

Housing Needs Assessment
Le Flore County

Prepared For:

Oklahoma Housing Finance Agency
Oklahoma Department of Commerce
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

Effective Date of the Analysis:

July 15, 2015

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

January 21, 2016

Mr. Dennis Shockley, Executive Director
Oklahoma Housing Finance Agency
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

SUBJECT: Housing Needs Assessment
 Le Flore County
 IRR - Tulsa/OKC File No. 140-2015-0053

Dear Mr. Shockley:

As per our Agreement with Oklahoma Housing Finance Agency (OHFA), we have completed a residential housing market analysis (the "Analysis") for use by OHFA and the Oklahoma Department of Commerce (ODOC). Per our Agreement, OHFA and ODOC shall have unrestricted authority to publish, disclose, distribute and otherwise use, in whole or in part, the study and reports, data or other materials included in the Analysis or otherwise prepared pursuant to the Agreement and no materials produced in whole, or in part, under the Agreement shall be subject to copyright in the United States or any other country. Integra Realty Resources – Tulsa/OKC will cause the Analysis (or any part thereof) and any other publications or materials produced as a result of the Agreement to include substantially the following statement on the first page of said document:

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Attached hereto, please find the Le Flore County Residential Housing Market Analysis. Analyst Lora Gwartney personally inspected the Le Flore County area during the month of July 2015 to collect the data used in the preparation of the Le Flore County Market Analysis. The University of Oklahoma College of Architecture Division of Regional and City Planning provided consultation, assemblage and analysis of the data for IRR-Tulsa/OKC.

Mr. Dennis Shockley
Oklahoma Housing Finance Agency

Introduction and Executive Summary

This report is part of a Statewide Affordable Housing Market Study commissioned by the Oklahoma Department of Commerce (ODOC) in partnership with the Oklahoma Housing Finance Agency (OHFA), as an outgrowth of the 2013 tornado outbreak in Oklahoma. It was funded by the U.S. Department of Housing and Urban Development (USHUD) through the Community Development Block Grant – Disaster Recovery program (CDBG-DR). This study was conducted by a public/private partnership between Integra Realty Resources – Tulsa/OKC, the University of Oklahoma College of Architecture, Division of Regional and City Planning, and DeBruler Inc. IRR-Tulsa/OKC, The University of Oklahoma, and DeBruler Inc. also prepared a prior statewide study in 2001, also commissioned by ODOC in partnership with OHFA.

This study is a value-added product derived from the original 2001 statewide housing study that incorporates additional topics and datasets not included in the 2001 study, which impact affordable housing throughout the state. These topic areas include:

- Disaster Resiliency
- Homelessness
- Assessment of Fair Housing
- Evaluation of Residential Lead-Based Paint Hazards

These topics are interrelated in terms of affordable housing policy, housing development, and disaster resiliency and recovery. Homeless populations are more vulnerable in the event of a disaster, as are many of the protected classes under the Fair Housing Act. Lead-based paint is typically more likely to be present in housing units occupied by low-to-moderate income persons, and can also present an environmental hazard in the wake of a disaster. Effective affordable housing policy can mitigate the impact of natural and manmade disasters by encouraging the development and preservation of safe, secure, and disaster-resilient housing for Oklahoma’s most vulnerable populations.

Housing Market Analysis Specific Findings:

1. The population of Le Flore County is projected to be effectively stable between 2016 and 2020, though slight growth in households is projected over the same period of time.
2. Le Flore County is projected to need a total of 20 housing units for ownership and 7 housing units for rent over the next five years. This estimate is based solely on projected household growth; additional housing need exists among cost overburdened households throughout the county.
3. Median Household Income in Le Flore County is estimated to be \$35,804 in 2015, compared with \$47,049 estimated for the State of Oklahoma. The poverty rate in Le Flore County is estimated to be 22.26%, compared with 16.85% for Oklahoma.
4. Vacancy among housing units for ownership is slightly lower than the rest of the state, while vacancy among housing units for rent is slightly higher.
5. Home values and rental rates in Le Flore County are significantly lower than the state averages.

6. Average sale price of homes in Poteau was \$78,179 in 2015, with an average price per square foot of \$53.15. Average year of construction of homes sold in 2015 is estimated to be 1970.
7. Approximately 37.39% of renters and 20.38% of owners are housing cost overburdened.

Disaster Resiliency Specific Findings:

1. Tornadoes (1959-2014): Number: 59 Injuries: 147 Fatalities: 20 Damages (1996-2014): \$3,670,000.00
2. Social Vulnerability: Above the state score; at the census tract level, the southern portion of the county has a particularly higher scores
3. Floodplain: Spiro, Shady Point, Panama, and Poteau have notable development within or near the floodplain.

Homelessness Specific Findings

1. Le Flore County is located in the Southeastern Oklahoma Continuum of Care.
2. There are an estimated 442 homeless individuals in this area, 225 of which are identified as sheltered.
3. There is a high rate of homelessness in this region, most of which seek shelter in small towns and rural areas.
4. Many of the homeless in this CoC are classified as chronically homeless (73).
5. Other significant homeless subpopulations include the mentally ill (49) and chronic substance abusers (50).

Fair Housing Specific Findings

1. Units at risk for poverty: 204
2. Units nearer elevated number of disabled persons: 573
3. Units further than 15 miles from a hospital: 166

Lead-Based Paint Specific Findings

1. We estimate there are 2,860 occupied housing units in Le Flore County with lead-based paint hazards.
2. 1,382 of those housing units are estimated to be occupied by low-to-moderate income households.
3. We estimate that 475 of those low-to-moderate income households have children under the age of 6 present.

Report Format and Organization

The first section of this report comprises the housing market analysis for Le Flore County. This section is divided into general area information, followed by population, household and income trends and analysis, then followed by area economic conditions. The next area of analysis concerns the housing stock of Le Flore County, including vacancy rates, construction activity and trends, and analyses of the homeowner and rental markets. This section is followed by five-year forecasts of housing need for owners and renters, as well as specific populations such as low-to-moderate income households, the elderly, and working families.

The next section of this report addresses special topics of concern:

- Disaster Resiliency
- Homelessness
- Fair Housing
- Lead-Based Paint Hazards

This last section is followed by a summary of the conclusions of this report for Le Flore County.

General Information

Purpose and Function of the Market Study

The purpose of this market study is to evaluate the need for affordable housing units in Le Flore County, Oklahoma. The analysis will consider existing supply and projected demand and overall market trends in the Le Flore County area.

Effective Date of Consultation

The Le Flore County area was inspected and research was performed during July, 2015. The effective date of this analysis is July 15, 2015. The date of this report is January 21, 2016. The market study is valid only as of the stated effective date or dates.

Scope of the Assignment

1. The Le Flore County area was inspected during July, 2015. The inspection included visits to all significant population centers in the county and portions of the rural county areas.
2. Regional, city and neighborhood data is based on information retained from national, state, and local government entities; various Chambers of Commerce, news publications, and other sources of economic indicators.
3. Specific economic data was collected from all available public agencies. Population and household information was collected from national demographic data services as well as available local governments. Much data was gathered regarding market specific items from personal interviews.
4. Development of the applicable analysis involved the collection and interpretation of verified data from local property owners/managers, realtors, and other individuals active within the area real estate market.
5. The analyst's assemblage and analysis of the defined data provided a basis from which conclusions as to the supply of and demand for residential housing were made.

Data Sources

Specific data sources used in this analysis include but are not limited to:

1. The 2000 and 2010 Decennial Censuses of Population and Housing
2. The 2009-2013 American Community Survey (ACS)
3. U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division
4. The United States Department of Labor, Bureau of Labor Statistics, including the Local Area Unemployment Statistics and the Quarterly Census of Employment and Wages programs
5. The U.S. Department of Housing and Urban Development, including the Comprehensive Housing Affordability Strategy (CHAS), and the 2013 Picture of Subsidized Households
6. Continuum of Care Assistance Programs

7. The National Oceanic and Atmospheric Administration
8. Nielsen SiteReports (formerly known as Claritas)
9. The Oklahoma State Department of Health
10. The Oklahoma Department of Human Services
11. The Federal Reserve Bank of Kansas City, Oklahoma City Branch
12. The Federal Reserve Bank of New York

Le Flore County Analysis

Area Information

The purpose of this section of the report is to provide a basis for analyzing and estimating trends relating to Le Flore County. The primary emphasis is concentrated on those factors that are of significance to residential development users. Residential and commercial development in the community is influenced by the following factors:

1. Population and economic growth trends.
2. Existing commercial supply and activity.
3. Natural physical elements.
4. Political policy and attitudes toward community development.

Location

Le Flore County is located in eastern Oklahoma. The county is bordered on the north by Haskell and Sequoyah counties, on the west by Pushmataha, Latimer, and Haskell counties, on the south by McCurtain County, and on the east by Arkansas. The Le Flore County Seat is Poteau, which is located in the northcentral part of the county. This location is approximately 127 miles southeast of Tulsa and 192 miles southeast of Oklahoma City.

Le Flore County has a total area of 1,609 square miles (1,589 square miles of land, and 19 square miles of water), ranking 6th out of Oklahoma's 77 counties in terms of total area. The total population of Le Flore County as of the 2010 Census was 50,384 persons, for a population density of 32 persons per square mile of land.

Access and Linkages

The county has average accessibility to state and national highway systems. Multiple major highways intersect within Le Flore County. These are US-59, US-271, US-270, US-259, OK-1, OK-144, OK-63, OK-128, OK-83, OK-31, OK-9, and OK-112. The nearest interstate highway is I-40, approximately 20 miles north of Poteau. The county also has an intricate network of county roadways.

Public transportation is provided by Ki Bois Area Transit System (KATS) which operates both flexible and fixed routes as well as demand-response service. The local market perceives public transportation as average compared to other communities in the region of similar size. However, the primary mode of transportation in this area is private automobiles by far.

Robert S. Kerr Airport is located just south of Poteau. Its primary asphalt runway is 4,007 feet in length and averages 22 aircraft operations per day. The nearest full-service commercial airport is the Fort Smith Regional Airport approximately 32.2 miles northeast.

