providers must provide places that allow these individuals to seek refuge from the elements.

Those living with HIV/AIDS tend to underreport their status and needs. Given the cost of medical care these individuals face, the need for permanent and stable housing is critical. Housing providers must work to ensure that there are enough units for this undercounted population. Working with county health care providers, OHFA is much more likely to estimate the size and needs of this population of homeless and potentially homeless persons. Special care must be taken to ascertain the barriers these individuals face when using vouchers to secure housing in the marketplace.

Victims of domestic violence require temporary and transitional housing statewide. CoCs with high supportive services tend to better accommodate the housing needs for these population. Cleveland County provides a good model for the State. However, many homeless victims of domestic violence live in rural areas that are underserved. Efforts must be undertaken to work with social services provides, schools, churches, and the police to help identify these individuals and to lead them to available housing and supportive services.

While not mentioned in the PIC data, estimates must be prepared to calculate the number and needs of homeless populations with felonies. In particular, there has been a rise nationally in the number of homeless sex offenders. Zoning regulations and discrimination from the private market has pushed many registered sex offenders to the periphery of many communities. Given their criminal histories, this population of homeless is harder to house but should not be forgotten for health and safety of these individuals and the communities they inhabit.

The size of the homeless veteran population seems to be decreasing as a result of national initiatives to end homelessness for veterans in Oklahoma. The needs of homeless veterans are highest in areas of the State near VA facilities. Temporary and permanent housing should be constructed at a higher rate in these areas to meet demand. Care should be taken to make certain that the housing constructed is built to meet the psychological needs of veterans, particularly those suffering from PTSD.

Rural homelessness, in general, is a challenge to assess and characterize. The rate of homelessness in rural areas is most likely much higher than annual counts demonstrate. The majority of rural homeless likely find shelter out of public view. Some may shelter in their cars, in undeveloped areas or in the homes of those who allow them to stay. They are not likely to find their way to urban areas given their lack of transportation options and preferences for rural living. Programs that are developed to provide shelter to the rural homeless must be developed to allow sheltering in place where possible. Sheltering in place should only be allowed, however, in places where individuals are likely to be able to find what they need, including opportunities to work.

Very little is known about the age distribution of homeless over the age of 24. It is likely that the homeless population, including those who are chronically homeless, is aging. Elderly homeless individuals have special needs. Counts must be more sensitive to understanding the size and needs of this population. This does not mean arbitrarily building units to house this population unless a need can be demonstrated for the same.

Waiting lists for public housing and section 8 vouchers are high across the State. This is not uncommon to Oklahoma. However, when we are considering the size of the population that is at risk to homelessness, these waiting lists are an important factor to consider. Resources should be spent in a manner which is preventative so that these individuals' and families' needs are met before they become homeless.

The absence of affordable housing alternatives across some parts of the State is the largest threat to homelessness. In markets that are constrained by an aging housing stock or those that are rapidly growing, individuals and families who live on the economic margins are at risk for becoming homeless. Communities must work to ensure that zoning regulations promote the development of housing types serving all income levels, including the providing of temporary and permanent housing to meet the needs of the presently homeless and those at risk for becoming the same. Funding distributions should be targeted to communities with the highest needs who are willing to do what is necessary to meet the needs of the homeless and those at risk for the same.

Fair Housing

Summary

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity.

These findings are intended to aid the Oklahoma Housing Finance Agency (OHFA) determine the location of new affordable housing in relation to vulnerable populations and explore ways to expand the opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Key Findings:

- 70% of affordable housing units are located in census tracts marked by poverty
- 62% of affordable housing is located in census tracts where a majority of the residents are not white
- 13% of affordable housing units have no access to transit services and 56% have access to limited service, on-demand transit
- 2.6% of affordable housing units have limited access to a hospital
- 7.8% of affordable housing units are located in food deserts

Recommendations:

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

What is Fair Housing?

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. On one hand, this protects the ability of individuals to obtain housing regardless of personal characteristics such as race, skin color, national origin, gender, familial status, or disability. It also focuses attention on more subtle forms of discrimination that cluster low-income housing in ways that inhibit the ability of communities to access services and amenities that support self-sufficiency and autonomy.

Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity. In 2014, HUD released the Affirmatively Furthering Fair Housing (AFFH) rule for public comment. The draft rule

"directs HUD's program participants to take significant actions to overcome historic patterns of segregation, achieve truly balanced and integrated living patterns, promote fair housing choice, and foster inclusive communities that are free from discrimination" (HUD 2015). In 2015, the United States Supreme Court provided legal support for actions taken to remedy patterns that impede the upward mobility and opportunity of low-income individuals and communities. In the case of Texas Department of Housing and Community Affairs v. The Inclusive Communities Project the court reiterated the need to address disparate impacts in considering the location of affordable housing and reinforced the importance of AFFH (Bostic 2015). Housing discrimination from this perspective is not only felt by individual residents, it can also be the result of actions that work to limit the opportunities to improve the quality of life in local communities.

