

Housing Needs Assessment
Cimarron County

Prepared For:

Oklahoma Housing Finance Agency
Oklahoma Department of Commerce
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

Effective Date of the Analysis:

October 20, 2015

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

October 30, 2015

Mr. Dennis Shockley, Executive Director
Oklahoma Housing Finance Agency
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

SUBJECT: Housing Needs Assessment
 Cimarron County
 IRR - Tulsa/OKC File No. 140-2015-0026

Dear Mr. Shockley:

As per our Agreement with Oklahoma Housing Finance Agency (OHFA), we have completed a residential housing market analysis (the "Analysis") for use by OHFA and the Oklahoma Department of Commerce (ODOC). Per our Agreement, OHFA and ODOC shall have unrestricted authority to publish, disclose, distribute and otherwise use, in whole or in part, the study and reports, data or other materials included in the Analysis or otherwise prepared pursuant to the Agreement and no materials produced in whole, or in part, under the Agreement shall be subject to copyright in the United States or any other country. Integra Realty Resources – Tulsa/OKC will cause the Analysis (or any part thereof) and any other publications or materials produced as a result of the Agreement to include substantially the following statement on the first page of said document:

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Attached hereto, please find the Cimarron County Residential Housing Market Analysis. Analyst Sarah Kin personally inspected the Cimarron County area during the month of October 2015 to collect the data used in the preparation of the Cimarron County Market Analysis. The University of Oklahoma College of Architecture Division of Regional and City Planning provided consultation, assemblage and analysis of the data for IRR-Tulsa/OKC.

Mr. Dennis Shockley
Oklahoma Housing Finance Agency
October 30, 2015

Introduction and Executive Summary

This report is part of a Statewide Affordable Housing Market Study commissioned by the Oklahoma Department of Commerce (ODOC) in partnership with the Oklahoma Housing Finance Agency (OHFA), as an outgrowth of the 2013 tornado outbreak in Oklahoma. It was funded by the U.S. Department of Housing and Urban Development (USHUD) through the Community Development Block Grant – Disaster Recovery program (CDBG-DR). This study was conducted by a public/private partnership between Integra Realty Resources – Tulsa/OKC, the University of Oklahoma College of Architecture, Division of Regional and City Planning, and DeBruler Inc. IRR-Tulsa/OKC, The University of Oklahoma, and DeBruler Inc. also prepared a prior statewide study in 2001, also commissioned by ODOC in partnership with OHFA.

This study is a value-added product derived from the original 2001 statewide housing study that incorporates additional topics and datasets not included in the 2001 study, which impact affordable housing throughout the state. These topic areas include:

- Disaster Resiliency
- Homelessness
- Assessment of Fair Housing
- Evaluation of Residential Lead-Based Paint Hazards

These topics are interrelated in terms of affordable housing policy, housing development, and disaster resiliency and recovery. Homeless populations are more vulnerable in the event of a disaster, as are many of the protected classes under the Fair Housing Act. Lead-based paint is typically more likely to be present in housing units occupied by low-to-moderate income persons, and can also present an environmental hazard in the wake of a disaster. Effective affordable housing policy can mitigate the impact of natural and manmade disasters by encouraging the development and preservation of safe, secure, and disaster-resilient housing for Oklahoma’s most vulnerable populations.

Housing Market Analysis Specific Findings:

1. The population of Cimarron County has been declining since the 2000 census. Countywide population has declined by 28.6% since 2000.
2. Little to no new residential construction has occurred in Cimarron County over the previous decade. A comprehensive search of Cimarron County records indicates that there are nine residential units in the county that were built during or after 2004. The building permits survey from the U.S. Census Bureau indicates that no residential building permits were issued in the county after 2004.
3. Although the number of households is projected to decline over the next several years, the number of housing units is also declining, leading to a shortage of good quality housing.
4. Median Household Income in Cimarron County is estimated to be \$42,134 in 2015, compared with \$47,049 estimated for the State of Oklahoma. The poverty rate in Cimarron County is estimated to be 20.03%, compared with 16.85% for Oklahoma.
5. Home values and rental rates in Cimarron County are well below the state averages, making new residential construction not cost feasible.

Disaster Resiliency Specific Findings:

1. Create and maintain the county HMP
2. Apply for grants/funding to develop a county hazard mitigation plan.
3. Create a shelter registry for location of individual and business-based shelters (online or paper)
4. Tornadoes (1959-2014): Number: 42 Injuries: 3 Fatalities: 0 Damages (1996-2014): \$450,000.00
5. Social Vulnerability: Similar to overall state level at county level; The area of higher level of social vulnerability by census tract is the Boise City area.
6. Floodplain: updated flood maps not available.

Homelessness Specific Findings

1. Cimarron County is located in the Oklahoma Balance of State Continuum of Care.
2. There are an estimated 295 homeless individuals in this area, 154 of which are identified as sheltered.
3. Homeless children under the age of 18 are more likely to be unsheltered than sheltered.
4. Many homeless persons are victims of domestic violence, totaling 75 people.
5. Very few units are available for occupation by families with children (14), and there is a need to grow the number of units that are available for this group of homeless and the children in their care.

Fair Housing Specific Findings

1. Units farther than 15 miles to a Hospital: 8
2. Units located in a Food Desert: 69
3. Units that lack readily available Transit: 69

Lead-Based Paint Specific Findings

4. We estimate there are 292 occupied housing units in Cimarron County with lead-based paint hazards.
5. 137 of those housing units are estimated to be occupied by low-to-moderate income households.
6. We estimate that 33 of those low-to-moderate income households have children under the age of 6 present.

Report Format and Organization

The first section of this report comprises the housing market analysis for Cimarron County. This section is divided into general area information, followed by population, household and income trends and analysis, then followed by area economic conditions. The next area of analysis concerns the housing stock of Cimarron County, including vacancy rates, construction activity and trends, and analyses of the homeowner and rental markets. This section is followed by five-year forecasts of housing need for owners and renters, as well as specific populations such as low-to-moderate income households, the elderly, and working families.

The next section of this report addresses special topics of concern:

- Disaster Resiliency
- Homelessness
- Fair Housing
- Lead-Based Paint Hazards

This last section is followed by a summary of the conclusions of this report for Cimarron County.

General Information

Purpose and Function of the Market Study

The purpose of this market study is to evaluate the need for affordable housing units in Cimarron County, Oklahoma. The analysis will consider existing supply and projected demand and overall market trends in the Cimarron County area.

Effective Date of Consultation

The Cimarron County area was inspected and research was performed during October, 2015. The effective date of this analysis is October 20, 2015. The date of this report is October 30, 2015. The market study is valid only as of the stated effective date or dates.

Scope of the Assignment

1. The Cimarron County area was inspected during October, 2015. The inspection included visits to all significant population centers in the county and portions of the rural county areas.
2. Regional, city and neighborhood data is based on information retained from national, state, and local government entities; various Chambers of Commerce, news publications, and other sources of economic indicators.
3. Specific economic data was collected from all available public agencies. Population and household information was collected from national demographic data services as well as available local governments. Much data was gathered regarding market specific items from personal interviews.
4. Development of the applicable analysis involved the collection and interpretation of verified data from local property owners/managers, realtors, and other individuals active within the area real estate market.
5. The analyst's assemblage and analysis of the defined data provided a basis from which conclusions as to the supply of and demand for residential housing were made.

Data Sources

Specific data sources used in this analysis include but are not limited to:

1. The 2000 and 2010 Decennial Censuses of Population and Housing
2. The 2009-2013 American Community Survey (ACS)
3. U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division
4. The United States Department of Labor, Bureau of Labor Statistics, including the Local Area Unemployment Statistics and the Quarterly Census of Employment and Wages programs
5. The U.S. Department of Housing and Urban Development, including the Comprehensive Housing Affordability Strategy (CHAS), and the 2013 Picture of Subsidized Households
6. Continuum of Care Assistance Programs

7. The National Oceanic and Atmospheric Administration
8. Nielsen SiteReports (formerly known as Claritas)
9. The Oklahoma State Department of Health
10. The Oklahoma Department of Human Services
11. The Federal Reserve Bank of Kansas City, Oklahoma City Branch
12. The Federal Reserve Bank of New York

Cimarron County Analysis

Area Information

The purpose of this section of the report is to provide a basis for analyzing and estimating trends relating to Cimarron County. The primary emphasis is concentrated on those factors that are of significance to residential development users. Residential and commercial development in the community is influenced by the following factors:

1. Population and economic growth trends.
2. Existing commercial supply and activity.
3. Natural physical elements.
4. Political policy and attitudes toward community development.

Location

Cimarron County is located in northwestern Oklahoma, and is the furthest west county in the Oklahoma panhandle. Cimarron County shares a border with the State of Colorado to the north, the State of New Mexico to the west, and the State of Texas to the south. The Cimarron County Seat, Boise City, is approximately 110 miles northwest of the Amarillo, Texas central business district, 290 miles northwest of Oklahoma City, 250 miles northeast of Albuquerque, New Mexico, and 240 miles southeast of Denver, Colorado.

Cimarron County has a total area of 1,841 square miles (1,835 square miles of land, and 6 square miles of water), ranking 4th out of Oklahoma's 77 counties in terms of total area. The total population of Cimarron County as of the 2010 Census was 2,475 persons, for a population density of 1 person per square mile of land.

Access and Linkages

The county is served by the national highway system, but is removed from the interstate highway system. U.S. Highway 64 connects Boise City with the City of Guymon, Oklahoma, approximately 60 miles to the east. U.S. Highway 64 is primarily a two-lane highway that connects several northern Oklahoma communities, including Buffalo, Alva, and Cherokee, before merging with Interstate 35 in central Oklahoma. Cimarron County is also served by U.S. Highway 56, which traverses the county in a northeast/southwest direction. US-56 connects the Cimarron County communities of Felt, Boise City, and Keyes. US-56 merges with Interstate 25 at Springer, New Mexico, approximately 90 miles west of the western border of Cimarron County. US-56 also provides access to Dodge City, Kansas, a population center of approximately 28,159 persons, located approximately 125 miles northeast of the eastern border of Cimarron County.

Public transportation is not available in Cimarron County. The county is not served by passenger bus or rail service. The Boise City Airport is located four miles north of Boise City. This is a public, municipally

owned airport. It has a single asphalt runway approximately 4,200 feet in length, and averages approximately 67 aircraft operations per week. The nearest full-service commercial airport is the Rick Husband Amarillo International Airport, in Amarillo, Texas, located approximately 100 miles southeast.

Educational Facilities

Boise City, Felt, and Keyes have public school facilities. There are no colleges or universities within Cimarron County. The closest college is Oklahoma Panhandle State University, located in Goodwell, Oklahoma, approximately 50 miles southeast of Boise City.

Medical Facilities

County medical services are provided by the Cimarron Memorial Hospital, a critical access facility with 25 beds. The Cimarron Memorial Rural Health Clinic, located adjacent to the hospital, provides family practice medical care, physicals, and immunizations. The Oklahoma Dental Association does not list any actively practicing dentists in Cimarron County. Dental care is available in Guymon, Oklahoma, approximately 60 miles to the east of Boise City.

Demographic Analysis

Population and Households

The following table presents population levels and annualized changes in Cimarron County and Oklahoma. This data is presented as of the 2000 Census, the 2010 Census, with 2015 and 2020 estimates and forecasts provided by Nielsen SiteReports.

| Population Levels and Annual Changes | | | | | | | |
|---|-----------|-----------|--------|-----------|--------|-----------|--------|
| | 2000 | 2010 | Annual | 2015 | Annual | 2020 | Annual |
| | Census | Census | Change | Estimate | Change | Forecast | Change |
| Boise City | 1,483 | 1,266 | -1.57% | 1,166 | -1.63% | 1,097 | -1.21% |
| Cimarron County | 3,148 | 2,475 | -2.38% | 2,247 | -1.91% | 2,094 | -1.40% |
| State of Oklahoma | 3,450,654 | 3,751,351 | 0.84% | 3,898,675 | 0.77% | 4,059,399 | 0.81% |

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

The population of Cimarron County was 2,475 persons as of the 2010 Census, a -2.38% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Cimarron County to be 2,247 persons, and projects that the population will show -1.40% annualized decline over the next five years.

The population of Boise City was 1,266 persons as of the 2010 Census, a -1.57% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Boise City to be 1,166 persons, and projects that the population will show -1.21% annualized decline over the next five years.

The next table presents data regarding household levels in Cimarron County over the same periods of time. This data is presented both for all households (family and non-family) as well as family households alone.

| Households Levels and Annual Changes | | | | | | | |
|---|-----------|-----------|--------|-----------|--------|-----------|--------|
| Total Households | 2000 | 2010 | Annual | 2015 | Annual | 2020 | Annual |
| | Census | Census | Change | Estimate | Change | Forecast | Change |
| Boise City | 610 | 546 | -1.10% | 513 | -1.24% | 489 | -0.95% |
| Cimarron County | 1,257 | 1,047 | -1.81% | 966 | -1.60% | 909 | -1.21% |
| State of Oklahoma | 1,342,293 | 1,460,450 | 0.85% | 1,520,327 | 0.81% | 1,585,130 | 0.84% |
| Family Households | 2000 | 2010 | Annual | 2015 | Annual | 2020 | Annual |
| | Census | Census | Change | Estimate | Change | Forecast | Change |
| Boise City | 401 | 345 | -1.49% | 328 | -1.01% | 313 | -0.93% |
| Cimarron County | 868 | 705 | -2.06% | 649 | -1.64% | 612 | -1.17% |
| State of Oklahoma | 921,750 | 975,267 | 0.57% | 1,016,508 | 0.83% | 1,060,736 | 0.86% |

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

As of 2010, Cimarron County had a total of 1,047 households, representing a -1.81% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Cimarron County to have 966

households. This number is expected to experience a -1.21% annualized rate of decline over the next five years.

As of 2010, Boise City had a total of 546 households, representing a -1.10% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Boise City to have 513 households. This number is expected to experience a -0.95% annualized rate of decline over the next five years.

Population by Race and Ethnicity

The next table presents data regarding the racial and ethnic composition of Cimarron County based on the U.S. Census Bureau's American Community Survey.

2013 Population by Race and Ethnicity

| Single-Classification Race | Boise City | | Cimarron County | |

Source: Nielsen SiteReports

As of 2015, Nielsen estimates that the median age of Boise City is 42.4 years. This compares with the statewide figure of 36.6 years. Approximately 7.80% of the population is below the age of 5, while 24.79% is over the age of 62. Over the next five years, the population age 62 and above is forecasted to decline by -0.70% per year.

Families by Presence of Children

The next table presents data for Cimarron County regarding families by the presence of children.

2013 Family Type by Presence of Children Under 18 Years

| | Boise City | | Cimarron County | |
|--|------------|---------|-----------------|---------|
| | No. | Percent | No. | Percent |

| \$100,000 - \$124,999 | 34 | 6.63% | 64 | 6.63% | 106,912 | 7.03% |
| \$125,000 - \$149,999 | 16 | 3.12% | 33 | 3.42% | 57,804 | 3.80% |
| \$150,000 - \$199,999 | 14 | 2.73% | 19 | 1.97% | 48,856 | 3.21% |
| \$200,000 - \$249,999 | 2 | 0.39% | 6 | 0.62% | 18,661 | 1.23% |
| \$250,000 - \$499,999 | 4 | 0.78% | 7 | 0.72% | 20,487 | 1.35% |
| \$500,000+ | 1 | 0.19% | 2 | 0.21% | 7,454 | 0.49% |
| Median Household Income | \$42,809 | | \$42,134 | | \$47,049 | |
| Average Household Income | \$55,663 | | \$55,694 | | \$63,390 | |

Source: Nielsen SiteReports

As shown, median household income for Cimarron County is estimated to be \$42,134 in 2015. By way of comparison, the median household income of Oklahoma is estimated to be \$47,049. For Boise City, median household income is estimated to be \$42,809 .

Household Income Trend

Next we examine the long-term growth of incomes in Cimarron County, from the results of the 2000 Census (representing calendar year 1999), through the current 2015 estimates provided by Nielsen SiteReports. This data is then annualized into a compounded annual growth rate to estimate nominal annual household income growth over this period of time. We then compare the rate of annual growth with the rate of inflation over the same period of time (measured using the Consumer Price Index for all urban consumers, South Region, Size Class D, from May 1999 through May 2015). Subtracting the annual rate of inflation from the nominal rate of annual income growth yields a “real” rate of income growth which takes into account the effect of increasing prices of goods and services.

| Household Income Trend | | | | | |
|-------------------------------|-------------|-------------|---------|-----------|--------|
| | 1999 Median | 2015 Median | Nominal | Inflation | Real |
| | HH Income | HH Income | Growth | Rate | Growth |
| Boise City | \$30,071 | \$42,809 | 2.23% | 2.40% | -0.17% |
| Cimarron County | \$30,625 | \$42,134 | 2.01% | 2.40% | -0.39% |
| State of Oklahoma | \$33,400 | \$47,049 | 2.16% | 2.40% | -0.23% |

Sources: 2000 Decennial Census, Summary File 3, Table P53; Nielsen SiteReports; CPI All Urban Consumers, South Region, Size Class D

As shown, both Cimarron County and the State of Oklahoma as a whole saw negative growth in “real” median household income, once inflation is taken into account. It should be noted that this trend is not unique to Oklahoma or Cimarron County, but rather a national trend. Over the same period, the

national median household income increased from \$41,994 to \$53,706 (for a nominal annualized growth rate of 1.55%) while the Consumer Price Index increased at an annualized rate of 2.26%, for a “real” growth rate of -0.72%.

Poverty Rates

Overall rates of poverty in Cimarron County and Oklahoma are shown in the following table. This data is included from the 2013 American Community Survey, as well as the 2000 Census to show how these rates have changed over the last decade. We also include poverty rates for single-parent families by gender of householder.

| | 2000 Census | 2013 ACS | Change (Basis Points) | 2013 Poverty Rates for Single-Parent Families | |
|-------------------|----------------|-------------|--------------------------|---|--------------------|
| | | | | Male Householder | Female Householder |
| Boise City | 19.12% | 21.49% | 237 | 0.00% | 74.07% |
| Cimarron County | 17.56% | 20.03% | 247 | 0.00% | 75.36% |
| State of Oklahoma | 14.72% | 16.85% | 213 | 22.26% | 47.60% |

Sources: 2000 Decennial Census Table P87, 2009-2013 American Community Survey Tables B17001 & B17023

The poverty rate in Cimarron County is estimated to be 20.03% by the American Community Survey. This is an increase of 247 basis points since the 2000 Census. Within Boise City, the poverty rate is estimated to be 21.49%. It should be noted that increasing poverty rates over this period of time is a national trend: between the 2000 Census and the 2013 American Community Survey, the poverty rate of the United States increased from 12.38% to 15.37%, an increase of 299 basis points.

