

Housing Needs Assessment
Jackson County

Prepared For:

Oklahoma Housing Finance Agency
Oklahoma Department of Commerce
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

Effective Date of the Analysis:

December 8, 2015

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

January 26, 2016

Mr. Dennis Shockley, Executive Director
Oklahoma Housing Finance Agency
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

SUBJECT: Housing Needs Assessment
 Jackson County
 IRR - Tulsa/OKC File No. 140-2015-0046

Dear Mr. Shockley:

As per our Agreement with Oklahoma Housing Finance Agency (OHFA), we have completed a residential housing market analysis (the "Analysis") for use by OHFA and the Oklahoma Department of Commerce (ODOC). Per our Agreement, OHFA and ODOC shall have unrestricted authority to publish, disclose, distribute and otherwise use, in whole or in part, the study and reports, data or other materials included in the Analysis or otherwise prepared pursuant to the Agreement and no materials produced in whole, or in part, under the Agreement shall be subject to copyright in the United States or any other country. Integra Realty Resources – Tulsa/OKC will cause the Analysis (or any part thereof) and any other publications or materials produced as a result of the Agreement to include substantially the following statement on the first page of said document:

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Attached hereto, please find the Jackson County Residential Housing Market Analysis. Owen S. Ard, MAI personally inspected the Jackson County area during the month of December 2015 to collect the data used in the preparation of the Jackson County Market Analysis. The University of Oklahoma College of Architecture Division of Regional and City Planning provided consultation, assemblage and analysis of the data for IRR-Tulsa/OKC.

Mr. Dennis Shockley
Oklahoma Housing Finance Agency
January 26, 2016

Introduction and Executive Summary

This report is part of a Statewide Affordable Housing Market Study commissioned by the Oklahoma Department of Commerce (ODOC) in partnership with the Oklahoma Housing Finance Agency (OHFA), as an outgrowth of the 2013 tornado outbreak in Oklahoma. It was funded by the U.S. Department of Housing and Urban Development (USHUD) through the Community Development Block Grant – Disaster Recovery program (CDBG-DR). This study was conducted by a public/private partnership between Integra Realty Resources – Tulsa/OKC, the University of Oklahoma College of Architecture, Division of Regional and City Planning, and DeBruler Inc. IRR-Tulsa/OKC, The University of Oklahoma, and DeBruler Inc. also prepared a prior statewide study in 2001, also commissioned by ODOC in partnership with OHFA.

This study is a value-added product derived from the original 2001 statewide housing study that incorporates additional topics and datasets not included in the 2001 study, which impact affordable housing throughout the state. These topic areas include:

- Disaster Resiliency
- Homelessness
- Assessment of Fair Housing
- Evaluation of Residential Lead-Based Paint Hazards

These topics are interrelated in terms of affordable housing policy, housing development, and disaster resiliency and recovery. Homeless populations are more vulnerable in the event of a disaster, as are many of the protected classes under the Fair Housing Act. Lead-based paint is typically more likely to be present in housing units occupied by low-to-moderate income persons, and can also present an environmental hazard in the wake of a disaster. Effective affordable housing policy can mitigate the impact of natural and manmade disasters by encouraging the development and preservation of safe, secure, and disaster-resilient housing for Oklahoma’s most vulnerable populations.

Housing Market Analysis Specific Findings:

1. The population of Jackson County is projected to decline by -0.09% per year over the next five years, though population of Altus is projected to grow by 0.07% per year over the same time period.
2. Jackson County is projected to need a total of 57 housing units for ownership and 44 housing units for rent over the next five years, all in the Altus area, based solely on projected population and household growth by Nielsen SiteReports.
3. Altus Air Force Base was among the bases selected for training and maintenance for the new KC-46A Pegasus tanker, which is projected to add 350 jobs to Altus AFB (civilian and military). There will be additional housing need (well beyond the 101 housing units noted above) to accommodate new employment related to the KC-46A.
4. Median Household Income in Jackson County is estimated to be \$44,518 in 2015, compared with \$47,049 estimated for the State of Oklahoma. The poverty rate in Jackson County is estimated to be 16.51%, compared with 16.85% for Oklahoma.

5. The rental vacancy rate in Jackson County is lower than the state average, though the homeowner vacancy rate is somewhat higher.
6. Home values and rental rates in Jackson County are somewhat lower than the state averages.
7. Average sale price for homes in Altus was \$120,268 in 2015, with an average price per square foot of \$69.78. The average year of construction for homes sold in 2015 is estimated to be 1977.
8. Approximately 33.50% of renters and 17.20% of owners are housing cost overburdened.

Disaster Resiliency Specific Findings:

1. Create a shelter registry for location of individual and business-based shelters (online or paper)
2. Tornadoes (1959-2014): Number: 63 Injuries: 77 Fatalities: 4 Damages (1996-2014): \$20,000.00
3. Social Vulnerability: Above the state score; The area most vulnerable by census tract is in the area of Altus and western portion of the county.
4. Floodplain: National Climatic Data Center storm event statistics record 12 flood events in Jackson County and participating jurisdictions during the 10-year period 1993-2003. There were no reported damages. According to National Flood Insurance Program statistics, Jackson County residents had four reported losses and received payments totaling \$5,164.00 as of May 2011.

Homelessness Specific Findings

1. Jackson County is located in the Southwest Oklahoma Continuum of Care.
2. There are an estimated 239 homeless individuals in this area, 177 of which are identified as sheltered.
3. There are at least 8 homeless households comprised of children only.
4. There is also a high homeless veteran population (25) in this region.
5. Investment should be made for more temporary and permanent housing for homeless veterans.

Fair Housing Specific Findings

1. Units at risk for poverty: 18
2. Units in mostly non-white enclaves: 18
3. Units in limited English neighborhoods: 18
4. Units further than 15 miles from a hospital: 30
5. Units located in a food desert: 30

Lead-Based Paint Specific Findings

1. We estimate there are 2,281 occupied housing units in Jackson County with lead-based paint hazards.
2. 1,152 of those housing units are estimated to be occupied by low-to-moderate income households.

3. We estimate that 369 of those low-to-moderate income households have children under the age of 6 present.

Report Format and Organization

The first section of this report comprises the housing market analysis for Jackson County. This section is divided into general area information, followed by population, household and income trends and analysis, then followed by area economic conditions. The next area of analysis concerns the housing stock of Jackson County, including vacancy rates, construction activity and trends, and analyses of the homeowner and rental markets. This section is followed by five-year forecasts of housing need for owners and renters, as well as specific populations such as low-to-moderate income households, the elderly, and working families.

The next section of this report addresses special topics of concern:

- Disaster Resiliency
- Homelessness
- Fair Housing
- Lead-Based Paint Hazards

This last section is followed by a summary of the conclusions of this report for Jackson County.

General Information

Purpose and Function of the Market Study

The purpose of this market study is to evaluate the need for affordable housing units in Jackson County, Oklahoma. The analysis will consider existing supply and projected demand and overall market trends in the Jackson County area.

Effective Date of Consultation

The Jackson County area was inspected and research was performed during December, 2015. The effective date of this analysis is December 8, 2015. The date of this report is January 26, 2016. The market study is valid only as of the stated effective date or dates.

Scope of the Assignment

1. The Jackson County area was inspected during December, 2015. The inspection included visits to all significant population centers in the county and portions of the rural county areas.
2. Regional, city and neighborhood data is based on information retained from national, state, and local government entities; various Chambers of Commerce, news publications, and other sources of economic indicators.
3. Specific economic data was collected from all available public agencies. Population and household information was collected from national demographic data services as well as available local governments. Much data was gathered regarding market specific items from personal interviews.
4. Development of the applicable analysis involved the collection and interpretation of verified data from local property owners/managers, realtors, and other individuals active within the area real estate market.
5. The analyst's assemblage and analysis of the defined data provided a basis from which conclusions as to the supply of and demand for residential housing were made.

Data Sources

Specific data sources used in this analysis include but are not limited to:

1. The 2000 and 2010 Decennial Censuses of Population and Housing
2. The 2009-2013 American Community Survey (ACS)
3. U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division
4. The United States Department of Labor, Bureau of Labor Statistics, including the Local Area Unemployment Statistics and the Quarterly Census of Employment and Wages programs
5. The U.S. Department of Housing and Urban Development, including the Comprehensive Housing Affordability Strategy (CHAS), and the 2013 Picture of Subsidized Households
6. Continuum of Care Assistance Programs

7. The National Oceanic and Atmospheric Administration
8. Nielsen SiteReports (formerly known as Claritas)
9. The Oklahoma State Department of Health
10. The Oklahoma Department of Human Services
11. The Federal Reserve Bank of Kansas City, Oklahoma City Branch
12. The Federal Reserve Bank of New York

Jackson County Analysis

Area Information

The purpose of this section of the report is to provide a basis for analyzing and estimating trends relating to Jackson County. The primary emphasis is concentrated on those factors that are of significance to residential development users. Residential and commercial development in the community is influenced by the following factors:

1. Population and economic growth trends.
2. Existing commercial supply and activity.
3. Natural physical elements.
4. Political policy and attitudes toward community development.

Location

Jackson County is located in southwestern Oklahoma. The county is bordered on the north by Harmon, Greer, and Kiowa counties, on the west by Harmon County and Texas, on the south by Texas, and on the east by Kiowa and Tillman counties. The Jackson County Seat is Altus, which is located in the central part of the county. This location is approximately 243 miles southwest of Tulsa and 138 miles southwest of Oklahoma City.

Jackson County has a total area of 804 square miles (803 square miles of land, and 2 square miles of water), ranking 40th out of Oklahoma's 77 counties in terms of total area. The total population of Jackson County as of the 2010 Census was 26,446 persons, for a population density of 33 persons per square mile of land.

Access and Linkages

The county has average accessibility to state and national highway systems. Multiple major highways intersect within Jackson. These are US-283, US-62, OK-19, OK-34, OK-6, and OK-5. The nearest interstate highway is I-40, located 42.1 miles north. The county also has an intricate network of county roadways.

Public transportation is provided by Southwest Transit (ST) and the Altus Express, both operate a demand-response service. The local market perceives public transportation as average compared to other communities in the region of similar size. However, the primary mode of transportation in this area is private automobiles by far. Further, The BNSF Railroad operates hubs throughout the county. The railroad transports goods throughout the state of Oklahoma, though there are no passenger trains.

Altus/Quartz Mountain Regional Airport is located just north of Altus. Its primary concrete runway measure 5,501 feet in length. Additionally, Altus Air Force Base is located in Altus and operates as a

large contributor in the Jackson County economy. The nearest full-service commercial airport is Will Rogers World Airport, located approximately 120 miles northeast.

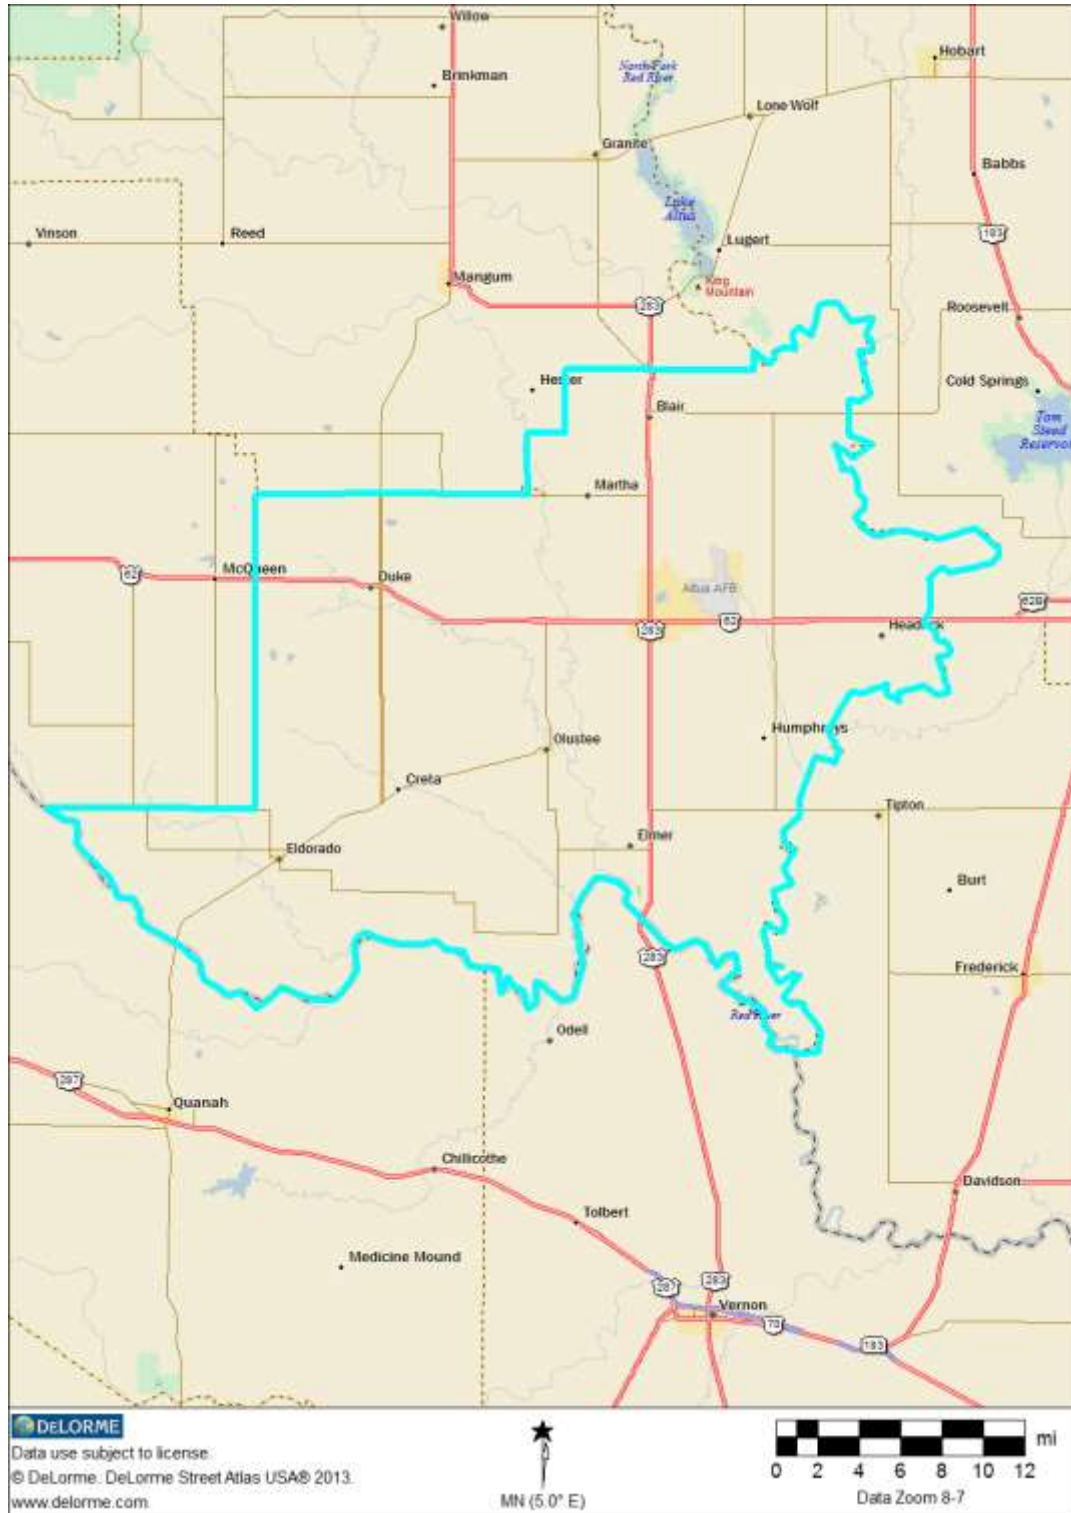

Educational Facilities

All of the county communities have public school facilities. Altus is served by Altus Public Schools which operates one high school, one middle school, one intermediate school, and six elementary schools. Altus is home to Western Oklahoma State College, the oldest two-year municipal college in Oklahoma. It offers a variety of associates degrees and has cooperative agreements with other institutions which allow students to complete bachelor's degrees in Altus.

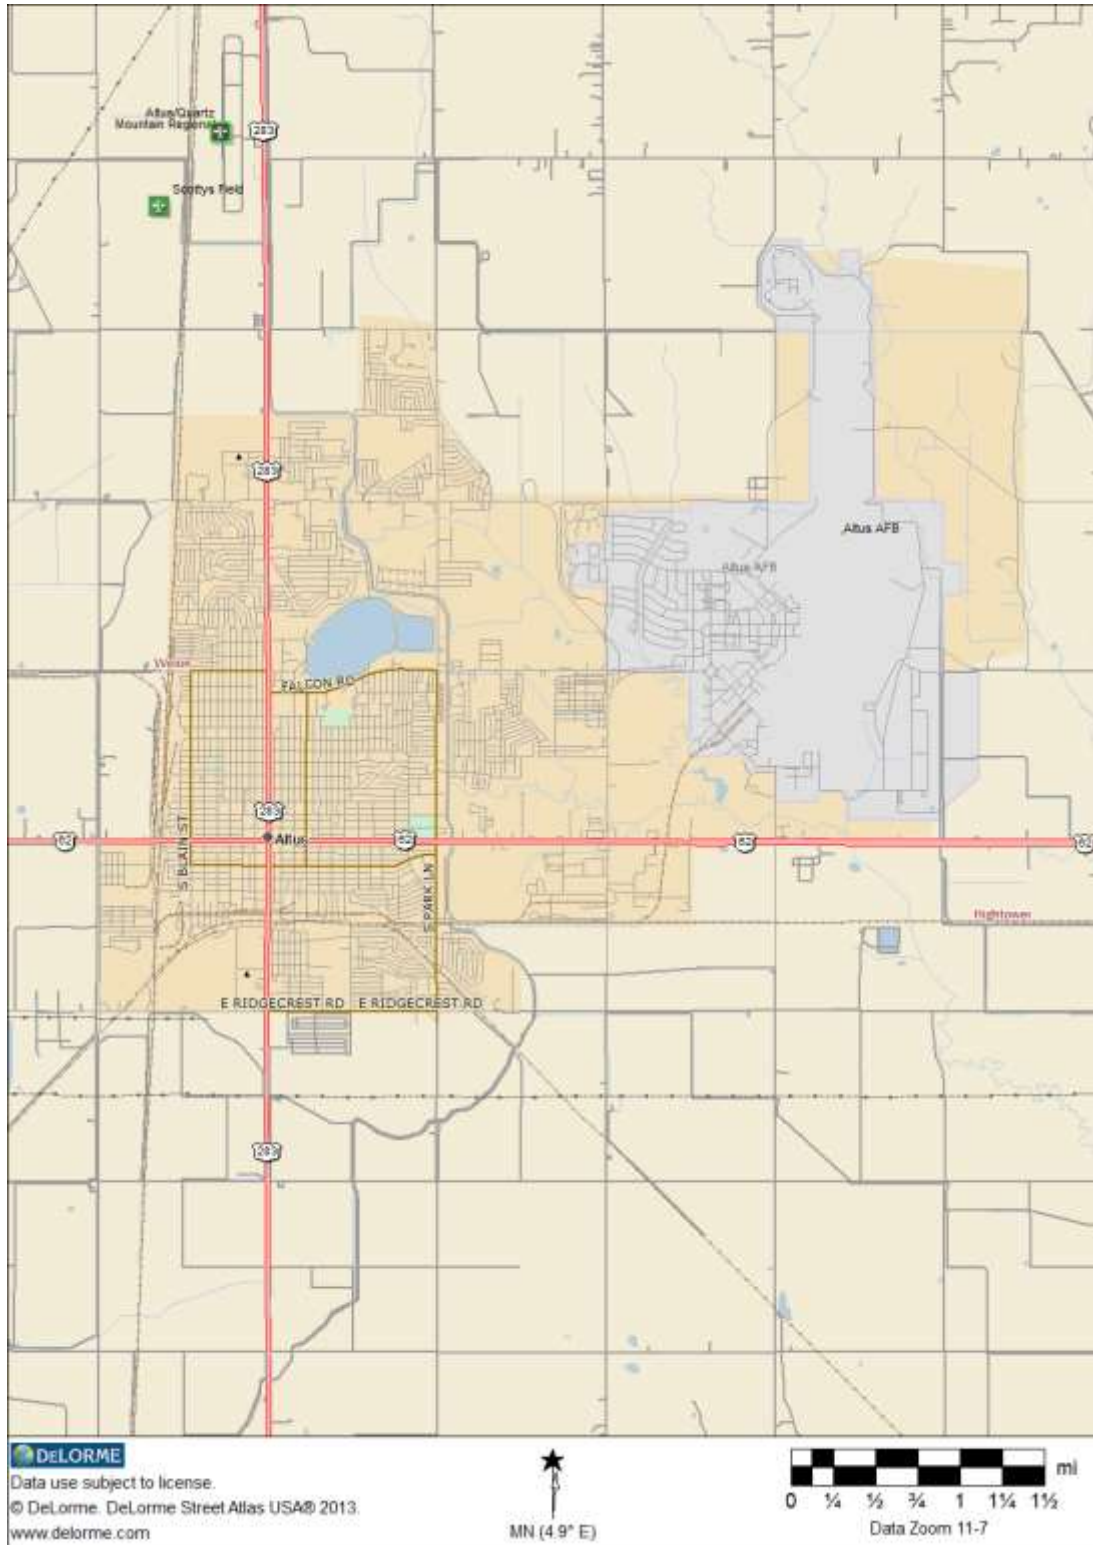

Medical Facilities

Medical services are provided by the Jackson County Memorial Hospital, an acute-care hospital offering surgical, emergency, and in and outpatient's services. The smaller county communities typically have either small outpatient medical services or doctor's officing in the community.