Approach

In Oklahoma, a combination of federal and state programs work to support the opportunities provided to individuals and families who rest safely and comfortably in an apartment or home. Here we use publicly available data for units that are part of the Low Income Housing Tax Credit (LIHTC) Program, the Rural Rental Housing Loans, or OHFA administered programs such as Oklahoma Affordable Housing Tax Credit (AHTC), the HOME investment partnership program, the Section 8 Housing Choice Voucher Program, and multi-family bonds. Collectively, these programs represent state efforts to assist individuals who are unable to afford housing.

Indicators of disparate impact vary but seem to contingent upon the contextual characteristics of a particular neighborhood. In an effort to help communities investigate and understand community level disparate impacts, HUD created a Fair Housing Assessment Tool (http://www.huduser.gov/portal/affht_pt.html#affh). The assessment tool includes measures on

(<u>http://www.huduser.gov/portal/affht_pt.html#affh</u>). The assessment tool includes measures on indicators of disparate impacts based on the clustering of potentially vulnerable populations, including:

- Race/Ethnicity of Residents
- National Origin of Residents
- English Proficiency of Residents
- Job Accessibility
- Transit Accessibility
- Level of Poverty
- Environmental Exposure (e.g. pollution, crime, food, health care, etc.)
- Disability

This report uses the Fair Housing Assessment Tool in conjunction with readily available data to initiate a more thorough investigation of the potential for disparate impacts in the state. The findings are intended to aid the Oklahoma Housing Finance Agency regarding future location of new fair housing in relation to vulnerable populations and the future opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Data

Data for this report are compiled from a variety of sources including the United States Census, the University of Oklahoma Center for Spatial Analysis, and primary data collected as part of ongoing research efforts at the University of Oklahoma. Data are aggregated into census tracts and reported statewide as well as by county (see Appendix 1).

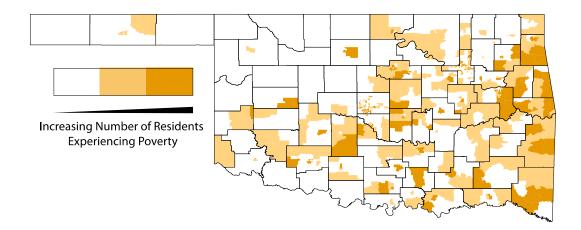

1. Urban/Rural

A majority of the affordable housing in Oklahoma is situated in rural communities. Urban communities including Edmond, Lawton, Norman, Oklahoma City, and Tulsa are home to just over 1/3 of the affordable housing units in the state.

	Total Affordable Housing Units	Situated an Urban Setting	Situated in a Rural Setting
OHFA	35,292	11,699 (33.1%)	23,593 (66.9%)
515	5,384	0	5,384 (100%)
LIHTC	23,537	8,255 (35.1%)	15,282 (64.9%)
Total	64,213	19,954 (31.1%)	44,259 (68.9%)

2. Poverty

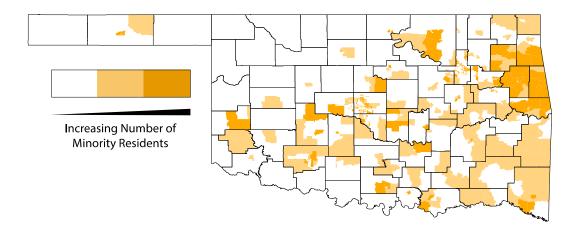

Approximately 70% of affordable housing units in Oklahoma are located in census tracts where the number of residents living in poverty is above the state average. About half of these units are located in areas of extreme poverty, where the number of individuals who are economically vulnerable exceeds 994, more than one standard deviation (411) from the mean (583).

	Total Affordable Housing Units	Situated in Poverty	Situated in Extreme Poverty
OHFA	35,292	12,295 (34.8%)	12,464 (35.3%)
515	5,384	2,093 (38.9%)	1,839 (34.2%)
LIHTC	23,537	7,483 (31.8%)	8,924 (38.0%)
Total	64,213	21,796 (33.9%)	23,227 (36.2%)

3. Non-white Enclaves

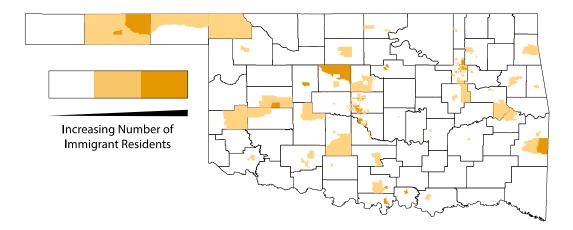

Just over 60% of affordable housing units in Oklahoma are located in census tracts where a majority of the residents are non-white. With just fewer than 24% of the total affordable housing units in census tracts heavily populated with residents who are not white – identified as census tracts where the number of non-white residents is more than 1,595 - one standard deviation (653) greater than the mean (542).