Economic Conditions

Employment and Unemployment

The following table presents total employment figures and unemployment rates for Cimarron County, with figures for Oklahoma and the United States for comparison. This data is as of May 2015.

| Employment and Unemployment | | | | | | |
|------------------------------------|------------------------|------------------------|------------------|-------------------------|-------------------------|----------------|
| | May-2010 Employment | May-2015 Employment | Annual Growth | May-2010 Unemp. Rate | May-2015 Unemp. Rate | Change (bp) |
| Cimarron County | 1,378 | 1,479 | 1.42% | 4.0% | 2.3% | -170 |
| State of Oklahoma | 1,650,748 | 1,776,187 | 1.48% | 6.8% | 4.4% | -240 |
| United States (thsds) | 139,497 | 149,349 | 1.37% | 9.3% | 5.3% | -400 |

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As of May 2015, total employment in Cimarron County was 1,479 persons. Compared with figures from May 2010, this represents annualized employment growth of 1.42% per year. The unemployment rate in May was 2.3%, a decrease of -170 basis points from May 2010, which was 4.0%. Over the last five years, both the statewide and national trends have been improving employment levels and declining unemployment rates; while the unemployment rate in Cimarron County has not declined as dramatically as it has at statewide and national levels, it is notable that in May 2010, the unemployment rate in Cimarron County was dramatically lower than national indications.

Employment Level Trends

The following chart shows total employment and unemployment levels in Cimarron County from January 2000 through May 2015, as reported by the Bureau of Labor Statistics, Local Area Unemployment Statistics program.

Employment and Unemployment in Cimarron County
January 2000 through May 2015

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics

As shown, total employment levels have generally trended downward from 2000 through mid-2008. Although employment increased in the first quarter of 2010, and then generally stayed at that level through the end of 2011, declines in 2012 and 2013 brought total employment to its lowest levels in fifteen years. Employment growth resumed in the first quarter of 2014, bringing total employment to its current level of 1,479 persons. The number of unemployed persons in May 2015 was 35, out of a total labor force of 1,514 persons.

Unemployment Rate Trends

The next chart shows historic unemployment rates for Cimarron County, as well as Oklahoma and the United States for comparison. This data covers the time period of January 2000 through May 2015, and has not been seasonally adjusted.

**Unemployment Rates in Cimarron County, Oklahoma and the United States
January 2000 through May 2015**

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As shown, unemployment rates in Cimarron County have generally remained stable over the past fifteen years. The national economic recession, which is clearly identifiable in unemployment rates for the United States and the State of Oklahoma, did not have a measurable impact on unemployment rates in Cimarron County.

Employment and Wages by Industrial Supersector

The next table presents data regarding employment in Cimarron County by industry, including total number of establishments, average number of employees in 2014, average annual pay, and location quotients for each industry compared with the United States. This data is furnished by the Bureau of Labor Statistics, Quarterly Census of Employment and Wages program.

Employees and Wages by Supersector - 2014

| Supersector | Establishments | Avg. No. of Employees | Percent of Total | Avg. Annual Pay | Location Quotient |
|--------------------------------------|----------------|-----------------------|------------------|-----------------|-------------------|
| Federal Government | 7 | 16 | 2.34% | \$33,826 | 1.17 |
| State Government | 5 | 16 | 2.34% | \$32,880 | 0.70 |
| Local Government | 16 | 242 | 35.43% | \$25,686 | 3.51 |
| Natural Resources and Mining | 9 | 148 | 21.67% | \$36,764 | 14.29 |
| Construction | 4 | N/A | N/A | N/A | N/A |
| Manufacturing | 1 | N/A | N/A | N/A | N/A |
| Trade, Transportation, and Utilities | 20 | 106 | 15.52% | \$28,154 | 0.81 |
| Information | 2 | N/A | N/A | N/A | N/A |
| Financial Activities | 8 | 36 | 5.27% | \$34,764 | 0.94 |
| Professional and Business Services | 5 | 10 | 1.46% | \$38,192 | 0.10 |

| Total | 95 | 683 | | \$28,065 | 1.00 |

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Employment Sectors - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Among private employers, the largest percentage of persons (21.67%) are employed in Natural Resources and Mining. The average annual pay in this sector is \$36,764 per year. The industry with the highest annual pay is Professional and Business Services, with average annual pay of \$38,192 per year.

The rightmost column of the previous table provides location quotients for each industry for Cimarron County, as compared with the United States. Location quotients (LQs) are ratios used to compare the concentration of employment in a given industry to a larger reference, in this case the United States. They are calculated by dividing the percentage of employment in a given industry in a given geography (Cimarron County in this instance), by the percentage of employment in the same industry in the United States. For example, if manufacturing in a certain county comprised 10% of total employment, while in the United States manufacturing comprised 5% of total employment, the location quotient would be 2.0:

$$10\% (\text{county manufacturing \%}) / 5\% (\text{U.S. manufacturing \%}) = 2.0$$

Location quotients greater than 1.0 indicate a higher concentration of employment compared with the nation, and suggest that the industry in question is an important contributor to the local economic base. Quotients less than 1.0 indicate that the industry makes up a smaller share of the local economy than the rest of the nation.

Within Cimarron County, among all industries the largest location quotient is in Natural Resources and Mining, with a quotient of 14.29.

The next table presents average annual pay in Cimarron County by industry, in comparison with Oklahoma as a whole and the United States.

Comparison of 2014 Average Annual Pay by Supersector

| Supersector | Cimarron County | State of Oklahoma | United States | Percent of State | Percent of Nation |
|--------------------------------------|--------------------|----------------------|------------------|---------------------|----------------------|

| Median Year Built: | | 1977 | | 1973 | | 1975 |
| Overall Median Year Built: | | 1963 | | 1965 | | 1976 |

Sources: 2009-2013 American Community Survey, Tables B25035, B25036 & B25037

Within Cimarron County, 3.56% of housing units were built after the year 2000. This compares with 15.22% statewide. Within Boise City the percentage is 2.26%.

79.85% of housing units in Cimarron County were built prior to 1990, while in Boise City the percentage is 71.87%. These figures compare with the statewide figure of 72.78%.

Substandard Housing

The next table presents data regarding substandard housing in Cimarron County. The two most commonly cited figures for substandard housing are a lack of complete plumbing, and/or a lack of a complete kitchen. We have also included statistics regarding homes heated by wood, although this is a

less frequently cited indicator of substandard housing since some homes (particularly homes for seasonal occupancy) are heated by wood but otherwise not considered substandard.

The Census Bureau definition of inadequate plumbing is any housing unit lacking any one (or more) of the following three items:

1. Hot and cold running water
2. A flush toilet
3. A bathtub or shower

Inadequate kitchens are defined by the Census Bureau as housing units lacking any of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

2013 Substandard Housing Units

| | Occupied | Inadequate Plumbing | | Inadequate Kitchen | | Uses Wood for Fuel | |
|-------------------|-----------|---------------------|---------|--------------------|---------|--------------------|---------|
| | Units | Number | Percent | Number | Percent | Number | Percent |
| Boise City | 487 | 0 | 0.00% | 0 | 0.00% | 11 | 2.26% |
| Cimarron County | 1,067 | 6 | 0.56% | 8 | 0.75% | 26 | 2.44% |
| State of Oklahoma | 1,444,081 | 7,035 | 0.49% | 13,026 | 0.90% | 28,675 | 1.99% |

Sources: 2009-2013 American Community Survey, Tables B25040, B25048 & B25052

Within Cimarron County, 0.56% of occupied housing units have inadequate plumbing (compared with 0.49% at a statewide level), while 0.75% have inadequate kitchen facilities (compared with 0.90% at a statewide level). It is likely that there is at least some overlap between these two figures, among units lacking both complete plumbing and kitchen facilities.

Vacancy Rates

The next table details housing units in Cimarron County by vacancy and type. This data is provided by the American Community Survey.

2013 Housing Units by Vacancy

| | Boise City | | Cimarron County | | State of Oklahoma | |
|--|------------|---------|-----------------|---------|-------------------|---------|
| | No. | Percent | No. | Percent | No. | Percent |

| Other vacant | 195 | 70.14% | 356 | 68.99% | 101,155 | 44.81% |
| Homeowner Vacancy Rate | 2.54% | | 2.72% | | 2.31% | |
| Rental Vacancy Rate | 14.29% | | 8.96% | | 8.24% | |

Source: 2009-2013 American Community Survey, Tables B25001, B25003 & B25004

Within Cimarron County, the overall housing vacancy rate is estimated to be 32.60%. The homeowner vacancy rate is estimated to be 2.72%, while the rental vacancy rate is estimated to be 8.96%.

In Boise City, the overall housing vacancy rate is estimated to be 36.34%. The homeowner vacancy rate is estimated to be 2.54%, while the rental vacancy rate is estimated to be 14.29%.

Building Permits

The U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division publishes a report of residential building permits issued for single family and multifamily units. Both Boise City and Cimarron County as a whole reported zero residential building permits issued over the 2004-2014 period. A search of the Cimarron County records indicated that there are nine single family residences in Cimarron County that were built after 2004. No multifamily structures built after 2004 were identified. This data is consistent with our interviews with local officials, all of whom indicated little to no housing growth in the area over the previous decade.

Homeownership Market

This section will address the market for housing units for purchase in Cimarron County, using data collected from both local and national sources.

Housing Units by Home Value

The following table presents housing units in Cimarron County by value, as well as median home value, as reported by the Census Bureau's American Community Survey.

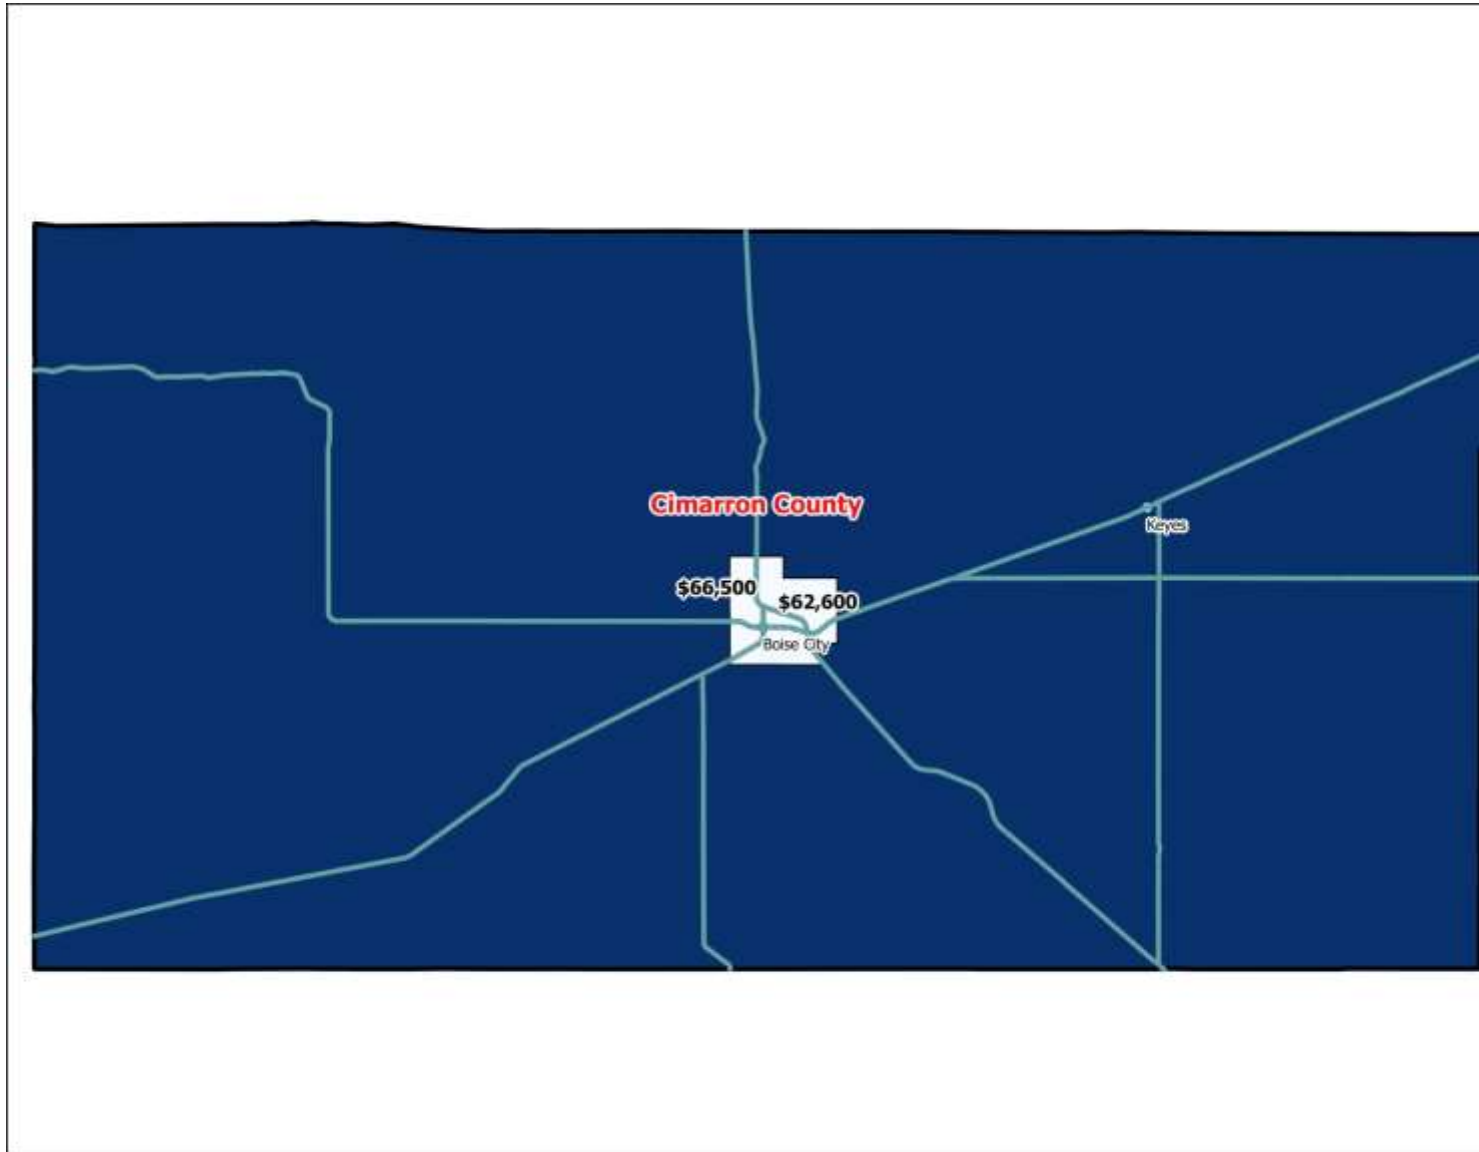

2013 Housing Units by Home Value

| | Boise City | | Cimarron County | | State of Oklahoma | |
|------------------------------------|-----------------|---------|-----------------|---------|-------------------|---------|
| | No. | Percent | No. | Percent | No. | Percent |

Sources: 2009-2013 American Community Survey, Tables B25075 and B25077

The median value of owner-occupied homes in Cimarron County is \$64,700. This is -42.6% lower than the statewide median, which is \$112,800. The median home value in Boise City is estimated to be \$59,300. The geographic distribution of home values in Cimarron County can be visualized by the following map.

Cimarron County Median Home Values by Census Tract

Home Values by Year of Construction

The next table presents median home values in Cimarron County by year of construction. Note that missing data fields indicate the Census Bureau had inadequate data to estimate a median value for that bracket.

| 2013 Median Home Value by Year of Construction | | | |
|---|------------------------------------|---|---|
| | Boise City Median Value | Cimarron County Median Value | State of Oklahoma Median Value |
| Total Owner-Occupied Units: | | | |
| Built 2010 or Later | - | - | \$188,900 |
| Built 2000 to 2009 | - | \$85,000 | \$178,000 |
| Built 1990 to 1999 | \$102,800 | \$85,500 | \$147,300 |
| Built 1980 to 1989 | \$85,000 | \$85,000 | \$118,300 |
| Built 1970 to 1979 | \$101,300 | \$95,000 | \$111,900 |
| Built 1960 to 1969 | \$52,700 | \$59,700 | \$97,100 |
| Built 1950 to 1959 | \$57,800 | \$54,700 | \$80,300 |
| Built 1940 to 1949 | \$27,500 | \$51,300 | \$67,900 |
| Built 1939 or Earlier | \$69,200 | \$68,800 | \$74,400 |

Note: Dashes indicate the Census Bureau had insufficient data to estimate a median value.

Boise City Single Family Sales Activity

Boise City Single Family Sales Activity All Bedroom Types

| Year | 2011 | 2012 | 2013 | 2014 | YTD 2015 |
|---------------------|-------------|-------------|-------------|-------------|-----------------|
| # of Units Sold | 19 | 34 | 31 | 28 | 11 |
| Average Sale Price | \$36,000 | \$37,776 | \$36,452 | \$26,410 | \$26,000 |
| Average Square Feet | 1,404 | 1,397 | 1,268 | 1,083 | 1,249 |
| Average Price/SF | \$21.92 | \$25.43 | \$28.89 | \$22.68 | \$19.20 |
| Average Year Built | 1947 | 1950 | 1952 | 1942 | 1937 |

Source: Cimarron County Assessor, via County Records, Inc.

Between 2011 and 2014, the average sale price declined by -7.45% per year. The average sale price in 2015 was \$26,000 for an average price per square foot of \$19.20/SF.

Foreclosure Rates

Due to the small size of Cimarron County, reliable foreclosure rate data was unavailable to us. Discussions with local real estate professionals indicate that foreclosures in the area have not had a measurable impact on the local housing market.

Rental Market

This section will discuss supply and demand factors for the rental market in Cimarron County, based on publicly available sources as well as our own surveys of landlords and rental properties in the area.

Gross Rent Levels

The following table presents data regarding gross rental rates in Cimarron County. Gross rent is the sum of contract rent, plus all utilities such as electricity, gas, water, sewer and trash, as applicable (telephone, cable, and/or internet expenses are not included in these figures).

| 2013 Rental Units by Gross Rent | | | | | | |
|--|-------------------|----------------|------------------------|----------------|--------------------------|----------------|
| | Boise City | | Cimarron County | | State of Oklahoma | |
| | No. | Percent | No. | Percent | No. | Percent |
| Total Rental Units: | 124 | | 301 | | 475,345 | |
| With cash rent: | 116 | | 191 | | 432,109 | |

| \$500 to \$549 | 17 | 13.71% | 20 | 6.64% | 31,527 | 6.63% |
| \$550 to \$599 | 0 | 0.00% | 0 | 0.00% | 33,032 | 6.95% |
| \$600 to \$649 | 0 | 0.00% | 6 | 1.99% | 34,832 | 7.33% |
| \$650 to \$699 | 8 | 6.45% | 10 | 3.32% | 32,267 | 6.79% |
| \$700 to \$749 | 0 | 0.00% | 5 | 1.66% | 30,340 | 6.38% |
| \$750 to \$799 | 0 | 0.00% | 0 | 0.00% | 27,956 | 5.88% |
| \$800 to \$899 | 0 | 0.00% | 2 | 0.66% | 45,824 | 9.64% |
| \$900 to \$999 | 0 | 0.00% | 0 | 0.00% | 34,153 | 7.18% |
| \$1,000 to \$1,249 | 0 | 0.00% | 4 | 1.33% | 46,884 | 9.86% |
| \$1,250 to \$1,499 | 0 | 0.00% | 0 | 0.00% | 14,699 | 3.09% |
| \$1,500 to \$1,999 | 0 | 0.00% | 0 | 0.00% | 10,145 | 2.13% |
| \$2,000 or more | 0 | 0.00% | 0 | 0.00% | 5,121 | 1.08% |
| No cash rent | 8 | 6.45% | 110 | 36.54% | 43,236 | 9.10% |
| Median Gross Rent | \$362 | | \$374 | | \$699 | |

Sources: 2009-2013 American Community Survey, Tables B25063 and B25064

Median gross rent in Cimarron County is estimated to be \$374, which is -46.5% less than Oklahoma's median gross rent of \$699/month. Median gross rent in Boise City is estimated to be \$362.