Demographic Analysis

Population and Households

The following table presents population levels and annualized changes in Jackson County and Oklahoma. This data is presented as of the 2000 Census, the 2010 Census, with 2015 and 2020 estimates and forecasts provided by Nielsen SiteReports.

Population Levels and Annual Changes							
	2000	2010	Annual	2015	Annual	2020	Annual
	Census	Census	Change	Estimate	Change	Forecast	Change
Altus	21,447	19,813	-0.79%	19,560	-0.26%	19,626	0.07%
Jackson County	28,439	26,446	-0.72%	25,891	-0.42%	25,771	-0.09%
State of Oklahoma	3,450,654	3,751,351	0.84%	3,898,675	0.77%	4,059,399	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

The population of Jackson County was 26,446 persons as of the 2010 Census, a -0.72% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Jackson County to be 25,891 persons, and projects that the population will show -0.09% annualized decline over the next five years.

The population of Altus was 19,813 persons as of the 2010 Census, a -0.79% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Altus to be 19,560 persons, and projects that the population will show 0.07% annualized growth over the next five years.

The next table presents data regarding household levels in Jackson County over the same periods of time. This data is presented both for all households (family and non-family) as well as family households alone.

Households Levels and Annual Changes							
Total Households	2000	2010	Annual	2015	Annual	2020	Annual
	Census	Census	Change	Estimate	Change	Forecast	Change
Altus	7,896	7,627	-0.35%	7,678	0.13%	7,779	0.26%
Jackson County	10,590	10,247	-0.33%	10,157	-0.18%	10,196	0.08%
State of Oklahoma	1,342,293	1,460,450	0.85%	1,520,327	0.81%	1,585,130	0.84%
Family Households	2000	2010	Annual	2015	Annual	2020	Annual
	Census	Census	Change	Estimate	Change	Forecast	Change
Altus	5,627	5,082	-1.01%	5,101	0.07%	5,171	0.27%
Jackson County	7,666	7,001	-0.90%	6,937	-0.18%	6,960	0.07%
State of Oklahoma	921,750	975,267	0.57%	1,016,508	0.83%	1,060,736	0.86%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

As of 2010, Jackson County had a total of 10,247 households, representing a -0.33% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Jackson County to have 10,157 households. This number is expected to experience a 0.08% annualized rate of growth over the next five years.

As of 2010, Altus had a total of 7,627 households, representing a -0.35% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Altus to have 7,678 households. This number is expected to experience a 0.26% annualized rate of growth over the next five years.

Population by Race and Ethnicity

The next table presents data regarding the racial and ethnic composition of Jackson County based on the U.S. Census Bureau's American Community Survey.

Source: Nielsen SiteReports

As of 2015, Nielsen estimates that the median age of Altus is 33.4 years. This compares with the statewide figure of 36.6 years. Approximately 7.92% of the population is below the age of 5, while 14.64% is over the age of 62. Over the next five years, the population age 62 and above is forecasted to grow by 1.68% per year.

Compared with the rest of the state, Altus and Jackson County have relatively younger populations, though the population age 62 and up is projected to increase over the next five years.

Families by Presence of Children

The next table presents data for Jackson County regarding families by the presence of children.

2013 Family Type by Presence of Children Under 18 Years

	Altus		Jackson County	
	No.	Percent	No.	Percent
Total Families:	5,109		7,027	
Married-Couple Family:	3,753	73.46%	5,332	75.88%
With Children Under 18 Years	1,460	28.58%	2,103	29.93%
No Children Under 18 Years	2,293	44.88%	3,229	45.95%

No Disabilities	1,386	62.01%	1,993	60.71%	290,398	57.72%
Total Number of Persons with Disabilities:	2,527	13.94%	3,515	14.29%	577,160	15.59%

Source: U.S. Census Bureau, 2009-2013 American Community Survey, Table C18108

Within Jackson County, 14.29% of the civilian non-institutionalized population has one or more disabilities, compared with 15.59% of Oklahomans as a whole. In Altus the percentage is 13.94%.

We have also compiled data for the veteran population of Jackson County by presence of disabilities, shown in the following table:

2013 Population by Veteran and Disability Status

	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Civilian Population Age 18+ For Whom Poverty Status is Determined	12,943		17,698		2,738,788	
Veteran:	2,372	18.33%	3,360	18.99%	305,899	11.17%
With a Disability	396	16.69%	667	19.85%	100,518	32.86%
No Disability	1,976	83.31%	2,693	80.15%	205,381	67.14%
Non-veteran:	10,571	81.67%	14,338	81.01%	2,432,889	88.83%
With a Disability	1,804	17.07%	2,442	17.03%	430,610	17.70%
No Disability	8,767	82.93%	11,896	82.97%	2,002,279	82.30%

Source: 2009-2013 American Community Survey, Table C21007

Within Jackson County, the Census Bureau estimates there are 3,360 veterans, 19.85% of which have one or more disabilities (compared with 32.86% at a statewide level). In Altus, there are an estimated 2,372 veterans, 16.69% of which are estimated to have a disability. Compared with the rest of the state, veterans in Altus and Jackson County are less likely to have one or more disabilities.

Group Quarters Population

The next table presents data regarding the population of Jackson County living in group quarters, such as correctional facilities, skilled-nursing facilities, student housing and military quarters.

2010 Group Quarters Population

	Altus		Jackson County	
	No.	Percent	No.	Percent
Total Population	19,813		26,446	
Group Quarters Population	687	3.47%	687	2.60%
Institutionalized Population	390	1.97%	390	1.47%
Correctional facilities for adults	200	1.01%	200	0.76%
Juvenile facilities	0	0.00%	0	0.00%
Nursing facilities/Skilled-nursing facilities	190	0.96%	190	0.72%
Other institutional facilities	0	0.00%	0	0.00%
Noninstitutionalized population	297	1.50%	297	1.12%
College/University student housing	94	0.47%	94	0.36%
Military quarters	196	0.99%	196	0.74%
Other noninstitutional facilities	7	0.04%	7	0.03%

Source: 2010 Decennial Census, Table P42

The percentage of the Jackson County population in group quarters is generally similar to the statewide figure, which was 2.99% in 2010.

Household Income Levels

Data in the following chart shows the distribution of household income in Jackson County, as well as median and average household income. Data for Oklahoma is included as a basis of comparison. This data is provided by Nielsen SiteReports for 2015.

2015 Household Income Distribution						
	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Households by HH Income	7,678		10,157		1,520,327	
< \$15,000	1,049	13.66%	1,446	14.24%	213,623	14.05%

\$50,000 - \$74,999	1,335	17.39%	1,782	17.54%	280,845	18.47%
\$75,000 - \$99,999	799	10.41%	1,092	10.75%	173,963	11.44%
\$100,000 - \$124,999	485	6.32%	646	6.36%	106,912	7.03%
\$125,000 - \$149,999	280	3.65%	368	3.62%	57,804	3.80%
\$150,000 - \$199,999	222	2.89%	299	2.94%	48,856	3.21%
\$200,000 - \$249,999	63	0.82%	97	0.96%	18,661	1.23%
\$250,000 - \$499,999	43	0.56%	70	0.69%	20,487	1.35%
\$500,000+	7	0.09%	14	0.14%	7,454	0.49%
Median Household Income	\$44,183		\$44,518		\$47,049	
Average Household Income	\$56,829		\$57,811		\$63,390	

Source: Nielsen SiteReports

As shown, median household income for Jackson County is estimated to be \$44,518 in 2015. By way of comparison, the median household income of Oklahoma is estimated to be \$47,049. For Altus, median household income is estimated to be \$44,183. For the most part, the income distribution in Jackson County is very similar to the rest of the state, excepting a higher proportion of persons in the income bracket between \$35,000 and \$50,000 per year. The income distribution can be better visualized by the following chart.

Household Income Trend

Next we examine the long-term growth of incomes in Jackson County, from the results of the 2000 Census (representing calendar year 1999), through the current 2015 estimates provided by Nielsen SiteReports. This data is then annualized into a compounded annual growth rate to estimate nominal annual household income growth over this period of time. We then compare the rate of annual growth with the rate of inflation over the same period of time (measured using the Consumer Price Index for all urban consumers, South Region, Size Class D, from May 1999 through May 2015). Subtracting the annual rate of inflation from the nominal rate of annual income growth yields a “real” rate of income growth which takes into account the effect of increasing prices of goods and services.

	1999 Median HH Income	2015 Median HH Income	Nominal Growth	Inflation Rate	Real Growth
Altus	\$30,217	\$44,183	2.40%	2.40%	0.00%
Jackson County	\$30,737	\$44,518	2.34%	2.40%	-0.06%
State of Oklahoma	\$33,400	\$47,049	2.16%	2.40%	-0.23%

Sources: 2000 Decennial Census, Summary File 3, Table P53; Nielsen SiteReports; CPI All Urban Consumers, South Region, Size Class D

As shown, income growth in both Jackson County and Altus essentially kept pace with inflation between 1999 and 2015. This is contrary to state and national trends which saw declines in median household income after adjusting for inflation. Over the same period, the national median household

income increased from \$41,994 to \$53,706 (for a nominal annualized growth rate of 1.55%) while the Consumer Price Index increased at an annualized rate of 2.26%, for a “real” growth rate of -0.72%.

Poverty Rates

Overall rates of poverty in Jackson County and Oklahoma are shown in the following table. This data is included from the 2013 American Community Survey, as well as the 2000 Census to show how these rates have changed over the last decade. We also include poverty rates for single-parent families by gender of householder.

Poverty Rates	2000 Census	2013 ACS	Change (Basis Points)	2013 Poverty Rates for Single-Parent Families	
				Male Householder	Female Householder
Altus	17.16%	16.72%	-44	29.53%	63.79%
Jackson County	16.23%	16.51%	28	24.53%	56.18%
State of Oklahoma	14.72%	16.85%	213	22.26%	47.60%

Sources: 2000 Decennial Census Table P87, 2009-2013 American Community Survey Tables B17001 & B17023

The poverty rate in Jackson County is estimated to be 16.51% by the American Community Survey. This is an increase of 28 basis points since the 2000 Census. Within Altus, the poverty rate is estimated to be 16.72%. As shown, the poverty rates of Altus and Jackson County as a whole were relatively stable between 2000 and 2013. It should be noted that increasing poverty rates over this period of time is a national trend: between the 2000 Census and the 2013 American Community Survey, the poverty rate of the United States increased from 12.38% to 15.37%, an increase of 299 basis points.

Economic Conditions

Employment and Unemployment

The following table presents total employment figures and unemployment rates for Jackson County, with figures for Oklahoma and the United States for comparison. This data is as of May 2015.

Employment and Unemployment						
	May-2010 Employment	May-2015 Employment	Annual Growth	May-2010 Unemp. Rate	May-2015 Unemp. Rate	Change (bp)
Jackson County	10,851	10,782	-0.13%	6.2%	4.0%	-220
State of Oklahoma	1,650,748	1,776,187	1.48%	6.8%	4.4%	-240
United States (thds)	139,497	149,349	1.37%	9.3%	5.3%	-400

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As of May 2015, total employment in Jackson County was 10,782 persons. Compared with figures from May 2010, this represents annualized employment decline of -0.13% per year. The unemployment rate in May was 4.0%, a decrease of -220 basis points from May 2010, which was 6.2%. Over the last five years, both the statewide and national trends have been improving employment levels and declining unemployment rates, and Jackson County has underperformed both the state and nation in terms of employment growth, though its unemployment rate is lower than state and national figures.

Employment Level Trends

The following chart shows total employment and unemployment levels in Jackson County from January 2000 through May 2015, as reported by the Bureau of Labor Statistics, Local Area Unemployment Statistics program.

**Employment and Unemployment in Jackson County
January 2000 through May 2015**

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics

As shown, total employment levels were generally level from 2000 through late 2008, which marked the beginning of the national economic downturn. Total employment has generally trended downward since 2008, though some slight improvement has occurred over the last twelve months, to its current level of 10,782 persons. The number of unemployed persons in May 2015 was 448, out of a total labor force of 11,230 persons.

It is expected that employment figures will increase significantly in the near future due to jobs related to the KC-46A Pegasus tanker: Altus Air Force Base was selected as one of the bases where training and maintenance for the tanker will take place, and this is projected to directly result in 350 additional jobs (civilian and military) at Altus AFB.

Unemployment Rate Trends

The next chart shows historic unemployment rates for Jackson County, as well as Oklahoma and the United States for comparison. This data covers the time period of January 2000 through May 2015, and has not been seasonally adjusted.

**Unemployment Rates in Jackson County, Oklahoma and the United States
January 2000 through May 2015**

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As shown, unemployment rates in Jackson County increased moderately from 2000 through 2003, and then generally declined until the 4th quarter of 2008 as the effects of the national economic recession were felt. Unemployment rates began to decline again in 2010, to their current level of 4.0%. On the whole, unemployment rates in Jackson County track very well with statewide figures. Compared with the United States, unemployment rates in Jackson County and Oklahoma are and have historically been well below the national average.

Employment and Wages by Industrial Supersector

The next table presents data regarding employment in Jackson County by industry, including total number of establishments, average number of employees in 2014, average annual pay, and location quotients for each industry compared with the United States. This data is furnished by the Bureau of Labor Statistics, Quarterly Census of Employment and Wages program.

Employees and Wages by Supersector - 2014

Supersector	Establishments	Avg. No. of Employees	Percent of Total	Avg. Annual Pay	Location Quotient
Federal Government	29	1,309	13.99%	\$51,676	7.00
State Government	15	411	4.39%	\$32,952	1.32
Local Government	43	1,892	20.22%	\$37,123	2.01
Natural Resources and Mining	49	164	1.75%	\$34,575	1.16
Construction	48	175	1.87%	\$30,523	0.42
Manufacturing	14	842	9.00%	\$43,204	1.01
Trade, Transportation, and Utilities	165	1,623	17.35%	\$27,877	0.91

Other Services	29	92	0.98%	\$22,700	0.32
Total	666	9,356		\$34,720	1.00

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Employment Sectors - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Among private employers, the largest percentage of persons (17.35%) are employed in Trade, Transportation, and Utilities. The average annual pay in this sector is \$27,877 per year. The industry with the highest annual pay is Information, with average annual pay of \$43,487 per year.

The rightmost column of the previous table provides location quotients for each industry for Jackson County, as compared with the United States. Location quotients (LQs) are ratios used to compare the concentration of employment in a given industry to a larger reference, in this case the United States. They are calculated by dividing the percentage of employment in a given industry in a given geography (Jackson County in this instance), by the percentage of employment in the same industry in the United States. For example, if manufacturing in a certain county comprised 10% of total employment, while in the United States manufacturing comprised 5% of total employment, the location quotient would be 2.0:

$$10\% (\text{county manufacturing } \%) / 5\% (\text{U.S. manufacturing } \%) = 2.0$$

Location quotients greater than 1.0 indicate a higher concentration of employment compared with the nation, and suggest that the industry in question is an important contributor to the local economic base. Quotients less than 1.0 indicate that the industry makes up a smaller share of the local economy than the rest of the nation.

Within Jackson County, among all industries the largest location quotient is in Federal Government, with a quotient of 7.00 (attributable to Altus Air Force Base). Among private employers, the largest is Natural Resources and Mining, with a quotient of 1.16.

The next table presents average annual pay in Jackson County by industry, in comparison with Oklahoma as a whole and the United States.

Comparison of 2014 Average Annual Pay by Supersector

Supersector	Jackson County	State of Oklahoma	United States	Percent of State	Percent of Nation
Federal Government	\$51,676	\$66,411	\$75,784	77.8%	68.2%
State Government	\$32,952	\$44,721	\$54,184	73.7%	60.8%
Local Government	\$37,123	\$36,300	\$46,146	102.3%	80.4%
Natural Resources and Mining	\$34,575	\$87,445	\$59,666	39.5%	57.9%
Construction	\$30,523	\$47,127	\$55,041	64.8%	55.5%
Manufacturing	\$43,204	\$53,614	\$62,977	80.6%	68.6%
Trade, Transportation, and Utilities	\$27,877	\$40,563	\$42,988	68.7%	64.8%

Source: 2009-2013 American Community Survey, Table B23007

Within Jackson County, there are 5,331 working families, 50.82% of which have children under the age of 18 present. This compares with 51.10% in Oklahoma as a whole.

Major Employers

Major employers in the Jackson County area are presented in the following table, as reported by the Cameron University School of Business.

Major Employers in Jackson County

Company	City/Town	Industry / Description	No. Employees
Altus Air Force Base	Altus	Fed. Gov't Installation	1,000-1,500
Jackson County Memorial Hospital	Altus	Health Care	700-800
Altus Public Schools	Altus	Education	600-650
Bar-S Foods	Altus	Meat Processing	500-600
Wal-Mart	Altus	Retail	400-450
City of Altus	Altus	Government	250-300
Western Oklahoma State College	Altus	Education	150-200
Boeing Aerospace Operations	Altus	AFB Support Operations	150-200
English Village Manor Nursing Home	Altus	Health Care	150-200
Southwest OK Community Action Agency	Altus	Community & Social Services	100-150
Flight Safety Services Corp.	Altus	AFB Support Operations	100-150
American Gypsum Company	Duke	Gypsum Products	100-150

Source: Cameron University School of Business

Although Altus Air Force Base is the most significant presence in Jackson County, there are other significant employers including Bar-S Foods and American Gypsum Company.

It is expected that employment at Altus AFB will increase significantly in the near future due to jobs related to the KC-46A Pegasus tanker: Altus Air Force Base was selected as one of the bases where training and maintenance for the tanker will take place, and this is projected to directly result in 350 additional jobs (civilian and military) at Altus AFB.

Commuting Patterns

Travel Time to Work

The next table presents data regarding travel time to work in Jackson County.

Workers 16 Years and Over by Commuting Time to Work

	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Commuting Workers:	8,776		11,691		1,613,364	
Less than 15 minutes	6,603	75.24%	7,616	65.14%	581,194	36.02%
15 to 30 minutes	1,456	16.59%	2,883	24.66%	625,885	38.79%
30 to 45 minutes	432	4.92%	683	5.84%	260,192	16.13%
45 to 60 minutes	126	1.44%	199	1.70%	74,625	4.63%
60 or more minutes	159	1.81%	310	2.65%	71,468	4.43%

Source: 2009-2013 American Community Survey, Table B08303

Within Jackson County, the largest percentage of workers (65.14%) travel fewer than 15 minutes to work. Although Jackson County has an active labor market, it also serves to some extent as a bedroom community to the greater Oklahoma City metro area.