	Total Affordable Housing Units	Situated in Majority Non-White Community	Situated in Heavily Non-White Community
OHFA	35,292	12,814 (36.3%)	7,907 (22.4%)
515	5,384	2,229 (41.4%)	1,288 (23.9%)
LIHTC	23,537	10,285 (43.7%)	5,677 (24.1%)
Total	64,213	25,328 (39.4%)	14,872 (23.2%)

4. Immigrant Enclaves

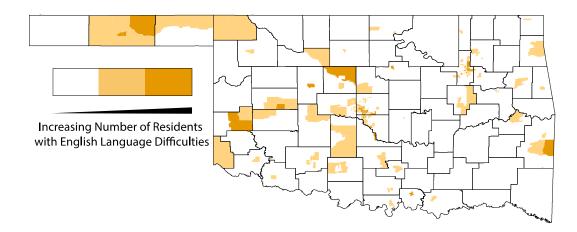

One-third of affordable housing units in Oklahoma are located in census tracts where more than the average number of residents are immigrants. About half of these units are located in areas dense with immigrants, where the number of individuals who are not citizen exceeds 349, more than one standard deviation (219) from the mean (130).

	Total Affordable Housing Units	Situated in Immigrant Enclave	Situated in Heavily Immigrant Enclave
OHFA	35,292	8,114 (23.0%)	3,358 (9.5%)
515	5,384	1,017 (18.9%)	159 (3.0%)
LIHTC	23,537	5,457 (23.2%)	3,364 (14.3%)
Total	64,213	14,588 (22.7%)	6,881 (10.7%)

5. Limited English Proficiency

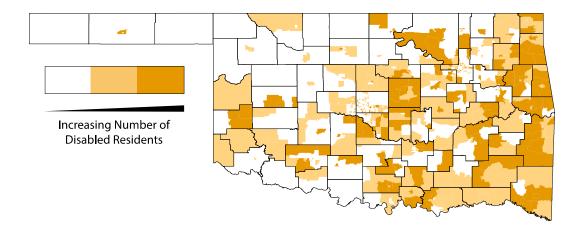

Almost 17,000 existing affordable housing units in Oklahoma are located in census tracts where more residents than average do not speak English very well. A little more than half of these units are located in areas dense with individuals with limited English proficiency, where the number of individuals who speak English less than very well exceeds 380, more than one standard deviation (240) from the mean (140).

	Total Affordable Housing Units	Community with more than average number of Limited English Speakers	Community dense with limited English Speakers
OHFA	35,292	6,250 (17.7%)	3,122 (8.8%)
515	5,384	799 (14.8%)	240 (4.5%)
LIHTC	23,537	4,034 (17.1%)	3,475 (14.8%)
Total	64,213	11,083 (17.3%)	6,837 (10.6%)

6. Disability

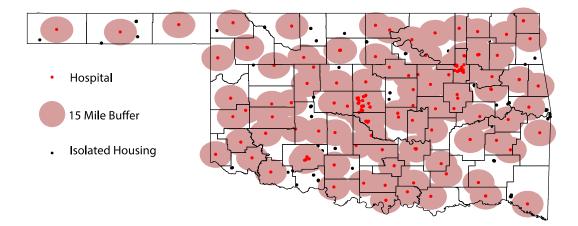

Almost 60% of existing affordable housing units in Oklahoma are located in census tracts where more residents than average have a disability. A little more than half of these units are located in areas dense with individuals with a disability, where the number of individuals who are disabled is greater than 831, more than one standard deviation (289) from the mean (542).

	Total	Community with more	Community dense with
	Affordable Housing	than average number	Disabled Residents
	Units	of Disabled Residents	
OHFA	35,292	10,098	10,722
		(28.6%)	(30.4%)
515	5,384	1,686	2,594
	,	(31.3%)	(48.8%)
LIHTC	23,537	7,074	6,289
		(30.1%)	(26.7%)
Total	64,213	18,858	19,605
		(29.4%)	(30.5%)

7. Hospitals

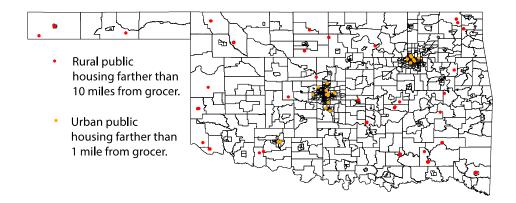

There are no affordable housing units more than 30 miles from a hospital. Approximately 2.6% of affordable housing units are farther than 15 miles from the nearest hospital. As indicated by the larger percentage of Rural Rental Housing Loan units, most of these are located in rural areas.