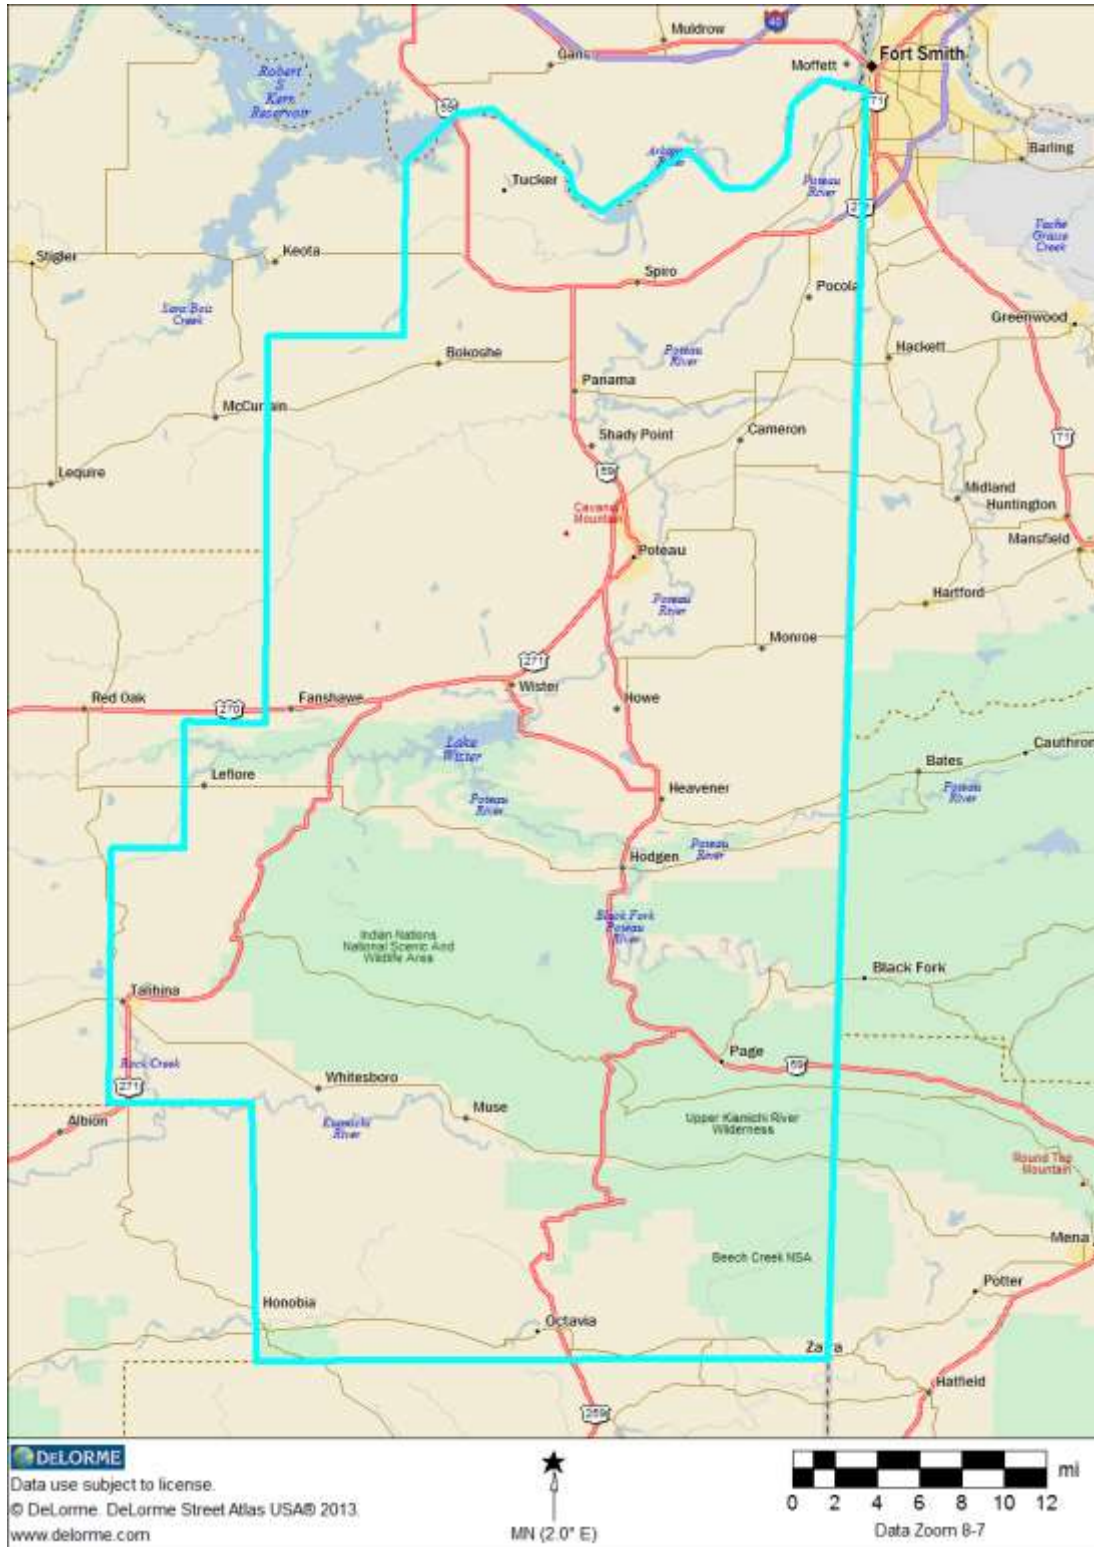

Educational Facilities

All of the county communities have public school facilities. Poteau is served by Poteau Public Schools. Poteau Public Schools is comprised of two elementary schools, one middle school, and one high school. Poteau is home to Carl Albert State College, which offers a variety of two-year degree programs. Poteau is also home to Kiamichi Technology Center-Poteau. Other higher education opportunities near LeFlore County include Eastern Oklahoma State College in Wilburton, Connors State College in Warner, and the University of Arkansas – Fort Smith campus.

Medical Facilities

Medical services are provided by the Eastern Oklahoma Medical Center, an 84-bed acute-care hospital, providing emergency care, in and outpatient services, and a number of additional medical procedures. Additionally, the Choctaw Nation Health Care Center is located in Talihina. The smaller county communities typically have either small outpatient medical services or doctor's officing in the community.

Demographic Analysis

Population and Households

The following table presents population levels and annualized changes in Le Flore County and Oklahoma. This data is presented as of the 2000 Census, the 2010 Census, with 2015 and 2020 estimates and forecasts provided by Nielsen SiteReports.

Population Levels and Annual Changes							
	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change	2020 Forecast	Annual Change
Poteau	7,939	8,520	0.71%	8,337	-0.43%	8,418	0.19%
Le Flore County	48,109	50,384	0.46%	49,505	-0.35%	49,472	-0.01%
State of Oklahoma	3,450,654	3,751,351	0.84%	3,898,675	0.77%	4,059,399	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

The population of Le Flore County was 50,384 persons as of the 2010 Census, a 0.46% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Le Flore County to be 49,505 persons, and projects that the population will show -0.01% annualized decline over the next five years.

The population of Poteau was 8,520 persons as of the 2010 Census, a 0.71% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Poteau to be 8,337 persons, and projects that the population will show 0.19% annualized growth over the next five years. The Nielsen SiteReports estimates and forecasts for Poteau appear low: the most recent Census Bureau estimates for Poteau show the population to be effectively stable.

The next table presents data regarding household levels in Le Flore County over the same periods of time. This data is presented both for all households (family and non-family) as well as family households alone.

Households Levels and Annual Changes							
Total Households	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change	2020 Forecast	Annual Change
Poteau	3,013	3,178	0.53%	3,152	-0.16%	3,193	0.26%
Le Flore County	17,861	18,878	0.56%	18,601	-0.30%	18,628	0.03%
State of Oklahoma	1,342,293	1,460,450	0.85%	1,520,327	0.81%	1,585,130	0.84%
Family Households	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change	2020 Forecast	Annual Change
Poteau	2,042	2,133	0.44%	2,109	-0.23%	2,131	0.21%
Le Flore County	13,201	13,455	0.19%	13,262	-0.29%	13,276	0.02%
State of Oklahoma	921,750	975,267	0.57%	1,016,508	0.83%	1,060,736	0.86%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

As of 2010, Le Flore County had a total of 18,878 households, representing a 0.56% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Le Flore County to have

18,601 households. This number is expected to experience a 0.03% annualized rate of growth over the next five years.

As of 2010, Poteau had a total of 3,178 households, representing a 0.53% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Poteau to have 3,152 households. This number is expected to experience a 0.26% annualized rate of growth over the next five years.

Population by Race and Ethnicity

The next table presents data regarding the racial and ethnic composition of Le Flore County based on the U.S. Census Bureau's American Community Survey.

2013 Population by Race and Ethnicity

Single-Classification Race	Poteau		Le Flore County

Source: Nielsen SiteReports

As of 2015, Nielsen estimates that the median age of Poteau is 35.6 years. This compares with the statewide figure of 36.6 years. Approximately 6.79% of the population is below the age of 5, while 17.45% is over the age of 62. Over the next five years, the population age 62 and above is forecasted to grow by 1.69% per year. Compared with Le Flore County as a whole, Poteau's population is relatively younger.

Families by Presence of Children

The next table presents data for Le Flore County regarding families by the presence of children.

2013 Family Type by Presence of Children Under 18 Years

	Poteau		Le Flore County	
	No.	Percent	No.	Percent
Total Families:	2,057		12,664

With Two or More Disabilities	345	27.42%	2,264	30.25%	117,044	23.27%
No Disabilities	631	50.16%	3,660	48.90%	290,398	57.72%
Total Number of Persons with Disabilities:	1,415	17.03%	10,049	20.56%	577,160	15.59%

Source: U.S. Census Bureau, 2009-2013 American Community Survey, Table C18108

Within Le Flore County, 20.56% of the civilian non-institutionalized population has one or more disabilities, compared with 15.59% of Oklahomans as a whole. In Poteau the percentage is 17.03%.

We have also compiled data for the veteran population of Le Flore County by presence of disabilities, shown in the following table:

2013 Population by Veteran and Disability Status

	Poteau		Le Flore County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Civilian Population Age 18+ For Whom Poverty Status is Determined	6,147		36,450		2,738,788	
Veteran:	683	11.11%	3,717	10.20%	305,899	11.17%
With a Disability	324	47.44%	1,613	43.40%	100,518	32.86%
No Disability	359	52.56%	2,104	56.60%	205,381	67.14%
Non-veteran:	5,464	88.89%	32,733	89.80%	2,432,889	88.83%
With a Disability	970	17.75%	7,810	23.86%	430,610	17.70%
No Disability	4,494	82.25%	24,923	76.14%	2,002,279	82.30%

Source: 2009-2013 American Community Survey, Table C21007

Within Le Flore County, the Census Bureau estimates there are 3,717 veterans, 43.40% of which have one or more disabilities (compared with 32.86% at a statewide level). In Poteau, there are an estimated 683 veterans, 47.44% of which are estimated to have a disability.

Group Quarters Population

The next table presents data regarding the population of Le Flore County living in group quarters, such as correctional facilities, skilled-nursing facilities, student housing and military quarters.

2010 Group Quarters Population

	Poteau		Le Flore County	
	No.	Percent	No.	Percent
Total Population	8,520		50,384	
Group Quarters Population	496	5.82%	1,616	3.21%
Institutionalized Population	232	2.72%	1,256	2.49%
Correctional facilities for adults	130	1.53%	873	1.73%
Juvenile facilities	4	0.05%	10	0.02%
Nursing facilities/Skilled-nursing facilities	98	1.15%	373	0.74%
Other institutional facilities	0	0.00%	0	0.00%
Noninstitutionalized population	264	3.10%	360	0.71%
College/University student housing	255	2.99%	255	0.51%
Military quarters	0	0.00%	0	0.00%
Other noninstitutional facilities	9	0.11%	105	0.21%

Source: 2010 Decennial Census, Table P42

The percentage of the Le Flore County population in group quarters is somewhat higher than the statewide figure, which was 2.99% in 2010. This is partly attributable to persons in student housing.

Household Income Levels

Data in the following chart shows the distribution of household income in Le Flore County, as well as median and average household income. Data for Oklahoma is included as a basis of comparison. This data is provided by Nielsen SiteReports for 2015.

2015 Household Income Distribution						
	Poteau		Le Flore County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Households by HH Income	3,152		18,601		1,520,327

\$35,000 - \$49,999	638	20.24%	3,050	16.40%	229,628	15.10%
\$50,000 - \$74,999	616	19.54%	3,225	17.34%	280,845	18.47%
\$75,000 - \$99,999	235	7.46%	1,501	8.07%	173,963	11.44%
\$100,000 - \$124,999	160	5.08%	900	4.84%	106,912	7.03%
\$125,000 - \$149,999	65	2.06%	343	1.84%	57,804	3.80%
\$150,000 - \$199,999	67	2.13%	325	1.75%	48,856	3.21%
\$200,000 - \$249,999	22	0.70%	67	0.36%	18,661	1.23%
\$250,000 - \$499,999	21	0.67%	48	0.26%	20,487	1.35%
\$500,000+	1	0.03%	5	0.03%	7,454	0.49%
Median Household Income	\$40,854		\$35,804		\$47,049	
Average Household Income	\$51,298		\$46,274		\$63,390	

Source: Nielsen SiteReports

As shown, median household income for Le Flore County is estimated to be \$35,804 in 2015. By way of comparison, the median household income of Oklahoma is estimated to be \$47,049. For Poteau, median household income is estimated to be \$40,854. Compared with the rest of the state, Poteau and Le Flore County have relatively lower income levels, with higher percentages of persons in the lowest income brackets. The income distribution can be better visualized by the following chart.

Household Income Trend

Next we examine the long-term growth of incomes in Le Flore County, from the results of the 2000 Census (representing calendar year 1999), through the current 2015 estimates provided by Nielsen SiteReports. This data is then annualized into a compounded annual growth rate to estimate nominal annual household income growth over this period of time. We then compare the rate of annual growth with the rate of inflation over the same period of time (measured using the Consumer Price Index for all urban consumers, South Region, Size Class D, from May 1999 through May 2015). Subtracting the annual rate of inflation from the nominal rate of annual income growth yields a “real” rate of income growth which takes into account the effect of increasing prices of goods and services.

	1999 Median HH Income	2015 Median HH Income	Nominal Growth	Inflation Rate	Real Growth
Poteau	\$26,178	\$40,854	2.82%	2.40%	0.42%
Le Flore County	\$27,278	\$35,804	1.71%	2.40%	-0.69%
State of Oklahoma	\$33,400	\$47,049	2.16%	2.40%	-0.23%

Sources: 2000 Decennial Census, Summary File 3, Table P53; Nielsen SiteReports; CPI All Urban Consumers, South Region, Size Class D

As shown, both Le Flore County and the State of Oklahoma as a whole saw negative growth in “real” median household income, once inflation is taken into account (though Poteau saw positive income growth after adjusting for inflation). It should be noted that this trend is not unique to Oklahoma or Le

Flore County, but rather a national trend. Over the same period, the national median household income increased from \$41,994 to \$53,706 (for a nominal annualized growth rate of 1.55%) while the Consumer Price Index increased at an annualized rate of 2.26%, for a “real” growth rate of -0.72%. It is notable that Poteau’s household income trend was contrary to Le Flore County, Oklahoma, and the nation as a whole, and saw positive annualized growth.

Poverty Rates

Overall rates of poverty in Le Flore County and Oklahoma are shown in the following table. This data is included from the 2013 American Community Survey, as well as the 2000 Census to show how these rates have changed over the last decade. We also include poverty rates for single-parent families by gender of householder.