Means of Transportation

Data in the following table presents data regarding means of transportation for employed persons in Jackson County.

	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Workers Age 16+	8,991		11,942		1,673,026	
Car, Truck or Van:	8,202	91.22%	11,063	92.64%	1,551,461	92.73%

<i>Carpooled</i>	868	10.58%	1,241	11.22%	178,054	11.48%
Public Transportation	8	0.09%	12	0.10%	8,092	0.48%
Taxicab	50	0.56%	50	0.42%	984	0.06%
Motorcycle	39	0.43%	39	0.33%	3,757	0.22%
Bicycle	42	0.47%	42	0.35%	4,227	0.25%
Walked	319	3.55%	364	3.05%	30,401	1.82%
Other Means	116	1.29%	121	1.01%	14,442	0.86%
Worked at Home	215	2.39%	251	2.10%	59,662	3.57%

Source: 2009-2013 American Community Survey, Table B08301

As shown, the vast majority of persons in Jackson County commute to work by private vehicle, with a small percentage of persons working from home.

Housing Stock Analysis

Existing Housing Units

The following table presents data regarding the total number of housing units in Jackson County. This data is provided as of the 2000 Census, the 2010 Census, with a 2015 estimate furnished by Nielsen SiteReports.

Total Housing Units					
	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change
Altus	9,264	8,890	-0.41%	9,058	0.38%
Jackson County	12,377	12,077	-0.25%	12,163	0.14%
State of Oklahoma	1,514,400	1,664,378	0.95%	1,732,484	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

Since the 2010, Nielsen estimates that the number of housing units in Jackson County grew by 0.14% per year, to a total of 12,163 housing units in 2015. In terms of new housing unit construction, Jackson County underperformed Oklahoma as a whole between 2010 and 2015.

Housing by Units in Structure

The next table separates housing units in Jackson County by units in structure, based on data from the Census Bureau's American Community Survey.

2013 Housing Units by Units in Structure						
	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	8,847		12,083		1,669,828	
1 Unit, Detached	7,367	83.27%	9,994	82.71%	1,219,987	73.06%
1 Unit, Attached	373	4.22%	379	3.14%	34,434	2.06%
Duplex Units	119	1.35%	139	1.15%	34,207	2.05%
3-4 Units	213	2.41%	223	1.85%	42,069	2.52%
5-9 Units	221	2.50%	282	2.33%	59,977	3.59%
10-19 Units	204	2.31%	283	2.34%	57,594	3.45%
20-49 Units	109	1.23%	125	1.03%	29,602	1.77%
50 or More Units	58	0.66%	92	0.76%	30,240	1.81%
Mobile Homes	183	2.07%	564	4.67%	159,559	9.56%
Boat, RV, Van, etc.	0	0.00%	2	0.02%	2,159	0.13%
Total Multifamily Units	924	10.44%	1,144	9.47%	253,689	15.19%

Source: 2009-2013 American Community Survey, Table B25024

Within Jackson County, 82.71% of housing units are single-family, detached. 9.47% of housing units are multifamily in structure (two or more units per building), while 4.68% of housing units comprise mobile homes, RVs, etc.

Within Altus, 83.27% of housing units are single-family, detached. 10.44% of housing units are multifamily in structure, while 2.07% of housing units comprise mobile homes, RVs, etc.

Housing Units Number of Bedrooms and Tenure

Data in the following table presents housing units in Jackson County by tenure (owner/renter), and by number of bedrooms.

2013 Housing Units by Tenure and Number of Bedrooms

	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Occupied Housing Units	7,666		10,455		1,444,081	
Owner Occupied:	4,306	56.17%	6,459	61.78%	968,736	67.08%
No Bedroom	20	0.46%	40	0.62%	2,580	0.27%
1 Bedroom	70	1.63%	115	1.78%	16,837	1.74%
2 Bedrooms	694	16.12%	1,092	16.91%	166,446	17.18%
3 Bedrooms	2,631	61.10%	3,921	60.71%	579,135	59.78%
4 Bedrooms	798	18.53%	1,187	18.38%	177,151	18.29%
5 or More Bedrooms	93	2.16%	104	1.61%	26,587	2.74%
Renter Occupied:	3,360	43.83%	3,996	38.22%	475,345	32.92%
No Bedroom	64	1.90%	67	1.68%	13,948	2.93%
1 Bedroom	433	12.89%	506	12.66%	101,850	21.43%
2 Bedrooms	1,307	38.90%	1,498	37.49%	179,121	37.68%
3 Bedrooms	1,277	38.01%	1,583	39.61%	152,358	32.05%
4 Bedrooms	266	7.92%	315	7.88%	24,968	5.25%
5 or More Bedrooms	13	0.39%	27	0.68%	3,100	0.65%

Source: 2009-2013 American Community Survey, Table B25042

The overall homeownership rate in Jackson County is 61.78%, while 38.22% of housing units are renter occupied. In Altus, the homeownership rate is 56.17%, while 43.83% of households are renters. Compared with the rest of the state, Altus and Jackson County have relatively low homeownership rates, which is likely attributable in part to Altus Air Force Base.

Housing Units Tenure and Household Income

The next series of tables analyze housing units by tenure, and by household income.

Jackson County Owner/Renter Percentages by Income Band in 2013

Household Income	Total Households	Total Owners	Total Renters	% Owners	% Renters
Total	10,455	6,459	3,996	61.78%	38.22%
Less than \$5,000	369	157	212	42.55%	57.45%
\$5,000 - \$9,999	475	172	303	36.21%	63.79%
\$10,000-\$14,999	584	256	328	43.84%	56.16%
\$15,000-\$19,999	678	316	362	46.61%	53.39%
\$20,000-\$24,999	639	298	341	46.64%	53.36%

Median Year Built:		1965		1966		1975
Overall Median Year Built:		1969		1969		1976

Sources: 2009-2013 American Community Survey, Tables B25035, B25036 & B25037

Within Jackson County, 8.90% of housing units were built after the year 2000. This compares with 15.22% statewide. Within Altus the percentage is 7.61%.

80.90% of housing units in Jackson County were built prior to 1990, while in Altus the percentage is 83.59%. These figures compare with the statewide figure of 72.78%. Compared with the rest of the state, Altus and Jackson County have relatively older housing stocks, with relatively fewer homes of recent construction.

Substandard Housing

The next table presents data regarding substandard housing in Jackson County. The two most commonly cited figures for substandard housing are a lack of complete plumbing, and/or a lack of a complete kitchen. We have also included statistics regarding homes heated by wood, although this is a less frequently cited indicator of substandard housing since some homes (particularly homes for seasonal occupancy) are heated by wood but otherwise not considered substandard.

The Census Bureau definition of inadequate plumbing is any housing unit lacking any one (or more) of the following three items:

1. Hot and cold running water
2. A flush toilet
3. A bathtub or shower

Inadequate kitchens are defined by the Census Bureau as housing units lacking any of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

2013 Substandard Housing Units

	Occupied Units	Inadequate Plumbing Number	Inadequate Plumbing Percent	Inadequate Kitchen Number	Inadequate Kitchen Percent	Uses Wood for Fuel Number	Uses Wood for Fuel Percent
Altus	7,666	26	0.34%	106	1.38%	5	0.07%
Jackson County	10,455	63	0.60%	157	1.50%	42	0.40%
State of Oklahoma	1,444,081	7,035	0.49%	13,026	0.90%	28,675	1.99%

Sources: 2009-2013 American Community Survey, Tables B25040, B25048 & B25052

Within Jackson County, 0.60% of occupied housing units have inadequate plumbing (compared with 0.49% at a statewide level), while 1.50% have inadequate kitchen facilities (compared with 0.90% at a statewide level). It is likely that there is at least some overlap between these two figures, among units lacking both complete plumbing and kitchen facilities.

Vacancy Rates

The next table details housing units in Jackson County by vacancy and type. This data is provided by the American Community Survey.

2013 Housing Units by Vacancy

	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	8,847		12,083		1,669,828	
Total Vacant Units	1,181	13.35%	1,628	13.47%	225,747	13.52%
For rent	209	17.70%	238	14.62%	43,477	19.26%
Rented, not occupied	64	5.42%	72	4.42%	9,127	4.04%
For sale only	276	23.37%	318	19.53%	23,149	10.25%
Sold, not occupied	21	1.78%	41	2.52%	8,618	3.82%
For seasonal, recreational, or occasional use	42	3.56%	63	3.87%	39,475	17.49%
For migrant workers	22	1.86%	22	1.35%	746	0.33%
Other vacant	547	46.32%	874	53.69%	101,155	44.81%
Homeowner Vacancy Rate	6.00%		4.66%		2.31%	
Rental Vacancy Rate	5.75%		5.53%		8.24%	

Source: 2009-2013 American Community Survey, Tables B25001, B25003 & B25004

Within Jackson County, the overall housing vacancy rate is estimated to be 13.47%. The homeowner vacancy rate is estimated to be 4.66%, while the rental vacancy rate is estimated to be 5.53%.

In Altus, the overall housing vacancy rate is estimated to be 13.35%. The homeowner vacancy rate is estimated to be 6.00%, while the rental vacancy rate is estimated to be 5.75%.

Compared with the rest of the state, Altus and Jackson County have relatively lower rental vacancy, but higher vacancy among homes intended for ownership.

Building Permits

The table presents data regarding new residential building permits issued in Altus. This data is furnished by the U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division. Please note that average costs reported only represent physical construction costs for the housing units, and do not include land prices, most soft costs (such as finance fees), or builder's profit. Data was unavailable for the years 2009 and 2010, but available for each of the other years.

Altus**New Residential Building Permits Issued, 2004-2014**

Year	Single Family Units	Avg. Construction Cost	Multifamily Units	Avg. Multifamily Construction Cost
2004	26	\$130,277	0	N/A
2005	37	\$144,321	0	N/A
2006	48	\$146,690	0	N/A

Source: United States Census Bureau Building Permits Survey

In Altus, building permits for 325 housing units were issued between 2004 and 2014, for an average of 30 units per year. Note that the Census Bureau is missing data for the years 2009 and 2010. 100.00% of these housing units were single family homes.

New Construction Activity**For Ownership:**

Most new housing construction in Jackson County is located in or around Altus. New construction has occurred in additions such as Heritage Homes, Hunter Pointe, Laurel Homes and North Ridge (in some cases in later phases of these additions), and for the most part is located on the north side of Altus. Although some new home construction is relatively affordable, much is not: the average sale price of homes constructed in 2012 or later (for homes sold in 2015) is \$255,944 or \$105.55 per square foot. This is well above what could be afforded by a household earning at or less than median household income for Jackson County, which is estimated to be \$44,518 in 2015.

For Rent:

To the best of our knowledge, no significant new multifamily rental development has occurred in Altus or Jackson County in many years. There is currently a proposal to renovate an existing project-based facility for elderly/disabled tenants (Parkridge Estates) using Affordable Housing Tax Credits, but if funded this project will not add any new units to the Altus market.

Homeownership Market

This section will address the market for housing units for purchase in Jackson County, using data collected from both local and national sources.

Housing Units by Home Value

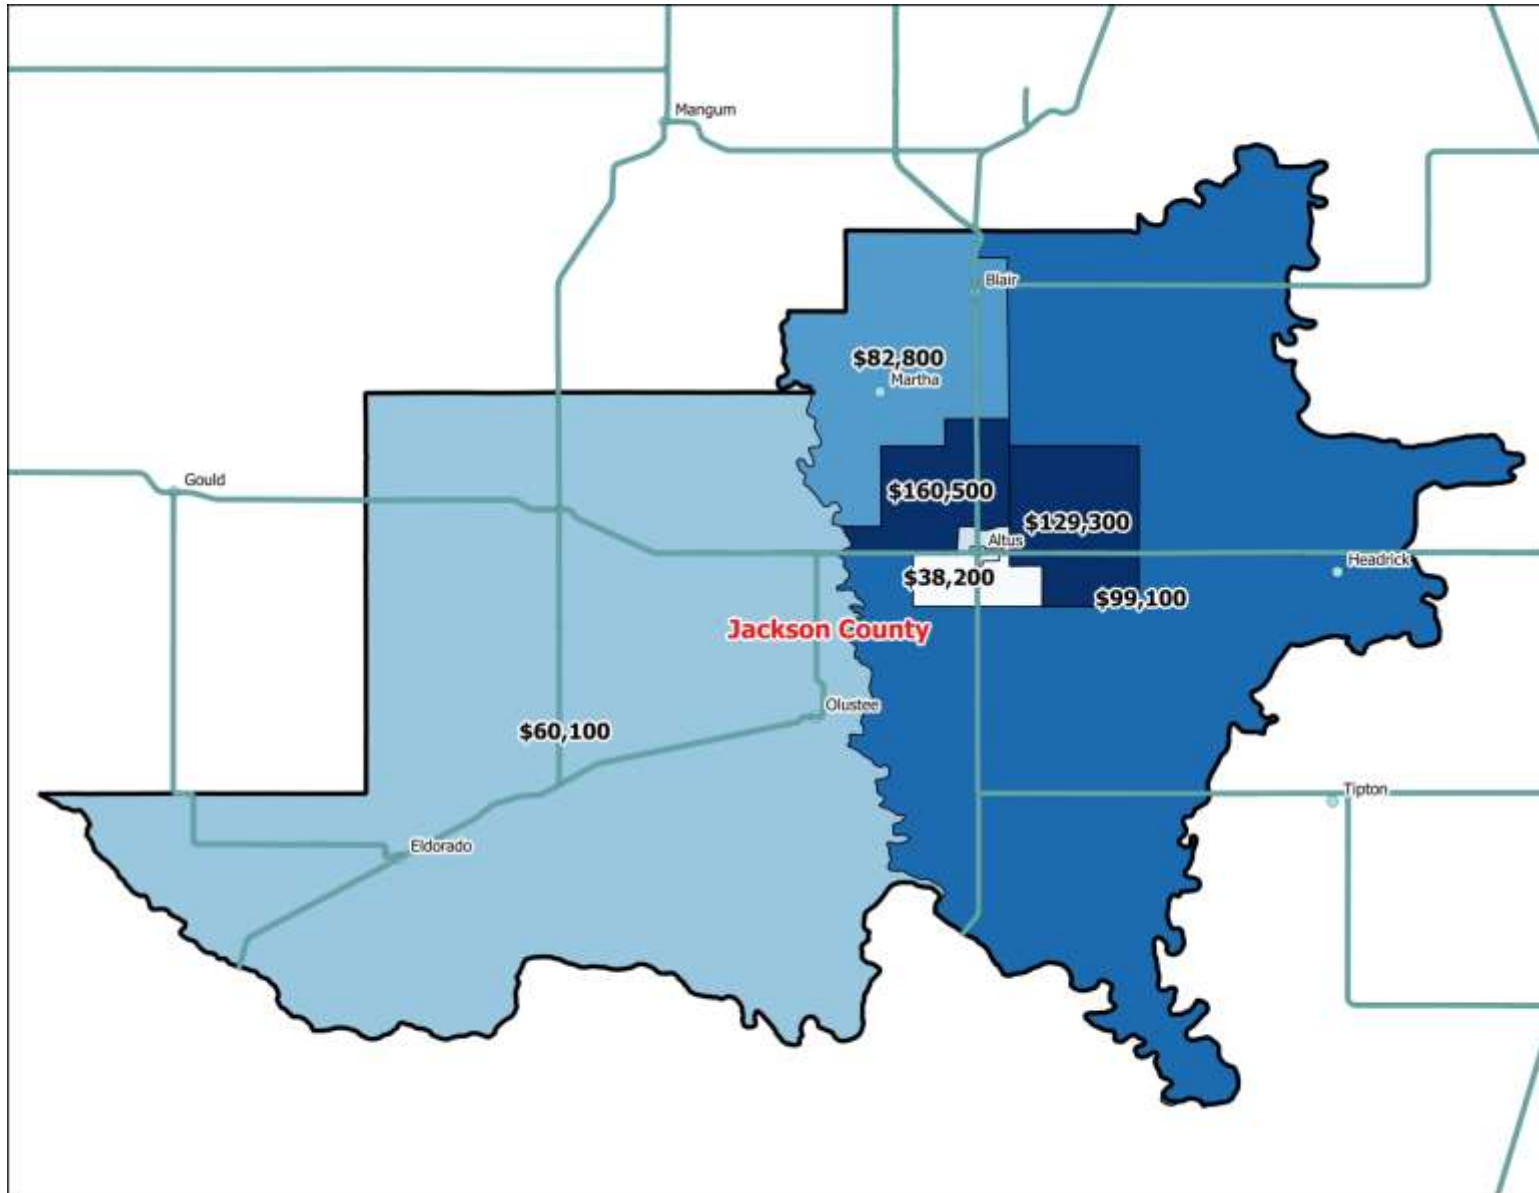

The following table presents housing units in Jackson County by value, as well as median home value, as reported by the Census Bureau's American Community Survey.

2013 Housing Units by Home Value						
	Altus		Jackson County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent

Median Home Value:	\$87,900		\$87,400		\$112,800	

Sources: 2009-2013 American Community Survey, Tables B25075 and B25077

The median value of owner-occupied homes in Jackson County is \$87,400. This is -22.5% lower than the statewide median, which is \$112,800. The median home value in Altus is estimated to be \$87,900. The geographic distribution of home values in Jackson County can be visualized by the following map.

Jackson County Median Home Values by Census Tract

Home Values by Year of Construction

The next table presents median home values in Jackson County by year of construction. Note that missing data fields indicate the Census Bureau had inadequate data to estimate a median value that age bracket.

2013 Median Home Value by Year of Construction

	Altus Median Value	Jackson County Median Value	State of Oklahoma Median Value
Total Owner-Occupied Units:			
Built 2010 or Later	-	\$198,400	\$188,900
Built 2000 to 2009	\$226,700	\$218,000	\$178,000

Altus Single Family Sales Activity Four Bedroom Units

Year	2011	2012	2013	2014	YTD 2015
# of Units Sold	75	100	111	109	91
Average Sale Price	\$189,715	\$208,094	\$205,928	\$201,245	\$191,407
Average Square Feet	2,308	2,350	2,383	2,368	2,271
Average Price/SF	\$82.20	\$88.55	\$86.42	\$84.99	\$84.28
Average Year Built	1993	1998	1999	1995	1992

Source: Jackson County Assessor, via County Records, Inc.

Altus Single Family Sales Activity All Bedroom Types

Year	2011	2012	2013	2014	YTD 2015
# of Units Sold	399	364	352	376	333
Average Sale Price	\$126,470	\$108,607	\$118,379	\$117,327	\$120,268
Average Square Feet	1,568	1,605	1,708	1,641	1,724
Average Price/SF	\$80.64	\$67.67	\$69.31	\$71.50	\$69.78
Average Year Built	1975	1977	1977	1975	1977

Source: Jackson County Assessor, via County Records, Inc.

Data for 2011 appears abnormally high and appears to have been influenced by a portfolio transaction. Between 2012 and 2015, the average sale price grew by 2.58% per year. The average sale price in 2015 was \$120,268 for an average price per square foot of \$69.78. The average year of construction for homes sold in 2015 is estimated to be 1977. On the whole, the Altus single-family market appears to be strengthening over the last several years. Given high demand for housing expected in the near future due to the KC-46A, it is likely that this trend will continue in the near term.

Foreclosure Rates

The next table presents foreclosure rate data for Jackson County, compiled by the Federal Reserve Bank of New York. This data is effective as of May 2014.