	Total Affordable Housing Units	More than 15 miles to nearest hospital	More than 30 miles to nearest hospital
OHFA	35,292	628 (1.8%)	0
515	5,384	500 (9.3%)	0
LIHTC	23,537	532 (2.3%)	0
Total	64,213	1,660 (2.6%)	0

8. Grocery Stores

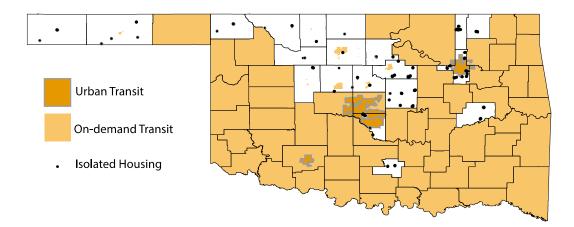

Approximately 7.8% of affordable housing units are in areas that are classified as food deserts. According to the United States Department of Agriculture, food deserts exist in urban environments further than 1 mile from a grocery store and in rural environments further than 10 miles from a grocery store (<u>https://apps.ams.usda.gov/fooddeserts/foodDeserts.aspx</u>).

	Total	Urban	Rural
	Affordable Housing	> 1 Mile from nearest	> 10 miles to nearest
	Units	Grocer	Grocer
OHFA	35,292	1,493	1,097
		(4.2%)	(3.1%)
515	5,384	0	466
			(8.7%)
LIHTC	23,537	1,175	769
		(5.0%)	(3.3%)
Total	64,213	2,668	2,332
		(4.2%)	(3.6%)

9. Transit

A little over 69% of affordable housing in Oklahoma is located in a census tract with limited or no access to transit services. This includes 8,367 affordable housing units in areas that lack public transit services all together as well as 36,363 units that are situated in areas that have on-demand transportation services that often have limited operation times and may only serve elderly and disabled populations or those going to a medical appointment.

	Total Affordabl e Housing Units	No Transit	Urban Transit	On-Demand Transit
OHFA	35,292	4,035 (11.4%)	11,265 (31.9%)	19,992 (56.6%)
515	5,384	767 (14.2%)	0	4,617 (85.8%)
LIHTC	23,537	3,565 (15.1%)	8,217 (34.9%)	11,755 (49.9%)
Total	64,213	8,367 (13.0%)	19,482 (30.3%)	36,363 (56.6%)

What does this mean for Oklahoma?

This report suggests a number of possible ways forward for the Oklahoma Housing Finance Agency as it continues to support quality low-income and workforce housing for residents of the state. Across a number of indicators of opportunity, affordable housing in the state clusters in ways that raise concerns about the opportunities available to affordable housing residents in comparison to other residents.

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

Moving ahead, Oklahoma should be wary of a narrowly focused vision focused solely on the problems of existing affordable housing and the integration of these residents into other communities. The relocation of residents harkens back to the physical and social destruction brought about by urban renewal. Such an approach pits efforts to enhance existing affordable housing through community development against efforts to build a more integrated and diverse society (Goetz 2015). Rather, Oklahoma has the opportunity to work closely with local municipalities to improve the conditions of current affordable housing communities while simultaneously advancing integration of low-income and workforce housing through the construction in new settings.

For future new development, a number of case studies and emerging scholarship on the importance of neighborhood effects provide guidance on possible ways forward for Oklahoma. For instance, in El Paso, Texas a public private partnership between the Housing Authority of the City of El Paso and private developers led to the development of a mixed income housing development. Eastside Crossings (http://www.hacep.org/about-us/eastside-crossings) provides 74 traditional affordable housing units, 79 affordable housing units, and 45 market rate units in partnership with the Texas Department of Housing and Community Affairs (Housing Authority of El Paso 2015). In Sacramento, partnership between private developers and the Capital Area Redevelopment Authority resulted in the adaptive reuse of a building listed on the National Register of Historic Buildings into affordable Housing (Vellinga 2015). Located in a dense, walkable, transit-oriented community, the Warehouse Artist Lofts (http://www.rstreetwal.com) are home to 116 units, 86 of which are affordable and 13,000 square feet of ground floor retail.

For existing affordable housing, strategies exist to help enhance localized opportunities and build a culture of community participation around housing. Across the nation, there is a need to refocus the discussion away from the deficits found in many communities to look for closely at opportunities (Lens 2015) and to think about the consequences of physical, social, and economic isolation (Clarke, Morenoff, Debbink, Golberstein, Elliott, & Lantz, 2014.).