	2000	2013	Change (Basis Points)	2013 Poverty Rates for Single-Parent Families	
	Census	ACS		Male Householder	Female Householder
Poteau	22.11%	19.03%	-308	0.00%	48.24%
Le Flore County	19.07%	22.24%	317	19.73%	58.72%
State of Oklahoma	14.72%	16.85%	213	22.26%	47.60%

Sources: 2000 Decennial Census Table P87, 2009-2013 American Community Survey Tables B17001 & B17023

The poverty rate in Le Flore County is estimated to be 22.24% by the American Community Survey. This is an increase of 317 basis points since the 2000 Census. Within Poteau, the poverty rate is estimated to be 19.03%, which showed a decline since the 2000 Census (though its poverty rate is still well above statewide figures). It should be noted that increasing poverty rates over this period of time is a national trend: between the 2000 Census and the 2013 American Community Survey, the poverty rate of the United States increased from 12.38% to 15.37%, an increase of 299 basis points.

Economic Conditions

Employment and Unemployment

The following table presents total employment figures and unemployment rates for Le Flore County, with figures for Oklahoma and the United States for comparison. This data is as of May 2015.

Employment and Unemployment						
	May-2010 Employment	May-2015 Employment	Annual Growth	May-2010 Unemp. Rate	May-2015 Unemp. Rate	Change (bp)
Le Flore County	18,865	18,627	-0.25%	9.5%	7.0%	-250
State of Oklahoma	1,650,748	1,776,187	1.48%	6.8%	4.4%	-240
United States (thsds)	139,497	149,349	1.37%	9.3%	5.3%	-400

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As of May 2015, total employment in Le Flore County was 18,627 persons. Compared with figures from May 2010, this represents annualized employment decline of -0.25% per year. The unemployment rate in May was 7.0%, a decrease of -250 basis points from May 2010, which was 9.5%. Over the last five years, both the statewide and national trends have been improving employment levels and declining unemployment rates, and Le Flore County has underperformed both the state and nation in these statistics.

Employment Level Trends

The following chart shows total employment and unemployment levels in Le Flore County from January 2000 through May 2015, as reported by the Bureau of Labor Statistics, Local Area Unemployment Statistics program.

Employment and Unemployment in Le Flore County
January 2000 through May 2015

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics

As shown, total employment levels have been generally flat for the last fifteen years. Total employment was level from 2000 through 2008, and shows some decline after the beginning of the national economic downturn in late 2008. There has been some slightly employment growth starting in 2013, growing to its current level of 18,627 persons employed in May 2015. The number of unemployed persons in May 2015 was 1,399, out of a total labor force of 20,026 persons.

Unemployment Rate Trends

The next chart shows historic unemployment rates for Le Flore County, as well as Oklahoma and the United States for comparison. This data covers the time period of January 2000 through May 2015, and has not been seasonally adjusted.

**Unemployment Rates in Le Flore County, Oklahoma and the United States
January 2000 through May 2015**

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As shown, unemployment rates in Le Flore County increased moderately from 2000 through 2003, and then generally declined until the 4th quarter of 2008 as the effects of the national economic recession were felt. Unemployment rates began to decline again in 2010, to their current level of 7.0%. On the whole, unemployment rates in Le Flore County track very well with statewide figures but are typically above the state. Compared with the United States, unemployment rates in Le Flore County have generally tracked with the national unemployment rate, excepting a temporary spike in unemployment in 2012-2013; this increase may have been related to layoffs at the Bremner Food Group in Poteau which affected 130 in 2011-2012.

Employment and Wages by Industrial Supersector

The next table presents data regarding employment in Le Flore County by industry, including total number of establishments, average number of employees in 2014, average annual pay, and location quotients for each industry compared with the United States. This data is furnished by the Bureau of Labor Statistics, Quarterly Census of Employment and Wages program.

Employees and Wages by Supersector - 2014

Supersector	Establishments	Avg. No. of Employees	Percent of Total	Avg. Annual Pay	Location Quotient
Federal Government	26	167	1.23%	\$52,269	0.62
State Government	16	579	4.27%	\$36,223	1.28
Local Government	76	3,889	28.71%	\$37,699	2.85

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Employment Sectors - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Among private employers, the largest percentage of persons (14.70%) are employed in Trade, Transportation, and Utilities. The average annual pay in this sector is \$28,532 per year. The industry

with the highest annual pay is Natural Resources and Mining, with average annual pay of \$64,319 per year.

The rightmost column of the previous table provides location quotients for each industry for Le Flore County, as compared with the United States. Location quotients (LQs) are ratios used to compare the concentration of employment in a given industry to a larger reference, in this case the United States. They are calculated by dividing the percentage of employment in a given industry in a given geography (Le Flore County in this instance), by the percentage of employment in the same industry in the United States. For example, if manufacturing in a certain county comprised 10% of total employment, while in the United States manufacturing comprised 5% of total employment, the location quotient would be 2.0:

$$10\% (\text{county manufacturing \%}) / 5\% (\text{U.S. manufacturing \%}) = 2.0$$

Location quotients greater than 1.0 indicate a higher concentration of employment compared with the nation, and suggest that the industry in question is an important contributor to the local economic base. Quotients less than 1.0 indicate that the industry makes up a smaller share of the local economy than the rest of the nation.

Within Le Flore County, among all industries the largest location quotient is in Natural Resources and Mining, with a quotient of 7.11. This sector includes agricultural employment as well as employment in the oil and gas industry. The next highest location quotient is in local government (2.85); this sector includes tribal government employment (the Choctaw Nation).

The next table presents average annual pay in Le Flore County by industry, in comparison with Oklahoma as a whole and the United States.

Comparison of 2014 Average Annual Pay by Supersector

Supersector	Le Flore County	State of Oklahoma	United States	Percent of State	Percent of Nation
Federal Government	\$52,269	\$66,411	\$75,784	78.7%	69.0%

Source: 2009-2013 American Community Survey, Table B23007

Within Le Flore County, there are 8,617 working families, 49.23% of which have children under the age of 18 present. This compares with 51.10% in Oklahoma as a whole.

Major Employers

Major employers in the Le Flore County area are presented in the following table, as reported by the Poteau Chamber of Commerce.

Major Employers in Le Flore County

Company	Industry / Description
Eastern Oklahoma Medical Center	Health Care
Choctaw Nation	Tribal Government
OK Foods	Poultry Processing
Kenco Plastics	Manufacturing
Poteau Public School District	Education
City of Poteau	Municipal Government
Le Flore County	County Government

Source: Poteau Chamber of Commerce

As can be seen, the largest employers in Poteau include local and county government, the local public school district, the Eastern Oklahoma Medical Center, Choctaw Nation, and a variety of manufacturers.

Commuting Patterns

Travel Time to Work

The next table presents data regarding travel time to work in Le Flore County.

Workers 16 Years and Over by Commuting Time to Work

	Poteau		Le Flore County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Commuting Workers:	3,369		17,368		1,613,364	
Less than 15 minutes	2,004	59.48%	6,809	39.20%	581,194	36.02%
15 to 30 minutes	681	20.21%	5,902	33.98%	625,885	38.79%
30 to 45 minutes	451	13.39%	3,002	17.28%	260,192	16.13%
45 to 60 minutes	162	4.81%	900	5.18%	74,625	4.63%
60 or more minutes	71	2.11%	755	4.35%	71,468	4.43%

Source: 2009-2013 American Community Survey, Table B08303

Within Le Flore County, the largest percentage of workers (39.20%) travel fewer than 15 minutes to work. Although Le Flore County has an active labor market, many employees living in the area appear to commute to other labor markets in the region such as Fort Smith.

Means of Transportation

Data in the following table presents data regarding means of transportation for employed persons in Le Flore County.

Workers 16 Years and Over by Means of Transportation to Work

	Poteau		Le Flore County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent

Worked at Home	65	1.89%	593	3.30%	59,662	3.57%

Source: 2009-2013 American Community Survey, Table B08301

As shown, the vast majority of persons in Le Flore County commute to work by private vehicle, with a small percentage of persons working from home.

Housing Stock Analysis

Existing Housing Units

The following table presents data regarding the total number of housing units in Le Flore County. This data is provided as of the 2000 Census, the 2010 Census, with a 2015 estimate furnished by Nielsen SiteReports.

Total Housing Units					
	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change
Poteau	3,351	3,566	0.62%	3,571	0.03%
Le Flore County	20,142	21,448	0.63%	21,514	0.06%
State of Oklahoma	1,514,400	1,664,378	0.95%	1,732,484	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

Since the 2010, Nielsen estimates that the number of housing units in Le Flore County grew by 0.06% per year, to a total of 21,514 housing units in 2015. In terms of new housing unit construction, Le Flore County underperformed Oklahoma as a whole between 2010 and 2015.

Housing by Units in Structure

The next table separates housing units in Le Flore County by units in structure, based on data from the Census Bureau's American Community Survey.

2013 Housing Units by Units in Structure						
	Poteau		Le Flore County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	3,733		21,460		1,669,828	
1 Unit, Detached	3,026	81.06%	16,330	76.10%	1,219,987	73.06%

Median Year Built:		1977		1978		1975
Overall Median Year Built:		1975		1980		1976

Sources: 2009-2013 American Community Survey, Tables B25035, B25036 & B25037

Within Le Flore County, 14.86% of housing units were built after the year 2000. This compares with 15.22% statewide. Within Poteau the percentage is 11.30%.

66.97% of housing units in Le Flore County were built prior to 1990, while in Poteau the percentage is 71.18%. These figures compare with the statewide figure of 72.78%.

Substandard Housing

The next table presents data regarding substandard housing in Le Flore County. The two most commonly cited figures for substandard housing are a lack of complete plumbing, and/or a lack of a complete kitchen. We have also included statistics regarding homes heated by wood, although this is a less frequently cited indicator of substandard housing since some homes (particularly homes for seasonal occupancy) are heated by wood but otherwise not considered substandard.

The Census Bureau definition of inadequate plumbing is any housing unit lacking any one (or more) of the following three items:

1. Hot and cold running water

2. A flush toilet
3. A bathtub or shower

Inadequate kitchens are defined by the Census Bureau as housing units lacking any of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

2013 Substandard Housing Units

	Occupied	Inadequate Plumbing		Inadequate Kitchen		Uses Wood for Fuel	
	Units	Number	Percent	Number	Percent	Number	Percent
Poteau	3,230	0	0.00%	34	1.05%	25	0.77%
Le Flore County	18,412	106	0.58%	130	0.71%	1,030	5.59%
State of Oklahoma	1,444,081	7,035	0.49%	13,026	0.90%	28,675	1.99%

Sources: 2009-2013 American Community Survey, Tables B25040, B25048 & B25052

Within Le Flore County, 0.58% of occupied housing units have inadequate plumbing (compared with 0.49% at a statewide level), while 0.71% have inadequate kitchen facilities (compared with 0.90% at a statewide level). It is likely that there is at least some overlap between these two figures, among units lacking both complete plumbing and kitchen facilities. Le Flore County has a relatively high percentage of homes heated by wood, but this is likely attributable to housing units intended for seasonal occupancy.

Vacancy Rates

The next table details housing units in Le Flore County by vacancy and type. This data is provided by the American Community Survey.

2013 Housing Units by Vacancy

	Poteau		Le Flore County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	3,733		21,460		1,669,828	
Total Vacant Units	503	13.47%	3,048	14.20%	225,747	13.52%
For rent	134	26.64%	491	16.11%	43,477	19.26%
Rented, not occupied	37	7.36%	79	2.59%	9,127	4.04%
For sale only	31	6.16%	249	8.17%	23,149	10.25%
Sold, not occupied	0	0.00%	44	1.44%	8,618	3.82%
For seasonal, recreational, or occasional use	0	0.00%	509	16.70%	39,475	17.49%
For migrant workers	0	0.00%	0	0.00%	746	0.33%
Other vacant	301	59.84%	1,676	54.99%	101,155	44.81%
Homeowner Vacancy Rate	1.44%		1.79%		2.31%	
Rental Vacancy Rate	10.49%		9.21%		8.24%	

Source: 2009-2013 American Community Survey, Tables B25001, B25003 & B25004

Within Le Flore County, the overall housing vacancy rate is estimated to be 14.20%. The homeowner vacancy rate is estimated to be 1.79%, while the rental vacancy rate is estimated to be 9.21%.

In Poteau, the overall housing vacancy rate is estimated to be 13.47%. The homeowner vacancy rate is estimated to be 1.44%, while the rental vacancy rate is estimated to be 10.49%. Compared with the rest of the state, Poteau and Le Flore County have relatively lower vacancy among housing units intended for ownership, but somewhat higher vacancy among rental units.

Building Permits

The next series of tables present data regarding new residential building permits issued in Poteau. This data is furnished by the U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division. Please note that average costs reported only represent physical construction costs for the housing units, and do not include land prices, most soft costs (such as finance fees), or builder's profit. This data was only available for Poteau for years 2005-2010, more recent data was not available from the Census Bureau.