Foreclosure Rates

Geography	% of Outstanding Mortgages in Foreclosure, May 2014
Jackson County	1.4%
State of Oklahoma	2.1%
United States	2.1%
Rank among Counties in Oklahoma*:	51

* Rank among the 64 counties for which foreclosure rates are available

Source: Federal Reserve Bank of New York, Community Credit Profiles

According to the data provided, the foreclosure rate in Jackson County was 1.4% in May 2014. The county ranked 51 out of 64 counties in terms of highest foreclosure rates in Oklahoma. This rate compares with the statewide and nationwide foreclosure rates, both of which were 2.1%. With among the lowest foreclosure rates in the state, foreclosures have likely had less impact on the market for homes in Altus and Jackson County than other parts of the state.

Rental Market

This section will discuss supply and demand factors for the rental market in Jackson County, based on publicly available sources as well as our own surveys of landlords and rental properties in the area.

Gross Rent Levels

The following table presents data regarding gross rental rates in Jackson County. Gross rent is the sum of contract rent, plus all utilities such as electricity, gas, water, sewer and trash, as applicable (telephone, cable, and/or internet expenses are not included in these figures).

2013 Rental Units by Gross Rent						
	Altus		Jackson County		State of Oklahoma

No cash rent	205	6.10%	333	8.33%	43,236	9.10%
Median Gross Rent		\$679		\$673		\$699

Sources: 2009-2013 American Community Survey, Tables B25063 and B25064

Median gross rent in Jackson County is estimated to be \$673, which is -3.7% less than Oklahoma's median gross rent of \$699/month. Median gross rent in Altus is estimated to be \$679.

Median Gross Rent by Year of Construction

The next table presents data from the American Community Survey regarding median gross rent by year of housing unit construction. Note that dashes in the table indicate the Census Bureau had insufficient data to provide a median rent figure for that specific data field.

2013 Median Gross Rent by Year of Construction

	Altus Median Rent	Jackson County Median Rent	State of Oklahoma Median Rent
Total Rental Units:			
Built 2010 or Later	-	-	\$933
Built 2000 to 2009	\$839	\$784	\$841
Built 1990 to 1999	\$916	\$767	\$715
Built 1980 to 1989	\$731	\$681	\$693
Built 1970 to 1979	\$605	\$635	\$662
Built 1960 to 1969	\$768	\$715	\$689
Built 1950 to 1959	\$640	\$627	\$714
Built 1940 to 1949	\$615	\$623	\$673
Built 1939 or Earlier	\$636	\$621	\$651

Note: Dashes indicate the Census Bureau had insufficient data to estimate a median gross rent.

Source: 2009-2013 American Community Survey, Table 25111

The highest median gross rent in Jackson County is among housing units constructed after 2000, which is \$784 per month. In order to be affordable, a household would need to earn at least \$31,360 per year to afford such a unit.

Altus Rental Survey Data

The next table shows the results of our rental survey of Altus.

Altus Rental Properties								
Name	Type	Year Built	Bedrooms	Bathrooms	Size (SF)	Rate	Rate/SF	Vacancy
Apple Creek Altus	Market Rate	1985	1	1	424	\$395	\$0.932	N/A
Apple Creek Altus	Market Rate	1985	1	1	626	\$470	\$0.751	N/A
Apple Creek Altus	Market Rate	1985	2	1	744	\$655	\$0.880	N/A
Apple Creek Altus	Market Rate	1985	2	2	877	\$600	\$0.684	N/A

Madison Trail Apartment	Market Rate	2002	1	1	696	\$649	\$0.932	3.00%
Madison Trail Apartment	Market Rate	2002	2	2	946	\$699	\$0.739	3.00%
Madison Trail Apartment	Market Rate	2002	3	2	1,096	\$850	\$0.776	3.00%
Parkridge Estates	Project Based - Elderly/Disabled	1978	1	1	718	\$549	\$0.765	0.00%

The previous rent surveys encompass most of the larger complexes in Altus. These properties are located throughout the community and provide a good indication of the availability and rental structure of multifamily property. Concessions such as free rent or no deposit were not evident in the competitive market survey. These inducements appear to have phased out over the market, and appear only sporadically at individual complexes to induce leasing activity in a particular unit type. Review of historical rental data indicates the comparable rental rates have increased in a predominant

range of \$10 to \$20 per unit per month annually over the past 36 months. The area should continue to show good rental rate and occupancy support due to the limited number of new available units, and projected new employment at Altus Air Force Base related to the KC-46A.

Rental Market Vacancy – Altus

The developments outlined previously report occupancy levels typically above 95%, and several report waiting lists. These occupancy levels are typical of well-maintained and poorly maintained properties alike. The ability of older, physically deteriorating facilities to maintain high occupancy levels reflects the lack of superior alternatives in the Altus market. The Section 8 units, according to property managers, typically stay well occupied. The overall market vacancy of rental housing units was reported at 5.75% by the Census Bureau as of the most recent American Community Survey. Occupancy levels will likely remain very high in the near future as population and employment levels grow and new supply remains minimal.

Projected Housing Need

Consolidated Housing Affordability Strategy (CHAS)

This section will analyze data from the U.S. Department of Housing and Urban Development's Consolidated Housing Affordability Strategy (CHAS) dataset for Jackson County. This data is typically separated into household income thresholds, defined by HUD Area Median Family Income (HAMFI). HUD Area Median Family Income (HAMFI) is equivalent to Area Median Income (AMI) for the purposes of this report. This data is considered the best indicator of housing need available which separates need into household income thresholds as defined by HUD.

Cost Burden by Income Threshold

The next table presents CHAS data for Jackson County regarding housing cost burden as a percentage of household income. Renter costs are considered to be the sum of contract rent and any utilities not paid by the landlord (such as electricity, natural gas, and water, but not including telephone service, cable service, internet service, etc.). Homeowner costs include mortgage debt service (or similar debts such as deeds of trust or contracts for deed), utilities, property taxes and property insurance.

Households are considered to be cost overburdened if their housing costs (renter or owner) are greater than 30% of their gross household income. A household is "severely" overburdened if their housing costs are greater than 50% of their gross household income.

Jackson County : CHAS - Housing Cost Burden by HAMFI

Household Income / Cost Burden	Owners		Renters

Substandard Conditions / Overcrowding by Income Threshold

The following table summarizes data regarding substandard housing conditions and overcrowding, separated by owner/renter and HAMFI income threshold. Substandard housing conditions are defined by HUD as any housing unit lacking either complete plumbing or a complete kitchen.

A housing unit without “complete plumbing” is any housing unit lacking one or more of the following features (they do not need to all be present in the same room):

1. Hot and cold running water
2. A flush toilet
3. A bathtub or shower

A lack of a complete kitchen is any housing unit lacking any one or more of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

Households are considered to be “overcrowded” if the household has more than 1.0 persons per room (note that this definition is “room” including bedrooms, living rooms and kitchens, as opposed to only “bedrooms”), and is “severely overcrowded” if the household has more than 1.5 persons per room.

Jackson County : CHAS - HAMFI by Substandard Conditions / Overcrowding

Cost Burden by Household Type

The following table provides a breakdown of households by HAMFI, and by household type and size, and by housing cost burden. The categories of household type provided by HUD are:

- Elderly Family: Households with two persons, either or both age 62 or over.
- Small Family: 2 persons, neither age 62 or over, or families with 3 or 4 persons of any age.
- Large Family: families with 5 or more persons.
- Elderly Non-Family (single persons age 62 or over, or unrelated elderly individuals)
- Non-Elderly, Non-Family: all other households.

Housing Problems by Household Type

The next set of tables presents data by household type and whether or not the household is experiencing **any** housing problems. Housing problems are defined by HUD as any household meeting any of the three following criteria:

1. Housing costs greater than 30% of income (cost-overburdened).
2. Living in a housing unit lacking complete plumbing or a complete kitchen (substandard housing unit).
3. Living in a housing unit with more than 1.0 persons per room (overcrowding).

Housing Problems by Race / Ethnicity

Data presented in the following tables summarizes housing problems (as previously defined), by HAMFI threshold, and by race/ethnicity, for Jackson County. Under CFR 91.305(b)(1)(ii)(2), racial or ethnic groups have disproportionate need if “the percentage of persons in a category of need who are members of a particular racial or ethnic group in a category of need is at least 10 percentage points higher than the percentage of persons in the category as a whole.”

Households Under 80% of AMI: Percentage with Housing Problems by Race

Source: 2008-2012 HUD Comprehensive Housing Affordability Strategy, Table 7

CHAS Conclusions

The previous data notes many areas of need (and severe need) among the existing population of Jackson County. The greatest needs are among households with incomes less than 30% of Area Median Income. Several other areas of note:

- Among households with incomes less than 50% of Area Median Income, there are 910 renter households that are cost overburdened, and 545 homeowners that are cost overburdened.
- Among **elderly** households with incomes less than 50% of Area Median Income, there are 135 renter households that are cost overburdened, and 239 homeowners that are cost overburdened.
- Nearly 64% of renters with incomes less than 80% of AMI, with one or more disabilities, have one or more housing problems.

Overall Anticipated Housing Demand

Future demand for housing units in Jackson County can be estimated from population and household growth. Population estimates are based on known factors such as noted increases in the city employment base and indications from demographic services. In this case we have considered data from both the U.S. Census Bureau and Nielsen SiteReports. The estimates of changes in households and population were presented in a previous section of this report. The anticipated future demand is estimated for Altus, as well as Jackson County as a whole. The calculations are shown in the following tables.

Altus Anticipated Demand

Households in Altus grew at an annually compounded rate of -0.35% from 2000 to 2010. Nielsen SiteReports estimates households have grown 0.13% per year since that time, and that households will grow 0.26% per year through 2020. For these reasons we will rely on the Nielsen SiteReports forecast of 0.26% per year in forecasting future household growth for Altus.

The percentage of owner households was estimated at 56.17% with renter households estimated at 43.83%, based on data from the U.S. Census Bureau. The estimated number of additional units needed to service increasing demand can be estimated by applying this percentage to the anticipated growth in households. It should be noted that this is an estimate of rental and owner requirements and should be relied upon only as a guideline for possible new demand. The calculations are shown below.

Future Housing Demand Estimates for Altus						
Year	2015	2016	2017	2018	2019	2020
Household Estimates	7,678	7,698	7,718	7,738	7,759	7,779
Owner %: 56.17%	4,313	4,324	4,335	4,347	4,358	4,369
Renter %: 43.83%	3,365	3,374	3,383	3,392	3,401	3,410
Total New Owner Households					57	
Total New Renter Households					44	

Based on an estimated household growth rate of 0.26% per year, Altus would require 57 new housing units for ownership, and 44 units for rent, over the next five years. Annually this equates to 11 units for ownership per year, and 9 units for rent per year.

Jackson County Anticipated Demand

Nielsen SiteReports projects relatively minimal new household growth in Jackson County as a whole, due to projected declines in population and households in areas of the county outside of Altus. Our projected need for Jackson County is therefore based on the needs in Altus, since Altus is by far the primary population center in the county. As such, our projection for Jackson County is for 57 housing units for ownership and 44 units for rent, and that effectively all of these units will be needed in the Altus area.

Housing Demand – Population Subsets

This section will address 5-year forecasted needs and trends for population special population subsets for Jackson County. These forecasts are based on the previously forecasted overall trends for the next five years.

Housing Needs by Income Thresholds

The first table will address future housing needs and trends for households in Jackson County by income threshold: households within incomes below 30%, 50%, 60% and 80% of Area Median Income, by tenure (owner/renter). These forecasts are primarily based on HUD Consolidated Housing Affordability Strategy data presented previously. Households with incomes below 60% of Area Median Income (AMI) are estimated at 120% of the households at 50% of AMI. Note that these figures are cumulative and should not be added across income thresholds.

Jackson County: 2015-2020 Housing Needs by Income Threshold

	Owner Subset %	Renter Subset %	Owners	Renters	Total
Total New Demand: 2015-2020	100.00%	100.00%	57	44	101
Less than 30% AMI	9.29%	21.79%	5	10	15
Less than 50% AMI	16.05%	34.26%	9	15	24
Less than 60% AMI	19.26%	41.11%	11	18	29
Less than 80% AMI	29.03%	61.08%	17	27	43

Elderly Housing Needs

The next table will address future housing needs and trends for households with elderly persons (age 62 and up). Like the previous table, this data is based on the overall trends previously defined, and the 2008-2012 CHAS data previously discussed (specifically CHAS Table 16). It is further broken down by income threshold and tenure.

Jackson County: 2015-2020 Housing Needs Age 62 and Up

	Owner Subset %	Renter Subset %	Elderly Owners	Elderly Renters	Elderly Total
Total New Elderly (62+) Demand: 2015-2020	33.26%	11.31%	19	5	24
Elderly less than 30% AMI	3.92%	2.77%	2	1	3
Elderly less than 50% AMI	7.53%	6.42%	4	3	7
Elderly less than 60% AMI	9.03%	7.71%	5	3	9
Elderly less than 80% AMI	12.60%	8.69%	7	4	11

Housing Needs for Persons with Disabilities / Special Needs

The following table will address future trends and needs for households with at least one household member with at least one disability as identified by HUD CHAS Table 6 (hearing or vision impairments, ambulatory limitations, cognitive limitations, self-care limitations, or independent living limitations). As with the previous tables, this data is also further broken down by income threshold and tenure.

Jackson County: 2015-2020 Housing Needs for Persons with Disabilities

	Owner Subset %	Renter Subset %	Disabled Owners	Disabled Renters	Disabled Total
Total New Disabled Demand (2015-2020)	30.65%	22.54%	17	10	27
Disabled less than 30% AMI	5.07%	7.68%	3	3	6
Disabled less than 50% AMI	8.37%	13.10%	5	6	11
Disabled less than 60% AMI	10.05%	15.72%	6	7	13
Disabled less than 80% AMI	13.06%	18.14%	7	8	15

Housing Needs for Veterans

This section will address housing needs for households with at least one veteran. This data is not available through HUD's Consolidated Housing Affordability Strategy, so we have instead relied on data from the U.S. Census Bureau, specifically the 2009-2013 American Community Survey, Table C21007. This data is further broken down by tenure, poverty status, and disability status.

Jackson County: 2015-2020 Housing Needs for Veterans

	Owner Subset %	Renter Subset %	Veteran Owners	Veteran Renters	Veteran Total
Total New Demand (2015-2020)	100.00%	100.00%	57	44	101
Total Veteran Demand	18.99%	18.99%	11	8	19
Veterans with Disabilities	3.77%	3.77%	2	2	4
Veterans Below Poverty	1.54%	1.54%	1	1	2
Disabled Veterans Below Poverty	0.34%	0.34%	0	0	0

Housing Needs for Working Families

The final table addresses housing needs for working families. Working families are in this case defined as families (households with at least two members related by blood or marriage) with at least one person employed. Like the forecasts for veteran needs, this data cannot be extracted from the HUD CHAS tables, so we have again relied on the Census Bureau's American Community Survey (table B23007 in this instance). The data is further broken down by the presence of children (below the age of 18).

Jackson County: 2015-2020 Housing Needs for Working Families

	Owner Subset %	Renter Subset %	Owners	Renters	Total
Total New Demand (2015-2020)	100.00%	100.00%	57	44	101
Total Working Families	50.99%	50.99%	29	22	51
Working Families with Children Present	25.91%	25.91%	15	11	26

Population Subset Conclusions

Based on population and household growth over the next five years, a total of 39 housing units will be needed in Jackson County over the next five years. Of those units:

- 11 will be needed by households earning less than 60% of Area Median Income

- 3 will be needed by households age 62 and up, earning less than 60% of Area Median Income
- 5 will be needed by households with disabilities / special needs, earning less than 60% of Area Median Income
- 10 will be needed by working families with children present

This data suggests a strong need in Jackson County for housing units that are both affordable and accessible to persons with disabilities / special needs, and working families.

Special Topics

Jackson County Disaster Resiliency Assessment

The purpose of this section is to assess at the county level key components of disaster resiliency. Housing location and quality as well as planning activities can help reduce impacts from disaster events and allow for faster recovery. Disasters can include tornadoes, extreme weather, high winds, as well as man-made events. These events may largely be inevitable, but the ability to reduce damage and casualties as well recovery can be improved with good planning.

C.0 Comprehensive Plans & Hazard Mitigation Plans

There are 9 key cities within the county (Altus, Blair, Eldorado, Olustee, Headrick, Elmer, East Duke, Martha, Friendship).

Comprehensive plans are the guiding documents for cities of various sizes to address key aspects of their community from land use, transportation, environment, housing, and economic development.

The other key plan for a city to manage, mitigate and plan for recovery related to disasters is a **Hazard Mitigation Plan** (or Emergency Management Plan). Often low density counties, the Hazard Mitigation Plan is done at the county level, though some cities may augment the county plan with a city plan.

Jackson County does have a Hazard Mitigation Plan and an Emergency Operations Plan.

C.2.1.1. Historical Data on Natural Disasters and Other Hazards

Data on historical damages and casualties is typically collected as part of a **Hazard Mitigation Plan** preparation to determine the appropriate planning measures and actions to take before and after an event.

The Jackson County HMP first identified the vulnerability and risks for the area

HAZARD VULNERABILITY BY JURISDICTION												
COUNTY	DAM FAILURE	DROUGHT	EARTHQUAKE	EXTREME HEAT	FLOOD	HAIL	HAZARDOUS MATERIALS	HIGH WINDS	LIGHTNING	TORNADO	WILDFIRE	WINTER STORM

p. 16

Dam Failures

Dam/dike failures have not occurred in any years between 1950 and 2012. Damages to personal property are estimated at \$0.00. p. 18

Flooding

“Flood Zones of Jackson County

All of Jackson County and participating jurisdictions are still subject to riverine and flash flooding. The Town of Blair has flooding in the areas of U.S. Hwy. 283 and 1st Street, east on 1st Street, north on Stonehocker Street, north on Taylor Street, east on 4th Street and west on Main Street. The Town of Eldorado has flooding in the areas of Lloyd Street and A Street, A Street and 8th Street, 8th Street and Main and Market Street and A Street. The Town of Martha has flooding in the areas of north Main Street and south Main Street, north Popular Street east Church Street and west Church Street. The Town of Olustee has flooding in the areas of D Street and 5th Street and east 7th Street. The City of Altus has flooding in the areas of Galaxy and Kenwood Streets, Falcon Road and Kenwood Street, C Street and East Asalee and Park Street. There are no schools which are participating in this plan that are subject to flooding.” P. 28

“National Climatic Data Center storm event statistics record 12 flood events in Jackson County and participating jurisdictions during the 10-year period 1993-2003. There were no reported damages. According to National Flood Insurance Program statistics, Jackson County residents had four reported losses and received payments totaling \$5,164.00 as of May 2011.” P. 28

“Flood Events

August 2, 1995 - In Jackson County, SH 5 was closed due to high water four miles south of Humphries.

March 23, 2000 - Highway 62 west of Altus was covered by water at either the Salt Fork of the Red River or Bitter Creek. Flooding was also reported on Highway 283 near Blair, where several creeks overflowed. Widespread 2-3 inch rainfall amounts were reported across central and northern Jackson County.

May 24, 2003 – In Eldorado Three to four foot deep water was reported across several city streets.

June 28, 2004 - Flash flooding occurred during the evening as rainfall totals up to 4 inches over Jackson County in southwestern Oklahoma. OK State Highway 6 was covered by floodwaters and mud at two locations on the highway about 1 mile north of Olustee, OK.”p. 28

Flooding

All parts of the county may be subject to flash flooding, freeze-thaw flooding and extreme precipitation that can cause flooding, unrelated to the streams and rivers. Development in the floodplain, however, increases risk of damages and property loss potentially repeatedly.

NOAA data shows the following historic data on disaster events for the county:

Historic data on tornados between 1950-2014 there are 63 tornados documented. There were 77 injuries that occurred connected to these tornados, with 59 of those injuries happening in the 1982 tornado. There were 4 fatalities connected to tornadoes during this time period, 2 of which occurred in 1982. Property losses between 1950-1996 ranged from \$51,788,307.00 to \$517,883,350.00. (The accounting methods used for losses changed in 1996.) The losses estimated between 1996-2014 was \$20,000.00 .