The Oklahoma Housing Finance Agency may need to collaborate more closely with other governmental agencies to develop comprehensive strategies that not only improve existing housing but also work toward enhancing access to food, recreation, amenities, jobs, and quality schools. By doing so, OHFA could help build the social and physical resiliency of these communities so that residents would be empowered to choose for themselves whether or not they want to stay and be part of their existing community or move elsewhere in search of a better quality of life. A set of tools for doing some of this work is available through Policy Link (http://www.policylink.org/equity-tools/equitable-development-toolkit/about-toolkit). For those who are relocated due to circumstances that make staying in place impossible, intensive case management may be required to ensure that these residents avoid pitfalls and thrive in a new environment (Theodos, Popkin, Guernsey, & Getsinger, 2010). But evidence continues to suggest that stability, particularly in the lives of children, is an essential part of ensuring that everyone has the opportunity to succeed and thrive (HUD 2014).

Lead-Based Paint Hazards

Findings / Health and Well-being

Lead is known to be highly toxic particularly to young children 5 years of age and under. Excessive exposure results in reduced intelligence, impaired hearing, reduced stature and a host of other negative health effects. It is well documented that a common source of lead exposure for children is lead-based paint in older housing along with the dust and soil it generates. Children are exposed to lead-based paint most commonly by directly eating paint chips or indirectly by ingesting lead-contaminated house dust or soil through normal hand-to-mouth contact.

For purposes of this analysis, the federal definition of "lead-based paint hazard" at 24 CFR Part 35.86 was applied. Under this definition, lead-based paint hazard is defined as, "...any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as established by the appropriate Federal agency."

It is noteworthy estimates presented can only be stated as dwellings that "potentially" have LBP hazards because there are no real-time surveys or studies of residential structures built prior to 1978. However, there have been previous estimations provided in the state's Consolidated Plan.

Statewide Findings

Using methodology which will be discussed later in this section, we have estimated the number of housing units in Oklahoma with lead-based paint hazards as defined in 24 CFR Part 35.86. Our estimates are shown in the following table.

Lead-Based Paint Hazards in Oklahoma		
	Number	Percent
Total Housing Units	1,432,730	
Total Housing Units with Lead-Based Paint Hazards	240,229	16.8%
Owner-Occupied Units w/LBP Hazards	159,861	66.5%
Renter-Occupied Units w/LBP Hazards	80,368	33.5%
Housing Units w/LBP Hazards Occupied by Low-to-Moderate Income Households	113,931	47.4%
Housing Units w/LBP Hazards with Children < 6 Years of Age Present	37,426	15.6%
Housing Units w/LBP Hazards Occupied by LMI Households and Children < 6 Years of Age Present	19,761	52.8%
Sources: American Healthy Homes Survey Table 5-1 & CHAS Tables 12 & 13		

As shown, we estimate that there are 240,229 housing units in Oklahoma containing lead-based paint hazards, representing 16.8% of Oklahoma's total housing stock. 66.5% of those units are owner-occupied, while 33.5% are renter-occupied. Of the 240,229 housing units containing lead-based paint hazards, 113,931 units, or 47.4%, are occupied by households with low-to-moderate incomes as defined by HUD. Among all housing units with lead-based paint hazards, 37,426 units have children under the age of six present, and 52.8% of those units, or 19,761 units total, are households with low-to-moderate incomes. Exhibits 2 through 6, found at the end of this section, graphically summarize our statewide findings at a county level.

Disaster Resiliency/ Economy and Society, Infrastructure and Environment

While communities strive to address lead-based paint hazards through education and removal when detected in connection with federally funded local housing rehabilitation initiatives, hazard detection and mitigation may have special considerations in terms of disaster resiliency.

Many disasters are accompanied by widespread damage to residential structures often times scattering building material debris across the landscape necessitating removal by heavy equipment and disposal in landfills. When building materials contaminated with lead-based paint become part of non-contaminated debris disposal, it presents an environmental hazard that can span well beyond recovery and rebuilding efforts.

Leadership and Strategy

Given the albeit large but finite number of potential housing units with lead hazards, the state and local communities may wish to consider initiatives aimed at reducing and/or eventually eliminating residential lead-based paint hazards, particularly in housing occupied by low and moderate income households with young children present. One such initiative could be the use of the state's various federal and state housing programs' competitive funding selection criteria. By designing rating criteria that specifically awards points to applicants that purposefully seek out properties within counties known to have higher percentages of lead hazards, housing developers along with those engaged in rehabilitation may be incentivized to engage in hazard mitigation.