Poteau

New Residential Building Permits Issued, 2005-2010

Year	Single Family Units	Avg. Construction Cost	Multifamily Units	Avg. Multifamily Construction Cost
2005	34	\$115,456	23	\$58,768
2006	24	\$111,792	0	N/A
2007	17	\$107,059	0	N/A
2008	33	\$65,348	0	N/A
2009	57	\$78,684	0	N/A
2010	18	\$111,278	0	N/A

Source: United States Census Bureau Building Permits Survey

In Poteau, building permits for 206 housing units were issued between 2005 and 2010, for an average of 34 units per year. 88.83% of these housing units were single family homes, and 11.17% consisted of multifamily units. Considering over 34% of housing units in Poteau are occupied by renters, it is likely that new multifamily development is not keeping up with need for rental units in Poteau.

New Construction Activity

For Ownership:

New housing construction for ownership has occurred throughout the Le Flore County area. Much new construction has occurred on unplatted rural acreages outside of the jurisdiction of any town or city, but in the general vicinity of the communities of Poteau, Heavener, Wister, Panama, Pocola and Spiro, among others. Some new construction has also occurred inside Poteau city limits, typically either on the north side of the city, or on the far southwestern side. Subdivisions in Poteau that have seen new construction in recent years include Country Meadows, Foothills and Shadow Mountain.

New home construction has been primarily custom built construction, and in some cases appears to have represented housing for seasonal or recreational use. New construction has comprised a mix of smaller, relatively affordable homes, and much larger and more expensive custom-built homes. For homes constructed in Le Flore County after 2005 (and sold since January 2014), the average sale price is estimated to be \$154,263 or \$99.92 per square foot. This amount is less than many other counties in southeastern Oklahoma, but nonetheless well above what could be reasonably afforded by a household earning at or less than median household income, which is estimated to be \$35,804 in 2015.

For Rent:

Apart from very small-scale rental properties (fewer than eight units) there has been very little new construction of properties for rent in Le Flore County over the last ten years. Some new rental housing in Poteau has been constructed by the Choctaw Nation Housing Authority though detailed information regarding these homes was not available. A new affordable rental housing development for seniors age 62 and up has been proposed in Poteau, on the north side of town near Garden Walk Apartments. This development would be financed in part with Affordable Housing Tax Credits, and would comprise

36 one and two-bedroom apartments for seniors with incomes less than 60% of Area Median Income. If constructed this development would go far in meeting the affordable housing needs of seniors in the Poteau area.

Homeownership Market

This section will address the market for housing units for purchase in Le Flore County, using data collected from both local and national sources.

Housing Units by Home Value

The following table presents housing units in Le Flore County by value, as well as median home value, as reported by the Census Bureau's American Community Survey.

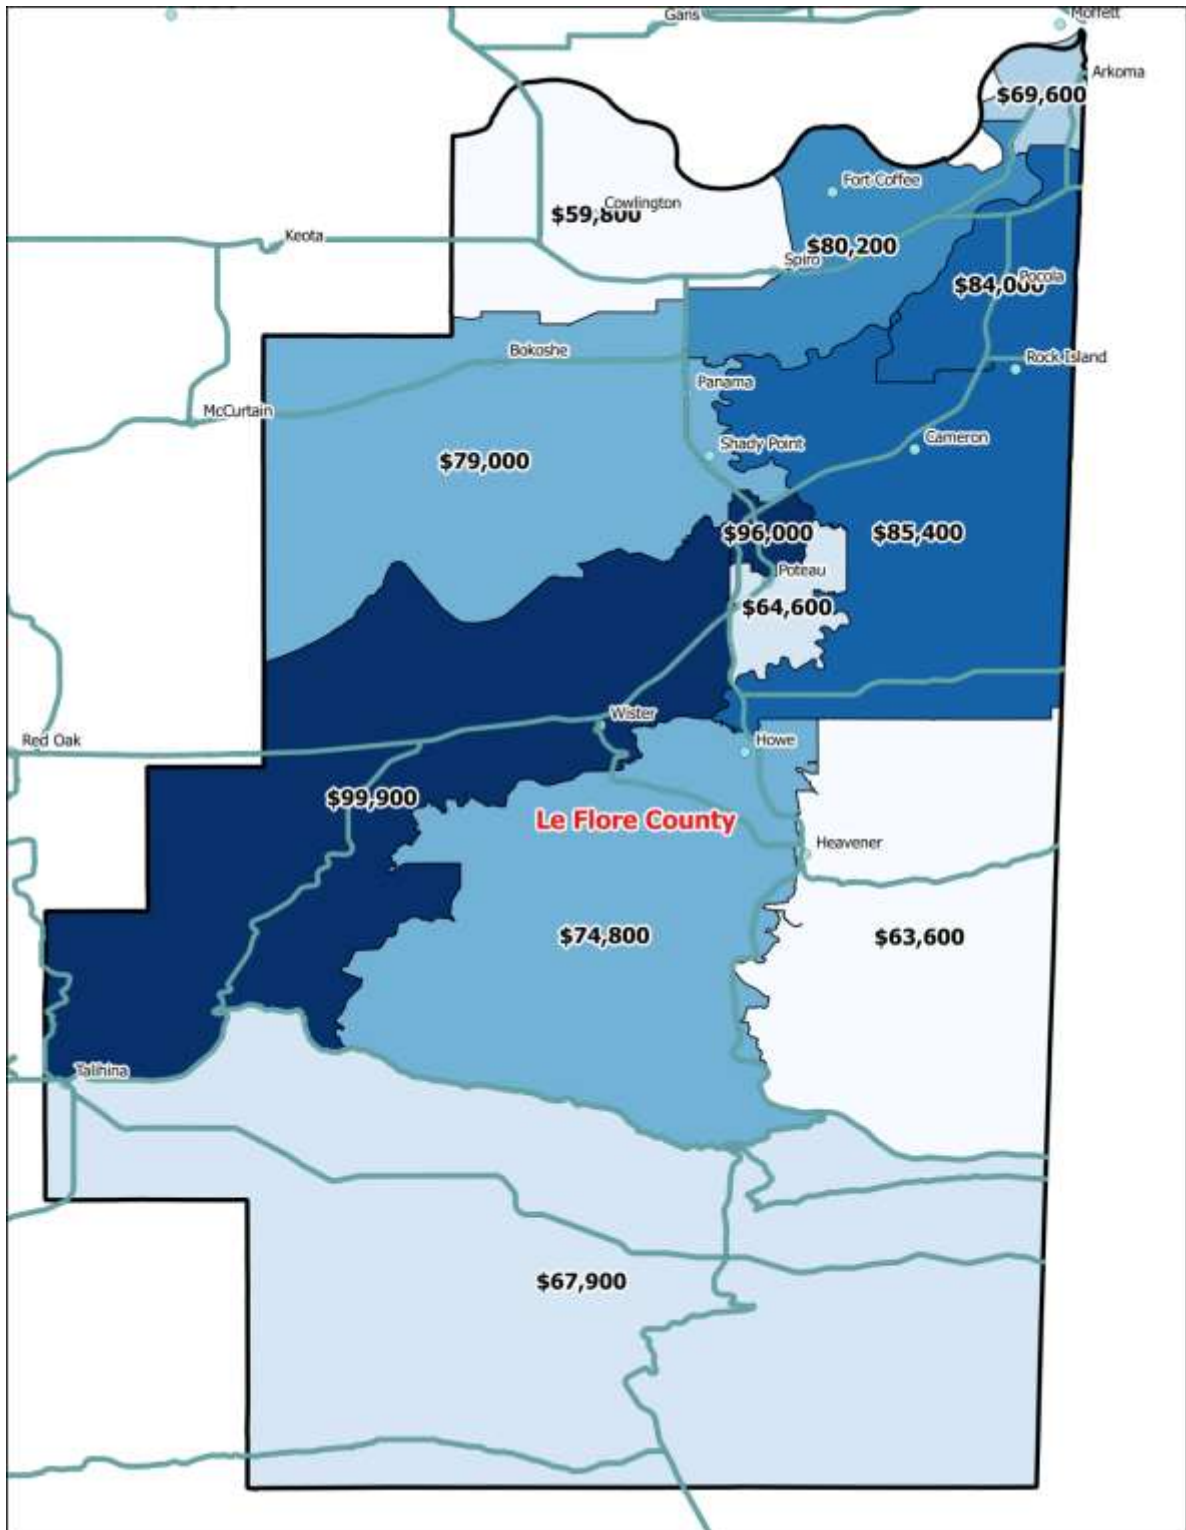

2013 Housing Units by Home Value

	Poteau		Le Flore County		State of Oklahoma

Median Home Value:	\$91,700		\$80,100		\$112,800	

Sources: 2009-2013 American Community Survey, Tables B25075 and B25077

The median value of owner-occupied homes in Le Flore County is \$80,100. This is -29.0% lower than the statewide median, which is \$112,800. The median home value in Poteau is estimated to be \$91,700. The geographic distribution of home values in Le Flore County can be visualized by the following map. As can be seen, the highest home values are located in the areas just north of Poteau, and in central and western Le Flore County.

Le Flore County Median Home Values by Census Tract

Home Values by Year of Construction

The next table presents median home values in Le Flore County by year of construction. Note that missing data fields indicate the Census Bureau had inadequate data to estimate a median value that age bracket.

2013 Median Home Value by Year of Construction			
	Poteau Median Value	Le Flore County Median Value	State of Oklahoma Median Value
Total Owner-Occupied Units:			
Built 2010 or Later	\$323,900	\$168,100	\$188,900

Source: Le Flore County Assessor, via County Records, Inc.

Between 2011 and 2014, the average sale price has fluctuated between approximately \$85,000 and \$100,000. The average sale price in 2015 was \$78,179 for an average price per square foot of \$53.15. The average year of construction has generally been early to mid-1970s.

Foreclosure Rates

The next table presents foreclosure rate data for Le Flore County, compiled by the Federal Reserve Bank of New York. This data is effective as of May 2014.

Foreclosure Rates

Geography	% of Outstanding Mortgages in Foreclosure, May 2014
Le Flore County	3.4%
State of Oklahoma	2.1%
United States	2.1%
Rank among Counties in Oklahoma*:	7

* Rank among the 64 counties for which foreclosure rates are available

Source: Federal Reserve Bank of New York, Community Credit Profiles

According to the data provided, the foreclosure rate in Le Flore County was 3.4% in May 2014. The county ranked 7 out of 64 counties in terms of highest foreclosure rates in Oklahoma. This rate compares with the statewide and nationwide foreclosure rates, both of which were 2.1%. With one of the highest foreclosure rates in the state, foreclosures have likely had a negative impact on home values in the area.

Rental Market

This section will discuss supply and demand factors for the rental market in Le Flore County, based on publicly available sources as well as our own surveys of landlords and rental properties in the area.

Gross Rent Levels

The following table presents data regarding gross rental rates in Le Flore County. Gross rent is the sum of contract rent, plus all utilities such as electricity, gas, water, sewer and trash, as applicable (telephone, cable, and/or internet expenses are not included in these figures).

2013 Rental Units by Gross Rent

	Poteau		Le Flore County		State of Oklahoma

Median Gross Rent		\$546		\$554		\$699

Sources: 2009-2013 American Community Survey, Tables B25063 and B25064

Median gross rent in Le Flore County is estimated to be \$554, which is -20.7% less than Oklahoma's median gross rent of \$699/month. Median gross rent in Poteau is estimated to be \$546.

Median Gross Rent by Year of Construction

The next table presents data from the American Community Survey regarding median gross rent by year of housing unit construction. Note that dashes in the table indicate the Census Bureau had insufficient data to provide a median rent figure for that specific data field.

2013 Median Gross Rent by Year of Construction

	Poteau Median Rent	Le Flore County Median Rent	State of Oklahoma Median Rent
Total Rental Units:			
Built 2010 or Later	-	\$521	\$933
Built 2000 to 2009	\$393	\$608	\$841
Built 1990 to 1999	\$487	\$523	\$715
Built 1980 to 1989	\$793	\$599	\$693
Built 1970 to 1979	\$501	\$526	\$662
Built 1960 to 1969	\$619	\$568	\$689
Built 1950 to 1959	\$562	\$563	\$714
Built 1940 to 1949	\$633	\$573	\$673
Built 1939 or Earlier	\$579	\$562	\$651

Note: Dashes indicate the Census Bureau had insufficient data to estimate a median gross rent.

Source: 2009-2013 American Community Survey, Table 25111

The highest median gross rent in Le Flore County is among housing units constructed between 2000 and 2009, which is \$608 per month. In order to be affordable, a household would need to earn at least \$24,320 per year to afford such a unit.

Poteau Rental Survey Data

The table shows the results of our rental survey of Poteau. The data is divided between market rate properties, and affordable properties of all types (project-based Section 8, Low-Income Housing Tax Credit, USDA Rural Development, etc.). Rental rates shown for USDA properties are reported market rental rates; most tenants at these properties pay rent based on 30% of their income.