Median Gross Rent by Year of Construction

The next table presents data from the American Community Survey regarding median gross rent by year of housing unit construction. Note that dashes in the table indicate the Census Bureau had insufficient data to provide a median rent figure for that specific data field.

| 2013 Median Gross Rent by Year of Construction | | | |
|---|-----------------------------------|--|--|
| | Boise City Median Rent | Cimarron County Median Rent | State of Oklahoma Median Rent |
| Total Rental Units: | | | |
| Built 2010 or Later | - | - | \$933 |
| Built 2000 to 2009 | - | - | \$841 |
| Built 1990 to 1999 | \$245 | \$304 | \$715 |
| Built 1980 to 1989 | - | \$316 | \$693 |
| Built 1970 to 1979 | - | \$404 | \$662 |
| Built 1960 to 1969 | - | - | \$689 |
| Built 1950 to 1959 | \$388 | \$388 | \$714 |
| Built 1940 to 1949 | - | \$666 | \$673 |
| Built 1939 or Earlier | - | \$550 | \$651 |

Note: Dashes indicate the Census Bureau had insufficient data to estimate a median gross rent.

Source: 2009-2013 American Community Survey, Table 25111

Boise City Rental Survey Data

The next table shows the results of our rental survey of Boise City. There are two apartment complexes known to exist in Boise City—a four unit USDA RD property known as Sagebrush Apartments III, and an eighteen unit USDA RD property known as Black Mesa Apartments. These properties were originally constructed as a single property, but in 2002, the four units at Sagebrush III were transferred to a separate entity and are managed separately. Sagebrush III is 100% occupied; the manager stated that she typically has a waiting list, but does not at the moment. There are three vacant units at Black Mesa Apartments, although the manager is reportedly processing applications for all three units.

| Boise City Rental Properties - Affordable | | | | | | | | |
|--|-------------|-------------------|-----------------|------------------|------------------|-------------|----------------|----------------|
| Name | Type | Year Built | Bedrooms | Bathrooms | Size (SF) | Rate | Rate/SF | Vacancy |
| Sagebrush Apartments III | USDA RD | 1982 | 2 | 1 | 800 | \$530 | \$0.663 | 0.00% |
| Black Mesa Apartments | USDA RD | 1982 | 1 | 1 | 600 | \$655 | \$1.092 | 17.00% |
| Black Mesa Apartments | USDA RD | 1982 | 2 | 1 | 800 | \$750 | \$0.938 | 17.00% |
| Black Mesa Apartments | USDA RD | 1982 | 3 | 1 | 1,000 | \$803 | \$0.803 | 17.00% |

Based on the number of units identified as rentals by the 2010 Census, it is reasonable to assume that a number of single family residences are rentals. Single family rental rates typically range \$300-\$350 for a two bedroom single family residence or mobile home and \$350-\$3400 for a three bedroom

single family residence or mobile home. These rental rates reflect market rates for average quality single family residences. A large percentage of the Boise City housing stock is in fair to poor condition. Discussions with area brokers and a review of the Boise City News indicates that the single family rental housing stock in Boise City is near or at 100% occupancy among habitable units.

Rental Market Vacancy – Boise City

The developments outlined previously typically report high occupancy levels. Black Mesa Apartments currently has three vacant units, but the property manager is reportedly processing applications for those units. This analyst did not identify any single family rental units in habitable condition available for rent. The overall market vacancy of rental housing units was reported at 14.29% by the Census Bureau as of the most recent American Community Survey. This vacancy level is inclusive of all housing units, including housing units not fit for occupancy. We believe that occupancy among habitable rental units is higher than the 85.71% reported by the census bureau.

Summary of HUD Subsidized Properties

There are no HUD subsidized properties in Cimarron County. The HUD “Picture of Subsidized Households” data for 2013 identifies one housing choice voucher in Cimarron County

Projected Housing Need

Consolidated Housing Affordability Strategy (CHAS)

This section will analyze data from the U.S. Department of Housing and Urban Development's Consolidated Housing Affordability Strategy (CHAS) dataset for Cimarron County. This data is typically separated into household income thresholds, defined by HUD Area Median Family Income (HAMFI). HUD Area Median Family Income (HAMFI) is equivalent to Area Median Income (AMI) for the purposes of this report. This data is considered the best indicator of housing need available which separates need into household income thresholds as defined by HUD.

Cost Burden by Income Threshold

The next table presents CHAS data for Cimarron County regarding housing cost burden as a percentage of household income. Renter costs are considered to be the sum of contract rent and any utilities not paid by the landlord (such as electricity, natural gas, and water, but not including telephone service, cable service, internet service, etc.). Homeowner costs include mortgage debt service (or similar debts such as deeds of trust or contracts for deed), utilities, property taxes and property insurance.

Households are considered to be cost overburdened if their housing costs (renter or owner) are greater than 30% of their gross household income. A household is "severely" overburdened if their housing costs are greater than 50% of their gross household income.

Cimarron County : CHAS - Housing Cost Burden by HAMFI

| Household Income / Cost Burden | Owners | | Renters | |
|-----------------------------------|------------|---------|------------|---------|
| | Number | Percent | Number | Percent |

Households by Income Threshold: Percentage with Housing Cost Over 30% of Income

Source: 2008-2012 HUD Comprehensive Housing Affordability Strategy, Table 6

Substandard Conditions / Overcrowding by Income Threshold

The following table summarizes data regarding substandard housing conditions and overcrowding, separated by owner/renter and HAMFI income threshold. Substandard housing conditions are defined by HUD as any housing unit lacking either complete plumbing or a complete kitchen.

A housing unit without “complete plumbing” is any housing unit lacking one or more of the following features (they do not need to all be present in the same room):

1. Hot and cold running water
2. A flush toilet
3. A bathtub or shower

A lack of a complete kitchen is any housing unit lacking any one or more of the three following items:

1. A sink with a faucet
2. A stove or range

3. A refrigerator

Households are considered to be “overcrowded” if the household has more than 1.0 persons per room (note that this definition is “room” including bedrooms, living rooms and kitchens, as opposed to only “bedrooms”), and is “severely overcrowded” if the household has more than 1.5 persons per room.

Cost Burden by Household Type

The following table provides a breakdown of households by HAMFI, and by household type and size, and by housing cost burden. The categories of household type provided by HUD are:

- Elderly Family: Households with two persons, either or both age 62 or over.
- Small Family: 2 persons, neither age 62 or over, or families with 3 or 4 persons of any age.
- Large Family: families with 5 or more persons.
- Elderly Non-Family (single persons age 62 or over, or unrelated elderly individuals)
- Non-Elderly, Non-Family: all other households.

Housing Problems by Household Type

The next set of tables presents data by household type and whether or not the household is experiencing **any** housing problems. Housing problems are defined by HUD as any household meeting any of the three following criteria:

1. Housing costs greater than 30% of income (cost-overburdened).
2. Living in a housing unit lacking complete plumbing or a complete kitchen (substandard housing unit).
3. Living in a housing unit with more than 1.0 persons per room (overcrowding).

Housing Problems by Race / Ethnicity

Data presented in the following tables summarizes housing problems (as previously defined), by HAMFI threshold, and by race/ethnicity, for Cimarron County. Under CFR 91.305(b)(1)(ii)(2), racial or ethnic groups have disproportionate need if “the percentage of persons in a category of need who are members of a particular racial or ethnic group in a category of need is at least 10 percentage points higher than the percentage of persons in the category as a whole.”

Overall Anticipated Housing Demand

Future demand for housing units in Cimarron County can be estimated from population and household growth. Population estimates are based on known factors such as noted increases in the city employment base and indications from demographic services. In this case we have considered data from both the U.S. Census Bureau and Nielsen SiteReports. The estimates of changes in households and population were presented in a previous section of this report. The anticipated future demand is estimated for Boise City, as well as Cimarron County as a whole. The calculations are shown in the following tables.

Boise City Anticipated Demand

As indicated throughout the report, the population, households and number of housing units have decreased over the last fifteen years. The following table summarizes population, household, and housing unit changes.

| Boise City Historical Population and Housing Changes | | | | | |
|---|-------------|-------------|----------|---------------|----------|
| | 2000 Census | 2010 Census | % Change | 2015 Estimate | % Change |
| Population | 1,483 | 1,266 | -1.57% | 1,166 | -1.63% |
| Households | 610 | 546 | -1.10% | 513 | -1.24% |
| Housing Units | 752 | 754 | 0.03% | 739 | -0.40% |

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

As shown, the number of households declined by 1.10% annually between 2000 and 2010. The number of housing units remained generally stable over that time period. From 2010 to 2015, the number of households declined by 33, while the number of housing units declined by 15. It is anticipated that the annual household decline will not be as rapid over the next several years, but that the deterioration of the housing stock will continue at current rates or will accelerate considering the age and condition of the current housing stock and the lack of new residential construction. This will lead to reduced availability of housing units in the city of Boise City.

According to local officials, there is an existing shortage of housing, both ownership and rental, in Boise City. Very little new residential construction has occurred in Boise City over the past decade, and declining population numbers may be due, at least in part, to a lack of good quality housing. Employment growth in the area is limited by the area's housing stock. The lack of new construction, despite demand for new housing units, can be attributed to the high cost of materials and labor in the area, as well as rental rates and median sales prices that do not justify the cost of construction.

Cimarron County Anticipated Demand

As indicated throughout the report, the population, households and number of housing units have decreased over the last fifteen years. The following table summarizes population, household, and housing unit changes.

| Cimarron County Historical Population and Housing Changes | | | | | |
|--|-------------|-------------|----------|---------------|----------|
| | 2000 Census | 2010 Census | % Change | 2015 Estimate | % Change |
| Population | 3,148 | 2,475 | -2.38% | 2,247 | -1.91% |
| Households | 1,257 | 1,047 | -1.81% | 966 | -1.60% |
| Housing Units | 1,583 | 1,587 | 0.03% | 1,545 | -0.53% |

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

Like in Boise City, the population of Cimarron County is declining at a rate faster than the number of housing units declined. The loss of housing units is attributed to demolitions coupled with a lack of new residential construction. The percentage loss of households was not as high as the percentage population loss due to declining average household size. It is unlikely that the average household size will significantly decrease in the future.

The 2015 estimate for housing units and households indicates that there are 579 more housing units than there are households in Cimarron County. The low vacancy rate among habitable units reported by local officials and property managers indicates that the majority of the vacant housing units are not in habitable condition. Additionally, the existing housing stock will continue to age and deteriorate. A small amount of affordable new housing would improve the county's housing infrastructure and give more housing options to current residents of Cimarron County.

Cimarron County Disaster Resiliency Assessment

The purpose of this section is to assess at the county level key components of disaster resiliency. Housing location and quality as well as planning activities can help reduce impacts from disaster events and allow for faster recovery. Disasters can include tornadoes, extreme weather, high winds, as well as man-made events. These events may largely be inevitable, but the ability to reduce damage and casualties as well recovery can be improved with good planning.

C.0 Comprehensive Plans & Hazard Mitigation Plans

There are 5 key cities or towns within the county (Boise City, Kenton, Keyes, Felt and Wheless). Boise City, being the county seat, is the most likely to consider having a comprehensive plan, but at a population under 2,000 it is not surprising that they do not have one.

Comprehensive plans are the guiding documents for cities of various sizes to address key aspects of their community from land use, transportation, environment, housing, and economic development.

As the towns grow, the larger urbanized areas should consider creating a comprehensive plan to guide the way they want to encourage growth and preservation of culture. Additionally, this would be an opportunity to include objectives to manage risks related to disasters.

The other key plan for a city to manage, mitigate and plan for recovery related to disasters is a **Hazard Mitigation Plan** (or Emergency Management Plan). Often low density counties, the Hazard Mitigation Plan is done at the county level, though some cities may augment the county plan with a city plan.

Cimarron County does not have a Hazard Mitigation Plan. Their HMP has expired. However, the county did meet the criteria of being a StormReady County in August 2012.

C.2.1.1. Historical Data on Natural Disasters and Other Hazards

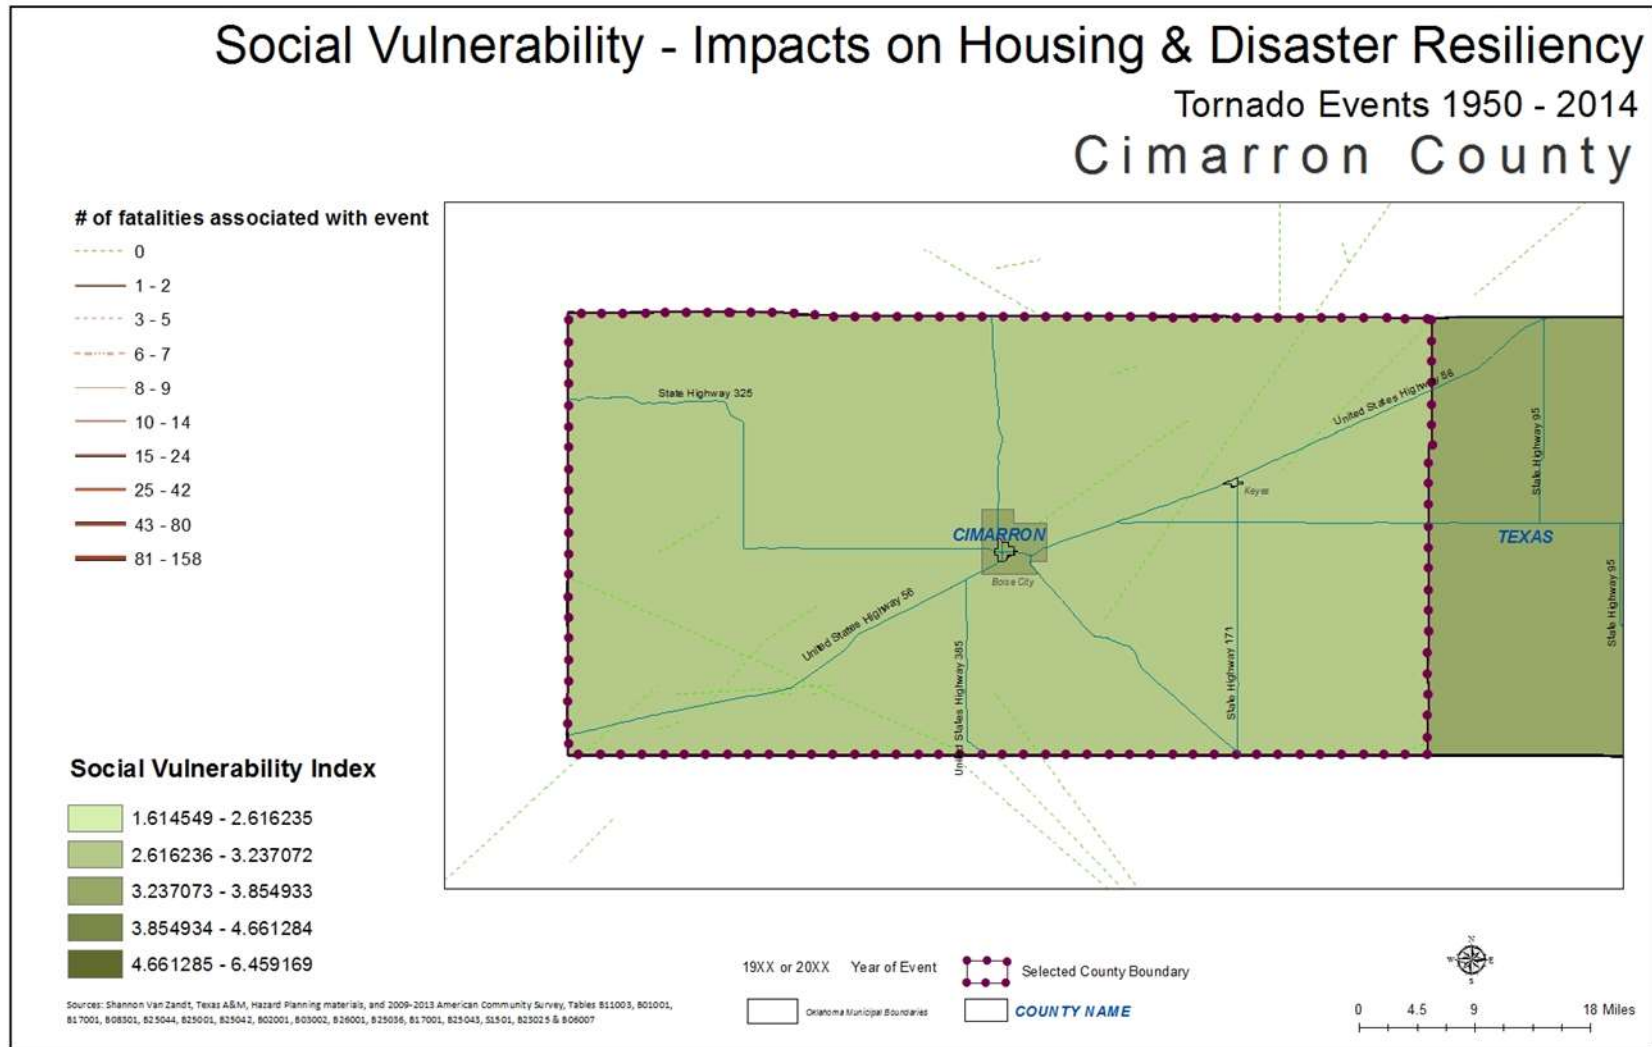

Data on historical damages and casualties is typically collected as part of a **Hazard Mitigation Plan** preparation to determine the appropriate planning measures and actions to take before and after an event. However, given no HMP is available, use of NOAA data on tornados (shapefile) will provide some insight on one risks to the area.