State and local governments may wish to capitalize on the results of this study by using the data to support competitive applications to the Federal Home Loan Bank Topeka's Affordable Housing Program funding for owner occupied rehabilitation which, among other competitive rating criteria, awards points for the "Abatement of Hazardous Environmental Conditions". Similarly, this report's data may be used to document hazards and need in applications for competitive health care grants offered at the federal level.

Similar to initiatives undertaken by USHUD, the state may want to consider undertaking a real-time sample survey of homes built prior to 1978 across the state's community sizes and counties to more accurately ascertain the extent of the hazard and/or conducting real-time surveys of LBP Risk Assessors licensed by the ODEQ.

Survey of Previous Lead-based Paint Studies

Using a combination of US Census Bureau and US Department of Housing and Urban Development Comprehensive Housing Affordability Strategy data and age of housing stock built prior to 1980, the Oklahoma Department of Commerce's, "State of Oklahoma Five-Year E-Consolidated Plan FY 2014 – 2018" estimated 59% of the owner occupied and 65% of the renter occupied housing had the potential of containing lead-based paint. To address lead paint hazards, the Consolidated Plan recommended assessment of hazard presence be conducted at the point dwelling rehabilitation is undertaken and that nonprofits advise persons receiving federal rehabilitating assistance regarding the dangers of lead exposure.

At the national level, between 1998 and 2000, USHUD Office of Health Homes and Lead Hazard Control staff and the National Institute of Environmental Health Sciences conducted a real-time

random sampling of 831 permanently occupied housing units (multifamily, single family and mobile homes) taken from all 50 states and the District of Columbia. The results indicated an estimated 38 million (39% of the 96 million total housing units) of the nation's housing units had lead-based paint hazards. Of that total, 24 million had significant lead hazards with 1.2 million of those units occupied by low income families. It was further estimate that 35% of all low income housing had lead-based paint hazards. The study also noted the prevalence of lead-based paint increases with age of housing. However, most painted surfaces, even in older homes don't have lead paint. Geography was found to be related to the incidence of lead-based paint with the Northeast and Midwest having 2 times the prevalence of lead paint than the South and West. Finally, the study recommends "public-private sector resources be directed units posing the greatest risk" as a preventive measure to avoid lead poisoning.

In April 2011, the U.S. Department of Housing and Urban Development, Office of Healthy Homes and Lead Hazard Control updated its 1998-2000 nationwide report in its publication, "American Healthy Homes Survey, Lead and Arsenic Findings". This report, conducted from June 2005 through March 2006, estimated 37.1 million homes (34.9%) out of a total of 106 million total housing units have lead-based paint somewhere in the building. Of the 65.6 million homes built before 1978, 34.4 million (52%) have lead-based paint. The study reaffirmed the previous finding that the prevalence of lead-based paint is higher in the Northeast and Midwest parts of the United States than South and West. It also confirmed earlier finding that the incidence of lead-based paint increases with age of housing with 86% of the homes built prior to 1940 containing lead. An estimated 3.6 million homes with children less than 6 years of age have lead-based paint hazards of which 1.1 million are low income households. Of the 16.8 million homes with children under the age of 6, 5.7 million (34%) have lead-based paint, about the same incidence of lead-based paint in all homes.

In June 2006, the Oklahoma State Department of Health's Childhood Lead Poisoning Prevention Program (OCLPPP) received a 5-year project grant "Oklahoma Childhood Lead Poisoning Prevention Program Focusing in High Risk Groups". That program focused on communities evidencing high numbers of children 6-72 months of age who are at high risk for lead poisoning.

In order to more effectively target high-risk areas and populations, the OCLPPP identified 21 high-risk target area (HRTA) zip codes (see Exhibit #1) located within Oklahoma, Tulsa, Muskogee, Jackson, Okmulgee, Ottawa, Kay, Garfield, and Hughes counties. These 21 zip codes were narrowed from a list of 57 zip codes out of the state's approximately 700 zip codes that with populations of 5,000 or more persons; greater than or equal to 22% of housing stock built prior to 1950; and, greater than or equal to 18% of children under the age of 6 years living below the poverty level.

The 57 zip codes were further compared and evaluated based on selected characteristics such as EBLL cases and proportion of minority population. Zip codes with higher EBLL prevalence and/or minority populations (Hispanic/African American/American Indian) were ranked higher and given the designation as HRTA zip codes.

Kiowa County Findings

The number of housing units in Kiowa County containing lead-based paint hazards can be estimated by applying the percentages of housing units with such hazards reported by the American Healthy

Homes Survey, to the number of occupied homes in Kiowa County, by year of construction. The following table presents the percentage of housing units in the Census Bureau South Region based on the AHHS findings.