Poteau Rental Properties								
Name	Type	Year Built	Bedrooms	Bathrooms	Size (SF)	Rate	Rate/SF	Vacancy
Gardenwalk of Poteau	USDA - Family	1986	1	1	650	\$435	\$0.669	N/A
Gardenwalk of Poteau	USDA - Family	1986	2	1	760	\$480	\$0.632	N/A
Gardenwalk of Poteau	USDA - Family	1986	3	2	860	\$570	\$0.663	N/A
Gardenwalk on Michelle Lane	LIHTC/USDA - Family	1979	1	1	600	\$390	\$0.650	0.00%
Gardenwalk on Michelle Lane	LIHTC/USDA - Family	1979	2	1	750	\$435	\$0.580	0.00%
Gardenwalk on Lacey Lane	LIHTC/USDA - Family	1988	1	1	600	\$390	\$0.650	0.00%
Gardenwalk on Lacey Lane	LIHTC/USDA - Family	1988	2	1	750	\$435	\$0.580	0.00%
Gardenwalk on Lacey Lane	LIHTC/USDA - Family	1988	3	2	850	\$490	\$0.576	0.00%
Savannah Park	USDA - Elderly	1990	1	1	600	\$400	\$0.667	0.00%
Savannah Park	USDA - Elderly	1990	2	1	750	\$480	\$0.640	0.00%
Serenity Heights	Market Rate	1995	2	1	810	\$450	\$0.556	16.70%
Whitney Apartments	Market Rate	1983	2	1	1,000	\$525	\$0.525	25.00%

The previous rent surveys encompass over two hundred rental units in six complexes. These properties are located throughout the community and provide a good indication of the availability and rental structure of multifamily property. Review of historical rental data indicates the comparable rental rates have been generally stable over the last several years. We also note that there are recently constructed duplexes in Poteau (Wolf Valley Duplexes): these two-bedroom, two-bath duplexes rent for \$850/month (not including any utilities except for lawn maintenance), and include 2-car garages.

Rental Market Vacancy – Poteau

The affordable rental properties which reported their current occupancy all reported full occupancy with waiting lists. Market rate properties, however, all report some vacancy: it appears that although there is high demand for affordable rental housing, market rate rental housing is adequately supplied, or potentially oversupplied. The overall market vacancy of rental housing units was reported at 10.49% by the Census Bureau as of the most recent American Community Survey.

24% of housing units are occupied by single parents with female heads of household. 25% of households have at least one person with a disability. 37% of households have either a householder or spouse age 62 or above. Of the households age 62 or above, 47% have one or more disabilities. Finally, 12% of households are designated as racial or ethnic minorities.

Projected Housing Need

Consolidated Housing Affordability Strategy (CHAS)

This section will analyze data from the U.S. Department of Housing and Urban Development's Consolidated Housing Affordability Strategy (CHAS) dataset for Le Flore County. This data is typically separated into household income thresholds, defined by HUD Area Median Family Income (HAMFI). HUD Area Median Family Income (HAMFI) is equivalent to Area Median Income (AMI) for the purposes of this report. This data is considered the best indicator of housing need available which separates need into household income thresholds as defined by HUD.

Cost Burden by Income Threshold

The next table presents CHAS data for Le Flore County regarding housing cost burden as a percentage of household income. Renter costs are considered to be the sum of contract rent and any utilities not paid by the landlord (such as electricity, natural gas, and water, but not including telephone service, cable service, internet service, etc.). Homeowner costs include mortgage debt service (or similar debts such as deeds of trust or contracts for deed), utilities, property taxes and property insurance.

Households are considered to be cost overburdened if their housing costs (renter or owner) are greater than 30% of their gross household income. A household is "severely" overburdened if their housing costs are greater than 50% of their gross household income.

Substandard Conditions / Overcrowding by Income Threshold

The following table summarizes data regarding substandard housing conditions and overcrowding, separated by owner/renter and HAMFI income threshold. Substandard housing conditions are defined by HUD as any housing unit lacking either complete plumbing or a complete kitchen.

A housing unit without “complete plumbing” is any housing unit lacking one or more of the following features (they do not need to all be present in the same room):

1. Hot and cold running water
2. A flush toilet
3. A bathtub or shower

A lack of a complete kitchen is any housing unit lacking any one or more of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

Households are considered to be “overcrowded” if the household has more than 1.0 persons per room (note that this definition is “room” including bedrooms, living rooms and kitchens, as opposed to only “bedrooms”), and is “severely overcrowded” if the household has more than 1.5 persons per room.

Le Flore County : CHAS - HAMFI by Substandard Conditions / Overcrowding

Cost Burden by Household Type

The following table provides a breakdown of households by HAMFI, and by household type and size, and by housing cost burden. The categories of household type provided by HUD are:

- Elderly Family: Households with two persons, either or both age 62 or over.
- Small Family: 2 persons, neither age 62 or over, or families with 3 or 4 persons of any age.
- Large Family: families with 5 or more persons.
- Elderly Non-Family (single persons age 62 or over, or unrelated elderly individuals)
- Non-Elderly, Non-Family: all other households.

Housing Problems by Household Type

The next set of tables presents data by household type and whether or not the household is experiencing **any** housing problems. Housing problems are defined by HUD as any household meeting any of the three following criteria:

1. Housing costs greater than 30% of income (cost-overburdened).
2. Living in a housing unit lacking complete plumbing or a complete kitchen (substandard housing unit).
3. Living in a housing unit with more than 1.0 persons per room (overcrowding).

Housing Problems by Race / Ethnicity

Data presented in the following tables summarizes housing problems (as previously defined), by HAMFI threshold, and by race/ethnicity, for Le Flore County. Under CFR 91.305(b)(1)(ii)(2), racial or ethnic groups have disproportionate need if “the percentage of persons in a category of need who are members of a particular racial or ethnic group in a category of need is at least 10 percentage points higher than the percentage of persons in the category as a whole.”

CHAS Conclusions

The previous data notes many areas of need (and severe need) among the existing population of Le Flore County. The greatest needs are among households with incomes less than 30% of Area Median Income. Several other areas of note:

- Among households with incomes less than 50% of Area Median Income, there are 1,525 renter households that are cost overburdened, and 1,440 homeowners that are cost overburdened.
- Among **elderly** households with incomes less than 50% of Area Median Income, there are 254 renter households that are cost overburdened, and 694 homeowners that are cost overburdened.

- 73.4% of African American renters with incomes less than 80% of Area Median Income have one or more housing problems, and 57.7% of African American homeowners with incomes less than 80% of Area Median Income have one or more housing problems. For persons of Hispanic ethnicity, 69.6% of renters and 55.2% of owners have housing problems.

Housing Demand – Population Subsets

This section will address 5-year forecasted needs and trends for population special population subsets for Le Flore County. These forecasts are based on the previously forecasted overall trends for the next five years.

Housing Needs by Income Thresholds

The first table will address future housing needs and trends for households in Le Flore County by income threshold: households within incomes below 30%, 50%, 60% and 80% of Area Median Income, by tenure (owner/renter). These forecasts are primarily based on HUD Consolidated Housing Affordability Strategy data presented previously. Households with incomes below 60% of Area Median Income (AMI) are estimated at 120% of the households at 50% of AMI. Note that these figures are cumulative and should not be added across income thresholds.

Le Flore County: 2015-2020 Housing Needs by Income Threshold					
	Owner	Renter			
	Subset %	Subset %	Owners	Renters	Total
Total New Demand: 2015-2020	100.00%	100.00%	20	7	27
Less than 30% AMI	8.57%	23.32%	2	2	3
Less than 50% AMI	17.44%	42.41%	3	3	6
Less than 60% AMI	20.93%	50.89%	4	4	8
Less than 80% AMI	34.07%	62.91%	7	4	11

Elderly Housing Needs

The next table will address future housing needs and trends for households with elderly persons (age 62 and up). Like the previous table, this data is based on the overall trends previously defined, and the 2008-2012 CHAS data previously discussed (specifically CHAS Table 16). It is further broken down by income threshold and tenure.

Le Flore County: 2015-2020 Housing Needs Age 62 and Up					
	Owner	Renter	Elderly	Elderly	Elderly
	Subset %	Subset %	Owners	Renters	Total
Total New Elderly (62+) Demand: 2015-2020	34.88%	17.39%	7	1	8
Elderly less than 30% AMI	3.75%	3.72%	1	0	1
Elderly less than 50% AMI	8.90%	8.54%	2	1	2
Elderly less than 60% AMI	10.68%	10.25%	2	1	3
Elderly less than 80% AMI	17.11%	13.47%	3	1	4

Housing Needs for Persons with Disabilities / Special Needs

The following table will address future trends and needs for households with at least one household member with at least one disability as identified by HUD CHAS Table 6 (hearing or vision impairments, ambulatory limitations, cognitive limitations, self-care limitations, or independent living limitations). As with the previous tables, this data is also further broken down by income threshold and tenure.

Le Flore County: 2015-2020 Housing Needs for Persons with Disabilities

	Owner Subset %	Renter Subset %	Disabled Owners	Disabled Renters	Disabled Total
Total New Disabled Demand (2015-2020)	40.84%	36.28%	8	3	11
Disabled less than 30% AMI	4.64%	7.14%	1	0	1
Disabled less than 50% AMI	9.86%	15.88%	2	1	3
Disabled less than 60% AMI	11.83%	19.06%	2	1	4
Disabled less than 80% AMI	18.29%	27.14%	4	2	6

Housing Needs for Veterans

This section will address housing needs for households with at least one veteran. This data is not available through HUD's Consolidated Housing Affordability Strategy, so we have instead relied on data from the U.S. Census Bureau, specifically the 2009-2013 American Community Survey, Table C21007. This data is further broken down by tenure, poverty status, and disability status.

Le Flore County: 2015-2020 Housing Needs for Veterans

	Owner Subset %	Renter Subset %	Veteran Owners	Veteran Renters	Veteran Total
Total New Demand (2015-2020)	100.00%	100.00%	20	7	27
Total Veteran Demand	10.20%	10.20%	2	1	3
Veterans with Disabilities	4.43%	4.43%	1	0	1
Veterans Below Poverty	1.00%	1.00%	0	0	0
Disabled Veterans Below Poverty	0.60%	0.60%	0	0	0

Housing Needs for Working Families

The final table addresses housing needs for working families. Working families are in this case defined as families (households with at least two members related by blood or marriage) with at least one person employed. Like the forecasts for veteran needs, this data cannot be extracted from the HUD CHAS tables, so we have again relied on the Census Bureau's American Community Survey (table B23007 in this instance). The data is further broken down by the presence of children (below the age of 18).

Le Flore County: 2015-2020 Housing Needs for Working Families

	Owner Subset %	Renter Subset %	Owners	Renters	Total
Total New Demand (2015-2020)	100.00%	100.00%	20	7	27
Total Working Families	46.80%	46.80%	9	3	13
Working Families with Children Present	23.04%	23.04%	5	2	6

Population Subset Conclusions

Based on population and household growth over the next five years, a total of 27 housing units will be needed in Le Flore County over the next five years. Of those units:

- 8 will be needed by households earning less than 60% of Area Median Income

- 3 will be needed by households age 62 and up, earning less than 60% of Area Median Income
- 4 will be needed by households with disabilities / special needs, earning less than 60% of Area Median Income
- 6 will be needed by working families with children present

It should be noted that these figures are based solely on projected household growth, and do not account for *existing* households and families with needs. As previously noted, data provided by HUD shows 1,525 existing renter households and 1,440 homeowners in Le Flore County who are cost overburdened. It is also notable that 100% of large families with incomes less than 30% of area median income are reported to have housing problems. It is evident that there is significant need in Le Flore County which is not currently being met, which is not reflected by future household growth forecasts.

Special Topics

Le Flore County Disaster Resiliency Assessment

The purpose of this section is to assess at the county level key components of disaster resiliency. Housing location and quality as well as planning activities can help reduce impacts from disaster events and allow for faster recovery. Disasters can include tornadoes, extreme weather, high winds, as well as man-made events. These events may largely be inevitable, but the ability to reduce damage and casualties as well recovery can be improved with good planning.

C.0 Comprehensive Plans & Hazard Mitigation Plans

There are 4 key cities within the county: Poteau, Heavener, Pocola, and Spiro.

Comprehensive plans are the guiding documents for cities of various sizes to address key aspects of their community from land use, transportation, environment, housing, and economic development.

Of the 4 cities, no adopted comprehensive plans were found. How flood plain applications, etc. were found regarding disaster resiliency. See following section for further details -*Public Policy and Governance to Build Disaster Resiliency*.

The other key plan for a city to manage, mitigate and plan for recovery related to disasters is a **Hazard Mitigation Plan** (or Emergency Management Plan). Often low density counties, the Hazard Mitigation Plan is done at the county level, though some cities may augment the county plan with a city plan.

No HMP was found for Le Flore County. However the Le Flore County Emergency Management website does identify the key disaster for the county: winter weather, wildfires, tornados, floods, lightning, and earthquakes. The site also provides a description of the disaster, safety instructions, and information for shelter and preparation, etc.

C.2.1.1. Historical Data on Natural Disasters and Other Hazards

Data on historical damages and casualties is typically collected as part of a **Hazard Mitigation Plan** preparation to determine the appropriate planning measures and actions to take before and after an event.

No HMP was found. However according to <http://www.city-data.com/city/Poteau-Oklahoma.html>, Le Flore County had 18 declared natural disasters declared. Major Disasters (Presidential) Declared- 12 and Emergencies Declared- 6. Casualty data was found via NOAA.