C.2.1.2; C.2.1.6; C.2.1.7;C.2.1.8 Shelters from Disaster Event

Jackson HMP recommends:

- Create database on citizens with existing storm shelters (p. 56, 64, 80, 85, 93, 95)
- Build safe rooms/storm shelters to protect from tornados and high winds (p.56)
- City of Altus: Storm shelter GPS identification and plan to remove citizens from these shelters if necessary and GPS devices for all city vehicles (p.64)

According to the Jackson County EOP the only town with a public tornado/storm shelters is El Dorado (**Emergency Operation Center**) (EOP, p. 112)

C.2.1.3 Public Policy and Governance to Build Disaster Resiliency

Information not available.

C.2.1.4 Local Emergency Response Agency Structure

The Jackson County EOP spells out the direction and control process and structure.

C.2.1.5 Threat & Hazard Warning Systems

Jackson County HMP proposes:

- Improve Warning Systems (storm sirens, cell phone notification, fire alert, etc.)(p. 56)
- City of Altus: Purchase 11 sirens and 11 battery back-ups. Installation location not yet determined. (p. 65)
- Town of Blair has purchased 3 storm sirens (p. 72)
- Town of Duke, El Dorado, Headrick, Martha, and Olustee proposed purchase of storm sirens (p. 80)

Sirens:

ALTUS Number of Sirens: 12

BLAIR Number of Sirens: 2

Social Vulnerability

Based on the research work done by the Texas A&M University Hazard Reduction and Recovery Center, an added component is being included in this section. Social vulnerability can place households at a further disadvantage during and after a disaster. This analysis is assessing for the county the levels of social vulnerability based on demographic indicators to highlight ‘hotspots’ or counties that have higher social vulnerability. That combined with Hazard Mitigation Plans – or lack thereof – can highlight places where additional work is needed to reduce impacts on households.

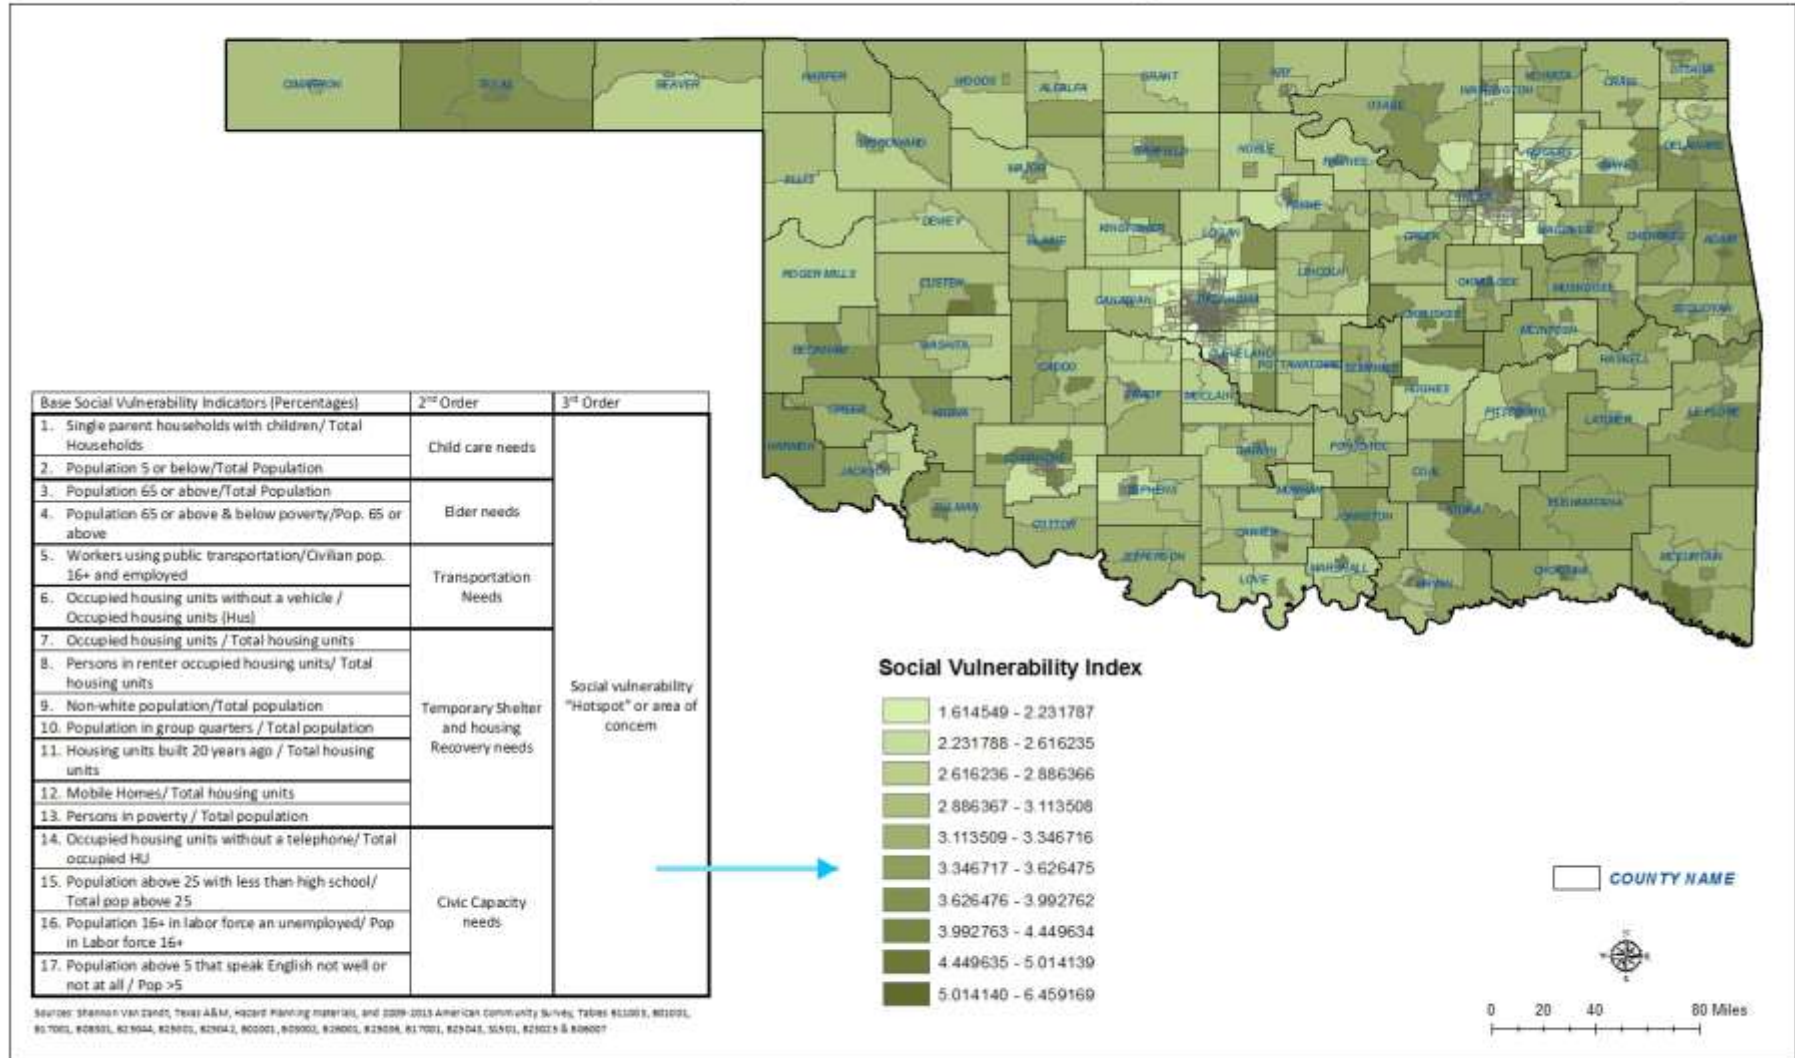

Social Vulnerability Analysis - Jackson County

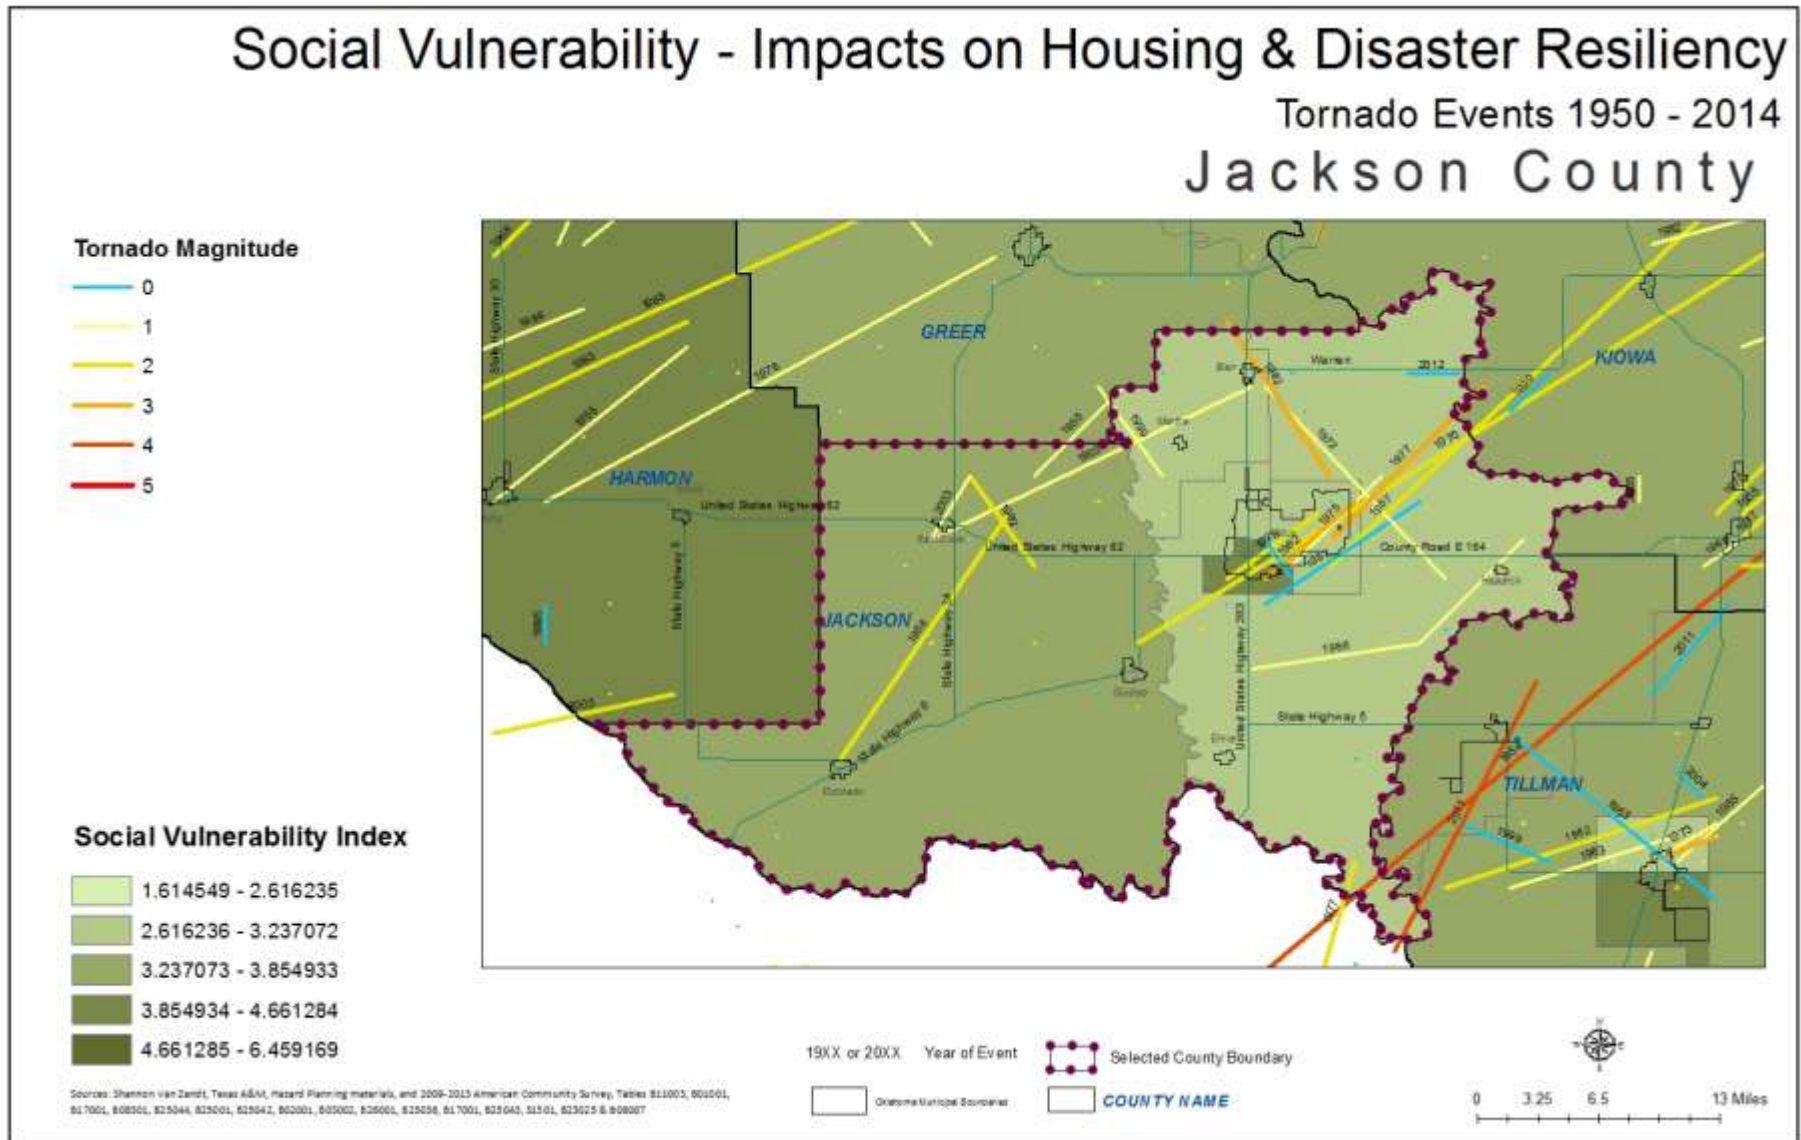

Base Social Vulnerability Indicators (%)		2nd Order	3rd Order
1.) Single Parent Households	14.71%	0.227	3.47 Social Vulnerability 'Hotspot' or Area of Concern
2.) Population Under 5	7.99%	(Child Care Needs)	
3.) Population 65 or Above	13.08%	0.25	
4.) Population 65 or Above & Below Poverty Rate	11.94%	(Elder Needs)	
5.) Workers Using Public Transportation	0.10%	0.045	
6.) Occupied Housing Units w/o Vehicle	4.45%	(Transportation Needs)	
7.) Housing Unit Occupancy Rate	86.53%	2.645 (Temporary Shelter and Housing Recovery Needs)	
8.) Rental Occupancy Rate	38.22%		
9.) Non-White Population	34.73%		
10.) Population in Group Quarters	2.98%		
11.) Housing Units Built Prior to 1990	80.90%		
12.) Mobile Homes, RVs, Vans, etc.	4.68%		
13.) Poverty Rate	16.51%		
14.) Housing Units Lacking Telephones	2.06%	0.302 (Civic Capacity Needs)	
15.) Age 25+ With Less Than High School Diploma	15.90%		
16.) Unemployment Rate	6.91%		
17.) Age 5+ Which Cannot Speak English Well or Not At All	5.29%		

Sources: Shannon Van Zandt, Texas A&M, Hazard Planning materials, and 2009-2013 American Community Survey, Tables B11003, B01001, B17001, B08301, B25044, B25001, B25042, B02001, B03002, B26001, B25036, B17001, B25043, S1501, B23025 & B06007

Social Vulnerability - Impacts on Housing & Disaster Resiliency

Social vulnerability combined with the devastating impacts of a natural or man-made disaster can compound a household's ability to recover and in fact can place those individuals at an even greater gap or disadvantage prior to the event (Shannon Van Zandt, Texas A&M, Hazard Planning).

This county falls above average per this index for social vulnerability when comparing as a county to other counties in the state. The area most vulnerable by census tract is in the area of Altus and western portion of the county. Combine that with the tornados, as one physical hazard or event that occurs, people in these areas may have additional difficulties during an event due to transportation and family needs. Additionally recovery for socially vulnerable populations can be slow and may require additional outside assistance.

Recommendations for this county:

- Continue to update and maintain the county HMP and include attention to areas within the county that in addition to physical vulnerability may have compounding social vulnerability factors.
- Efforts to strengthen building codes related to tornadoes and natural disasters should be considered.
- Planning for shelters from disaster events for multifamily, HUD and LIHTC units, in addition to all housing in the community should be incorporated with any effort to increase housing.

Homelessness

By Continuum of Care

Oklahoma is comprised of eight Continuums of Care (CoC). These entities manage the provision of services to the homeless, among other functions. By definition, CoCs involve nonprofit homeless providers; victim service providers; faith-based organizations; governments; businesses; advocates; public housing agencies; school districts; social service providers; mental health agencies; hospitals; universities; affordable housing developers; law enforcement and other organizations that serve the homeless and those at risk of becoming homeless (Continuum of Care Network pamphlet, 2015). These entities are governed by a community plan that helps them deliver services to the homeless and/or to prevent a return to the homeless. CoCs provide a variety of services aimed at outreach, engagement and assessment, including emergency shelter, rapid re-housing, transitional housing, and permanent housing, among others (Continuum of Care Network pamphlet, 2015).

The data below describes the characteristics of those receiving or eligible for the CoC in which Jackson County is located. This data is collected by the CoCs on last day of January each year and reported on an annual basis. It is currently the best source of data available at the State level of understanding the demographics of these populations.

OK 506 Southwest Oklahoma

OK 506 represents the southwest region of Oklahoma, including Roger Mills, Beckham, Washita, Kiowa, Tillman, Cotton, Jefferson, Stephens, Garvin, McClain, Grady, Caddo, Comanche, Greer, Harmon, and Jackson counties. This region of Oklahoma has a small homeless population generally. However, there are at least 8 homeless households comprised of children only. While these households are sheltered, additional analysis would be useful to understand the trend that may be leading to homeless youth in this region. There is also a high homeless veteran population (25) in this region. There may be a correlation between the number of homeless veterans in this CoC and the presence of a military base in Comanche County, as well as a Veterans' Hospital in the area. Given the presence of these services in this area, investment should be made for more temporary and permanent housing for homeless veterans. There are Veterans' Hospitals in this COC where veterans can receive services. This may play a big role on why there is a significant amount of homeless veterans in this COC.

<i>OK 506 Southwest OK Regional</i>	Emergency Shelter(sheltered)		Unsheltered	Total
Households without children	43	48	59	150

COC Conclusion

Each of the CoC's represents a unique area. It's important to note that the Point In Time data serves as a baseline. It is likely that the homeless population is much larger than counted. Generally, the State's homeless population is over the age of 24. In some areas of the State, there is a disproportionately high rate of homeless youth. More detailed exploration is necessary to understand the reasons which led them to this State and the needs of homeless youth. Domestic violence victims comprise a significant portion of the homeless population in the State. In some areas, the presence of social service providers for this subpopulation has reduced homeless rates. The same is true with respect to homeless veterans. As anticipated, the majority of the homeless population across the state can be classified as: mentally ill, chronically homeless, and chronic substance abusers. The needs of these difficult to house homeless must remain a priority across the State.

A Snap Shot of Homelessness in the State

Point in Time data was last collected on January 29, 2015 across the State. On that date, counts revealed a homeless populations of more than 3,000 residents. The majority of those counted (2,603 individuals) were classified as households without children. The majority of this group lives in emergency shelters (1,652) or transitional housing (376) with 575 classified as unsheltered.