Housing Units in the South Census Region with Lead-Based Paint Hazards by Year of Construction						
	No. of Housing	Units w/ LBP	Percent of Units			
Year of Construction	Units (000s)	Hazards (000s)	w/ LBP Hazards			
1978-2005	18,625	664	3.6%			
1960-1977	11,724	1,311	11.2%			
1940-1959	5,575	2,145	38.5%			
1939 or Earlier	3,072	1,947	63.4%			
Total 38,996 6,067 15.6%						
Source: U.S. Dept. of Housing and Urban Development, American Healthy Homes Survey, Table 5-1						

These percentages can then be applied to the number of housing units in Kiowa County, by year of construction and by tenure (owner-occupied versus renter-occupied), as reported by HUD's Comprehensive Housing Affordability Strategy (CHAS) data for Kiowa County.

Total Housing Units in Kiowa County with Lead-Based Paint Hazards by Tenure

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12							

To conclude, we estimate that there are a total of 1,096 homes in Kiowa County containing lead-based paint hazards, 802 owner-occupied and 294 renter-occupied. Of the 1,096 homes in the county estimated to have lead-based paint hazards, 323 are estimated to be occupied by households with low-incomes (incomes less than 50% of Area Median Income), and 230 are estimated to be occupied by households with moderate incomes (between 50% and 80% of Area Median Income), for a total of 553 housing units in Kiowa County with lead-based paint hazards occupied by households with low or moderate incomes.

Lead-Based Paint Hazards in Homes with Children Present

Using the same methodology, we can estimate the number of housing units in Kiowa County occupied by households with children under the age of six present. For this analysis we apply the lead-based paint hazards percentages from the American Healthy Homes Survey to the data in HUD CHAS Table 13, which details housing units by year of construction, household income, and presence of children under the age of six. The data is presented in the following table:

Housing Units in Kiowa Co	unty with Lead-	Based Paint Ha	zards	
with Children under Age 6	Present Occupi	ed by Low or N	Ioderate-Incom	ne Families
Housing Units < 50% AMI w/	Total Housing	Percent w/LBP	Number w/LBP

Total	521	25.23%	131	
Sources: American Healthy Homes	Survey Table 5-1 & C	HAS Table 13		

As shown, we estimate there are 131 housing units in Kiowa County with lead-based paint hazards and children under the age of six present, and that 86 of those housing units are occupied by families with low to moderate incomes.

Conclusions

The previous analysis has attempted to describe the state of the residential housing market in Kiowa County, Oklahoma. Where possible, information regarding the population centers of the county was included to assess need on a community level. Much of the information is based on demographic information from local authorities and national information services. However, personal interviews were performed with property owners and managers, real estate professionals, and community officials in an effort to substantiate information from the national organizations and understand current market conditions. Several important issues regarding housing have become apparent through this analysis and are identified below.

Kiowa County has steadily declined in population for the last fifteen years, continuing a trend since the 1930 Census (excepting the 1980 Census which showed slight growth since 1970). Although Nielsen SiteReports projects some population and household growth over the next five years, this is unlikely in light of SKF USA announcing closure of its Hobart plant, which will impact over 100 jobs in the area. Without any significant new employment opportunities in the area, it is unlikely that the trend of declining population and household levels will reverse in the near future. However, for the most part housing unit occupancy appears very high in Hobart, and given the age of the area's housing stock, there is likely at least some need for preservation / rehabilitation of existing housing stock.

Kiowa County has a relatively moderate rate of renters with high rent costs (30.32%) as well as homeowners with high ownership costs (12.11%). The county's poverty rate is also above the state, at 22.57% compared with 16.85% statewide.

In terms of disaster resiliency we note that 73 tornadoes have impacted the county between 1959 and 2014, with nine injuries and two fatalities combined, and that the National Climatic Data Center notes 27 flood events in Kiowa County since 1993.

Kiowa County is located within the Southwest Oklahoma Continuum of Care (CoC), which provides services to the area's homeless populations among other functions. Throughout the entire Southwest Oklahoma CoC, there are an estimated 239 homeless persons, 177 of which are estimated to be sheltered. This Continuum of Care has a disproportionately high number of homeless veterans, and at least 8 homeless households comprised only of children. Investment should be made for more temporary and permanent housing for homeless veterans in this region.

Due to the age of the county's housing stock, lead-based paint hazards are an issue, with an estimated 1,096 occupied housing units with such hazards, and 131 of those units occupied by low-to-moderate income households with children under the age of 6 present.

The housing stock of Kiowa County is aging, and some limited need exists for preservation or rehabilitation of existing housing, and potentially some limited housing need for special needs populations. We note that the population age 62 and up is projected to increase 2.16% per year over the next five years, and that 20.09% of Kiowa County's population has one or more disabilities (compared with 15.59% statewide). A relatively small amount of housing, particularly reasonably

affordable housing for households earning less than area median income, would likely be beneficial to the needs of households, particularly renters and owners that are cost overburdened.