Flooding

All parts of the county may be subject to flash flooding, freeze-thaw flooding and extreme precipitation that can cause flooding, unrelated to the streams and rivers. Development in the floodplain, however, increases risk of damages and property loss potentially repeatedly.

Tornado

- On 3/26/1976, a category F5 (max. wind speeds 261-318 mph) tornado 10.6 miles away from the Poteau city center killed 2 people and injured 64 people and caused between \$500,000 and \$5,000,000 in damages.
- On 5/5/1961, a category F4 (max. wind speeds 207-260 mph) tornado 7.6 miles away from the city center killed 16 people and injured 58 people and caused between \$50,000 and \$500,000 in damages.

Earthquake

- On 1/21/1982 at 00:33:54, a magnitude 4.7 (4.5 MB, 4.7 LG, 4.5 LG, Class: Light, Intensity: IV - V) earthquake occurred 137.3 miles away from the city center.
- On 5/4/2001 at 06:42:12, a magnitude 4.7 (4.2 MB, 4.7 LG, 4.5 LG, Depth: 6.2 mi) earthquake occurred 138.2 miles away from Poteau center

- On 9/6/1997 at 23:38:00, a magnitude 4.5 (4.5 LG, 4.2 LG, Depth: 3.1 mi) earthquake occurred 106.1 miles away from the city center
- On 3/25/1976 at 00:41:20, a magnitude 5.0 (4.9 MB, 5.0 LG, Class: Moderate, Intensity: VI - VII) earthquake occurred 246.0 miles away from the city center
- On 5/4/1991 at 01:18:54, a magnitude 5.0 (4.4 MB, 4.6 LG, 5.0 LG, Depth: 3.1 mi) earthquake occurred 289.0 miles away from Poteau center
- On 1/18/1995 at 15:51:39, a magnitude 4.2 (4.0 LG, 4.2 LG, Depth: 3.1 mi) earthquake occurred 169.4 miles away from the city center

NOAA data shows the following historic data on disaster events for the county:

Approximately 10 total tornadoes in Le Flore County prior to 1950. This includes 20 deaths and 87 injuries.

Approximately 61 total tornadoes in Le Flore County from 1950-2014 (F0-F5). This includes:

- F5 Tornado – x1 in 1976; resulting in 2 deaths and 64 injuries.
- F4 Tornado – x2 in 1961 and 1976; resulting in 17 deaths and 62 injuries.
- F3 Tornado – x4 in 1960, 1980, and 1983; resulting in 1 death and 15 injuries.

Selected County Boundary

C.2.1.2; C.2.1.6; C.2.1.7; C.2.1.8 Shelters from Disaster Event

According to the Le Flore County Emergency Management website, there are 10 public storm shelters. See <http://www.lcem.us/publicshelters.html#>

- Arkoma- First Baptist Church
- Heavener- Saferoom between the High School and Elementary School
- Howe- New Highschool Gym
- Panama- Panama Middle School
- Pocola- Elementary School
- Poteau- High School
- Poteau- Pansy Kidd Middle School
- Poteau- Upper Elementary School
- Spiro- High School Safe Room
- Wister- Behind new High School Gym

Le Flore County Emergency Management also maintains an online registry of private storm shelters. However, the estimates of were not found regarding number of shelters listed in registry. See <http://www.lcem.us/shelterregistration.html>

C.2.1.3 Public Policy and Governance to Build Disaster Resiliency

Poteau – According to Poteau City Code (reference http://sterlingcodifiers.com/codebook/index.php?book_id=1010)

- Control the alteration of natural floodplains, stream channels, and natural protective barriers, which are involved in the accommodation of floodwaters.
- Prevent or regulate the construction of flood barriers which will increase flood hazards to other lands. (1990 Code § 12-503)
- All new construction or substantial improvements shall be constructed with electrical, heating, ventilation, plumbing and air conditioning equipment and other service facilities that are designed or located so as to prevent water from entering or accumulating within the components during conditions of flooding;
- New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of floodwaters into the system and discharges from the systems into floodwaters;
- On site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding. (1990 Code § 12-516)
- Regarding floodways- Encroachments are prohibited, including fill, new construction, substantial improvements and other developments unless certification by a professional registered engineer or architect is provided demonstrating that encroachments shall not result in any increase in flood levels within the community during occurrence of the base flood discharge;
- The availability of alternative locations, not subject to flooding or erosion damage, for the proposed use; and
- The relationship of the proposed use to the comprehensive plan for that area. (1990 Code § 12-514)

Heavener

- The City of Heavener requires that for all future residential development the lowest floor must be elevated to or higher than the base flood elevation (100-year flood plain). See http://www.cityofheavener.us/?page_id=232

Pocola -According to the Town Ordinances (<http://www.townofpocola.com/TownOrdinances.pdf>)

- Adoption of FEMA FLOOD INSURANCE RATE MAPs (FIRM).
- The manufactured home chassis is supported by reinforced piers or other foundation elements of at least equivalent strength that are no less than thirty six inches (36") in height above grade and be securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement.
- Anchoring: All new construction or substantial improvements shall be designed (or modified) and adequately anchored to prevent flotation, collapse or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy;
- Methods And Practices: All new construction or substantial improvements shall be constructed by methods and practices that minimize flood damage;
- Resistant Materials: All new construction or substantial improvements shall be constructed with materials resistant to flood damage;
- Water Supply Systems: All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of floodwaters into the system;
- SPECIFIC STANDARDS: In all areas of special flood hazard where base flood elevation data has been provided as set forth in section 12-3-2 and subsection 12-4-2H of this title, and subsection 12-5-3C of this chapter, the following provisions are required:

C.2.1.4 Local Emergency Response Agency Structure

Information not available.

C.2.1.5 Threat & Hazard Warning Systems

The identified Threat & Hazard Warning Systems for Le Flore County include:

- Sirens (City of Pocola website states that city has sirens “throughout” city however no quantities were found. See <http://www.townofpocola.com/EM%20EAS%20ACTIVATION%20SOG.pdf>. Additional resources indicate that outdoor warning sirens are present in the City of Poteau. See <http://www.4029tv.com/news/tornado-sirens-accidentally-sound-in-leflore-county/31993252>.
- Social Media (Facebook page operated by Le Flore County Emergency Management and twitter account. See <https://www.facebook.com/lcemcst/> and https://twitter.com/LeFloreCountyEM?ref_src=twsrc%5Etfw)
- Town of Pocola Emergency Management suggests using www.wunderground.com (see <http://www.townofpocola.com/eoc.html>)

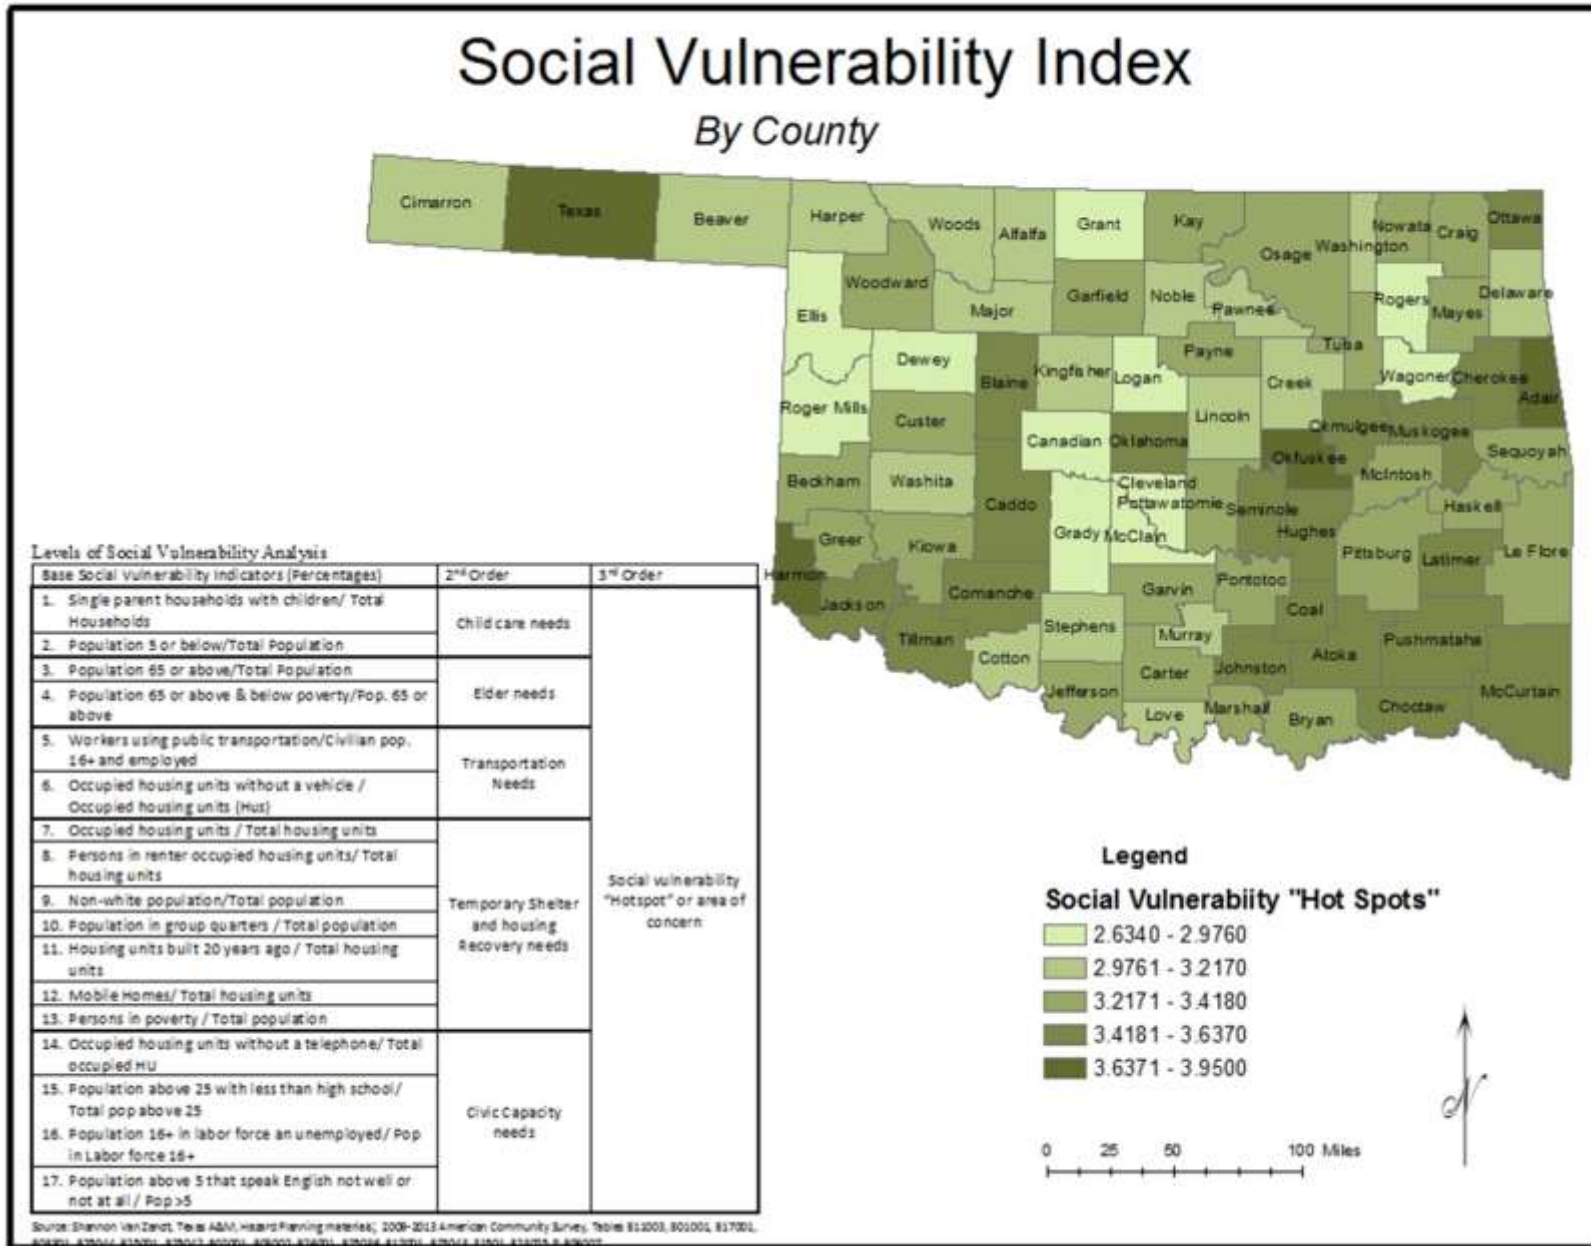

Social Vulnerability

Based on the research work done by the Texas A&M University Hazard Reduction and Recovery Center, an added component is being included in this section. Social vulnerability can place households at a further disadvantage during and after a disaster. This analysis is assessing for the county the levels of social vulnerability based on demographic indicators to highlight ‘hotspots’ or counties that have higher social vulnerability. That combined with Hazard Mitigation Plans – or lack thereof – can highlight places where additional work is needed to reduce impacts on households.