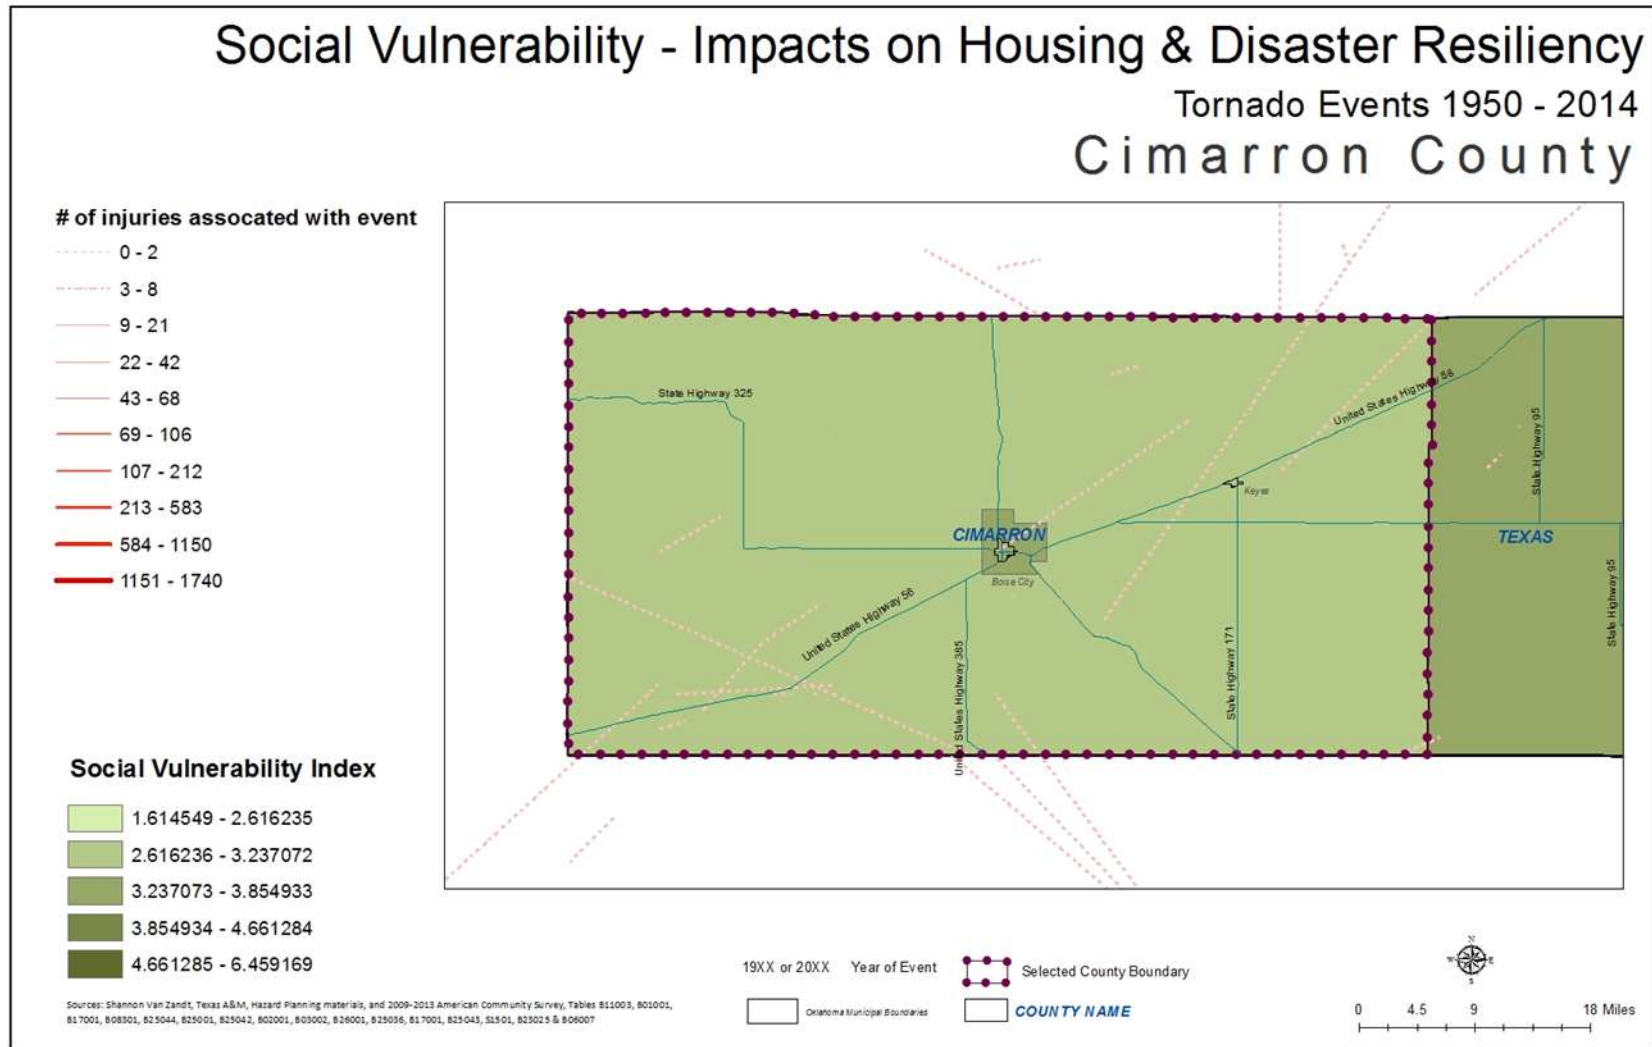

Flooding, based on FEMA FIRM maps, does not show floodplain areas in the county. The National Flood Hazard Layer (Official) is not available for this area. Flash flooding is a concern for all parts of the state after heavy precipitation.

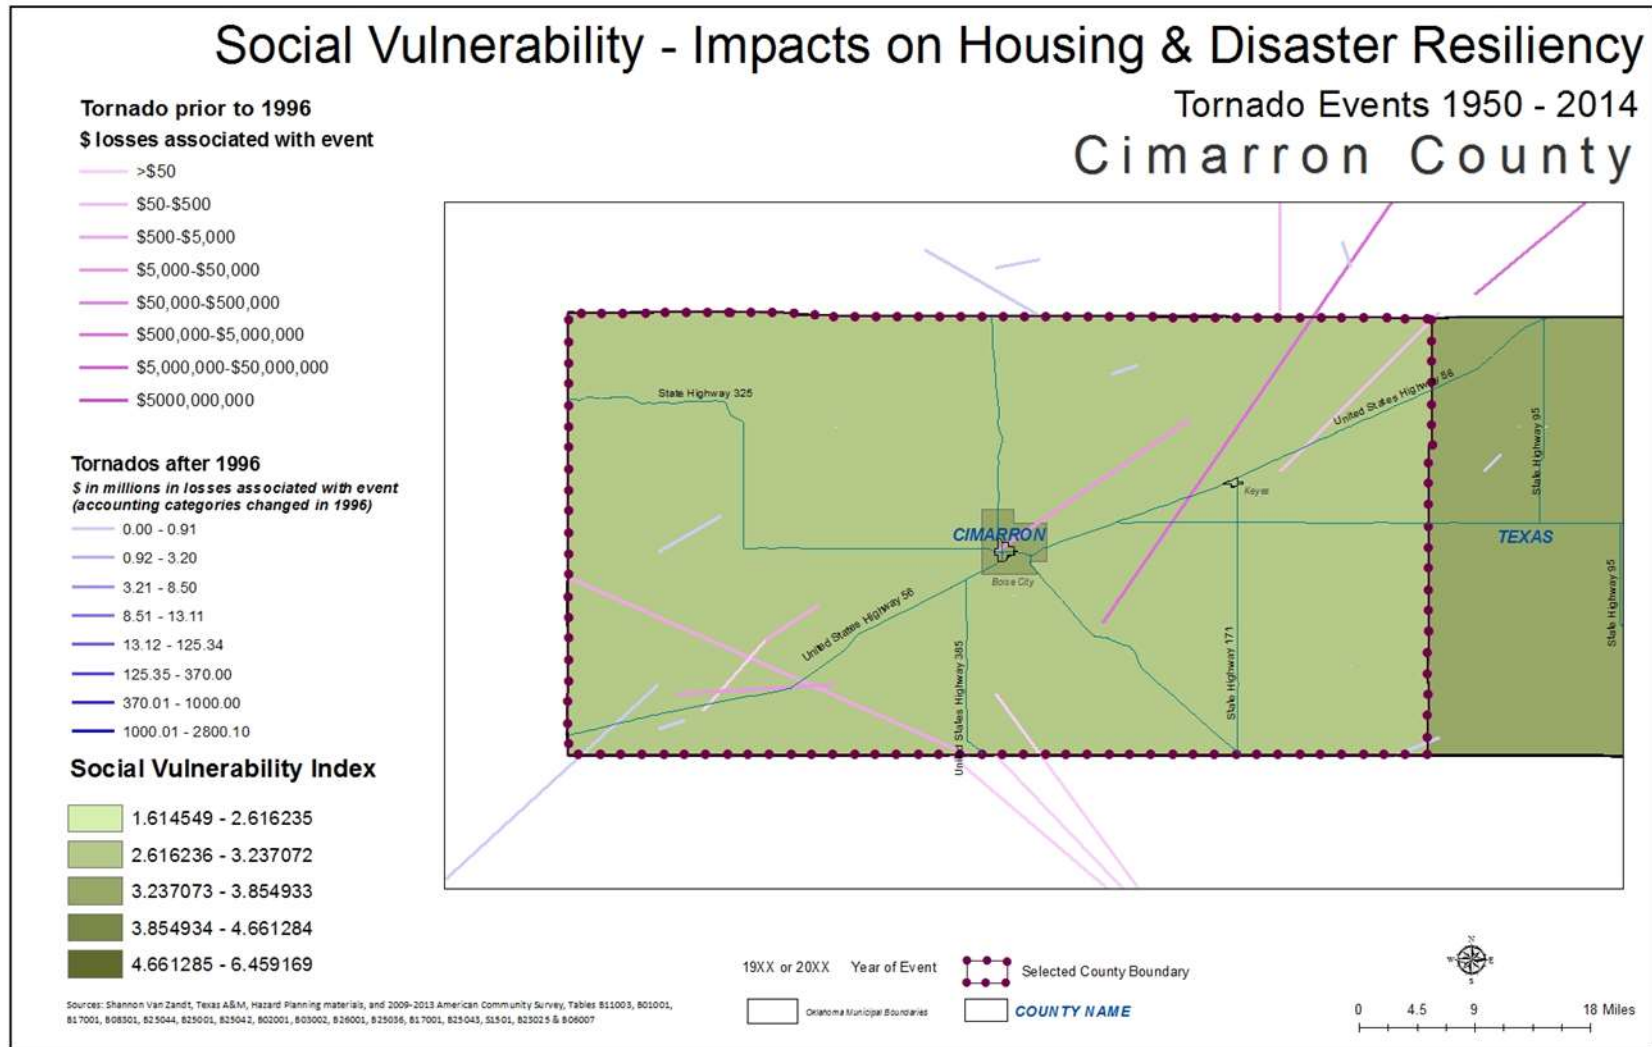

Historic data on tornados between 1950-2014 there are 42 tornados documented. There were 3 injuries that occurred connected to these tornados, with 2 of those injuries happening in the 1992 tornado. There were 0 fatalities connected to tornados during this time period. Property losses between 1961-1996 ranged from \$172,553 to \$1,735,650. (The accounting methods used for losses changed in 1996.) The losses estimated between 1996-2014 was \$450,000.

The Cimarron County Oklahoma Office of Emergency Services does maintain a website with FEMA-based information on the various risks that may impact the area and advice on preparedness.

Social Vulnerability

Based on the research work done by the Texas A&M University Hazard Reduction and Recovery Center, an added component is being included in this section. Social vulnerability can place households at a further disadvantage during and after a disaster. This analysis is assessing for the county the levels of social vulnerability based on demographic indicators to highlight 'hotspots' or counties that have higher social vulnerability. That combined with Hazard Mitigation Plans – or lack thereof – can highlight places where additional work is needed to reduce impacts on households