The number of households with children is seemingly small totaling 343. The vast majority of those in this classification live at emergency shelters (201) or transitional housing (104) with only 38 classified as unsheltered. Homeless service providers in Oklahoma City and Tulsa emphasized that this group was likely undercounted across the State because they are less visible than other categories of homeless. They emphasized that emergency shelters, as presently designed, do not meet the needs of families with children in terms of both privacy and safety.

The Point in Time data reveals less than 100 households comprised of only children. Of these 74 counted households, 35 live in emergency shelters and 39 are unsheltered. This population is likely significantly undercounted as youth who are homeless typically seek to avoid identification for fear of being returned to their homes. These young people often have specific needs for supportive services that are difficult to deliver because the population remains unseen. Homeless advocates in the State hold up Tulsa as a good example of the State for serving homeless youth. OKC's Be the Change is also a leader in identifying and providing needed service to homeless youth in the metropolitan region. The problem of homeless youth is not just isolated to large urban areas. Mid-sized and smaller cities also look for innovative ways to service. Cities like El Reno and Enid have their own drop in centers for homeless youth. Social networks in smaller cities fill similar functions.

Oklahoma City public schools also tracks homeless students within the district. There are homeless students attending 78 elementary and middle schools in Oklahoma City. This data suggests that the majority of the city's homeless students are African American or Hispanic. There are 664 homeless African American students, 724 homeless Hispanic students, and 254 homeless Caucasian students. There are ten high schools in OKC that have reported having homeless students. Douglass and Capitol Hill high schools have the highest homeless student populations. Douglass has 50 homeless African American students. Capitol Hill has 49 homeless Hispanic students. The majority of these students can be classified as "couch homeless" or doubled up, meaning that they are finding

shelter with extended family members, friends, and other non-relatives for a brief amount of time due to hardship.

The majority of Oklahoma's homeless population is over 24 years old. This classification system is not particularly useful in helping to assess the number and needs of the elderly population, which is reported to be a substantial subset of this population.

The Point in Time data categorizes the homeless population into two categories: Hispanic/Latino and Non-Hispanic/Non-Latino. The lion's share of homeless in Oklahoma are Non-Hispanic/Non-Latino (3,528). In Oklahoma City, 62% of the homeless served are classified as Caucasian. Twenty-five percent of the homeless population is African American. Seven percent of the homeless in OKC identify as Native American. Less than one percent of those identified as homeless in OKC are Asian. By contrast, a relative small fraction of the State's homeless population is Hispanic/Latino. The Point in Time data identified a relatively small Hispanic homeless population, including less than 250 individuals. This follows OKC counts that identify 7% of the city's homeless population as Hispanic. Homeless advocates in OKC indicate that social networks, including churches and extended families, keep the number of homeless in the Hispanic population proportionately lower than their Non-Hispanic/Non-Latino counterparts. However, these individuals likely classify as "couch homeless" and are in a continued state of being vulnerable to becoming homeless.

The PIC data indicates that there are more homeless males (2,237) than females (1,535). This follows national trends. Care should be taken when interpreting this data, as women are less likely to participate in Point in Time counts. There is a growing population of homeless in Oklahoma that identifies as transgender. PIC data identified 5 individuals identifying as transgender. This population is likely much higher and will continue to grow due to family and national attitudes about this population. Transgender populations may require special housing accommodations, especially in the emergency shelter context, to provide for their social and emotional needs.

Another group of homeless individuals that merits special consideration in the distribution of resources is those identified as having special needs. This classification includes persons with "physical, mental or behavioral disabilities, persons with HIV/AIDS and/or persons with alcohol or drug addictions. The Point in Time data estimates that there are nearly 1300 homeless persons with special needs in OKC alone.

The Point in Time data is coarse and does not do an effectively track homeless populations with specific needs, such as those persons who are homeless and living with HIV/AIDS. This special population of homeless is likely growing in Oklahoma. According to the Oklahoma State Department of Health there were an estimated 5,375 cases of persons living with HIV/AIDS by the end of 2013. There were a total of 437 newly diagnosed HIV/AIDS cases in 2013 for the state of Oklahoma. The vast majority of populations living with HIV/AIDS (nearly 72%) reside in urban areas. In OKC alone, the Point in Time data identified at least 25 homeless individuals living with HIV/AIDS. This is likely an undercount. Based on this information and anecdotal data from homeless service providers, special effort must be made to understand the housing, medical, and supportive services needs of homeless persons living with HIV/AIDS.

Shelter is crucial for homeless persons with HIV/AIDS in the management of this illness. However, traditional shelter setting(s) may not be suitable to house this population. Those with suppressed immune systems are vulnerable to the spread of infectious diseases which may be present in open shelters. In addition, shelter personally may not be properly trained in handling AIDS related issues. For these reasons, as well as resources made available by the federal government, homeless persons living with HIV/AIDs are often given housing choice vouchers, created by HOPWA, so that they secure housing on the private market. This can be challenging in constrained rental markets like Norman, for example, where affordable housing options are limited. It is estimated that more than 60 individuals living in OKC with HIV/AIDs are homeless because they have been unable to find a landlord that will accept their housing choice voucher.

State Name: Oklahoma**Point-in Time Date: 1/29/2015****Summary by household type reported:**

Transgender	3	2	0	5
Total	2,309	690	778	3,777

Rural Areas

Homelessness in the rural areas of the State is much more difficult to calculate. Given the population density of the State, the majority of services that serve the homeless are concentrated in urban and semi-urban areas. Even if beds are available, many rural homeless lack knowledge about the services or a means to travel to receive the same. As a part of this study, OU students were dispatched into the 77 counties in the State to, among other issues, attempt to understand the degree to which there is rural homelessness in the State. Their qualitative inquiries yielded very little data, in part, because rural homeless is difficult to identify and often ignored. For the purposes of this report, a literature review was prepared on the topic of rural homelessness in the United States. The goals of this academic review is to assist policymakers and service providers in the State in uncovering the dimensions of this illusive population.

In the U.S., the rural homeless population is predominantly Caucasian. This population is comprised of single mothers, widowed wives and husbands, divorced and separated men and women, and young people. A study examining rural homelessness in Ohio found that nearly 40% of those who classify as homeless were divorced, separated, or widowed (First, Richard J., John C. Rife, and Beverly G. Toomey, 1994, pg. 101). Ohio's rural homeless were also relatively young. Close to 80% of homeless population in this study was between the ages of 18 and 39 years old (First et al, 1994, pg. 101). Rural homelessness is often less visible than urban homelessness because these populations commonly take shelter are at a friend's house, in their vehicles, or on abandoned properties. These populations can also be found on "...campgrounds or in hollows, desert canyons, farmers' fields, state parks, and highway rest areas" (Milbourne and Cloke, 2006, pg. 17).

The causes of rural homelessness mirror, in most ways, the plight of the urban homeless. The study of homelessness in rural Ohio revealed family problems and substance abuse issues as primary causes of rural homelessness. The incidence of homelessness resulting from situations of domestic violence is high in rural areas (Cummins et al, 1998). Substance abuse issues are a common cause for homelessness in rural America. The literature reveals that this population tends to be homeless because they have isolated themselves from family and people who want to help (First et al, 1994). In the case of both domestic violence and substance abuse, it is often difficult for these individuals to find shelter and the supportive services they require in rural areas where options are limited, if available at all. The thought of moving to an urban area to find both shelter and supportive services is sometimes not considered at all by these vulnerable populations.

Rural areas are also more prone to the kind of poverty that puts individuals and families at risk for homelessness. The number of people living at or below the poverty line in rural places is higher than anywhere else in the United States (Moore, 2001). The statement "rural homelessness is a microcosm of national economic and political developments" cannot be truer for American rural communities (Vissing, 1996, pg. 103). The disinvestment of small towns and their inability to attract long-term sustainable business development, cripples a small town's economy. In effect, this is a main contributor for why poverty is such a common theme for rural communities. As a result, the State should carefully consider its investments in rural Oklahoma. While there is a need for shelter in these places, the construction of this housing type should be weighed with long term opportunities for employment in the area.

It is not surprising that rural areas typically lack both emergency shelters and temporary housing options. Services that provide temporary housing and provide relief and support services for those who cannot find food are virtually nonexistent in rural communities across the United States (Moore, 2001). Sheltering the homeless is undercapitalized in rural areas because communities do not see a concentration of homeless individuals (Vissing, 1996, pg. 146). As a result, the homeless must satisfice where they are. For instance, for families who are homeless, some of them use a friend's house to store clothes or to seek shelter, while some receive assistance from churches (Cummins et al, 1998). Others migrate to urban areas where services are available and more accessible (Rollinson, Paul A., and John T. Pardeck, 2006).

The absence of affordable housing in rural areas is a root cause of homelessness (Levinson, David, and Marcy Ross, 2007). In fact, it was noticed that many of the people were receiving monetary assistance or previously had some money saved up to spend on housing, but these measures were not enough to keep them afloat (First et al, 1994, pg. 101). Housing costs rise in rural areas typically rise as a result of competition for a limited amount of housing stock. In some rural areas, low income families are spending 70% of their household incomes on housing, sometimes substandard housing (Vissing, 1996, pg. 124). As Levinson et al explain, "housing costs are lower but so are incomes, with the result of placing a heavier rent burden in the community" (Levinson, David, and Marcy Ross, 2007, pg. 45). Renters in rural communities, as a result, are far more susceptible to becoming homeless than their urban or suburban counterparts because they do not have the financial safety net sometimes associated with homeownership (Fitchen, 1991, pg. 193).

While this brief review of the literature describes the state of homelessness across rural America, many of the lessons learned are easily translated to an Oklahoma context. The condition and supply of affordable housing units is relatively poor in many rural portions of the State. Rent burden, as more fully characterized in the Consolidated Housing Affordability Strategy (CHAS) section of this report, is high. This leaves families living and working in relatively weak economies vulnerable to homelessness. Once homeless, supportive services in these areas are relatively limited, especially for the chronically homeless, those with substance abuse problems, and victims of domestic violence. Services available to these populations in urban areas may not be attractive to individuals and families who are accustomed to life in rural communities. Where practicable, more consideration must be given to providing supportive services and temporary and permanent housing to homeless populations wishing to remain in rural areas.

At Risk For Homelessness

Poverty is the primary factor that places Oklahoma families at risk of being homeless. There are many factors experienced by those living in poverty which leave residents more or less vulnerable to homelessness. For the purposes of this study, a social vulnerability index has been constructed to measure the likelihood or risk that residents living in poverty might find themselves homeless. This index includes factors such as single headed households, concentration of young and elderly residents, the reliance on public transportation, private vehicle availability, racial composition, housing type, presence or absence of a telephone in the household, amongst other factors. This index is additive and seeks to understand the collective impact of these factors in estimating the vulnerability of a local population. While employed in more significant detail in the section of this report focusing on disaster resiliency, this tool is useful in identifying areas of the State where populations may be most vulnerable to homelessness. The index utilized in this section is different from the one crafted in the Disaster Resiliency chapter of this report in that it estimates social vulnerability at the county level, rather than by census tract. The decision to study vulnerability to homelessness at the county level was made to help policymakers understand, more generally, where resources and economic interventions are most necessary to stave off the potential effects of homelessness. This maps presents vulnerability to homelessness on the county level, depicting the most vulnerable counties in dark green.

Social Vulnerability - Impacts on Housing & Disaster Resiliency

The Oklahoma families most likely at risk are those living in public and subsidized housing. They live below the poverty line. Even those who are employed, remain vulnerable to homeless because an unexpected expense, like a medical emergency, threatens their ability to pay for their share of rent owed or utilities. A missed payment can easily lead to eviction and homeless.

Through the U.S. Department of Housing and Urban Development, Oklahoma service providers have been vested with more than 24,000 housing choice vouchers. Their spatial distribution is outlined below. Of significance is the size of the waiting lists for public housing units and housing choice vouchers in cities across the State. These individuals are the most vulnerable to being homeless.

		Authorized Vouchers	Public Housing Waiting List	Voucher waiting list
Ada	OK024	110	Unknown	Unknown

Oklahoma		24,612		

Findings and Recommendations

The chronically homeless population remains high in Oklahoma and follows national trends. While this population does not appear to be growing, the needs of the chronically homeless merit continued attention. Ample emergency shelters and soup kitchens must be made available for these sizable population in both urban and rural contexts. Social service providers should be clustered, to the extent possible, where these groups of homeless populations cluster. Given the future projections for the increase in the number of cold and hot days in the region, social service providers must provide places that allow these individuals to seek refuge from the elements.

Those living with HIV/AIDS tend to underreport their status and needs. Given the cost of medical care these individuals face, the need for permanent and stable housing is critical. Housing providers must work to ensure that there are enough units for this undercounted population. Working with county health care providers, OHFA is much more likely to estimate the size and needs of this population of homeless and potentially homeless persons. Special care must be taken to ascertain the barriers these individuals face when using vouchers to secure housing in the marketplace.

Victims of domestic violence require temporary and transitional housing statewide. CoCs with high supportive services tend to better accommodate the housing needs for these population. Cleveland County provides a good model for the State. However, many homeless victims of domestic violence live in rural areas that are underserved. Efforts must be undertaken to work with social services provides, schools, churches, and the police to help identify these individuals and to lead them to available housing and supportive services.

While not mentioned in the PIC data, estimates must be prepared to calculate the number and needs of homeless populations with felonies. In particular, there has been a rise nationally in the number of homeless sex offenders. Zoning regulations and discrimination from the private market has pushed many registered sex offenders to the periphery of many communities. Given their criminal histories, this population of homeless is harder to house but should not be forgotten for health and safety of these individuals and the communities they inhabit.

The size of the homeless veteran population seems to be decreasing as a result of national initiatives to end homelessness for veterans in Oklahoma. The needs of homeless veterans are highest in areas of the State near VA facilities. Temporary and permanent housing should be constructed at a higher rate in these areas to meet demand. Care should be taken to make certain that the housing constructed is built to meet the psychological needs of veterans, particularly those suffering from PTSD.

Rural homelessness, in general, is a challenge to assess and characterize. The rate of homelessness in rural areas is most likely much higher than annual counts demonstrate. The majority of rural homeless likely find shelter out of public view. Some may shelter in their cars, in undeveloped areas or in the homes of those who allow them to stay. They are not likely to find their way to urban areas given their lack of transportation options and preferences for rural living. Programs that are developed to provide shelter to the rural homeless must be developed to allow sheltering in place where possible. Sheltering in place should only be allowed, however, in places where individuals are likely to be able to find what they need, including opportunities to work.

Very little is known about the age distribution of homeless over the age of 24. It is likely that the homeless population, including those who are chronically homeless, is aging. Elderly homeless individuals have special needs. Counts must be more sensitive to understanding the size and needs of this population. This does not mean arbitrarily building units to house this population unless a need can be demonstrated for the same.

Waiting lists for public housing and section 8 vouchers are high across the State. This is not uncommon to Oklahoma. However, when we are considering the size of the population that is at risk to homelessness, these waiting lists are an important factor to consider. Resources should be spent in a manner which is preventative so that these individuals' and families' needs are met before they become homeless.

The absence of affordable housing alternatives across some parts of the State is the largest threat to homelessness. In markets that are constrained by an aging housing stock or those that are rapidly growing, individuals and families who live on the economic margins are at risk for becoming homeless. Communities must work to ensure that zoning regulations promote the development of housing types serving all income levels, including the providing of temporary and permanent housing to meet the needs of the presently homeless and those at risk for becoming the same. Funding distributions should be targeted to communities with the highest needs who are willing to do what is necessary to meet the needs of the homeless and those at risk for the same.

Fair Housing

Summary

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity.

These findings are intended to aid the Oklahoma Housing Finance Agency (OHFA) determine the location of new affordable housing in relation to vulnerable populations and explore ways to expand the opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Key Findings:

- 70% of affordable housing units are located in census tracts marked by poverty
- 62% of affordable housing is located in census tracts where a majority of the residents are not white
- 13% of affordable housing units have no access to transit services and 56% have access to limited service, on-demand transit
- 2.6% of affordable housing units have limited access to a hospital
- 7.8% of affordable housing units are located in food deserts

Recommendations:

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

What is Fair Housing?

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. On one hand, this protects the ability of individuals to obtain housing regardless of personal characteristics such as race, skin color, national origin, gender, familial status, or disability. It also focuses attention on more subtle forms of discrimination that cluster low-income housing in ways that inhibit the ability of communities to access services and amenities that support self-sufficiency and autonomy.

Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity. In 2014, HUD released the Affirmatively Furthering Fair Housing (AFFH) rule for public comment. The draft rule

“directs HUD’s program participants to take significant actions to overcome historic patterns of segregation, achieve truly balanced and integrated living patterns, promote fair housing choice, and foster inclusive communities that are free from discrimination” (HUD 2015). In 2015, the United States Supreme Court provided legal support for actions taken to remedy patterns that impede the upward mobility and opportunity of low-income individuals and communities. In the case of Texas Department of Housing and Community Affairs v. The Inclusive Communities Project the court reiterated the need to address disparate impacts in considering the location of affordable housing and reinforced the importance of AFFH (Bostic 2015). Housing discrimination from this perspective is not only felt by individual residents, it can also be the result of actions that work to limit the opportunities to improve the quality of life in local communities.

Approach

In Oklahoma, a combination of federal and state programs work to support the opportunities provided to individuals and families who rest safely and comfortably in an apartment or home. Here we use publicly available data for units that are part of the Low Income Housing Tax Credit (LIHTC) Program, the Rural Rental Housing Loans, or OHFA administered programs such as Oklahoma Affordable Housing Tax Credit (AHTC), the HOME investment partnership program, the Section 8 Housing Choice Voucher Program, and multi-family bonds. Collectively, these programs represent state efforts to assist individuals who are unable to afford housing.

Indicators of disparate impact vary but seem to contingent upon the contextual characteristics of a particular neighborhood. In an effort to help communities investigate and understand community level disparate impacts, HUD created a Fair Housing Assessment Tool (http://www.huduser.gov/portal/affht_pt.html#affh). The assessment tool includes measures on indicators of disparate impacts based on the clustering of potentially vulnerable populations, including:

- Race/Ethnicity of Residents
- National Origin of Residents
- English Proficiency of Residents
- Job Accessibility
- Transit Accessibility
- Level of Poverty
- Environmental Exposure (e.g. pollution, crime, food, health care, etc.)
- Disability

This report uses the Fair Housing Assessment Tool in conjunction with readily available data to initiate a more thorough investigation of the potential for disparate impacts in the state. The findings are intended to aid the Oklahoma Housing Finance Agency regarding future location of new fair housing in relation to vulnerable populations and the future opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Data

Data for this report are compiled from a variety of sources including the United States Census, the University of Oklahoma Center for Spatial Analysis, and primary data collected as part of ongoing research efforts at the University of Oklahoma. Data are aggregated into census tracts and reported statewide as well as by county (see Appendix 1).

1. Urban/Rural

A majority of the affordable housing in Oklahoma is situated in rural communities. Urban communities including Edmond, Lawton, Norman, Oklahoma City, and Tulsa are home to just over 1/3 of the affordable housing units in the state.

	Total Affordable Housing Units	Situated an Urban Setting	Situated in a Rural Setting
OHFA	35,292	11,699 (33.1%)	23,593 (66.9%)
515	5,384	0	5,384 (100%)
LIHTC	23,537	8,255 (35.1%)	15,282 (64.9%)
Total	64,213	19,954 (31.1%)	44,259 (68.9%)

2. Poverty

Approximately 70% of affordable housing units in Oklahoma are located in census tracts where the number of residents living in poverty is above the state average. About half of these units are located in areas of extreme poverty, where the number of individuals who are economically vulnerable exceeds 994, more than one standard deviation (411) from the mean (583).