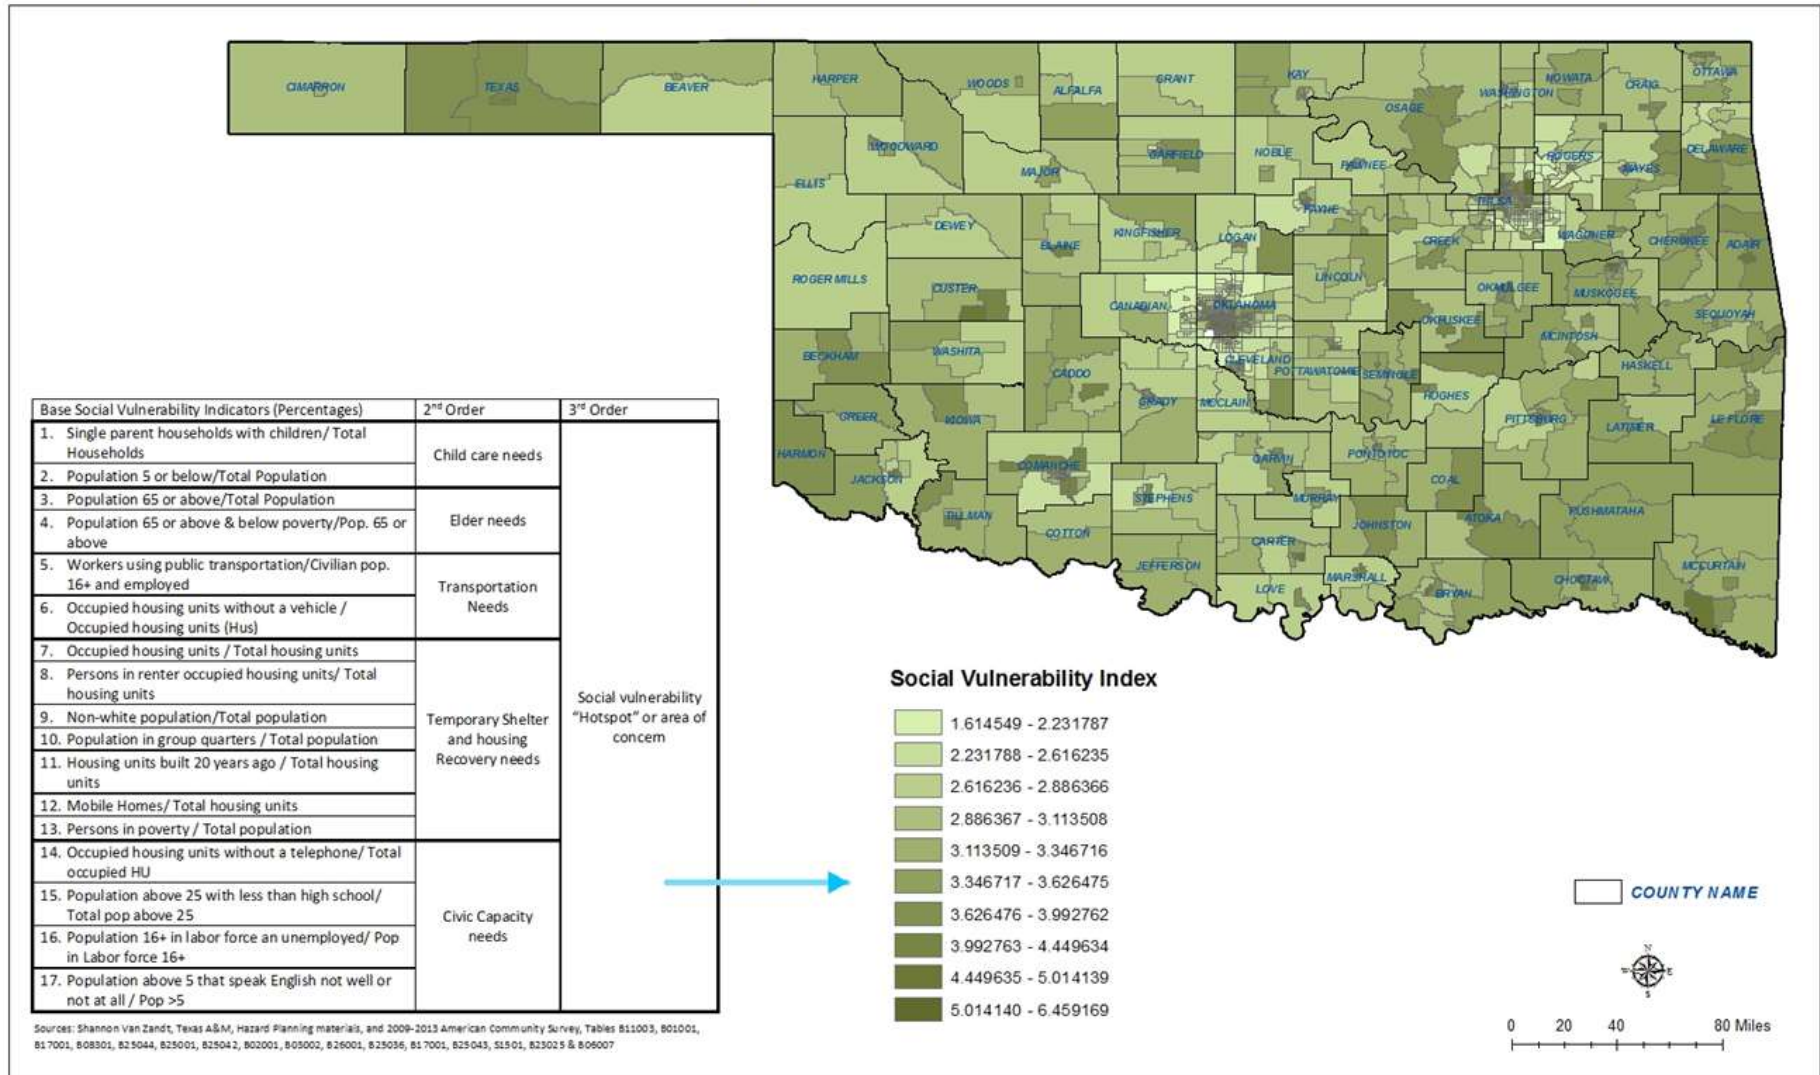

Social Vulnerability Analysis - Le Flore County		
Base Social Vulnerability Indicators (%)	2nd Order	3rd Order
1.) Single Parent Households	13.35%	3.418 Social Vulnerability 'Hotspot' or Area of Concern
2.) Population Under 5	6.35%	
3.) Population 65 or Above	15.66%	
4.) Population 65 or Above & Below Poverty Rate	14.60%	
5.) Workers Using Public Transportation	0.28%	
6.) Occupied Housing Units w/o Vehicle	5.17%	
7.) Housing Unit Occupancy Rate	85.80%	
8.) Rental Occupancy Rate	25.86%	
9.) Non-White Population	27.11%	
10.) Population in Group Quarters	3.25%	
11.) Housing Units Built Prior to 1990	66.97%	
12.) Mobile Homes, RVs, Vans, etc.	17.87%	
13.) Poverty Rate	22.24%	
14.) Housing Units Lacking Telephones	3.36%	
15.) Age 25+ With Less Than High School Diploma	19.50%	
16.) Unemployment Rate	11.62%	
17.) Age 5+ Which Cannot Speak English Well or Not At All	2.79%

 COUNTY NAME

Sources: Shannon Van Zandt, Texas A&M, Hazard Planning materials, and 2009-2013 American Community Survey, Tables B11003, B01001, B17001, B08501, B25044, B25001, B25042, B02001, B03002, B26001, B25036, B17001, B25043, S1501, B25025 & B06007

Social vulnerability combined with the devastating impacts of a natural or man-made disaster can compound a household's ability to recover and in fact can place those individuals at an even greater gap or disadvantage prior to the event (Shannon Van Zandt, Texas A&M, Hazard Planning).

This county has an elevated score per this index for social vulnerability when comparing as a county to other counties in the state. Looking at the census tract level, the southern portion of the county has a particularly higher score for social vulnerability. Combine that with the tornados, as one physical hazard or event that occurs, people in these areas may have additional difficulties during an event due to transportation and family needs. Additionally recovery for socially vulnerable populations can be slow and may require additional outside assistance.

Recommendations for this county:

- Apply for grants/funding to develop a county hazard mitigation plan. The HMP must then be approved by the state and FEMA. Include attention to areas within the county that may have compounding social vulnerability factors.
- Pursue efforts to strengthen building codes related to tornadoes and natural disasters should be considered (such as the use of "hurricane clips" for all new residential construction).
- Pursue funding/grants for public shelters. As the city pursues planning for shelters from disaster events for multifamily, HUD and LIHTC units, in addition to all housing in the community should be incorporated with any effort to increase housing.

Homelessness

By Continuum of Care

Oklahoma is comprised of eight Continuums of Care (CoC). These entities manage the provision of services to the homeless, among other functions. By definition, CoCs involve nonprofit homeless providers; victim service providers; faith-based organizations; governments; businesses; advocates; public housing agencies; school districts; social service providers; mental health agencies; hospitals; universities; affordable housing developers; law enforcement and other organizations that serve the homeless and those at risk of becoming homeless (Continuum of Care Network pamphlet, 2015). These entities are governed by a community plan that helps them deliver services to the homeless and/or to prevent a return to the homeless. CoCs provide a variety of services aimed at outreach, engagement and assessment, including emergency shelter, rapid re-housing, transitional housing, and permanent housing, among others (Continuum of Care Network pamphlet, 2015).

The data below describes the characteristics of those receiving or eligible for the CoC in which Le Flore County is located. This data is collected by the CoCs on last day of January each year and reported on an annual basis. It is currently the best source of data available at the State level of understanding the demographics of these populations.

OK 507 Southeastern Oklahoma

OK 507 represents McCurtain, Choctaw, Pushmataha, Bryan, Carter, Love, Pontotoc, Coal, Murray, Johnson, Atoka, Marshall, Pittsburg, Latimer, LeFlore, Haskell, McIntosh, Hughes, Okfuskee, Okmulgee, and Muskogee counties. There is a high rate of homelessness in this region, most of which seek shelter in small towns and rural areas. The majority of the homeless in this CoC are classified as chronically homeless (73). There are also a significant number of homeless that are mentally ill (49) and chronic substance abusers (50). The location of a correctional facility in this area may contribute to the disproportionate number of homeless in the CoC.

<i>OK 507 Southeastern OK Regional</i>	Emergency Shelter(sheltered)	Transitional Housing(sheltered)	Unsheltered	Total

COC Conclusion

Each of the CoC's represents a unique area. It's important to note that the Point In Time data serves as a baseline. It is likely that the homeless population is much larger than counted. Generally, the State's homeless population is over the age of 24. In some areas of the State, there is a disproportionately high rate of homeless youth. More detailed exploration is necessary to understand the reasons which led them to this State and the needs of homeless youth. Domestic violence victims comprise a significant portion of the homeless population in the State. In some areas, the presence of social service providers for this subpopulation has reduced homeless rates. The same is true with respect to homeless veterans. As anticipated, the majority of the homeless population across the state can be classified as: mentally ill, chronically homeless, and chronic substance abusers. The needs of these difficult to house homeless must remain a priority across the State.

A Snap Shot of Homelessness in the State

Point in Time data was last collected on January 29, 2015 across the State. On that date, counts revealed a homeless populations of more than 3,000 residents. The majority of those counted (2,603 individuals) were classified as households without children. The majority of this group lives in emergency shelters (1,652) or transitional housing (376) with 575 classified as unsheltered.

The number of households with children is seemingly small totaling 343. The vast majority of those in this classification live at emergency shelters (201) or transitional housing (104) with only 38 classified as unsheltered. Homeless service providers in Oklahoma City and Tulsa emphasized that this group was likely undercounted across the State because they are less visible than other categories of homeless. They emphasized that emergency shelters, as presently designed, do not meet the needs of families with children in terms of both privacy and safety.

The Point in Time data reveals less than 100 households comprised of only children. Of these 74 counted households, 35 live in emergency shelters and 39 are unsheltered. This population is likely significantly undercounted as youth who are homeless typically seek to avoid identification for fear of being returned to their homes. These young people often have specific needs for supportive services that are difficult to deliver because the population remains unseen. Homeless advocates in the State hold up Tulsa as a good example of the State for serving homeless youth. OKC's Be the Change is also a leader in identifying and providing needed service to homeless youth in the metropolitan region. The problem of homeless youth is not just isolated to large urban areas. Mid-sized and smaller cities also look for innovative ways to service. Cities like El Reno and Enid have their own drop in centers for homeless youth. Social networks in smaller cities fill similar functions.