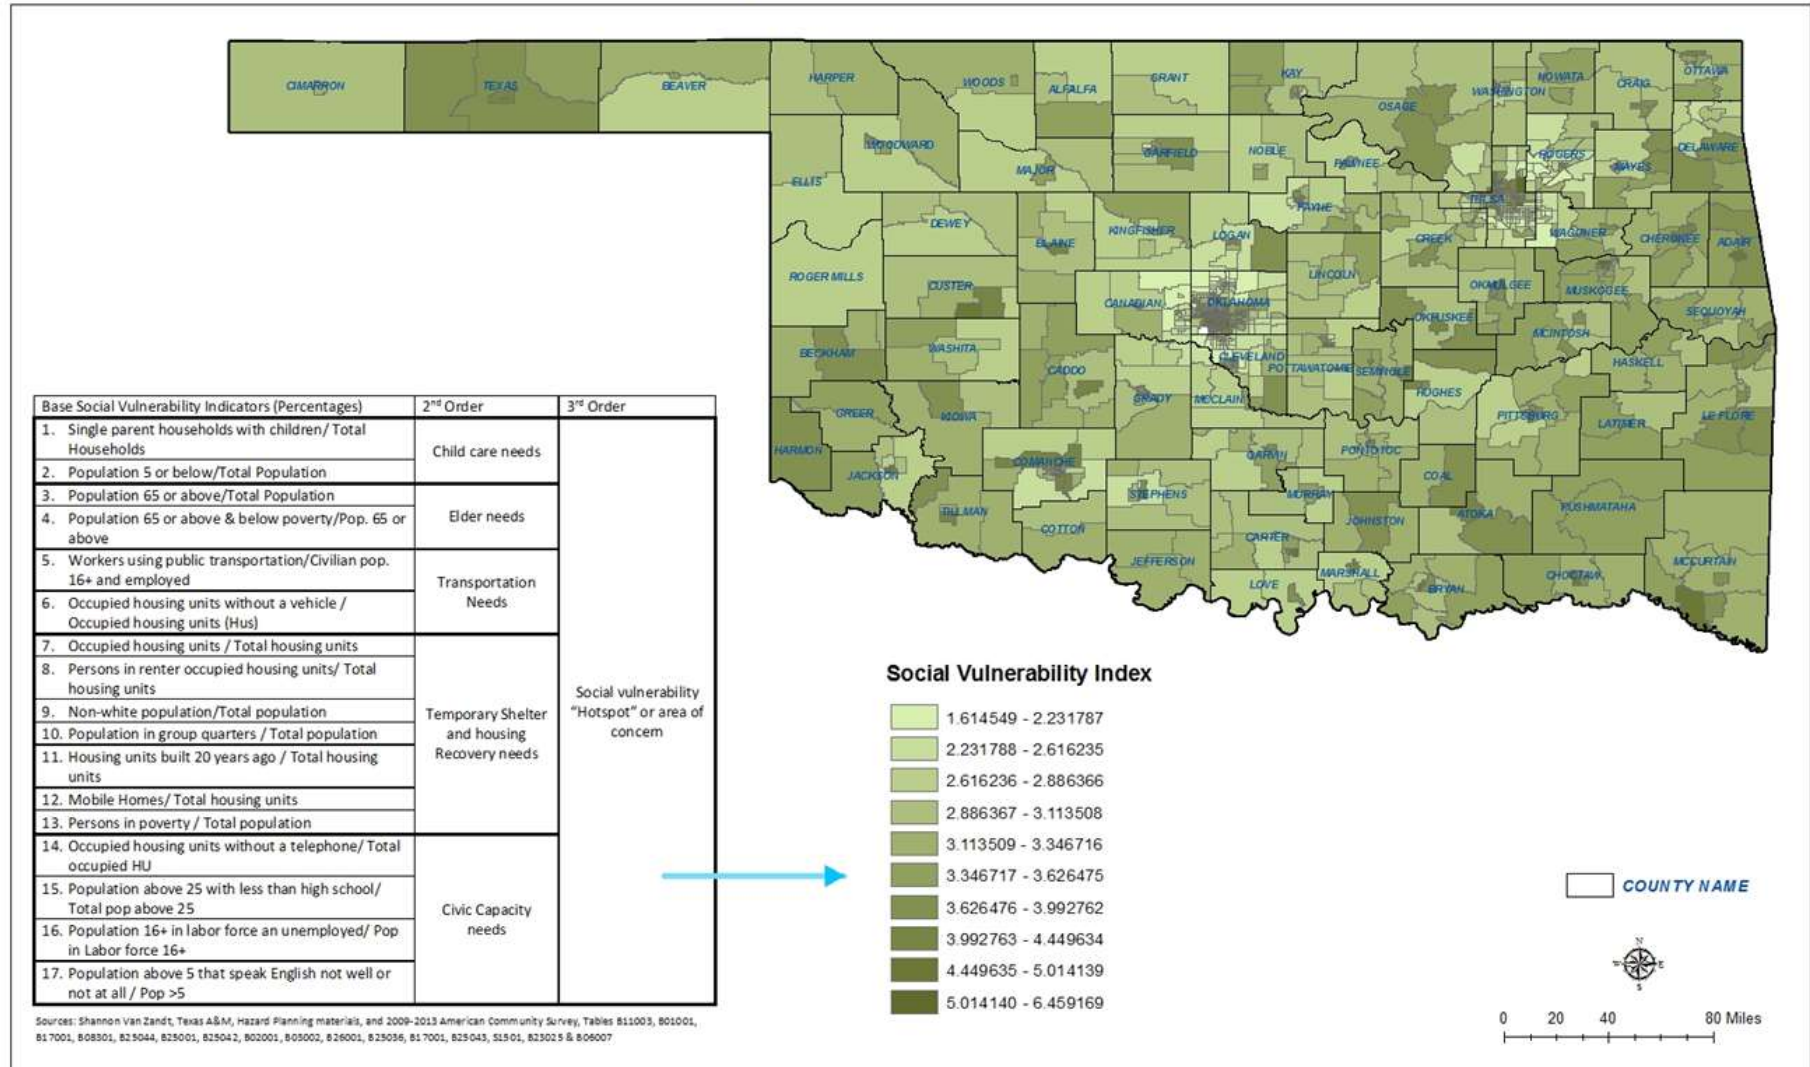

Social Vulnerability Analysis - Cimarron County

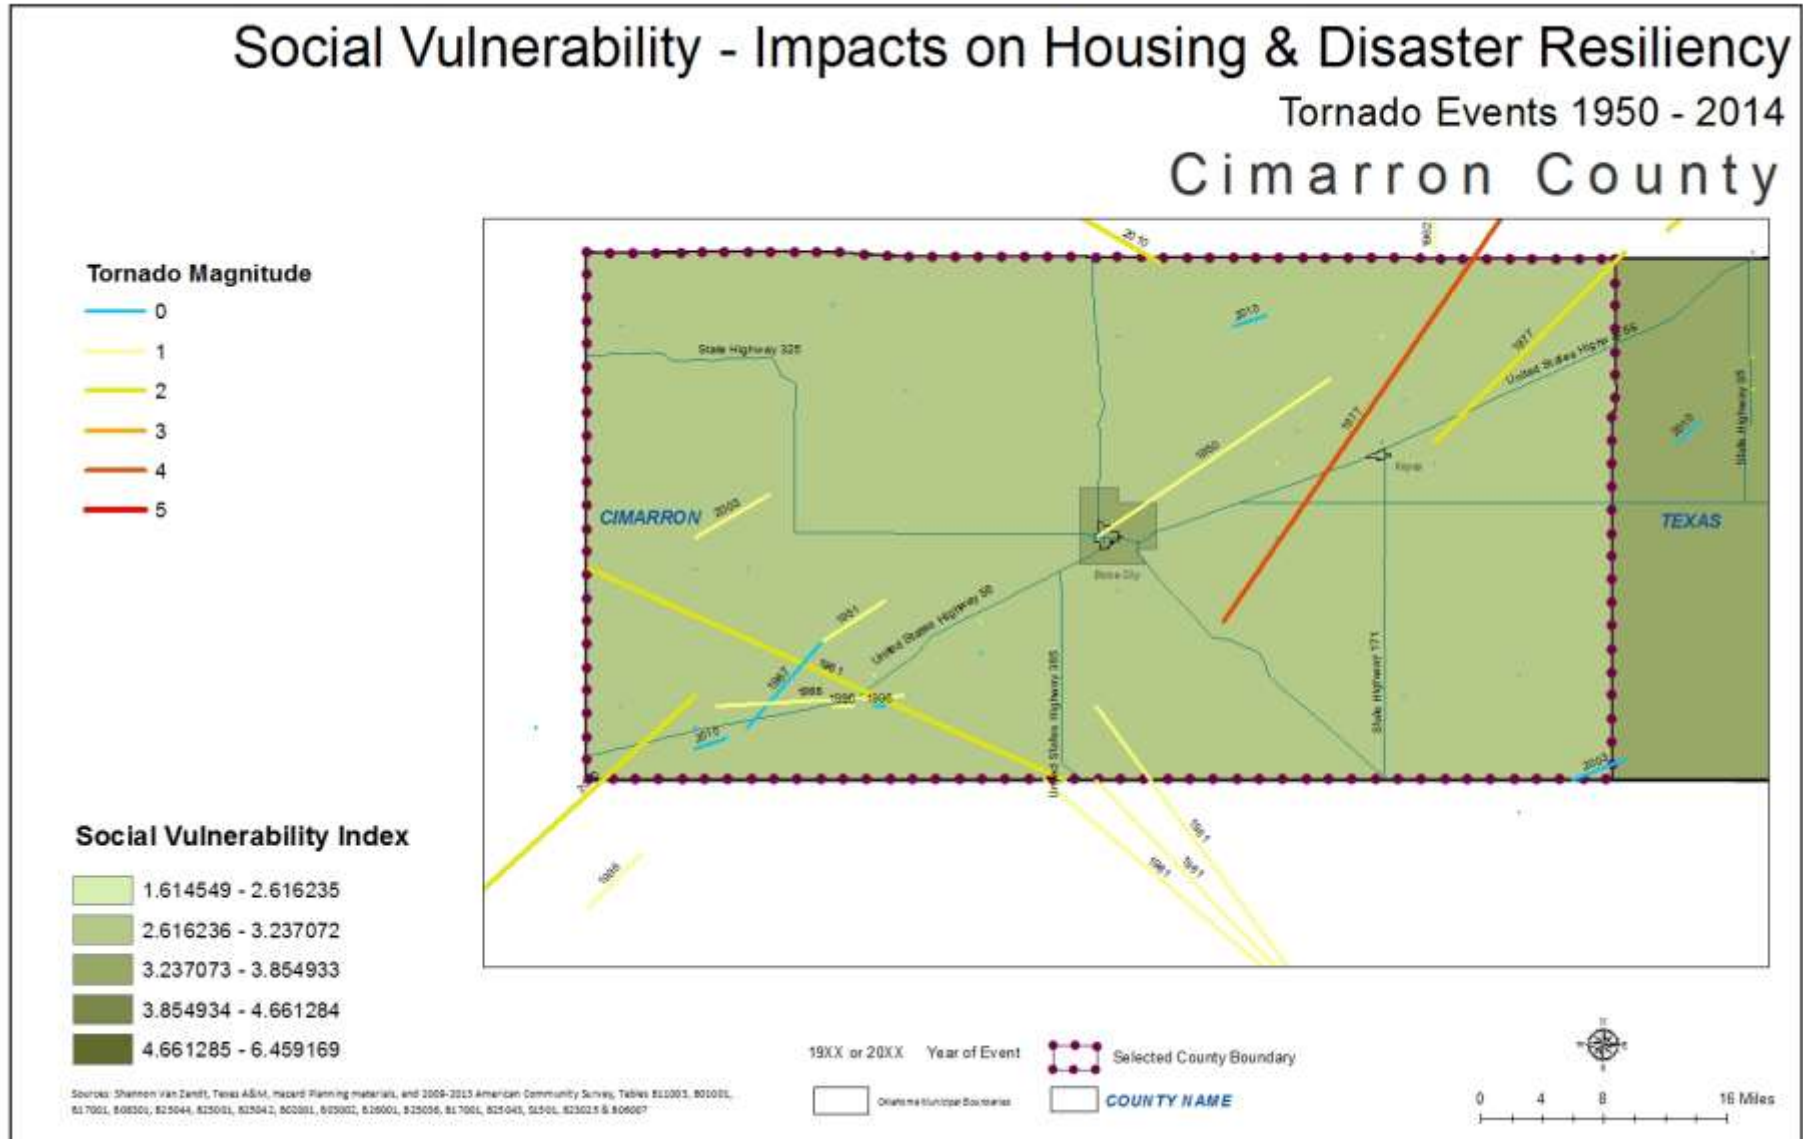

| Base Social Vulnerability Indicators (%) | | 2nd Order | 3rd Order |
|---|--------|---|--|
| 1.) Single Parent Households | 12.50% | 0.187 | 3.169 Social Vulnerability 'Hotspot' or Area of Concern |
| 2.) Population Under 5 | 6.21% | (Child Care Needs) | |
| 3.) Population 65 or Above | 22.12% | 0.287 | |
| 4.) Population 65 or Above & Below Poverty Rate | 6.55% | (Elder Needs) | |
| 5.) Workers Using Public Transportation | 0.00% | 0.049 | |
| 6.) Occupied Housing Units w/o Vehicle | 4.87% | (Transportation Needs) | |
| 7.) Housing Unit Occupancy Rate | 67.40% | 2.356 (Temporary Shelter and Housing Recovery Needs) | |
| 8.) Rental Occupancy Rate | 28.21% | | |
| 9.) Non-White Population | 23.15% | | |
| 10.) Population in Group Quarters | 1.40% | | |
| 11.) Housing Units Built Prior to 1990 | 79.85% | | |
| 12.) Mobile Homes, RVs, Vans, etc. | 15.54% | | |
| 13.) Poverty Rate | 20.03% | | |
| 14.) Housing Units Lacking Telephones | 0.66% | 0.291 (Civic Capacity Needs) | |
| 15.) Age 25+ With Less Than High School Diploma | 18.30% | | |
| 16.) Unemployment Rate | 1.26% | | |
| 17.) Age 5+ Which Cannot Speak English Well or Not At All | 8.86% | | |

Social Vulnerability - Impacts on Housing & Disaster Resiliency

Social vulnerability combined with the devastating impacts of a natural or man-made disaster can compound a household's ability to recover and in fact can place those individuals at an even greater gap or disadvantage prior to the event (Shannon Van Zandt, Texas A&M, Hazard Planning materials)

This county falls within the average level of social vulnerability for the county per this index for social vulnerability when comparing as a county to other counties in the state. The area of higher level of social vulnerability by census tract is the Boise City area. This is logical as this is the more populated portion of the county and thus where attention in terms of emergency management is appropriate.

Recommendations for this county:

- Create an online shelter registry for location of individual and business-based shelters.
- Update and maintain the county HMP and include attention to areas within the county that in addition to physical vulnerability may have compounding social vulnerability factors.
- Efforts to strengthen building codes related to tornadoes and natural disasters should be considered.
- Planning for shelters from disaster events for multifamily, HUD and LIHTC units, in addition to all housing in the community should be incorporated with any effort to increase housing.

Homelessness

By Continuum of Care

Oklahoma is comprised of eight Continuums of Care (CoC). These entities manage the provision of services to the homeless, among other functions. By definition, CoCs involve nonprofit homeless providers; victim service providers; faith-based organizations; governments; businesses; advocates; public housing agencies; school districts; social service providers; mental health agencies; hospitals; universities; affordable housing developers; law enforcement and other organizations that serve the homeless and those at risk of becoming homeless (Continuum of Care Network pamphlet, 2015). These entities are governed by a community plan that helps them deliver services to the homeless and/or to prevent a return to the homeless. CoCs provide a variety of services aimed at outreach, engagement and assessment, including emergency shelter, rapid re-housing, transitional housing, and permanent housing, among others (Continuum of Care Network pamphlet, 2015).

The data below describes the characteristics of those receiving or eligible for the CoC in which Cimarron County is located. This data is collected by the CoCs on last day of January each year and reported on an annual basis. It is currently the best source of data available at the State level of understanding the demographics of these populations.

OK 503 Oklahoma Balance of State

OK 503 represents the regions of Oklahoma that are not included in a regional or local COC's. Essentially, this COC accounts for the "rest" of the state. Most homeless people are sheltered in this data set, but not in statistically significant way. Out of the 198 total homeless households, 112 are sheltered to 86 unsheltered. Similar to that of the Tulsa region, "persons in households without children," above the age of 24 are significantly more homeless (127 to 10 persons age 18 to 24). Of note, "persons in households with at least one adult and one child," children under the age of 18 are more homeless than persons 18 and up. There are 87 homeless children under the age of 18 compared to the 71 combined total of persons above the age of 18. Also, these children are more unsheltered than sheltered. Lastly about this COC data set is that most homeless persons are victims of domestic violence, totaling 75 people. Since this COC accounts for all of the "leftovers" of the state in rural areas that are not included in the other COC's, possessing such a high number of homeless domestic violence victims is not unusual. There is the tendency in these rural areas to have a high amount of domestic violence issues, and homelessness is usually a step away for victims. The next most homeless subpopulation is the chronically homeless coming in at 40 people.

The majority of housing options available in this region are emergency shelters and transitional housing. These units are all open year around. Very few units are available for occupation by families with children (14). Given the prevalence of victims of domestic violence in this area, there is a need to grow the number of units that are available for this group of homeless and the children in their care.

| OK 503 Oklahoma Balance of State | Emergency Shelter(sheltered) | Transitional Housing(sheltered) | Unsheltered | Total |
|--|-------------------------------------|--|--------------------|--------------|
| Households without children | 85 | 4 | 47 | 136 |
| Households with at least 1 adult & 1 child | 19 | 4 | 39 | 62 |
| Households with only children | 0 | 0 | 0 | 0 |

COC Conclusion

Each of the CoC's represents a unique area. It's important to note that the Point In Time data serves as a baseline. It is likely that the homeless population is much larger than counted. Generally, the State's homeless population is over the age of 24. In some areas of the State, there is a disproportionately high rate of homeless youth. More detailed exploration is necessary to understand the reasons which led them to this State and the needs of homeless youth. Domestic violence victims comprise a significant portion of the homeless population in the State. In some areas, the presence of social service providers for this subpopulation has reduced homeless rates. The same is true with respect to homeless veterans. As anticipated, the majority of the homeless population across the state can be classified as: mentally ill, chronically homeless, and chronic substance abusers. The needs of these difficult to house homeless must remain a priority across the State.

A Snap Shot of Homelessness in the State

Point in Time data was last collected on January 29, 2015 across the State. On that date, counts revealed a homeless populations of more than 3,000 residents. The majority of those counted (2,603 individuals) were classified as households without children. The majority of this group lives in emergency shelters (1,652) or transitional housing (376) with 575 classified as unsheltered.

The number of households with children is seemingly small totaling 343. The vast majority of those in this classification live at emergency shelters (201) or transitional housing (104) with only 38 classified as unsheltered. Homeless service providers in Oklahoma City and Tulsa emphasized that this group was likely undercounted across the State because they are less visible than other categories of homeless. They emphasized that emergency shelters, as presently designed, do not meet the needs of families with children in terms of both privacy and safety.

The Point in Time data reveals less than 100 households comprised of only children. Of these 74 counted households, 35 live in emergency shelters and 39 are unsheltered. This population is likely significantly undercounted as youth who are homeless typically seek to avoid identification for fear of being returned to their homes. These young people often have specific needs for supportive services that are difficult to deliver because the population remains unseen. Homeless advocates in the State hold up Tulsa as a good example of the State for serving homeless youth. OKC's Be the Change is also a leader in identifying and providing needed service to homeless youth in the metropolitan region. The problem of homeless youth is not just isolated to large urban areas. Mid-sized and smaller cities also look for innovative ways to service. Cities like El Reno and Enid have their own drop in centers for homeless youth. Social networks in smaller cities fill similar functions.

Oklahoma City public schools also tracks homeless students within the district. There are homeless students attending 78 elementary and middle schools in Oklahoma City. This data suggests that the majority of the city's homeless students are African American or Hispanic. There are 664 homeless African American students, 724 homeless Hispanic students, and 254 homeless Caucasian students. There are ten high schools in OKC that have reported having homeless students. Douglass and Capitol Hill high schools have the highest homeless student populations. Douglass has 50 homeless African American students. Capitol Hill has 49 homeless Hispanic students. The majority of these students can be classified as "couch homeless" or doubled up, meaning that they are finding

shelter with extended family members, friends, and other non-relatives for a brief amount of time due to hardship.

The majority of Oklahoma's homeless population is over 24 years old. This classification system is not particularly useful in helping to assess the number and needs of the elderly population, which is reported to be a substantial subset of this population.

The Point in Time data categorizes the homeless population into two categories: Hispanic/Latino and Non-Hispanic/Non-Latino. The lion's share of homeless in Oklahoma are Non-Hispanic/Non-Latino (3,528). In Oklahoma City, 62% of the homeless served are classified as Caucasian. Twenty-five percent of the homeless population is African American. Seven percent of the homeless in OKC identify as Native American. Less than one percent of those identified as homeless in OKC are Asian. By contrast, a relatively small fraction of the State's homeless population is Hispanic/Latino. The Point in Time data identified a relatively small Hispanic homeless population, including less than 250 individuals. This follows OKC counts that identify 7% of the city's homeless population as Hispanic. Homeless advocates in OKC indicate that social networks, including churches and extended families, keep the number of homeless in the Hispanic population proportionately lower than their Non-Hispanic/Non-Latino counterparts. However, these individuals likely classify as "couch homeless" and are in a continued state of being vulnerable to becoming homeless.

The PIC data indicates that there are more homeless males (2,237) than females (1,535). This follows national trends. Care should be taken when interpreting this data, as women are less likely to participate in Point in Time counts. There is a growing population of homeless in Oklahoma that identifies as transgender. PIC data identified 5 individuals identifying as transgender. This population is likely much higher and will continue to grow due to family and national attitudes about this population. Transgender populations may require special housing accommodations, especially in the emergency shelter context, to provide for their social and emotional needs.

Another group of homeless individuals that merits special consideration in the distribution of resources is those identified as having special needs. This classification includes persons with "physical, mental or behavioral disabilities, persons with HIV/AIDS and/or persons with alcohol or drug addictions. The Point in Time data estimates that there are nearly 1300 homeless persons with special needs in OKC alone.

The Point in Time data is coarse and does not do an effectively track homeless populations with specific needs, such as those persons who are homeless and living with HIV/AIDS. This special population of homeless is likely growing in Oklahoma. According to the Oklahoma State Department of Health there were an estimated 5,375 cases of persons living with HIV/AIDS by the end of 2013. There were a total of 437 newly diagnosed HIV/AIDS cases in 2013 for the state of Oklahoma. The vast majority of populations living with HIV/AIDS (nearly 72%) reside in urban areas. In OKC alone, the Point in Time data identified at least 25 homeless individuals living with HIV/AIDS. This is likely an undercount. Based on this information and anecdotal data from homeless service providers, special effort must be made to understand the housing, medical, and supportive services needs of homeless persons living with HIV/AIDS.

Shelter is crucial for homeless persons with HIV/AIDS in the management of this illness. However, traditional shelter setting(s) may not be suitable to house this population. Those with suppressed immune systems are vulnerable to the spread of infectious diseases which may be present in open shelters. In addition, shelter personally may not be properly trained in handling AIDS related issues. For these reasons, as well as resources made available by the federal government, homeless persons living with HIV/AIDs are often given housing choice vouchers, created by HOPWA, so that they secure housing on the private market. This can be challenging in constrained rental markets like Norman, for example, where affordable housing options are limited. It is estimated that more than 60 individuals living in OKC with HIV/AIDs are homeless because they have been unable to find a landlord that will accept their housing choice voucher.

State Name: Oklahoma**Point-in Time Date: 1/29/2015****Summary by household type reported:**

| | Sheltered | | Unsheltered | Total |
|---|-------------------|-----------------------|-------------|--------------|
| | Emergency Shelter | Transitional Housing* | | |

| Total | 2,309 | 690 | 778 | 3,777 |

Rural Areas

Homelessness in the rural areas of the State is much more difficult to calculate. Given the population density of the State, the majority of services that serve the homeless are concentrated in urban and semi-urban areas. Even if beds are available, many rural homeless lack knowledge about the services or a means to travel to receive the same. As a part of this study, OU students were dispatched into the 77 counties in the State to, among other issues, attempt to understand the degree to which there is rural homelessness in the State. Their qualitative inquiries yielded very little data, in part, because rural homeless is difficult to identify and often ignored. For the purposes of this report, a literature review was prepared on the topic of rural homelessness in the United States. The goals of this academic review is to assist policymakers and service providers in the State in uncovering the dimensions of this illusive population.

In the U.S., the rural homeless population is predominantly Caucasian. This population is comprised of single mothers, widowed wives and husbands, divorced and separated men and women, and young people. A study examining rural homelessness in Ohio found that nearly 40% of those who classify as homeless were divorced, separated, or widowed (First, Richard J., John C. Rife, and Beverly G. Toomey, 1994, pg. 101). Ohio's rural homeless were also relatively young. Close to 80% of homeless population in this study was between the ages of 18 and 39 years old (First et al, 1994, pg. 101). Rural homelessness is often less visible than urban homelessness because these populations commonly take shelter are at a friend's house, in their vehicles, or on abandoned properties. These populations can also be found on "...campgrounds or in hollows, desert canyons, farmers' fields, state parks, and highway rest areas" (Milbourne and Cloke, 2006, pg. 17).

The causes of rural homelessness mirror, in most ways, the plight of the urban homeless. The study of homelessness in rural Ohio revealed family problems and substance abuse issues as primary causes of rural homelessness. The incidence of homelessness resulting from situations of domestic violence is high in rural areas (Cummins et al, 1998). Substance abuse issues are a common cause for homelessness in rural America. The literature reveals that this population tends to be homeless because they have isolated themselves from family and people who want to help (First et al, 1994). In the case of both domestic violence and substance abuse, it is often difficult for these individuals to find shelter and the supportive services they require in rural areas where options are limited, if available at all. The thought of moving to an urban area to find both shelter and supportive services is sometimes not considered at all by these vulnerable populations.