	Total Affordable Housing Units	Situated in Poverty	Situated in Extreme Poverty
OHFA	35,292	12,295 (34.8%)	12,464 (35.3%)
515	5,384	2,093 (38.9%)	1,839 (34.2%)
LIHTC	23,537	7,483 (31.8%)	8,924 (38.0%)
Total	64,213	21,796 (33.9%)	23,227 (36.2%)

3. Non-white Enclaves

Just over 60% of affordable housing units in Oklahoma are located in census tracts where a majority of the residents are non-white. With just fewer than 24% of the total affordable housing units in census tracts heavily populated with residents who are not white – identified as census tracts where the number of non-white residents is more than 1,595 - one standard deviation (653) greater than the mean (542).

	Total Affordable Housing Units	Situated in Majority Non-White Community	Situated in Heavily Non-White Community
OHFA	35,292	12,814 (36.3%)	7,907 (22.4%)
515	5,384	2,229 (41.4%)	1,288 (23.9%)
LIHTC	23,537	10,285 (43.7%)	5,677 (24.1%)
Total	64,213	25,328 (39.4%)	14,872 (23.2%)

4. Immigrant Enclaves

One-third of affordable housing units in Oklahoma are located in census tracts where more than the average number of residents are immigrants. About half of these units are located in areas dense with immigrants, where the number of individuals who are not citizen exceeds 349, more than one standard deviation (219) from the mean (130).

	Total Affordable Housing Units	Situated in Immigrant Enclave	Situated in Heavily Immigrant Enclave
OHFA	35,292	8,114 (23.0%)	3,358 (9.5%)
515	5,384	1,017 (18.9%)	159 (3.0%)
LIHTC	23,537	5,457 (23.2%)	3,364 (14.3%)
Total	64,213	14,588 (22.7%)	6,881 (10.7%)

5. Limited English Proficiency

Almost 17,000 existing affordable housing units in Oklahoma are located in census tracts where more residents than average do not speak English very well. A little more than half of these units are located in areas dense with individuals with limited English proficiency, where the number of individuals who speak English less than very well exceeds 380, more than one standard deviation (240) from the mean (140).

	Total Affordable Housing Units	Community with more than average number of Limited English Speakers	Community dense with limited English Speakers
OHFA	35,292	6,250 (17.7%)	3,122 (8.8%)
515	5,384	799 (14.8%)	240 (4.5%)
LIHTC	23,537	4,034 (17.1%)	3,475 (14.8%)
Total	64,213	11,083 (17.3%)	6,837 (10.6%)

6. Disability

Almost 60% of existing affordable housing units in Oklahoma are located in census tracts where more residents than average have a disability. A little more than half of these units are located in areas dense with individuals with a disability, where the number of individuals who are disabled is greater than 831, more than one standard deviation (289) from the mean (542).

	Total Affordable Housing Units	Community with more than average number of Disabled Residents	Community dense with Disabled Residents
OHFA	35,292	10,098 (28.6%)	10,722 (30.4%)
515	5,384	1,686 (31.3%)	2,594 (48.8%)
LIHTC	23,537	7,074 (30.1%)	6,289 (26.7%)
Total	64,213	18,858 (29.4%)	19,605 (30.5%)

7. Hospitals

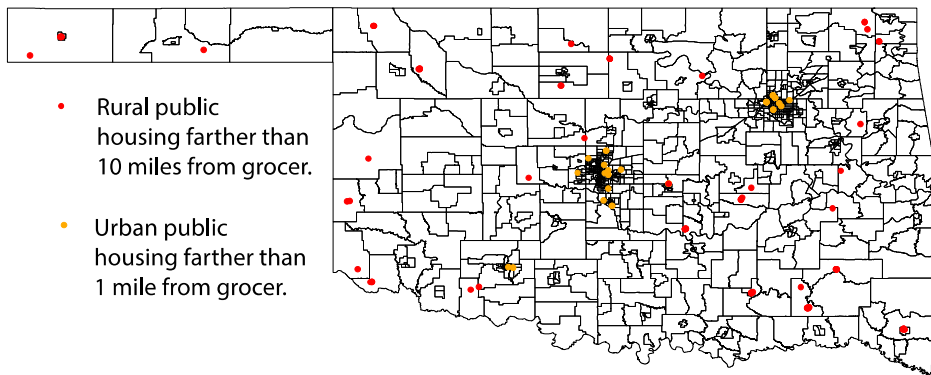

There are no affordable housing units more than 30 miles from a hospital. Approximately 2.6% of affordable housing units are farther than 15 miles from the nearest hospital. As indicated by the larger percentage of Rural Rental Housing Loan units, most of these are located in rural areas.

	Total Affordable Housing Units	More than 15 miles to nearest hospital	More than 30 miles to nearest hospital
OHFA	35,292	628 (1.8%)	0
515	5,384	500 (9.3%)	0
LIHTC	23,537	532 (2.3%)	0
Total	64,213	1,660 (2.6%)	0

8. Grocery Stores

Approximately 7.8% of affordable housing units are in areas that are classified as food deserts. According to the United States Department of Agriculture, food deserts exist in urban environments further than 1 mile from a grocery store and in rural environments further than 10 miles from a grocery store (<https://apps.ams.usda.gov/fooddeserts/foodDeserts.aspx>).

	Total Affordable Housing Units	Urban > 1 Mile from nearest Grocer	Rural > 10 miles to nearest Grocer
OHFA	35,292	1,493 (4.2%)	1,097 (3.1%)
515	5,384	0	466 (8.7%)
LIHTC	23,537	1,175 (5.0%)	769 (3.3%)
Total	64,213	2,668 (4.2%)	2,332 (3.6%)

9. Transit

A little over 69% of affordable housing in Oklahoma is located in a census tract with limited or no access to transit services. This includes 8,367 affordable housing units in areas that lack public transit services all together as well as 36,363 units that are situated in areas that have on-demand transportation services that often have limited operation times and may only serve elderly and disabled populations or those going to a medical appointment.

	Total Affordable Housing Units	No Transit	Urban Transit	On-Demand Transit
OHFA	35,292	4,035 (11.4%)	11,265 (31.9%)	19,992 (56.6%)
515	5,384	767 (14.2%)	0	4,617 (85.8%)
LIHTC	23,537	3,565 (15.1%)	8,217 (34.9%)	11,755 (49.9%)
Total	64,213	8,367 (13.0%)	19,482 (30.3%)	36,363 (56.6%)

What does this mean for Oklahoma?

This report suggests a number of possible ways forward for the Oklahoma Housing Finance Agency as it continues to support quality low-income and workforce housing for residents of the state. Across a number of indicators of opportunity, affordable housing in the state clusters in ways that raise concerns about the opportunities available to affordable housing residents in comparison to other residents.

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

Moving ahead, Oklahoma should be wary of a narrowly focused vision focused solely on the problems of existing affordable housing and the integration of these residents into other communities. The relocation of residents harkens back to the physical and social destruction brought about by urban renewal. Such an approach pits efforts to enhance existing affordable housing through community development against efforts to build a more integrated and diverse society (Goetz 2015). Rather, Oklahoma has the opportunity to work closely with local municipalities to improve the conditions of current affordable housing communities while simultaneously advancing integration of low-income and workforce housing through the construction in new settings.

For future new development, a number of case studies and emerging scholarship on the importance of neighborhood effects provide guidance on possible ways forward for Oklahoma. For instance, in El Paso, Texas a public private partnership between the Housing Authority of the City of El Paso and private developers led to the development of a mixed income housing development. Eastside Crossings (<http://www.hacep.org/about-us/eastside-crossings>) provides 74 traditional affordable housing units, 79 affordable housing units, and 45 market rate units in partnership with the Texas Department of Housing and Community Affairs (Housing Authority of El Paso 2015). In Sacramento, partnership between private developers and the Capital Area Redevelopment Authority resulted in the adaptive reuse of a building listed on the National Register of Historic Buildings into affordable Housing (Vellinga 2015). Located in a dense, walkable, transit-oriented community, the Warehouse Artist Lofts (<http://www.rstreetwal.com>) are home to 116 units, 86 of which are affordable and 13,000 square feet of ground floor retail.

For existing affordable housing, strategies exist to help enhance localized opportunities and build a culture of community participation around housing. Across the nation, there is a need to refocus the discussion away from the deficits found in many communities to look for closely at opportunities (Lens 2015) and to think about the consequences of physical, social, and economic isolation (Clarke, Morenoff, Debbink, Golberstein, Elliott, & Lantz, 2014.).

The Oklahoma Housing Finance Agency may need to collaborate more closely with other governmental agencies to develop comprehensive strategies that not only improve existing housing but also work toward enhancing access to food, recreation, amenities, jobs, and quality schools. By doing so, OHFA could help build the social and physical resiliency of these communities so that residents would be empowered to choose for themselves whether or not they want to stay and be part of their existing community or move elsewhere in search of a better quality of life. A set of tools for doing some of this work is available through Policy Link (<http://www.policylink.org/equity-tools/equitable-development-toolkit/about-toolkit>). For those who are relocated due to circumstances that make staying in place impossible, intensive case management may be required to ensure that these residents avoid pitfalls and thrive in a new environment (Theodos, Popkin, Guernsey, & Getsinger, 2010). But evidence continues to suggest that stability, particularly in the lives of children, is an essential part of ensuring that everyone has the opportunity to succeed and thrive (HUD 2014).

Lead-Based Paint Hazards

Findings / Health and Well-being

Lead is known to be highly toxic particularly to young children 5 years of age and under. Excessive exposure results in reduced intelligence, impaired hearing, reduced stature and a host of other negative health effects. It is well documented that a common source of lead exposure for children is lead-based paint in older housing along with the dust and soil it generates. Children are exposed to lead-based paint most commonly by directly eating paint chips or indirectly by ingesting lead-contaminated house dust or soil through normal hand-to-mouth contact.

For purposes of this analysis, the federal definition of “lead-based paint hazard” at 24 CFR Part 35.86 was applied. Under this definition, lead-based paint hazard is defined as, “...any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as established by the appropriate Federal agency.”

It is noteworthy estimates presented can only be stated as dwellings that “potentially” have LBP hazards because there are no real-time surveys or studies of residential structures built prior to 1978. However, there have been previous estimations provided in the state’s Consolidated Plan.

Statewide Findings

Using methodology which will be discussed later in this section, we have estimated the number of housing units in Oklahoma with lead-based paint hazards as defined in 24 CFR Part 35.86. Our estimates are shown in the following table.

Lead-Based Paint Hazards in Oklahoma		
	Number	Percent
Total Housing Units	1,432,730	
Total Housing Units with Lead-Based Paint Hazards	240,229	16.8%
Owner-Occupied Units w/LBP Hazards	159,861	66.5%
Renter-Occupied Units w/LBP Hazards	80,368	33.5%
Housing Units w/LBP Hazards Occupied by Low-to-Moderate Income Households	113,931	47.4%
Housing Units w/LBP Hazards with Children < 6 Years of Age Present	37,426	15.6%
Housing Units w/LBP Hazards Occupied by LMI Households and Children < 6 Years of Age Present	19,761	52.8%

Sources: American Healthy Homes Survey Table 5-1 & CHASTables 12 & 13

As shown, we estimate that there are 240,229 housing units in Oklahoma containing lead-based paint hazards, representing 16.8% of Oklahoma’s total housing stock. 66.5% of those units are owner-occupied, while 33.5% are renter-occupied. Of the 240,229 housing units containing lead-based paint hazards, 113,931 units, or 47.4%, are occupied by households with low-to-moderate incomes as defined by HUD. Among all housing units with lead-based paint hazards, 37,426 units have children under the age of six present, and 52.8% of those units, or 19,761 units total, are households with low-to-moderate incomes. Exhibits 2 through 6, found at the end of this section, graphically summarize our statewide findings at a county level.

Disaster Resiliency/ Economy and Society, Infrastructure and Environment

While communities strive to address lead-based paint hazards through education and removal when detected in connection with federally funded local housing rehabilitation initiatives, hazard detection and mitigation may have special considerations in terms of disaster resiliency.

Many disasters are accompanied by widespread damage to residential structures often times scattering building material debris across the landscape necessitating removal by heavy equipment and disposal in landfills. When building materials contaminated with lead-based paint become part of non-contaminated debris disposal, it presents an environmental hazard that can span well beyond recovery and rebuilding efforts.

Leadership and Strategy

Given the albeit large but finite number of potential housing units with lead hazards, the state and local communities may wish to consider initiatives aimed at reducing and/or eventually eliminating residential lead-based paint hazards, particularly in housing occupied by low and moderate income households with young children present. One such initiative could be the use of the state's various federal and state housing programs' competitive funding selection criteria. By designing rating criteria that specifically awards points to applicants that purposefully seek out properties within counties known to have higher percentages of lead hazards, housing developers along with those engaged in rehabilitation may be incentivized to engage in hazard mitigation.

State and local governments may wish to capitalize on the results of this study by using the data to support competitive applications to the Federal Home Loan Bank Topeka's Affordable Housing Program funding for owner occupied rehabilitation which, among other competitive rating criteria, awards points for the "Abatement of Hazardous Environmental Conditions". Similarly, this report's data may be used to document hazards and need in applications for competitive health care grants offered at the federal level.

Similar to initiatives undertaken by USHUD, the state may want to consider undertaking a real-time sample survey of homes built prior to 1978 across the state's community sizes and counties to more accurately ascertain the extent of the hazard and/or conducting real-time surveys of LBP Risk Assessors licensed by the ODEQ.

Survey of Previous Lead-based Paint Studies

Using a combination of US Census Bureau and US Department of Housing and Urban Development Comprehensive Housing Affordability Strategy data and age of housing stock built prior to 1980, the Oklahoma Department of Commerce's, "State of Oklahoma Five-Year E-Consolidated Plan FY 2014 – 2018" estimated 59% of the owner occupied and 65% of the renter occupied housing had the potential of containing lead-based paint. To address lead paint hazards, the Consolidated Plan recommended assessment of hazard presence be conducted at the point dwelling rehabilitation is undertaken and that nonprofits advise persons receiving federal rehabilitating assistance regarding the dangers of lead exposure.

At the national level, between 1998 and 2000, USHUD Office of Health Homes and Lead Hazard Control staff and the National Institute of Environmental Health Sciences conducted a real-time

random sampling of 831 permanently occupied housing units (multifamily, single family and mobile homes) taken from all 50 states and the District of Columbia. The results indicated an estimated 38 million (39% of the 96 million total housing units) of the nation's housing units had lead-based paint hazards. Of that total, 24 million had significant lead hazards with 1.2 million of those units occupied by low income families. It was further estimate that 35% of all low income housing had lead-based paint hazards. The study also noted the prevalence of lead-based paint increases with age of housing. However, most painted surfaces, even in older homes don't have lead paint. Geography was found to be related to the incidence of lead-based paint with the Northeast and Midwest having 2 times the prevalence of lead paint than the South and West. Finally, the study recommends "public-private sector resources be directed units posing the greatest risk" as a preventive measure to avoid lead poisoning.

In April 2011, the U.S. Department of Housing and Urban Development, Office of Healthy Homes and Lead Hazard Control updated its 1998-2000 nationwide report in its publication, "American Healthy Homes Survey, Lead and Arsenic Findings". This report, conducted from June 2005 through March 2006, estimated 37.1 million homes (34.9%) out of a total of 106 million total housing units have lead-based paint somewhere in the building. Of the 65.6 million homes built before 1978, 34.4 million (52%) have lead-based paint. The study reaffirmed the previous finding that the prevalence of lead-based paint is higher in the Northeast and Midwest parts of the United States than South and West. It also confirmed earlier finding that the incidence of lead-based paint increases with age of housing with 86% of the homes built prior to 1940 containing lead. An estimated 3.6 million homes with children less than 6 years of age have lead-based paint hazards of which 1.1 million are low income households. Of the 16.8 million homes with children under the age of 6, 5.7 million (34%) have lead-based paint, about the same incidence of lead-based paint in all homes.

In June 2006, the Oklahoma State Department of Health's Childhood Lead Poisoning Prevention Program (OCLPPP) received a 5-year project grant "Oklahoma Childhood Lead Poisoning Prevention Program Focusing in High Risk Groups". That program focused on communities evidencing high numbers of children 6-72 months of age who are at high risk for lead poisoning.

In order to more effectively target high-risk areas and populations, the OCLPPP identified 21 high-risk target area (HRTA) zip codes (see Exhibit #1) located within Oklahoma, Tulsa, Muskogee, Jackson, Okmulgee, Ottawa, Kay, Garfield, and Hughes counties. These 21 zip codes were narrowed from a list of 57 zip codes out of the state's approximately 700 zip codes that with populations of 5,000 or more persons; greater than or equal to 22% of housing stock built prior to 1950; and, greater than or equal to 18% of children under the age of 6 years living below the poverty level.

The 57 zip codes were further compared and evaluated based on selected characteristics such as EBL cases and proportion of minority population. Zip codes with higher EBL prevalence and/or minority populations (Hispanic/African American/American Indian) were ranked higher and given the designation as HRTA zip codes.

Jackson County Findings

The number of housing units in Jackson County containing lead-based paint hazards can be estimated by applying the percentages of housing units with such hazards reported by the American Healthy

Homes Survey, to the number of occupied homes in Jackson County, by year of construction. The following table presents the percentage of housing units in the Census Bureau South Region based on the AHHS findings.

Housing Units in the South Census Region with Lead-Based Paint Hazards by Year of Construction			
Year of Construction	No. of Housing Units (000s)	Units w/ LBP Hazards (000s)	Percent of Units w/ LBP Hazards
1978-2005	18,625	664	3.6%
1960-1977	11,724	1,311	11.2%
1940-1959	5,575	2,145	38.5%
1939 or Earlier	3,072	1,947	63.4%
Total	38,996	6,067	15.6%

Source: U.S. Dept. of Housing and Urban Development, American Healthy Homes Survey, Table 5-1

These percentages can then be applied to the number of housing units in Jackson County, by year of construction and by tenure (owner-occupied versus renter-occupied), as reported by HUD's Comprehensive Housing Affordability Strategy (CHAS) data for Jackson County.

Total Housing Units in Jackson County with Lead-Based Paint Hazards by Tenure			
Total Owner-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	2,252	3.57%	80
1960-1977	1,994	11.18%	223
1940-1959	1,550	38.48%	596
1939 or Earlier	835	63.38%	529
Total	6,630	21.55%	1,429
Total Renter-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,105	3.57%	39
1960-1977	1,121	11.18%	125
1940-1959	1,350	38.48%	519
1939 or Earlier	265	63.38%	168
Total	3,840	22.19%	852
Total Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	3,356	3.57%	120
1960-1977	3,114	11.18%	348
1940-1959	2,900	38.48%	1,116
1939 or Earlier	1,100	63.38%	697
Total	10,470	21.78%	2,281

Finally, we can use the same methodology to estimate the number of housing units in Jackson County with lead-based paint hazards, occupied by households with low-to-moderate incomes, by tenure:

**Housing Units in Jackson County with Lead-Based Paint Hazards by Tenure,
Occupied by Low-Income Families**

Owner-Occupied Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	172	3.57%	6
1960-1977	293	11.18%	33
1940-1959	395	38.48%	152
1939 or Earlier	290	63.38%	184
Total	1,149	32.60%	375

Renter-Occupied Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	336	3.57%	12
1960-1977	279	11.18%	31
1940-1959	550	38.48%	212
1939 or Earlier	175	63.38%	111
Total	1,340	27.29%	366

Total Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	508	3.57%	18
1960-1977	572	11.18%	64
1940-1959	945	38.48%	364
1939 or Earlier	465	63.38%	295
Total	2,489	29.74%	740

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

**Housing Units in Jackson County with Lead-Based Paint Hazards by Tenure,
Occupied by Moderate-Income Families**

Owner-Occupied Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	219	3.57%	8
1960-1977	167	11.18%	19
1940-1959	265	38.48%	102
1939 or Earlier	115	63.38%	73
Total	765	26.31%	201

Renter-Occupied Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	317	3.57%	11
1960-1977	329	11.18%	37
1940-1959	355	38.48%	137
1939 or Earlier	40	63.38%	25
Total	1,040	20.19%	210

Total Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	535	3.57%	19
1960-1977	495	11.18%	55
1940-1959	620	38.48%	239
1939 or Earlier	155	63.38%	98
Total	1,805	22.78%	411

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

To conclude, we estimate that there are a total of 2,281 homes in Jackson County containing lead-based paint hazards, 1,429 owner-occupied and 852 renter-occupied. Of the 2,281 homes in the county estimated to have lead-based paint hazards, 740 are estimated to be occupied by households with low-incomes (incomes less than 50% of Area Median Income), and 411 are estimated to be occupied by households with moderate incomes (between 50% and 80% of Area Median Income), for a total of 1,152 housing units in Jackson County with lead-based paint hazards occupied by households with low or moderate incomes.