Addendum A

Acknowledgments

The Housing Needs Assessment research team extends a special thanks to the following individuals and organizations for their many contributions of data, program information and time that helped make this project possible:

David A. Puckett

Experience

Senior Director with Integra Realty Resources - Oklahoma, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since May 2002, Mr. Puckett has performed appraisal services consisting of narrative and summary real estate appraisals. All types of real property are encompassed-apartments, garden office buildings, manufacturing and warehouse industrial buildings, mobile home parks, restaurants and retail structures. Valuations and market studies have been prepared on proposed and existing structures. Appraisals have been made for estates, mortgage financing, equity participation and due diligence support. Prior to his employ at Integra Realty Resources - Oklahoma, Mr. Puckett was an employee of the University of Oklahoma Center for Business and Economic Development, working as a data analyst for the All County Affordable Housing Study commissioned by the Oklahoma Department of Commerce. Responsibilities included demographic, economic and real estate data collection from federal, state and local sources, as well as interviews of regional planning district, county and municipal officials, real estate market experts and local economic development experts. Mr. Puckett was responsible for site visits of 23 of the 77 Oklahoma counties, and personally authored 18 of the final reports. As an employee of IRR-Oklahoma, Mr. Puckett also performed the site visits and authored the final reports for four of the nine entitlement cities: Tulsa, Broken Arrow, Shawnee and Lawton. Mr. Puckett has also completed numerous housing market studies for use in applications for Federal Low-Income Housing Tax Credits in Oklahoma, Kansas, Missouri and Arkansas, and has performed market studies and appraisals for use in H.U.D.'s Multifamily Accelerated Processing (M.A.P.) program. Clients served include corporations, financial institutions, investment firms and public/private agencies.

BACKGROUND SUMMARY

<u>Executive Manager</u> with extensive experience in public sector resource design, management and evaluation. Knowledge and skills include: structuring and design of state and local service programs and initiatives, developing written proposals for project financing, identifying community economic development resources and training.

EXPERIENCE

DeBruler, Inc.

Vice President, Oklahoma City, August 2001 to Present

Provide services including:

- Researching public and private resources and preparing applications for financial assistance in response to client requests for economic and community development projects.
- ✓ Technical assistance to nonprofits and units of local government regarding federal and state resources and structuring project-beneficial partnerships; preparing strategic and business plans for public and private sector entities.
- ✓ Group facilitation services.
- Technical training for nonprofits and units of local government regarding federal and state financial assistance programs. Conducting organizational assessments and developing capacity building curriculums.

Oklahoma Housing Finance Agency

<u>Team Leader, Housing Development Team</u>, Oklahoma City, July 1998 to July 2001 Provided direct supervision and oversight of sixteen staff engaged in the administration of multiple federal and state affordable housing program resources.

While employed by the agency:

- Reorganized state's Single Family Mortgage Revenue Bond, Low-income Housing Tax Credit, HOME Investment Partnerships and Housing Trust Fund Programs into a single work unit.
- ✓ Streamlined Low-income Housing Tax Credit Program administrative rules to provide for market responsive design flexibility.
- ✓ Streamlined affordable housing resources by developing a singular application package and process for the agency's affordable housing development resources and established e-information network.
- ✓ Facilitated the development of working partnerships between the state's nonprofit and forprofit housing development organizations and agency's mortgage revenue bond lenders.
- ✓ Financed the development of affordable housing by leveraging public sector development funds with private investments.

- ✓ Facilitated legislative task force on rural affordable housing issues and devised legislative and programmatic actions to spur rural development.
- ✓ Developed, financed and implemented the state's first statewide affordable housing market analysis in partnership with a major university center.
- ✓ Drafted enabling legislation, capitalized and implemented state's Housing Trust Fund.

Oklahoma Department of Commerce

Program Manager/Department Head, Oklahoma City, March 1988 to July 1998

- ✓ In response to market-based demand, directed a team of professional agency staff with diverse skills, in the redesign of the state's HOME Investment Partnerships Program from primarily rehabilitation services to the production of rural affordable housing units.
- ✓ Led HOME Program administrative team in the relocation of the Program from its state agency environment to the Oklahoma Housing Finance Agency, a public trust.
- ✓ Leveraged HOME Program development resources with other public and private debt capital to finance the development of rural affordable housing statewide.
- ✓ Formulated and implemented a legislative agenda to enact and capitalizing the state's Housing Trust Fund.
- Provided daily oversight and administration for several state administered federal programs including: U.S. Department of Energy State Energy Program, Community Development Block Grant, Home Investment Partnerships, Rental Rehabilitation, Solar Energy and Energy Conservation Bank, and State Appropriated Funds for regional councils of government.