Rural areas are also more prone to the kind of poverty that puts individuals and families at risk for homelessness. The number of people living at or below the poverty line in rural places is higher than anywhere else in the United States (Moore, 2001). The statement "rural homelessness is a microcosm of national economic and political developments" cannot be truer for American rural communities (Vissing, 1996, pg. 103). The disinvestment of small towns and their inability to attract long-term sustainable business development, cripples a small town's economy. In effect, this is a main contributor for why poverty is such a common theme for rural communities. As a result, the State should carefully consider its investments in rural Oklahoma. While there is a need for shelter in these places, the construction of this housing type should be weighed with long term opportunities for employment in the area.

It is not surprising that rural areas typically lack both emergency shelters and temporary housing options. Services that provide temporary housing and provide relief and support services for those who cannot find food are virtually nonexistent in rural communities across the United States (Moore, 2001). Sheltering the homeless is undercapitalized in rural areas because communities do not see a concentration of homeless individuals (Vissing, 1996, pg. 146). As a result, the homeless must satisfice where they are. For instance, for families who are homeless, some of them use a friend's house to store clothes or to seek shelter, while some receive assistance from churches (Cummins et al, 1998). Others migrate to urban areas where services are available and more accessible (Rollinson, Paul A., and John T. Pardeck, 2006).

The absence of affordable housing in rural areas is a root cause of homelessness (Levinson, David, and Marcy Ross, 2007). In fact, it was noticed that many of the people were receiving monetary assistance or previously had some money saved up to spend on housing, but these measures were not enough to keep them afloat (First et al, 1994, pg. 101). Housing costs rise in rural areas typically rise as a result of competition for a limited amount of housing stock. In some rural areas, low income families are spending 70% of their household incomes on housing, sometimes substandard housing (Vissing, 1996, pg. 124). As Levinson et al explain, "housing costs are lower but so are incomes, with the result of placing a heavier rent burden in the community" (Levinson, David, and Marcy Ross, 2007, pg. 45). Renters in rural communities, as a result, are far more susceptible to becoming homeless than their urban or suburban counterparts because they do not have the financial safety net sometimes associated with homeownership (Fitchen, 1991, pg. 193).

While this brief review of the literature describes the state of homelessness across rural America, many of the lessons learned are easily translated to an Oklahoma context. The condition and supply of affordable housing units is relatively poor in many rural portions of the State. Rent burden, as more fully characterized in the Consolidated Housing Affordability Strategy (CHAS) section of this report, is high. This leaves families living and working in relatively weak economies vulnerable to homelessness. Once homeless, supportive services in these areas are relatively limited, especially for the chronically homeless, those with substance abuse problems, and victims of domestic violence. Services available to these populations in urban areas may not be attractive to individuals and families who are accustomed to life in rural communities. Where practicable, more consideration must be given to providing supportive services and temporary and permanent housing to homeless populations wishing to remain in rural areas.

At Risk For Homelessness

Poverty is the primary factor that places Oklahoma families at risk of being homeless. There are many factors experienced by those living in poverty which leave residents more or less vulnerable to homelessness. For the purposes of this study, a social vulnerability index has been constructed to measure the likelihood or risk that residents living in poverty might find themselves homeless. This index includes factors such as single headed households, concentration of young and elderly residents, the reliance on public transportation, private vehicle availability, racial composition, housing type, presence or absence of a telephone in the household, amongst other factors. This index is additive and seeks to understand the collective impact of these factors in estimating the vulnerability of a local population. While employed in more significant detail in the section of this report focusing on disaster resiliency, this tool is useful in identifying areas of the State where populations may be most vulnerable to homelessness. The index utilized in this section is different from the one crafted in the Disaster Resiliency chapter of this report in that it estimates social vulnerability at the county level, rather than by census tract. The decision to study vulnerability to homelessness at the county level was made to help policymakers understand, more generally, where resources and economic interventions are most necessary to stave off the potential effects of homelessness. This maps presents vulnerability to homelessness on the county level, depicting the most vulnerable counties in dark green.

Social Vulnerability - Impacts on Housing & Disaster Resiliency

The Oklahoma families most likely at risk are those living in public and subsidized housing. They live below the poverty line. Even those who are employed, remain vulnerable to homeless because an unexpected expense, like a medical emergency, threatens their ability to pay for their share of rent owed or utilities. A missed payment can easily lead to eviction and homeless.

Through the U.S. Department of Housing and Urban Development, Oklahoma service providers have been vested with more than 24,000 housing choice vouchers. Their spatial distribution is outlined below. Of significance is the size of the waiting lists for public housing units and housing choice vouchers in cities across the State. These individuals are the most vulnerable to being homeless.

| | | Authorized Vouchers | Public Housing Waiting List | Voucher waiting list |
|---------------|-------|------------------------|--------------------------------------|----------------------------|
| Ada | OK024 | 110 | Unknown | Unknown |
| Bristow | OK033 | 87 | Unknown | Unknown |

| Oklahoma | | 24,612 | | |

Findings and Recommendations

The chronically homeless population remains high in Oklahoma and follows national trends. While this population does not appear to be growing, the needs of the chronically homeless merit continued attention. Ample emergency shelters and soup kitchens must be made available for these sizable population in both urban and rural contexts. Social service providers should be clustered, to the extent possible, where these groups of homeless populations cluster. Given the future projections for the increase in the number of cold and hot days in the region, social service providers must provide places that allow these individuals to seek refuge from the elements.

Those living with HIV/AIDS tend to underreport their status and needs. Given the cost of medical care these individuals face, the need for permanent and stable housing is critical. Housing providers must work to ensure that there are enough units for this undercounted population. Working with county health care providers, OHFA is much more likely to estimate the size and needs of this population of homeless and potentially homeless persons. Special care must be taken to ascertain the barriers these individuals face when using vouchers to secure housing in the marketplace.

Victims of domestic violence require temporary and transitional housing statewide. CoCs with high supportive services tend to better accommodate the housing needs for these population. Cleveland County provides a good model for the State. However, many homeless victims of domestic violence live in rural areas that are underserved. Efforts must be undertaken to work with social services provides, schools, churches, and the police to help identify these individuals and to lead them to available housing and supportive services.

While not mentioned in the PIC data, estimates must be prepared to calculate the number and needs of homeless populations with felonies. In particular, there has been a rise nationally in the number of homeless sex offenders. Zoning regulations and discrimination from the private market has pushed many registered sex offenders to the periphery of many communities. Given their criminal histories, this population of homeless is harder to house but should not be forgotten for health and safety of these individuals and the communities they inhabit.

The size of the homeless veteran population seems to be decreasing as a result of national initiatives to end homelessness for veterans in Oklahoma. The needs of homeless veterans are highest in areas of the State near VA facilities. Temporary and permanent housing should be constructed at a higher rate in these areas to meet demand. Care should be taken to make certain that the housing constructed is built to meet the psychological needs of veterans, particularly those suffering from PTSD.

Rural homelessness, in general, is a challenge to assess and characterize. The rate of homelessness in rural areas is most likely much higher than annual counts demonstrate. The majority of rural homeless likely find shelter out of public view. Some may shelter in their cars, in undeveloped areas or in the homes of those who allow them to stay. They are not likely to find their way to urban areas given their lack of transportation options and preferences for rural living. Programs that are developed to provide shelter to the rural homeless must be developed to allow sheltering in place where possible. Sheltering in place should only be allowed, however, in places where individuals are likely to be able to find what they need, including opportunities to work.

Very little is known about the age distribution of homeless over the age of 24. It is likely that the homeless population, including those who are chronically homeless, is aging. Elderly homeless individuals have special needs. Counts must be more sensitive to understanding the size and needs of this population. This does not mean arbitrarily building units to house this population unless a need can be demonstrated for the same.

Waiting lists for public housing and section 8 vouchers are high across the State. This is not uncommon to Oklahoma. However, when we are considering the size of the population that is at risk to homelessness, these waiting lists are an important factor to consider. Resources should be spent in a manner which is preventative so that these individuals' and families' needs are met before they become homeless.

The absence of affordable housing alternatives across some parts of the State is the largest threat to homelessness. In markets that are constrained by an aging housing stock or those that are rapidly growing, individuals and families who live on the economic margins are at risk for becoming homeless. Communities must work to ensure that zoning regulations promote the development of housing types serving all income levels, including the providing of temporary and permanent housing to meet the needs of the presently homeless and those at risk for becoming the same. Funding distributions should be targeted to communities with the highest needs who are willing to do what is necessary to meet the needs of the homeless and those at risk for the same.

Fair Housing

Summary

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity.

These findings are intended to aid the Oklahoma Housing Finance Agency (OHFA) determine the location of new affordable housing in relation to vulnerable populations and explore ways to expand the opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Key Findings:

- 70% of affordable housing units are located in census tracts marked by poverty
- 62% of affordable housing is located in census tracts where a majority of the residents are not white
- 13% of affordable housing units have no access to transit services and 56% have access to limited service, on-demand transit
- 2.6% of affordable housing units have limited access to a hospital
- 7.8% of affordable housing units are located in food deserts

Recommendations:

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

What is Fair Housing?

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. On one hand, this protects the ability of individuals to obtain housing regardless of personal characteristics such as race, skin color, national origin, gender, familial status, or disability. It also focuses attention on more subtle forms of discrimination that cluster low-income housing in ways that inhibit the ability of communities to access services and amenities that support self-sufficiency and autonomy.

Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity. In 2014, HUD released the Affirmatively Furthering Fair Housing (AFFH) rule for public comment. The draft rule

“directs HUD’s program participants to take significant actions to overcome historic patterns of segregation, achieve truly balanced and integrated living patterns, promote fair housing choice, and foster inclusive communities that are free from discrimination” (HUD 2015). In 2015, the United States Supreme Court provided legal support for actions taken to remedy patterns that impede the upward mobility and opportunity of low-income individuals and communities. In the case of Texas Department of Housing and Community Affairs v. The Inclusive Communities Project the court reiterated the need to address disparate impacts in considering the location of affordable housing and reinforced the importance of AFFH (Bostic 2015). Housing discrimination from this perspective is not only felt by individual residents, it can also be the result of actions that work to limit the opportunities to improve the quality of life in local communities.

Approach

In Oklahoma, a combination of federal and state programs work to support the opportunities provided to individuals and families who rest safely and comfortably in an apartment or home. Here we use publicly available data for units that are part of the Low Income Housing Tax Credit (LIHTC) Program, the Rural Rental Housing Loans, or OHFA administered programs such as Oklahoma Affordable Housing Tax Credit (AHTC), the HOME investment partnership program, the Section 8 Housing Choice Voucher Program, and multi-family bonds. Collectively, these programs represent state efforts to assist individuals who are unable to afford housing.

Indicators of disparate impact vary but seem to contingent upon the contextual characteristics of a particular neighborhood. In an effort to help communities investigate and understand community level disparate impacts, HUD created a Fair Housing Assessment Tool (http://www.huduser.gov/portal/affht_pt.html#affh). The assessment tool includes measures on indicators of disparate impacts based on the clustering of potentially vulnerable populations, including:

- Race/Ethnicity of Residents
- National Origin of Residents
- English Proficiency of Residents
- Job Accessibility
- Transit Accessibility
- Level of Poverty
- Environmental Exposure (e.g. pollution, crime, food, health care, etc.)
- Disability

This report uses the Fair Housing Assessment Tool in conjunction with readily available data to initiate a more thorough investigation of the potential for disparate impacts in the state. The findings are intended to aid the Oklahoma Housing Finance Agency regarding future location of new fair housing in relation to vulnerable populations and the future opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Data

Data for this report are compiled from a variety of sources including the United States Census, the University of Oklahoma Center for Spatial Analysis, and primary data collected as part of ongoing research efforts at the University of Oklahoma. Data are aggregated into census tracts and reported statewide as well as by county (see Appendix 1).

1. Urban/Rural

A majority of the affordable housing in Oklahoma is situated in rural communities. Urban communities including Edmond, Lawton, Norman, Oklahoma City, and Tulsa are home to just over 1/3 of the affordable housing units in the state.

| | Total Affordable Housing Units | Situated an Urban Setting | Situated in a Rural Setting |
|-------|--------------------------------|---------------------------|-----------------------------|
| OHFA | 35,292 | 11,699 (33.1%) | 23,593 (66.9%) |
| 515 | 5,384 | 0 | 5,384 (100%) |
| LIHTC | 23,537 | 8,255 (35.1%) | 15,282 (64.9%) |
| Total | 64,213 | 19,954 (31.1%) | 44,259 (68.9%) |

2. Poverty

Approximately 70% of affordable housing units in Oklahoma are located in census tracts where the number of residents living in poverty is above the state average. About half of these units are located in areas of extreme poverty, where the number of individuals who are economically vulnerable exceeds 994, more than one standard deviation (411) from the mean (583).

| | Total Affordable Housing Units | Situated in Poverty | Situated in Extreme Poverty |
|-------|--------------------------------|---------------------|-----------------------------|
| OHFA | 35,292 | 12,295 (34.8%) | 12,464 (35.3%) |
| 515 | 5,384 | 2,093 (38.9%) | 1,839 (34.2%) |
| LIHTC | 23,537 | 7,483 (31.8%) | 8,924 (38.0%) |
| Total | 64,213 | 21,796 (33.9%) | 23,227 (36.2%) |

3. Non-white Enclaves

Just over 60% of affordable housing units in Oklahoma are located in census tracts where a majority of the residents are non-white. With just fewer than 24% of the total affordable housing units in census tracts heavily populated with residents who are not white – identified as census tracts where the number of non-white residents is more than 1,595 - one standard deviation (653) greater than the mean (542).

| | Total Affordable Housing Units | Situated in Majority Non-White Community | Situated in Heavily Non-White Community |
|-------|--------------------------------|--|---|
| OHFA | 35,292 | 12,814 (36.3%) | 7,907 (22.4%) |
| 515 | 5,384 | 2,229 (41.4%) | 1,288 (23.9%) |
| LIHTC | 23,537 | 10,285 (43.7%) | 5,677 (24.1%) |
| Total | 64,213 | 25,328 (39.4%) | 14,872 (23.2%) |

4. Immigrant Enclaves

One-third of affordable housing units in Oklahoma are located in census tracts where more than the average number of residents are immigrants. About half of these units are located in areas dense with immigrants, where the number of individuals who are not citizen exceeds 349, more than one standard deviation (219) from the mean (130).

| | Total Affordable Housing Units | Situated in Immigrant Enclave | Situated in Heavily Immigrant Enclave |
|-------|--------------------------------|-------------------------------|---------------------------------------|
| OHFA | 35,292 | 8,114 (23.0%) | 3,358 (9.5%) |
| 515 | 5,384 | 1,017 (18.9%) | 159 (3.0%) |
| LIHTC | 23,537 | 5,457 (23.2%) | 3,364 (14.3%) |
| Total | 64,213 | 14,588 (22.7%) | 6,881 (10.7%) |

5. Limited English Proficiency

Almost 17,000 existing affordable housing units in Oklahoma are located in census tracts where more residents than average do not speak English very well. A little more than half of these units are located in areas dense with individuals with limited English proficiency, where the number of individuals who speak English less than very well exceeds 380, more than one standard deviation (240) from the mean (140).

| | Total Affordable Housing Units | Community with more than average number of Limited English Speakers | Community dense with limited English Speakers |
|-------|--------------------------------|---|---|
| OHFA | 35,292 | 6,250 (17.7%) | 3,122 (8.8%) |
| 515 | 5,384 | 799 (14.8%) | 240 (4.5%) |
| LIHTC | 23,537 | 4,034 (17.1%) | 3,475 (14.8%) |
| Total | 64,213 | 11,083 (17.3%) | 6,837 (10.6%) |

6. Disability

Almost 60% of existing affordable housing units in Oklahoma are located in census tracts where more residents than average have a disability. A little more than half of these units are located in areas dense with individuals with a disability, where the number of individuals who are disabled is greater than 831, more than one standard deviation (289) from the mean (542).

| | Total Affordable Housing Units | Community with more than average number of Disabled Residents | Community dense with Disabled Residents |
|-------|--------------------------------|---|---|
| OHFA | 35,292 | 10,098 (28.6%) | 10,722 (30.4%) |
| 515 | 5,384 | 1,686 (31.3%) | 2,594 (48.8%) |
| LIHTC | 23,537 | 7,074 (30.1%) | 6,289 (26.7%) |
| Total | 64,213 | 18,858 (29.4%) | 19,605 (30.5%) |

7. Hospitals

There are no affordable housing units more than 30 miles from a hospital. Approximately 2.6% of affordable housing units are farther than 15 miles from the nearest hospital. As indicated by the larger percentage of Rural Rental Housing Loan units, most of these are located in rural areas.

| | Total Affordable Housing Units | More than 15 miles to nearest hospital | More than 30 miles to nearest hospital |
|-------|--------------------------------|--|--|
| OHFA | 35,292 | 628 (1.8%) | 0 |
| 515 | 5,384 | 500 (9.3%) | 0 |
| LIHTC | 23,537 | 532 (2.3%) | 0 |
| Total | 64,213 | 1,660 (2.6%) | 0 |

8. Grocery Stores

Approximately 7.8% of affordable housing units are in areas that are classified as food deserts. According to the United States Department of Agriculture, food deserts exist in urban environments further than 1 mile from a grocery store and in rural environments further than 10 miles from a grocery store (<https://apps.ams.usda.gov/fooddeserts/foodDeserts.aspx>).

| | Total Affordable Housing Units | Urban > 1 Mile from nearest Grocer | Rural > 10 miles to nearest Grocer |
|-------|--------------------------------|------------------------------------|------------------------------------|
| OHFA | 35,292 | 1,493 (4.2%) | 1,097 (3.1%) |
| 515 | 5,384 | 0 | 466 (8.7%) |
| LIHTC | 23,537 | 1,175 (5.0%) | 769 (3.3%) |
| Total | 64,213 | 2,668 (4.2%) | 2,332 (3.6%) |

9. Transit

A little over 69% of affordable housing in Oklahoma is located in a census tract with limited or no access to transit services. This includes 8,367 affordable housing units in areas that lack public transit services all together as well as 36,363 units that are situated in areas that have on-demand transportation services that often have limited operation times and may only serve elderly and disabled populations or those going to a medical appointment.

| | Total Affordable Housing Units | No Transit | Urban Transit | On-Demand Transit |
|-------|--------------------------------|------------------|-------------------|-------------------|
| OHFA | 35,292 | 4,035 (11.4%) | 11,265 (31.9%) | 19,992 (56.6%) |
| 515 | 5,384 | 767 (14.2%) | 0 | 4,617 (85.8%) |
| LIHTC | 23,537 | 3,565 (15.1%) | 8,217 (34.9%) | 11,755 (49.9%) |
| Total | 64,213 | 8,367 (13.0%) | 19,482 (30.3%) | 36,363 (56.6%) |

What does this mean for Oklahoma?