Lead-Based Paint Hazards in Homes with Children Present

Using the same methodology, we can estimate the number of housing units in Jackson County occupied by households with children under the age of six present. For this analysis we apply the lead-based paint hazards percentages from the American Healthy Homes Survey to the data in HUD CHAS Table 13, which details housing units by year of construction, household income, and presence of children under the age of six. The data is presented in the following table:

Housing Units in Jackson County with Lead-Based Paint Hazards with Children under Age 6 Present Occupied by Low or Moderate-Income Families			
Housing Units < 50% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	84	3.57%	3
1940-1977	451	19.98%	90
1939 or Earlier	73	63.38%	46
Total	608	22.93%	139
Housing Units 50%-80% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	94	3.57%	3
1940-1977	257	19.98%	51
1939 or Earlier	8	63.38%	5
Total	358	16.66%	60
Total LMI Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	177	3.57%	6
1940-1977	708	19.98%	141
1939 or Earlier	81	63.38%	51
Total	966	20.61%	199
Total Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	685	3.57%	24
1940-1977	1,140	19.98%	228
1939 or Earlier	185	63.38%	117
Total	2,010	18.38%	369

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 13

As shown, we estimate there are 369 housing units in Jackson County with lead-based paint hazards and children under the age of six present, and that 199 of those housing units are occupied by families with low to moderate incomes.

Exhibit #1

Map 2: High-Risk Target Areas (HRTA) Zip Codes for Childhood Lead Poisoning

Legend

- High-Risk Target Area (HRTA) Zip Codes
- Other Zip Codes

Notes

The OCLPPP has identified 21 HRTA zip codes in Oklahoma. These zip codes are located in Garfield, Hughes, Jackson, Kay, Muskogee, Oklahoma, Okmulgee, Ottawa, and Tulsa Counties.

The HRTA zip codes include 73106, 73107, 73108, 73109, 73111, 73117, 73119, 73129, 73521, 73701, 74104, 74106, 74110, 74115, 74127, 74354, 74401, 74403, 74447, 74631, and 74848.

The HRTA zip codes are identified using the following criteria:

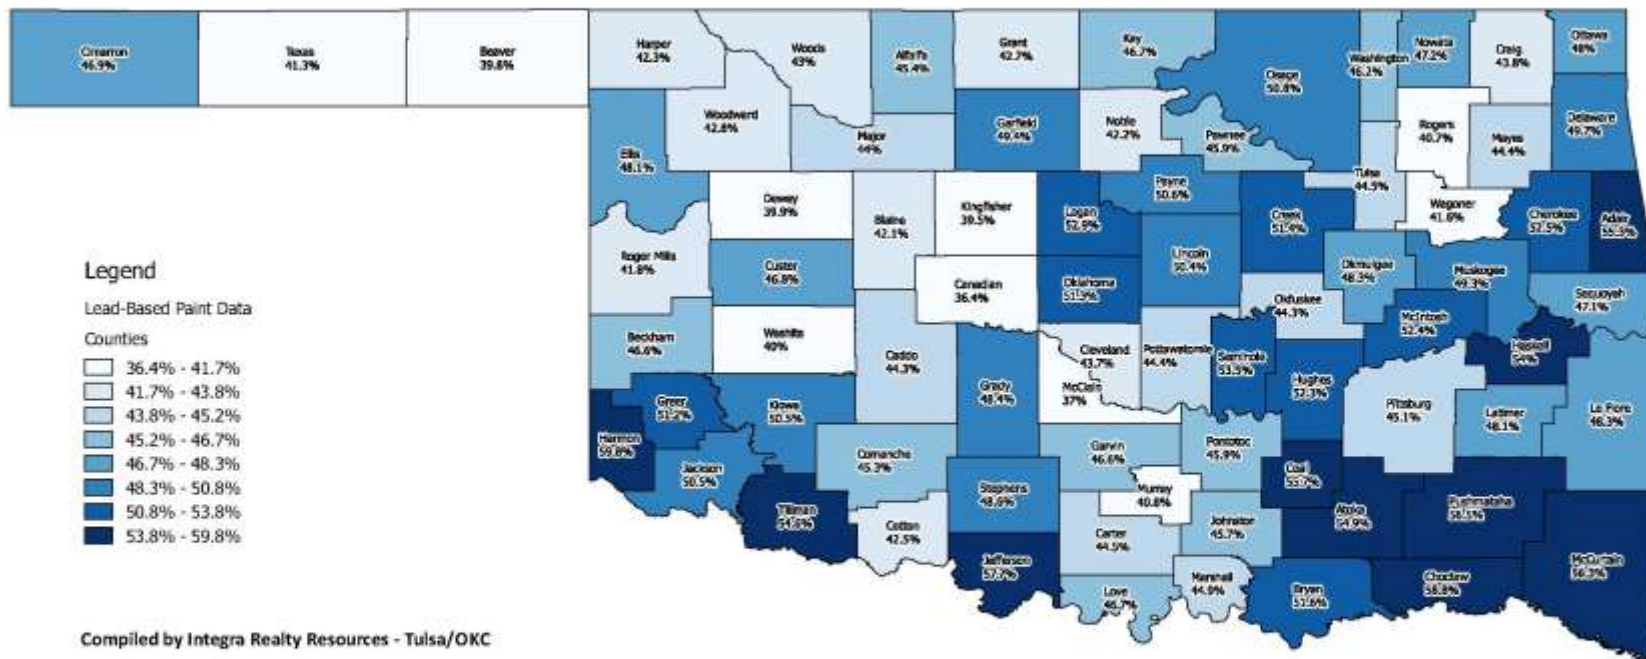

- 1- Zip codes having the highest proportion of pre-1950 housing;
- 2- Zip codes having the highest proportion of children under six years of age living in poverty;
- 3- Zip codes having high elevated blood lead level (EBLL) prevalence rate; and
- 4- Zip codes having the highest proportion of minority populations.

Conclusions

The previous analysis has attempted to describe the state of the residential housing market in Jackson County, Oklahoma. Where possible, information regarding the population centers of the county was included to assess need on a community level. Much of the information is based on demographic information from local authorities and national information services. However, personal interviews were performed with property owners and managers, real estate professionals, and community officials in an effort to substantiate information from the national organizations and understand current market conditions. Several important issues regarding housing have become apparent through this analysis and are identified below.

Jackson County experienced moderate population and household decline between 2000 and 2010. The rate of decline appears to have slowed between 2010 and 2015, however future growth is projected in the Altus area in the very near future. Nielsen SiteReports projects 0.07% annualized population growth in Altus over the next five years, and 0.26% annualized household growth. The forecast provided by Nielsen SiteReports does not consider recent economic developments in Altus, most notably the Air Force's decision to base training and maintenance for the new KC-46A Pegasus tanker at Altus Air Force Base. This project will add approximately 350 new jobs to the Altus area (both civilian and military). The Air Force will not add living quarters or any other form of housing units to the area, and consequently there will likely be even higher demand for housing in Altus.

New single-family housing for ownership has been constructed in the Altus area, primarily on the north side of town. The average price of a new home in Altus (constructed in 2012 or after) is \$255,944 or \$105.55 per square foot, which is well above what could be afforded by a household earning at or less than median household income for Jackson County, estimated to be \$44,518 in 2015. No significant new rental housing has been added to the area in many years.

Compared with the rest of the state, Jackson County has a relatively moderate rate of renters with high rent costs (33.50%) as well as homeowners with high ownership costs (17.20%). These are lower than the statewide figures; 40.01% and 19.12% respectively. The county's poverty rate is also slightly below the state, at 16.51% compared with 16.85% statewide.

In terms of disaster resiliency we note that 63 tornadoes have impacted the county between 1959 and 2014, with 77 injuries and four fatalities combined, and that the National Climatic Data Center notes 12 flood events in Jackson County between 1993 and 2003.

Jackson County is located within the Southwest Oklahoma Continuum of Care (CoC), which provides services to the area's homeless populations among other functions. Throughout the entire Southwest Oklahoma CoC, there are an estimated 239 homeless persons, 177 of which are estimated to be sheltered. This Continuum of Care has a disproportionately high number of homeless veterans, and at least 8 homeless households comprised only of children. Investment should be made for more temporary and permanent housing for homeless veterans in this region.

In terms of fair housing issues, 18 affordable housing units are located in areas at risk for poverty, and in primarily non-white enclaves. 30 units are located further than 15 miles from a hospital and those same 30 units are also considered to be in a food desert.

Due to the age of the county's housing stock, lead-based paint hazards are an issue, with an estimated 2,281 occupied housing units with such hazards, and 369 of those units occupied by low-to-moderate income households with children under the age of 6 present.

In summary, it is apparent that new housing in several categories is required in Jackson County. While the upper end of the market is being satisfied, the lower end of the population that requires rental and moderate cost ownership property has a more limited product available. As the population continues to grow in Jackson County (primarily in Altus), this demand will continue to increase. We estimate the county will need 57 housing units for ownership and 44 housing units for rent over the next five years, in order to accommodate projected population and household growth. This forecast is based solely on projected household growth in Altus, as forecasted by Nielsen SiteReports. The projected need does not consider the need that will be generated by new employment related to the KC-46A at Altus Air Force Base: in all likelihood there will be significant new housing need in the very near future, as approximately 350 new jobs are added to the area with no new housing provided by the Air Force. We also note that the City of Altus has been issuing approximately 30 new housing permits *per year* over the last several years. The 57 housing units for ownership and 44 units for rent should be considered a very base minimum necessary to accommodate moderate household growth, more will certainly be needed in order to accommodate new employment projected in the very near future. These units should include a mixture of both market rate rental units, affordable housing units, and housing for ownership affordable to a range of incomes.

David A. Puckett

Experience

Senior Director with Integra Realty Resources - Oklahoma, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since May 2002, Mr. Puckett has performed appraisal services consisting of narrative and summary real estate appraisals. All types of real property are encompassed-apartments, garden office buildings, manufacturing and warehouse industrial buildings, mobile home parks, restaurants and retail structures. Valuations and market studies have been prepared on proposed and existing structures. Appraisals have been made for estates, mortgage financing, equity participation and due diligence support. Prior to his employ at Integra Realty Resources - Oklahoma, Mr. Puckett was an employee of the University of Oklahoma Center for Business and Economic Development, working as a data analyst for the All County Affordable Housing Study commissioned by the Oklahoma Department of Commerce. Responsibilities included demographic, economic and real estate data collection from federal, state and local sources, as well as interviews of regional planning district, county and municipal officials, real estate market experts and local economic development experts. Mr. Puckett was responsible for site visits of 23 of the 77 Oklahoma counties, and personally authored 18 of the final reports. As an employee of IRR-Oklahoma, Mr. Puckett also performed the site visits and authored the final reports for four of the nine entitlement cities: Tulsa, Broken Arrow, Shawnee and Lawton. Mr. Puckett has also completed numerous housing market studies for use in applications for Federal Low-Income Housing Tax Credits in Oklahoma, Kansas, Missouri and Arkansas, and has performed market studies and appraisals for use in H.U.D.'s Multifamily Accelerated Processing (M.A.P.) program. Clients served include corporations, financial institutions, investment firms and public/private agencies.

Integra Realty Resources, Inc.

Corporate Profile

Integra Realty Resources, Inc. offers the most comprehensive property valuation and counseling coverage in North America with over 60 independently owned and operated offices located throughout the United States and the Caribbean. Integra was created for the purpose of combining the intimate knowledge of well-established local firms with the powerful resources and capabilities of a national company. Integra offers integrated technology, national data and information systems, as well as standardized valuation models and report formats for ease of client review and analysis. Integra's local offices have an average of 25 years of service in the local market, and virtually all are headed by a Senior Managing Director who is an MAI member of the Appraisal Institute.

Award for Service as the University Liaison to the Florida Chapter of the American Planning Association, Fall, 2010.

Teacher of the year award by the UF Student Planning Association, April, 2010.

Best paper in the real estate valuation category by the Appraisal Institute with Kimberly Geideman and Shan Gao, Fall, 2009.

Excellence in Teach Award by the College of Architecture of Texas A & M University, September, 2005.

Student Planning Award by the Texas Chapter of the American Planning Association, Fall, 2007.

Early Dissertation Research Grant to Study the Effects of Intergenerational Planning on Relocation Grief from the U.S. Department of Housing and Urban Development, November, 2003.

COURSES TAUGHT:

Principles and Practice of Urban Planning (graduate level, at the University of Oklahoma)

Land Use Controls (graduate level, at the University of Oklahoma)

Sociology of Housing (graduate level, at the University of Oklahoma with Dean Charles Graham)

Growth Management Powers II (graduate-law course, at the University of Florida)

Growth Management Powers I (graduate-law course, at the University of Florida)

Affordable Housing Law (graduate-law course, at the University of Florida)

Planning History and Theory (graduate level, at the University of Florida and Texas A&M University)

Land Use Planning Law (law school, at the University of Florida College of Law)

Land Development Law (graduate level, at Texas A&M University)
Historic Preservation Law (graduate level, at Texas A&M University)
Introduction to Urban Planning (undergraduate level, at Texas A&M University and Florida State University)
Attorney-Client Communications (undergraduate level, at Florida State University)
Legal Communications (undergraduate level, at Florida State University)
Environmental Law (continuing education, at Rutgers University)
Historic Preservation Law (continuing education, at Rutgers University)
Ordinance Drafting (continuing education, at Rutgers University)

INVITED LECTURES

University of Oklahoma
Department of Geography & Sustainability, Spring Colloquium
"Walking & Biking: Active Transportation and the Built Environment" January 2014

Kansas State University – Big 12 Fellowship

- The messiness of random sampling spatially Oct. 21, 2013
- Watershed Functions & Impacts from Development Oct. 21, 2013
- Creating an audit tool and operationalizing data Oct. 23, 2013
- Bicycle Facility Design & Planning Oct. 23, 2013
- Observational Methods Oct. 23, 2013
- Pedestrian Planning and Design: How does the environment we live in impact our lives? Oct. 2013
- Office workers – Sedentary by Practice: How can we integrate physical activity as part of daily routines at work – Formal presentation to faculty and students Oct. 2013

Department of Biostatistics and Epidemiology College of Public Health,
University of Oklahoma Health Sciences Center

- Planning, Built Environment, and Public Health: How does the environment we live in impact our lives? March 11, 2013

GRANT FUNDING

Received Ed Cline Faculty Development Award (\$1450), Spring 2014
Received Big 12 Faculty Fellowship Program Award (\$2500) June 2013
Received College of Architecture IT recipient (\$3450) July 2013
Sooner Parents Mini-Grant Funding (\$500) for student mentoring –prepared and submitted to assist RCPL Student Planning Association July 2013
Received Junior Faculty Research (\$7,000) for summer research on rural planning and physical activity opportunities. University of Oklahoma, Summer 2012
Robert Wood Johnson Active Living Research Dissertation Grant (\$25,000), Texas A&M University, 2007

SERVICE

University-Level Service

- Advisory Committee Course Management Systems (ACCMS) Spring 2013

College-Level Service

- Graduate Liaison for Regional & City Planning Division (Fall 2013 – present)
- Graduate Research & Curriculum Committee (Fall 2013 – present)
- RCPL orientation (Fall 2010- present)
- Search committee for new RCPL hires, new LA hire (Summer 2011, Summer 2012, Spring 2013, Spring 2014)
- IT Committee (member since 2012), Chair (Fall 2013-Spring 2014)
- Model Shop Committee (member since 2012-Fall 2013)
- RCPL website (2011- present)
- GHGI committee (Gould Hall Green Initiative) (Fall 2011)
- Co-hosting and arranging guest seminar: Dr. Chanam Lee – "The Built Environment and Disparities in Physical Activity", December 2012.

SERVICE

State-level / City-Level Service

- President – Health Equity Caucus, subgroup of Oklahoma Public Health Association
- APA/AICP member
- Bicycle Advisory Committee, City of Norman – Committee member (Spring 2013 – 2016)

National-Level Service

- Secretary/Treasurer of Faculty Women’s Interest Group (FWIG), committee under Association of Collegiate Schools of Planning (ACSP).
- CDC Weight of the Nation Conference planning, Built Environment & Transportation Subcommittee
- Reviewer for Journal of Physical Activity and Health

Bryce C. Lowery, PhD

BACKGROUND SUMMARY

Executive Manager with extensive experience in public sector resource design, management and evaluation. Knowledge and skills include: structuring and design of state and local service programs and initiatives, developing written proposals for project financing, identifying community economic development resources and training.

EXPERIENCE

DeBruler, Inc.

Vice President, Oklahoma City, August 2001 to Present

Provide services including:

- ✓ Researching public and private resources and preparing applications for financial assistance in response to client requests for economic and community development projects.
- ✓ Technical assistance to nonprofits and units of local government regarding federal and state resources and structuring project-beneficial partnerships; preparing strategic and business plans for public and private sector entities.
- ✓ Group facilitation services.
- ✓ Technical training for nonprofits and units of local government regarding federal and state financial assistance programs. Conducting organizational assessments and developing capacity building curriculums.

Oklahoma Housing Finance Agency

Team Leader, Housing Development Team, Oklahoma City, July 1998 to July 2001

Provided direct supervision and oversight of sixteen staff engaged in the administration of multiple federal and state affordable housing program resources.

While employed by the agency:

- ✓ Reorganized state's Single Family Mortgage Revenue Bond, Low-income Housing Tax Credit, HOME Investment Partnerships and Housing Trust Fund Programs into a single work unit.
- ✓ Streamlined Low-income Housing Tax Credit Program administrative rules to provide for market responsive design flexibility.
- ✓ Streamlined affordable housing resources by developing a singular application package and process for the agency's affordable housing development resources and established e-information network.
- ✓ Facilitated the development of working partnerships between the state's nonprofit and for-profit housing development organizations and agency's mortgage revenue bond lenders.
- ✓ Financed the development of affordable housing by leveraging public sector development funds with private investments.

- ✓ Facilitated legislative task force on rural affordable housing issues and devised legislative and programmatic actions to spur rural development.
- ✓ Developed, financed and implemented the state's first statewide affordable housing market analysis in partnership with a major university center.
- ✓ Drafted enabling legislation, capitalized and implemented state's Housing Trust Fund.

Oklahoma Department of Commerce

Program Manager/Department Head, Oklahoma City, March 1988 to July 1998

- ✓ In response to market-based demand, directed a team of professional agency staff with diverse skills, in the redesign of the state's HOME Investment Partnerships Program from primarily rehabilitation services to the production of rural affordable housing units.
- ✓ Led HOME Program administrative team in the relocation of the Program from its state agency environment to the Oklahoma Housing Finance Agency, a public trust.
- ✓ Leveraged HOME Program development resources with other public and private debt capital to finance the development of rural affordable housing statewide.
- ✓ Formulated and implemented a legislative agenda to enact and capitalizing the state's Housing Trust Fund.
- ✓ Provided daily oversight and administration for several state administered federal programs including: U.S. Department of Energy State Energy Program, Community Development Block Grant, Home Investment Partnerships, Rental Rehabilitation, Solar Energy and Energy Conservation Bank, and State Appropriated Funds for regional councils of government.

City of Oklahoma City January 1984 to February 1988

Division Head, Code Inspections Division/Department of Environmental Services

Assistant Superintendent, Utility Services Division/Water Department

Administrative Assistant, Street Maintenance Division, Public Works Department

Management Intern, Personnel Department

EDUCATION

Masters of Public Administration, University of Oklahoma 1983

Bachelor of Arts Political Science, University of Oklahoma, 1979