This report suggests a number of possible ways forward for the Oklahoma Housing Finance Agency as it continues to support quality low-income and workforce housing for residents of the state. Across a number of indicators of opportunity, affordable housing in the state clusters in ways that raise concerns about the opportunities available to affordable housing residents in comparison to other residents.

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

Moving ahead, Oklahoma should be wary of a narrowly focused vision focused solely on the problems of existing affordable housing and the integration of these residents into other communities. The relocation of residents harkens back to the physical and social destruction brought about by urban renewal. Such an approach pits efforts to enhance existing affordable housing through community development against efforts to build a more integrated and diverse society (Goetz 2015). Rather, Oklahoma has the opportunity to work closely with local municipalities to improve the conditions of current affordable housing communities while simultaneously advancing integration of low-income and workforce housing through the construction in new settings.

For future new development, a number of case studies and emerging scholarship on the importance of neighborhood effects provide guidance on possible ways forward for Oklahoma. For instance, in El Paso, Texas a public private partnership between the Housing Authority of the City of El Paso and private developers led to the development of a mixed income housing development. Eastside Crossings (<http://www.hacep.org/about-us/eastside-crossings>) provides 74 traditional affordable housing units, 79 affordable housing units, and 45 market rate units in partnership with the Texas Department of Housing and Community Affairs (Housing Authority of El Paso 2015). In Sacramento, partnership between private developers and the Capital Area Redevelopment Authority resulted in the adaptive reuse of a building listed on the National Register of Historic Buildings into affordable Housing (Vellinga 2015). Located in a dense, walkable, transit-oriented community, the Warehouse Artist Lofts (<http://www.rstreetwal.com>) are home to 116 units, 86 of which are affordable and 13,000 square feet of ground floor retail.

For existing affordable housing, strategies exist to help enhance localized opportunities and build a culture of community participation around housing. Across the nation, there is a need to refocus the discussion away from the deficits found in many communities to look for closely at opportunities (Lens 2015) and to think about the consequences of physical, social, and economic isolation (Clarke, Morenoff, Debbink, Golberstein, Elliott, & Lantz, 2014.).

The Oklahoma Housing Finance Agency may need to collaborate more closely with other governmental agencies to develop comprehensive strategies that not only improve existing housing but also work toward enhancing access to food, recreation, amenities, jobs, and quality schools. By doing so, OHFA could help build the social and physical resiliency of these communities so that residents would be empowered to choose for themselves whether or not they want to stay and be part of their existing community or move elsewhere in search of a better quality of life. A set of tools for doing some of this work is available through Policy Link (<http://www.policylink.org/equity-tools/equitable-development-toolkit/about-toolkit>). For those who are relocated due to circumstances that make staying in place impossible, intensive case management may be required to ensure that these residents avoid pitfalls and thrive in a new environment (Theodos, Popkin, Guernsey, & Getsinger, 2010). But evidence continues to suggest that stability, particularly in the lives of children, is an essential part of ensuring that everyone has the opportunity to succeed and thrive (HUD 2014).

Lead-Based Paint Hazards

Findings / Health and Well-being

Lead is known to be highly toxic particularly to young children 5 years of age and under. Excessive exposure results in reduced intelligence, impaired hearing, reduced stature and a host of other negative health effects. It is well documented that a common source of lead exposure for children is lead-based paint in older housing along with the dust and soil it generates. Children are exposed to lead-based paint most commonly by directly eating paint chips or indirectly by ingesting lead-contaminated house dust or soil through normal hand-to-mouth contact.

For purposes of this analysis, the federal definition of “lead-based paint hazard” at 24 CFR Part 35.86 was applied. Under this definition, lead-based paint hazard is defined as, “...any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as established by the appropriate Federal agency.”

It is noteworthy estimates presented can only be stated as dwellings that “potentially” have LBP hazards because there are no real-time surveys or studies of residential structures built prior to 1978. However, there have been previous estimations provided in the state’s Consolidated Plan.

Statewide Findings

Using methodology which will be discussed later in this section, we have estimated the number of housing units in Oklahoma with lead-based paint hazards as defined in 24 CFR Part 35.86. Our estimates are shown in the following table.

| Lead-Based Paint Hazards in Oklahoma | | |
|--|-----------|---------|
| | Number | Percent |
| Total Housing Units | 1,432,730 | |
| Total Housing Units with Lead-Based Paint Hazards | 240,229 | 16.8% |
| Owner-Occupied Units w/LBP Hazards | 159,861 | 66.5% |
| Renter-Occupied Units w/LBP Hazards | 80,368 | 33.5% |
| Housing Units w/LBP Hazards Occupied by Low-to-Moderate Income Households | 113,931 | 47.4% |
| Housing Units w/LBP Hazards with Children < 6 Years of Age Present | 37,426 | 15.6% |
| Housing Units w/LBP Hazards Occupied by LMI Households and Children < 6 Years of Age Present | 19,761 | 52.8% |

Sources: American Healthy Homes Survey Table 5-1 & CHASTables 12 & 13

As shown, we estimate that there are 240,229 housing units in Oklahoma containing lead-based paint hazards, representing 16.8% of Oklahoma’s total housing stock. 66.5% of those units are owner-occupied, while 33.5% are renter-occupied. Of the 240,229 housing units containing lead-based paint hazards, 113,931 units, or 47.4%, are occupied by households with low-to-moderate incomes as defined by HUD. Among all housing units with lead-based paint hazards, 37,426 units have children under the age of six present, and 52.8% of those units, or 19,761 units total, are households with low-to-moderate incomes. Exhibits 2 through 6, found at the end of this section, graphically summarize our statewide findings at a county level.

Disaster Resiliency/ Economy and Society, Infrastructure and Environment

While communities strive to address lead-based paint hazards through education and removal when detected in connection with federally funded local housing rehabilitation initiatives, hazard detection and mitigation may have special considerations in terms of disaster resiliency.

Many disasters are accompanied by widespread damage to residential structures often times scattering building material debris across the landscape necessitating removal by heavy equipment and disposal in landfills. When building materials contaminated with lead-based paint become part of non-contaminated debris disposal, it presents an environmental hazard that can span well beyond recovery and rebuilding efforts.

Leadership and Strategy

Given the albeit large but finite number of potential housing units with lead hazards, the state and local communities may wish to consider initiatives aimed at reducing and/or eventually eliminating residential lead-based paint hazards, particularly in housing occupied by low and moderate income households with young children present. One such initiative could be the use of the state's various federal and state housing programs' competitive funding selection criteria. By designing rating criteria that specifically awards points to applicants that purposefully seek out properties within counties known to have higher percentages of lead hazards, housing developers along with those engaged in rehabilitation may be incentivized to engage in hazard mitigation.

State and local governments may wish to capitalize on the results of this study by using the data to support competitive applications to the Federal Home Loan Bank Topeka's Affordable Housing Program funding for owner occupied rehabilitation which, among other competitive rating criteria, awards points for the "Abatement of Hazardous Environmental Conditions". Similarly, this report's data may be used to document hazards and need in applications for competitive health care grants offered at the federal level.

Similar to initiatives undertaken by USHUD, the state may want to consider undertaking a real-time sample survey of homes built prior to 1978 across the state's community sizes and counties to more accurately ascertain the extent of the hazard and/or conducting real-time surveys of LBP Risk Assessors licensed by the ODEQ.

Survey of Previous Lead-based Paint Studies

Using a combination of US Census Bureau and US Department of Housing and Urban Development Comprehensive Housing Affordability Strategy data and age of housing stock built prior to 1980, the Oklahoma Department of Commerce's, "State of Oklahoma Five-Year E-Consolidated Plan FY 2014 – 2018" estimated 59% of the owner occupied and 65% of the renter occupied housing had the potential of containing lead-based paint. To address lead paint hazards, the Consolidated Plan recommended assessment of hazard presence be conducted at the point dwelling rehabilitation is undertaken and that nonprofits advise persons receiving federal rehabilitating assistance regarding the dangers of lead exposure.

At the national level, between 1998 and 2000, USHUD Office of Health Homes and Lead Hazard Control staff and the National Institute of Environmental Health Sciences conducted a real-time

random sampling of 831 permanently occupied housing units (multifamily, single family and mobile homes) taken from all 50 states and the District of Columbia. The results indicated an estimated 38 million (39% of the 96 million total housing units) of the nation's housing units had lead-based paint hazards. Of that total, 24 million had significant lead hazards with 1.2 million of those units occupied by low income families. It was further estimate that 35% of all low income housing had lead-based paint hazards. The study also noted the prevalence of lead-based paint increases with age of housing. However, most painted surfaces, even in older homes don't have lead paint. Geography was found to be related to the incidence of lead-based paint with the Northeast and Midwest having 2 times the prevalence of lead paint than the South and West. Finally, the study recommends "public-private sector resources be directed units posing the greatest risk" as a preventive measure to avoid lead poisoning.

In April 2011, the U.S. Department of Housing and Urban Development, Office of Healthy Homes and Lead Hazard Control updated its 1998-2000 nationwide report in its publication, "American Healthy Homes Survey, Lead and Arsenic Findings". This report, conducted from June 2005 through March 2006, estimated 37.1 million homes (34.9%) out of a total of 106 million total housing units have lead-based paint somewhere in the building. Of the 65.6 million homes built before 1978, 34.4 million (52%) have lead-based paint. The study reaffirmed the previous finding that the prevalence of lead-based paint is higher in the Northeast and Midwest parts of the United States than South and West. It also confirmed earlier finding that the incidence of lead-based paint increases with age of housing with 86% of the homes built prior to 1940 containing lead. An estimated 3.6 million homes with children less than 6 years of age have lead-based paint hazards of which 1.1 million are low income households. Of the 16.8 million homes with children under the age of 6, 5.7 million (34%) have lead-based paint, about the same incidence of lead-based paint in all homes.

In June 2006, the Oklahoma State Department of Health's Childhood Lead Poisoning Prevention Program (OCLPPP) received a 5-year project grant "Oklahoma Childhood Lead Poisoning Prevention Program Focusing in High Risk Groups". That program focused on communities evidencing high numbers of children 6-72 months of age who are at high risk for lead poisoning.

In order to more effectively target high-risk areas and populations, the OCLPPP identified 21 high-risk target area (HRTA) zip codes (see Exhibit #1) located within Oklahoma, Tulsa, Muskogee, Jackson, Okmulgee, Ottawa, Kay, Garfield, and Hughes counties. These 21 zip codes were narrowed from a list of 57 zip codes out of the state's approximately 700 zip codes that with populations of 5,000 or more persons; greater than or equal to 22% of housing stock built prior to 1950; and, greater than or equal to 18% of children under the age of 6 years living below the poverty level.

The 57 zip codes were further compared and evaluated based on selected characteristics such as EBL cases and proportion of minority population. Zip codes with higher EBL prevalence and/or minority populations (Hispanic/African American/American Indian) were ranked higher and given the designation as HRTA zip codes.

Cimarron County Findings

The number of housing units in Cimarron County containing lead-based paint hazards can be estimated by applying the percentages of housing units with such hazards reported by the American

Healthy Homes Survey, to the number of occupied homes in Cimarron County, by year of construction. The following table presents the percentage of housing units in the Census Bureau South Region based on the AHHS findings.

Housing Units in the South Census Region with Lead-Based Paint Hazards by Year of Construction

| Year of Construction | No. of Housing Units (000s) | Units w/ LBP Hazards (000s) | Percent of Units w/ LBP Hazards |
|----------------------|-----------------------------|-----------------------------|---------------------------------|
| 1978-2005 | 18,625 | 664 | 3.6% |
| 1960-1977 | 11,724 | 1,311 | 11.2% |
| 1940-1959 | 5,575 | 2,145 | 38.5% |
| 1939 or Earlier | 3,072 | 1,947 | 63.4% |
| Total | 38,996 | 6,067 | 15.6% |

Source: U.S. Dept. of Housing and Urban Development, American Healthy Homes Survey, Table 5-1

These percentages can then be applied to the number of housing units in Cimarron County, by year of construction and by tenure (owner-occupied versus renter-occupied), as reported by HUD's Comprehensive Housing Affordability Strategy (CHAS) data for Cimarron County.

Total Housing Units in the State of Cimarron with Lead-Based Paint Hazards by Tenure

| Total Owner-Occupied Housing Units | Total Housing Units | Percent w/LBP Hazards | Number w/LBP Hazards |
|------------------------------------|---------------------|-----------------------|----------------------|
| 1978 or Later | 452,710 | 3.57% | 16,140 |
| 1960-1977 | 277,601 | 11.18% | 31,042 |
| 1940-1959 | 162,530 | 38.48% | 62,534 |
| 1939 or Earlier | 79,120 | 63.38% | 50,145 |
| Total | 971,960 | 16.45% | 159,861 |

| Total Renter-Occupied Housing Units | Total Housing Units | Percent w/LBP Hazards | Number w/LBP Hazards |
|-------------------------------------|---------------------|-----------------------|----------------------|
| 1978 or Later | 185,945 | 3.57% | 6,629 |
| 1960-1977 | 152,096 | 11.18% | 17,008 |
| 1940-1959 | 84,540 | 38.48% | 32,527 |
| 1939 or Earlier | 38,190 | 63.38% | 24,204 |
| Total | 460,770 | 17.44% | 80,368 |

| Total Housing Units | Total Housing Units | Percent w/LBP Hazards | Number w/LBP Hazards |
|---------------------|---------------------|-----------------------|----------------------|
| 1978 or Later | 638,654 | 3.57% | 22,769 |
| 1960-1977 | 429,696 | 11.18% | 48,049 |
| 1940-1959 | 247,070 | 38.48% | 95,061 |
| 1939 or Earlier | 117,310 | 63.38% | 74,350 |
| Total | 1,432,730 | 16.77% | 240,229 |

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

Finally, we can use the same methodology to estimate the number of housing units in Cimarron County with lead-based paint hazards, occupied by households with low-to-moderate incomes, by tenure:

**Housing Units in the State of Cimarron with Lead-Based Paint Hazards by Tenure,
Occupied by Low-Income Families**

| Owner-Occupied Housing Units < 50% AMI | Total Housing Units | Percent w/LBP Hazards | Number w/LBP Hazards |
|---|------------------------|--------------------------|-------------------------|
| 1978 or Later | 49,450 | 3.57% | 1,763 |
| 1960-1977 | 42,795 | 11.18% | 4,785 |
| 1940-1959 | 35,465 | 38.48% | 13,645 |
| 1939 or Earlier | 18,980 | 63.38% | 12,029 |
| Total | 146,690 | 21.97% | 32,223 |

| Renter-Occupied Housing Units < 50% AMI | Total Housing Units | Percent w/LBP Hazards | Number w/LBP Hazards |
|--|------------------------|--------------------------|-------------------------|
| 1978 or Later | 74,713 | 3.57% | 2,664 |
| 1960-1977 | 65,367 | 11.18% | 7,309 |
| 1940-1959 | 36,340 | 38.48% | 13,982 |

| 1939 or Earlier | 23,170 | 63.38% | 14,685 |
| Total | 250,025 | 18.80% | 47,013 |

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

To conclude, we estimate that there are a total of 292 homes in Cimarron County containing lead-based paint hazards, 159,861 owner-occupied and 80,368 renter-occupied. Of the 292 homes in the county estimated to have lead-based paint hazards, 66,918 are estimated to be occupied by households with low-incomes (incomes less than 50% of Area Median Income), and 47,013 are estimated to be occupied by households with moderate incomes (between 50% and 80% of Area Median Income), for a total of 137 housing units in Cimarron County with lead-based paint hazards occupied by households with low or moderate incomes.

Lead-Based Paint Hazards in Homes with Children Present

Using the same methodology, we can estimate the number of housing units in Cimarron County occupied by households with children under the age of six present. For this analysis we apply the lead-based paint hazards percentages from the American Healthy Homes Survey to the data in HUD CHAS Table 13, which details housing units by year of construction, household income, and presence of children under the age of six. The data is presented in the following table:

Housing Units in the State of Cimarron with Lead-Based Paint Hazards
with Children under Age 6 Present Occupied by Low or Moderate-Income Families

Conclusions

The previous analysis has attempted to describe the state of the residential housing market in Cimarron County, Oklahoma. Where possible, information regarding the population centers of the county was included to assess need on a community level. Much of the information is based on demographic information from local authorities and national information services. However, personal interviews were performed with property owners and managers, real estate professionals, and community officials in an effort to substantiate information from the national organizations and understand current market conditions. Several important issues regarding housing have become apparent through this analysis and are identified below.

The population of Cimarron County has declined 28.6% since the 2000 Census. Relatively little residential construction has occurred since that time. This is likely due in no small part to the fact that both home values and rental rates in the county are significantly below statewide figures, making new housing construction not financially feasible in many cases. The county also has lower income levels and higher rates of poverty compared with the rest of the state.

In terms of disaster resiliency we note that 42 tornadoes have impacted the county between 1959 and 2014, with three injuries. We recommend the county develop a hazard mitigation plan, and create a registry of individual and business-based shelters.

Cimarron County is located within the Oklahoma Balance of State Continuum of Care (CoC), which provides services to the area's homeless populations among other functions. Throughout the entire Balance of State CoC, there are an estimated 295 homeless persons, 154 of which are estimated to be sheltered. Homeless children under the age of 18 are more likely to be unsheltered than sheltered.

In terms of fair housing issues, 69 affordable housing units lack readily available transit, and the same 69 units are located in a food desert. 8 units are located more than 15 miles from a hospital.

Due to the age of the county's housing stock, lead-based paint hazards are an issue, with an estimated 292 occupied housing units with such hazards, and 33 of those units occupied by low-to-moderate income households with children under the age of 6 present.

In summary, though the population of the county is declining, some housing needs are unmet. The number of housing units is also declining, leading to a shortage of good quality housing. The rapidly aging housing stock of the county will need either rehabilitation or replacement in the near future in order to ensure residents have access to good quality and affordable housing.

Addendum A

Acknowledgments

The Housing Needs Assessment research team extends a special thanks to the following individuals and organizations for their many contributions of data, program information and time that helped make this project possible:

University of Oklahoma Intern Team

David A. Puckett

Experience

Senior Director with Integra Realty Resources - Oklahoma, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since May 2002, Mr. Puckett has performed appraisal services consisting of narrative and summary real estate appraisals. All types of real property are encompassed-apartments, garden office buildings, manufacturing and warehouse industrial buildings, mobile home parks, restaurants and retail structures. Valuations and market studies have been prepared on proposed and existing structures. Appraisals have been made for estates, mortgage financing, equity participation and due diligence support. Prior to his employ at Integra Realty Resources - Oklahoma, Mr. Puckett was an employee of the University of Oklahoma Center for Business and Economic Development, working as a data analyst for the All County Affordable Housing Study commissioned by the Oklahoma Department of Commerce. Responsibilities included demographic, economic and real estate data collection from federal, state and local sources, as well as interviews of regional planning district, county and municipal officials, real estate market experts and local economic development experts. Mr. Puckett was responsible for site visits of 23 of the 77 Oklahoma counties, and personally authored 18 of the final reports. As an employee of IRR-Oklahoma, Mr. Puckett also performed the site visits and authored the final reports for four of the nine entitlement cities: Tulsa, Broken Arrow, Shawnee and Lawton. Mr. Puckett has also completed numerous housing market studies for use in applications for Federal Low-Income Housing Tax Credits in Oklahoma, Kansas, Missouri and Arkansas, and has performed market studies and appraisals for use in H.U.D.'s Multifamily Accelerated Processing (M.A.P.) program. Clients served include corporations, financial institutions, investment firms and public/private agencies.

Integra Realty Resources, Inc.

Corporate Profile

Integra Realty Resources, Inc. offers the most comprehensive property valuation and counseling coverage in North America with over 60 independently owned and operated offices located throughout the United States and the Caribbean. Integra was created for the purpose of combining the intimate knowledge of well-established local firms with the powerful resources and capabilities of a national company. Integra offers integrated technology, national data and information systems, as well as standardized valuation models and report formats for ease of client review and analysis. Integra's local offices have an average of 25 years of service in the local market, and virtually all are headed by a Senior Managing Director who is an MAI member of the Appraisal Institute.

Investigator and Collaboration Lead, Planning for Sea Level Rise: A Pilot Study to Evaluate and Improve the Development and Delivery of Habitat Vulnerability Assessments and Adaptive Conservation Designs to Coastal Decision Makers, National Estuarine Research Reserve System Science Collaborative, 2011-2014.

Co-PI, Rural Coastal Region Adaptation Planning for Sea Level Rise, Florida Sea Grant, 2012-14.

Co-PI, Development of Sea Level Rise Adaptation Planning Procedures and Tools Using NOAA Sea Level Rise Impacts Viewer, Gulf of Mexico Regional Research Competition, 2012-14.

Co-PI, Impact of Parking Supply and Demand Management on Central Business District (CBD) Traffic Congestion, Transit Performance and Sustainable Land Use, Florida Department of Transportation, January 2010 – October 2011.

A Parameterized Climate Change Projection Model for Hurricane Flooding, Wave Action, Economic Damages, and Population Dynamics, sponsored by NOAA, September 2009-September 2011, Role, Co-Principal Investigator.

HOPE VI Community Services Study for the Redevelopment of Magnolia Gardens in Beaumont, Texas, sponsored by the U.S. Department of Housing and Urban Development and the Beaumont Public Housing Authority, January 2007-December 2011, Role, Co-Principal Investigator.

Preserve America Grant for an Intergenerational Oral History for Hearne, Texas, sponsored by the National Parks Service, January 2007-December 2007, Role, Investigator.

A Hedonic Model of the Effects of Adaptive Reuse on Community Change in Savannah, Georgia, sponsored by the Lincoln Institute of Land Policy, Role, Investigator.

Legal Analysis and Policy Formulation Regarding the Use of Regional Rural Landbanking to Enhance the Development of Affordable Housing Opportunities in Brazos Valley Texas, sponsored by the Brazos Valley Affordable Housing Corporation, January 2007-August 2007, Role, Co-Principal Investigator.

Market Study of the Barriers to the Provision of Affordable Housing in Brazos Valley Texas, sponsored by the Brazos Valley Affordable Housing Corporation, January 2006-August 2006, Role, Co-Principal Investigator.

Comparative Analysis of the Effects of the Location of Big Box Retail on Housing Prices in Urban and Suburban Areas, sponsored by Texas A&M College of Architecture, December 2005-December 2006, Role, Principal Investigator.

PROFESSIONAL SERVICE AND AFFILIATIONS:

Professional Services

Chair of the Academic Advisory Council for Sign Research and Education (August 2014-present)

Chair of the Planner Outreach Subcommittee for the International Sign Association (January 2014-present)

Appointed to the Alachua County Affordable Housing Advisory Board (April 2010-2011)

University Liaison to the Florida Chapter of the American Planning Association (September 2007-September 2010)

Fellow to the Center for Children and Families at the Levin College of Law (May 2007-2012)

Member of the Law School Honor Code Committee (2009-2010)

Member of the ICCHP Committee (2009-2010)

Member of DCP Faculty Council (2009-2012)

Member of UF Historic Buildings and Structures Committee (2009-2010)

UF Commencement Marshall (2008-2010)

Ad Hoc Member of the Amicus Committee for the American Planning Association
Fellow for the Center for Heritage Conservation at Texas A&M University (2005-2007).

CONFERENCE PRESENTATIONS:

International Conferences-Refereed Presentations

Jourdan, D., K. Hurd, H. G. Hawkins, and K. Winson-Geideman. Evidence-based Sign Regulation: Regulating Signage on the Basis of Empirical Wisdom. Presented at the AESOP-ACSP Conference in Dublin, Ireland, July 2013.

Nolon, J., Call, C., Murtaza, A, and **Jourdan, D.** Property Rights, Political Drama, and Smart Growth: The Challenges of Sustainable Development in 2011. Presented at the National Conference of the American Bar Association in Toronto, August 2011.

Jourdan, D., Wal-Mart in the Garden District- Does the Arbitrary and Capricious Standard of Review Lessen the Right of Citizens to Participate. Presented at the

International Association of Planning Law and Property Rights, Aalborg, Denmark, February, 2008.

Jourdan, D. and VanZandt, S, Creating Regional Landbanks to Meet Rural Affordable Housing Needs. Presented at the Joint International Conference of the Association of Collegiate Schools of Planning (ACSP) and the Association of European Planning Schools (AESOP), Chicago, IL, July 2008.

Jourdan, D., Should Children Have the Right to Speak for Themselves: The legal rights of youth to participate in national level policymaking. Presented at the International Conference on the Rights of Children, Ghent, Belgium (2006).

Jourdan, D., Grounding Theory: Developing New Theory on Intergenerational Participation. Presented at the Joint International Conference of the Association of Collegiate Schools of Planning (ACSP) and the Association of European Planning Schools (AESOP), Mexico City, Mexico (2006).

Jourdan, D., Planning to Reduce Worry. Presented at the Making Cities Livable Conference, Venice, Italy (2005).

National Conferences

Jourdan, D. Community Aesthetics and Sign Regulations: How far can a city go to prescribe aesthetics?" Presented at the National Signage Research and Education Conference in Cincinnati, OK, October, 2013.

Jourdan, D. and J. Kellaris, Collaborating with City Officials on Urban Signage, Presented at the International Sign Expo, in Las Vegas, NV, April, 2012.

Jourdan, D. Evidence-Based Sign Regulation: Regulating Signage on the Basis of Empirical Wisdom. Presented at the National Signage Research and Education Conference in Cincinnati, OK, October, 2012.

Jourdan, D., Ray, A., and Thompson, L. Relocating from Subsidized Housing in Florida: Are Residents Moving to Opportunity? Urban Affairs Association, Pittsburgh, PA, April 2012.

Frank, K., **Jourdan, D.**, Easley, G., and F. Eddleton. Leveraging community historical identity for climate change adaptation planning. Society for American City and Regional Planning History Conference, Baltimore, MD, November 17-20, 2011.

Frank, K., **Jourdan, D.**, and Obonyo, E. Sea level rise adaptation planning for rural coastal areas in Florida. Initiative on Climate Adaptation Research and Understanding through the Social Sciences: Climate Vulnerability and Adaptation (ICARUS II). May 5-8, Ann Arbor, MI, 2011.

Steiner, R., **Jourdan, D.**, Blanco, A., Mackey, J., Hanley, G., Sucar, V., and Shmaltzuyev, M., Understanding the Connection between Parking Management and Transit Usage: A Case Study of Miami and Fort Lauderdale Central Business Districts. Presented at the Association of Collegiate Schools of Planning (ACSP) Conference, Minneapolis. Oct. 13 – 16, 2011.

Steiner, R., Blanco, A. and **Jourdan, D.**, Impact of Parking Supply And Demand Management on Central Business District (CBD) Traffic Congestion. Presented at the Association of Collegiate Schools of Planning (ACSP) Conference. Minneapolis. Oct. 5 – 10, 2010.

Jourdan, D. Coming Home: The Relocation Effects of Expedited HOPE VI Revitalization Processes. Presented at the Urban Affairs Association, New Orleans, LA, 2011.

Zhao, J. and **Jourdan, D.** Zoning Variance Administration in Practice: Influencing Factors and Trends. Presented at the ACSP Conference in Minneapolis, MN, November, 2010.

Jourdan, D., Valuing Grief: A Proposal to Compensate Relocated Public Housing Residents for Intangibles. Presented at the ACSP Conference, Washington, D.C., October, 2009.

Jourdan, D., Garvin, E. and Stroud, N. Potential Legal Challenges to Form Based Codes: the Miami 21 Test Case. Presented at the IMLA Conference, Miami, FL, October, 2009.

Jourdan, D., Creating Regional Landbanks to Meet Rural Affordable Housing Needs. Presented at the Joint ACSP/AESOP Conference, Chicago, IL, July 2008.

VanZandt, S. and **Jourdan, D.** Landbanking to Meet Affordable Housing Needs. Presented at the National Conference of the American Planning Association Conference, Las Vegas, NV, April, 2008.

Jourdan, D. and Wieters, M. Serious Play: Constructing Learning to Promote Meaningful Dialogue in the Planning Classroom. Presented at the Association of Collegiate Schools of Planning National Conference, Fort Worth, TX, 2006.

Geideman, K. and **Jourdan, D.** Preserving Who's Neighborhood: The Effects of Adaptive Reuse by the Savannah College of Art & Design on Property Value and Community Change in Savannah, Georgia. Presented at the Lincoln Land Institute, Cambridge, MA, 2006.

Jourdan, D., Sentencing Goldilocks. Presented at the Association of Collegiate Schools of Planning National Conference, Kansas City, MO, 2005.

Jourdan, D., Public Housing: Is it Worth Preserving? Presented at the Association of Collegiate Schools of Planning National Conference, Kansas City, MO, 2005.

Jourdan, D., Grieving for a Lost Home?: A Case Study of How Participation in an Intergenerational Planning Process Lessened the Pre-Relocation Grief Effects of Experienced by the Youth and Adult Residents of the McDaniel Glenn Public Housing Community in Atlanta. Presented at the Association of Collegiate Schools of Planning National, Portland, OR, 2004.

Jourdan, D., Mending Fences: Resolving Neighbor Disputes With Squatter Settlements in Belize. Presented at Pace University, NYC, April 2004.

Jourdan, D., Increasing Youth Participation in the Planning Process. Presented at the Association of Collegiate Schools of Planning National Conference, Baltimore, MD, 2002.

National Conferences – Invited Discussant and/or Moderator

Jourdan, D. Institute for Quality Communities Placemaking Conference in Norman, OK (2013) on the topic of "Healthy, Walkable Communities."

Jourdan, D. Annual Conference of the ACSP in Washington D.C. (2009) on the topic of "Comparative Jurisprudence Relating to Takings and Due Process Law."

Jourdan, D. Joint ACSP/AESOP Conference, Chicago, IL, (2008) on the topic of "Comparative Legal Jurisprudence on Property Rights."

Jourdan, D. Annual Conference of the ACSP in Fort Worth, TX (2006) on the topic of "Researching Wal-Mart."

Jourdan, D. Annual Conference of the ACSP in Kansas City, MO (2005) on the topic of "Research Wal-Mart."

Jourdan, D. Annual Conference of the ACSP in Portland, OR (2004) on the topic of "What Planners Should Know About the Law."

Jourdan, D. Sustainable Campus Planning, Annual Conference of the ACSP in Baltimore, MD (2002).

State Conferences –Presentations by Invitation

Jourdan, D. The New Urbanism: Optimizing Imagination, Creativity, Innovation, and Human Flourishing, Presented at the State Creativity Forum in Oklahoma City, OK, November, 2013.

Jourdan, D. So You Want to Take on Your Sign Code, Presented at the State Conference of the Oklahoma Chapter of the American Planning Association in Tahlequah, OK, October, 2013.

Steiner, R., Blanco, A., and **Jourdan, D.** Parking as a Smart Growth Strategy, Presented at the Florida Chapter of the American Planning Association Conference September 2011.

Silver, C. and **Jourdan, D.** Legal Aspects of Sustainable Development, Presented at the Florida Chapter of the American Planning Association Conference, September, 2011.

Jourdan, D. The Land Use Revolution: The Tea Party's Influence on Planning Process. Presented at the Annual Conference of the Utah Land Institute, Salt Lake City, Utah, November 2011.

Jourdan, D., Measuring the Winds of Change: the Introduction of Qualitative Research Methods in Planning Processes. Presented at the Annual Conference of the Texas Chapter of the American Planning Association, Corpus Christi, TX (2006).

INVITED LECTURES

University of Oklahoma
Department of Geography & Sustainability, Spring Colloquium
"Walking & Biking: Active Transportation and the Built Environment" January 2014

Kansas State University – Big 12 Fellowship

- The messiness of random sampling spatially Oct. 21, 2013
- Watershed Functions & Impacts from Development Oct. 21, 2013
- Creating an audit tool and operationalizing data Oct. 23, 2013
- Bicycle Facility Design & Planning Oct. 23, 2013
- Observational Methods Oct. 23, 2013
- Pedestrian Planning and Design: How does the environment we live in impact our lives? Oct. 2013
- Office workers – Sedentary by Practice: How can we integrate physical activity as part of daily routines at work – Formal presentation to faculty and students Oct. 2013

Department of Biostatistics and Epidemiology College of Public Health,
University of Oklahoma Health Sciences Center

- Planning, Built Environment, and Public Health: How does the environment we live in impact our lives? March 11, 2013

GRANT FUNDING

Received Ed Cline Faculty Development Award (\$1450), Spring 2014
Received Big 12 Faculty Fellowship Program Award (\$2500) June 2013
Received College of Architecture IT recipient (\$3450) July 2013
Sooner Parents Mini-Grant Funding (\$500) for student mentoring –prepared and submitted to assist RCPL Student Planning Association July 2013
Received Junior Faculty Research (\$7,000) for summer research on rural planning and physical activity opportunities. University of Oklahoma, Summer 2012
Robert Wood Johnson Active Living Research Dissertation Grant (\$25,000), Texas A&M University, 2007

SERVICE

University-Level Service

- Advisory Committee Course Management Systems (ACCMS) Spring 2013

College-Level Service

- Graduate Liaison for Regional & City Planning Division (Fall 2013 – present)
- Graduate Research & Curriculum Committee (Fall 2013 – present)
- RCPL orientation (Fall 2010- present)
- Search committee for new RCPL hires, new LA hire (Summer 2011, Summer 2012, Spring 2013, Spring 2014)
- IT Committee (member since 2012), Chair (Fall 2013-Spring 2014)
- Model Shop Committee (member since 2012-Fall 2013)
- RCPL website (2011- present)
- GHGI committee (Gould Hall Green Initiative) (Fall 2011)
- Co-hosting and arranging guest seminar: Dr. Chanam Lee – "The Built Environment and Disparities in Physical Activity", December 2012.

SERVICE

State-level / City-Level Service

- President – Health Equity Caucus, subgroup of Oklahoma Public Health Association
- APA/AICP member
- Bicycle Advisory Committee, City of Norman – Committee member (Spring 2013 – 2016)

National-Level Service

- Secretary/Treasurer of Faculty Women’s Interest Group (FWIG), committee under Association of Collegiate Schools of Planning (ACSP).
- CDC Weight of the Nation Conference planning, Built Environment & Transportation Subcommittee
- Reviewer for Journal of Physical Activity and Health

Edmond, OK 73103

United States of America

Phone: 405/396-2032 Cell Phone: 405/202-1610

BACKGROUND SUMMARY

Executive Manager with extensive experience in public sector resource design, management and evaluation. Knowledge and skills include: structuring and design of state and local service programs and initiatives, developing written proposals for project financing, identifying community economic development resources and training.

EXPERIENCE

DeBruler, Inc.

Vice President, Oklahoma City, August 2001 to Present

Provide services including:

- ✓ Researching public and private resources and preparing applications for financial assistance in response to client requests for economic and community development projects.
- ✓ Technical assistance to nonprofits and units of local government regarding federal and state resources and structuring project-beneficial partnerships; preparing strategic and business plans for public and private sector entities.
- ✓ Group facilitation services.
- ✓ Technical training for nonprofits and units of local government regarding federal and state financial assistance programs. Conducting organizational assessments and developing capacity building curriculums.

Oklahoma Housing Finance Agency

Team Leader, Housing Development Team, Oklahoma City, July 1998 to July 2001

Provided direct supervision and oversight of sixteen staff engaged in the administration of multiple federal and state affordable housing program resources.

While employed by the agency:

- ✓ Reorganized state's Single Family Mortgage Revenue Bond, Low-income Housing Tax Credit, HOME Investment Partnerships and Housing Trust Fund Programs into a single work unit.
- ✓ Streamlined Low-income Housing Tax Credit Program administrative rules to provide for market responsive design flexibility.
- ✓ Streamlined affordable housing resources by developing a singular application package and process for the agency's affordable housing development resources and established e-information network.
- ✓ Facilitated the development of working partnerships between the state's nonprofit and for-profit housing development organizations and agency's mortgage revenue bond lenders.
- ✓ Financed the development of affordable housing by leveraging public sector development funds with private investments.

- ✓ Facilitated legislative task force on rural affordable housing issues and devised legislative and programmatic actions to spur rural development.
- ✓ Developed, financed and implemented the state's first statewide affordable housing market analysis in partnership with a major university center.
- ✓ Drafted enabling legislation, capitalized and implemented state's Housing Trust Fund.

Oklahoma Department of Commerce

Program Manager/Department Head, Oklahoma City, March 1988 to July 1998

- ✓ In response to market-based demand, directed a team of professional agency staff with diverse skills, in the redesign of the state's HOME Investment Partnerships Program from primarily rehabilitation services to the production of rural affordable housing units.
- ✓ Led HOME Program administrative team in the relocation of the Program from its state agency environment to the Oklahoma Housing Finance Agency, a public trust.
- ✓ Leveraged HOME Program development resources with other public and private debt capital to finance the development of rural affordable housing statewide.
- ✓ Formulated and implemented a legislative agenda to enact and capitalizing the state's Housing Trust Fund.
- ✓ Provided daily oversight and administration for several state administered federal programs including: U.S. Department of Energy State Energy Program, Community Development Block Grant, Home Investment Partnerships, Rental Rehabilitation, Solar Energy and Energy Conservation Bank, and State Appropriated Funds for regional councils of government.

City of Oklahoma City January 1984 to February 1988

Division Head, Code Inspections Division/Department of Environmental Services

Assistant Superintendent, Utility Services Division/Water Department

Administrative Assistant, Street Maintenance Division, Public Works Department

Management Intern, Personnel Department

EDUCATION

Masters of Public Administration, University of Oklahoma 1983

Bachelor of Arts Political Science, University of Oklahoma, 1979