Oklahoma City public schools also tracks homeless students within the district. There are homeless students attending 78 elementary and middle schools in Oklahoma City. This data suggests that the majority of the city's homeless students are African American or Hispanic. There are 664 homeless African American students, 724 homeless Hispanic students, and 254 homeless Caucasian students. There are ten high schools in OKC that have reported having homeless students. Douglass and Capitol Hill high schools have the highest homeless student populations. Douglass has 50 homeless African American students. Capitol Hill has 49 homeless Hispanic students. The majority of these students can be classified as "couch homeless" or doubled up, meaning that they are finding

shelter with extended family members, friends, and other non-relatives for a brief amount of time due to hardship.

The majority of Oklahoma's homeless population is over 24 years old. This classification system is not particularly useful in helping to assess the number and needs of the elderly population, which is reported to be a substantial subset of this population.

The Point in Time data categorizes the homeless population into two categories: Hispanic/Latino and Non-Hispanic/Non-Latino. The lion's share of homeless in Oklahoma are Non-Hispanic/Non-Latino (3,528). In Oklahoma City, 62% of the homeless served are classified a Caucasian. Twenty-five percent of the homeless population is African American. Seven percent of the homeless in OKC identify as Native American. Less than one percent of those identified as homeless in OKC are Asian. By contrast, a relative small fraction of the State's homeless population is Hispanic/Latino. The Point in Time data identified a relatively small Hispanic homeless population, including less than 250 individuals. This follows OKC counts that identify 7% of the city's homeless population as Hispanic. Homeless advocates in OKC indicate that social networks, including churches and extended families, keep the number of homeless in the Hispanic population proportionately lower than their Non-Hispanic/Non-Latino counterparts. However, these individual likely classify as "couch homeless" and are in a continued state of being vulnerable to becoming homeless.

The PIT data indicates that are more homeless males (2,237) than females (1,535). This follows national trends. Care should be taken when interpreting this data, as women are less likely to participate in Point in Time counts. There is a growing population of homeless in Oklahoma that identifies as transgender. PIT data identified 5 individuals identifying as transgender. This population is likely much higher and will continue to grow due to family and national attitudes about this population. Transgender populations may require special housing accommodations, especially in the emergency shelter context, to provide for their social and emotional needs.

Another group of homeless individuals that merits special consideration in the distribution of resources is those identified as having special needs. This classification includes persons with "physical, mental or behavioral disabilities, persons with HIV/AIDS and/or persons with alcohol or drug addictions. The Point in Time data estimates that there are nearly 1300 homeless persons with special needs in OKC alone.

The Point in Time data is coarse and does not do an effectively track homeless populations with specific needs, such as those persons who are homeless and living with HIV/AIDS. This special population of homeless is likely growing in Oklahoma. According to the Oklahoma State Department of Health there were an estimated 5,375 cases of persons living with HIV/AIDS by the end of 2013. There were a total of 437 newly diagnosed HIV/AIDS cases in 2013 for the state of Oklahoma. The vast majority of populations living with HIV/AIDS (nearly 72%) reside in urban areas. In OKC alone, the Point in Time data identified at least 25 homeless individuals living with HIV/AIDS. This is likely an undercount. Based on this information and anecdotal data from homeless service providers, special effort must be made to understand the housing, medical, and supportive services needs of homeless persons living with HIV/AIDS.

Shelter is crucial for homeless persons with HIV/AIDS in the management of this illness. However, traditional shelter setting(s) may not be suitable to house this population. Those with suppressed immune systems are vulnerable to the spread of infectious diseases which may be present in open shelters. In addition, shelter personnel may not be properly trained in handling AIDS related issues. For these reasons, as well as resources made available by the federal government, homeless persons living with HIV/AIDS are often given housing choice vouchers, created by HOPWA, so that they secure housing on the private market. This can be challenging in constrained rental markets like Norman, for example, where affordable housing options are limited. It is estimated that more than 60 individuals living in OKC with HIV/AIDS are homeless because they have been unable to find a landlord that will accept their housing choice voucher.

State Name: Oklahoma**Point-in Time Date: 1/29/2015****Summary by household type reported:**

Rural Areas

Homelessness in the rural areas of the State is much more difficult to calculate. Given the population density of the State, the majority of services that serve the homeless are concentrated in urban and semi-urban areas. Even if beds are available, many rural homeless lack knowledge about the services or a means to travel to receive the same. As a part of this study, OU students were dispatched into the 77 counties in the State to, among other issues, attempt to understand the degree to which there is rural homelessness in the State. Their qualitative inquiries yielded very little data, in part, because rural homeless is difficult to identify and often ignored. For the purposes of this report, a literature review was prepared on the topic of rural homelessness in the United States. The goals of this academic review is to assist policymakers and service providers in the State in uncovering the dimensions of this illusive population.

In the U.S., the rural homeless population is predominantly Caucasian. This population is comprised of single mothers, widowed wives and husbands, divorced and separated men and women, and young people. A study examining rural homelessness in Ohio found that nearly 40% of those who classify as homeless were divorced, separated, or widowed (First, Richard J., John C. Rife, and Beverly G. Toomey, 1994, pg. 101). Ohio's rural homeless were also relatively young. Close to 80% of homeless population in this study was between the ages of 18 and 39 years old (First et al, 1994, pg. 101). Rural homelessness is often less visible than urban homelessness because these populations commonly take shelter are at a friend's house, in their vehicles, or on abandoned properties. These populations can also be found on "...campgrounds or in hollows, desert canyons, farmers' fields, state parks, and highway rest areas" (Milbourne and Cloke, 2006, pg. 17).

The causes of rural homelessness mirror, in most ways, the plight of the urban homeless. The study of homelessness in rural Ohio revealed family problems and substance abuse issues as primary causes of rural homelessness. The incidence of homelessness resulting from situations of domestic violence is high in rural areas (Cummins et al, 1998). Substance abuse issues are a common cause for homelessness in rural America. The literature reveals that this population tends to be homeless because they have isolated themselves from family and people who want to help (First et al, 1994). In the case of both domestic violence and substance abuse, it is often difficult for these individuals to find shelter and the supportive services they require in rural areas where options are limited, if available at all. The thought of moving to an urban area to find both shelter and supportive services is sometimes not considered at all by these vulnerable populations.

Rural areas are also more prone to the kind of poverty that puts individuals and families at risk for homelessness. The number of people living at or below the poverty line in rural places is higher than anywhere else in the United States (Moore, 2001). The statement "rural homelessness is a microcosm of national economic and political developments" cannot be truer for American rural communities (Vissing, 1996, pg. 103). The disinvestment of small towns and their inability to attract long-term sustainable business development, cripples a small town's economy. In effect, this is a main contributor for why poverty is such a common theme for rural communities. As a result, the State should carefully consider its investments in rural Oklahoma. While there is a need for shelter in these places, the construction of this housing type should be weighed with long term opportunities for employment in the area.

It is not surprising that rural areas typically lack both emergency shelters and temporary housing options. Services that provide temporary housing and provide relief and support services for those who cannot find food are virtually nonexistent in rural communities across the United States (Moore, 2001). Sheltering the homeless is undercapitalized in rural areas because communities do not see a concentration of homeless individuals (Vissing, 1996, pg. 146). As a result, the homeless must satisfice where they are. For instance, for families who are homeless, some of them use a friend's house to store clothes or to seek shelter, while some receive assistance from churches (Cummins et al, 1998). Others migrate to urban areas where services are available and more accessible (Rollinson, Paul A., and John T. Pardeck, 2006).

The absence of affordable housing in rural areas is a root cause of homelessness (Levinson, David, and Marcy Ross, 2007). In fact, it was noticed that many of the people were receiving monetary assistance or previously had some money saved up to spend on housing, but these measures were not enough to keep them afloat (First et al, 1994, pg. 101). Housing costs rise in rural areas typically rise as a result of competition for a limited amount of housing stock. In some rural areas, low income families are spending 70% of their household incomes on housing, sometimes substandard housing (Vissing, 1996, pg. 124). As Levinson et al explain, "housing costs are lower but so are incomes, with the result of placing a heavier rent burden in the community" (Levinson, David, and Marcy Ross, 2007, pg. 45). Renters in rural communities, as a result, are far more susceptible to becoming homeless than their urban or suburban counterparts because they do not have the financial safety net sometimes associated with homeownership (Fitchen, 1991, pg. 193).

While this brief review of the literature describes the state of homelessness across rural America, many of the lessons learned are easily translated to an Oklahoma context. The condition and supply of affordable housing units is relatively poor in many rural portions of the State. Rent burden, as more fully characterized in the Consolidated Housing Affordability Strategy (CHAS) section of this report, is high. This leaves families living and working in relatively weak economies vulnerable to homelessness. Once homeless, supportive services in these areas are relatively limited, especially for the chronically homeless, those with substance abuse problems, and victims of domestic violence. Services available to these populations in urban areas may not be attractive to individuals and families who are accustomed to life in rural communities. Where practicable, more consideration must be given to providing supportive services and temporary and permanent housing to homeless populations wishing to remain in rural areas.

At Risk For Homelessness

Poverty is the primary factor that places Oklahoma families at risk of being homeless. There are many factors experienced by those living in poverty which leave residents more or less vulnerable to homelessness. For the purposes of this study, a social vulnerability index has been constructed to measure the likelihood or risk that residents living in poverty might find themselves homeless. This index includes factors such as single headed households, concentration of young and elderly residents, the reliance on public transportation, private vehicle availability, racial composition, housing type, presence or absence of a telephone in the household, amongst other factors. This index is additive and seeks to understand the collective impact of these factors in estimating the vulnerability of a local population. While employed in more significant detail in the section of this report focusing on disaster resiliency, this tool is useful in identifying areas of the State where populations may be most vulnerable to homelessness. The index utilized in this section is different from the one crafted in the Disaster Resiliency chapter of this report in that it estimates social vulnerability at the county level, rather than by census tract. The decision to study vulnerability to homelessness at the county level was made to help policymakers understand, more generally, where resources and economic interventions are most necessary to stave off the potential effects of homelessness. This maps presents vulnerability to homelessness on the county level, depicting the most vulnerable counties in dark green.

Social Vulnerability - Impacts on Housing & Disaster Resiliency

The Oklahoma families most likely at risk are those living in public and subsidized housing. They live below the poverty line. Even those who are employed, remain vulnerable to homeless because an unexpected expense, like a medical emergency, threatens their ability to pay for their share of rent owed or utilities. A missed payment can easily lead to eviction and homeless.

Through the U.S. Department of Housing and Urban Development, Oklahoma service providers have been vested with more than 24,000 housing choice vouchers. Their spatial distribution is outlined below. Of significance is the size of the waiting lists for public housing units and housing choice vouchers in cities across the State. These individuals are the most vulnerable to being homeless.

		Authorized Vouchers	Public Housing Waiting List	Voucher waiting list

Oklahoma		24,612		

Findings and Recommendations

There remains a significant homeless population in the urban and rural areas of Oklahoma. This population is very likely significantly undercounted in the Point In Time data. Local homeless advocates and service providers are highly aware of this undercount and are using innovative tools to find and serve the homeless. One example of these extra efforts to identify homeless populations is the data being collected by schools about the number of youth who are homeless or “couch” homeless. In this study, the research team also considered those families living at the economic margins and makes the case for the need for funding to support the housing needs of those that live a pay check or two from being homeless.

Those living with HIV/AIDS tend to underreport their status and needs. Given the cost of medical care these individuals face, the need for permanent and stable housing is critical. Housing providers must work to ensure that there are enough units for this undercounted population. Working with county health care providers, OHFA is much more likely to accurately estimate the size and needs of this population of homeless and potentially homeless persons. Special care must be taken to ascertain the barriers these individuals face when using vouchers to secure housing in the marketplace.

Victims of domestic violence require housing and supportive services across the State. CoCs with high supportive services tend to better accommodate the housing needs of these population. Cleveland County provides a good model for the State. However, many homeless victims of domestic violence live in rural areas that are underserved. Efforts must be undertaken to work with social services providers, schools, churches, and the police to help identify these individuals and to lead them to available housing and supportive services.

While not mentioned in the PIT data, estimates must be prepared to calculate the number and needs of homeless populations with felonies. In particular, there has been a rise nationally in the number of homeless sex offenders. Zoning regulations and discrimination from the private market has pushed many registered sex offenders to the periphery of many communities. This population must not be forgotten by policymakers.

The size of the homeless veteran population is decreasing as a result of national initiatives to end homelessness for veterans in Oklahoma. The needs of homeless veterans appear to be highest in areas of the State near VA facilities. Permanent housing should be constructed at a higher rate in these areas to meet demand. Care should be taken to make certain that the housing constructed is built to meet the psychological needs of veterans, particularly those suffering from PTSD.

Rural homelessness, in general, is a challenge to assess and characterize. The rate of homelessness in rural areas is most likely much higher than annual counts demonstrate. The majority of rural homeless likely find shelter out of public view. Some may shelter in their cars, in undeveloped areas or in the homes of those who allow them to stay. They are not likely to find their way to urban areas given their lack of transportation options and preferences for rural living. Programs that are developed to provide housing for the rural homeless must be developed to allow sheltering in place where possible.

Waiting lists for public housing and section 8 vouchers are high across the State. This is not uncommon to Oklahoma. However, when we are considering the size of the population that is at risk to homelessness, these waiting lists are an important factor to consider. Resources should be spent in a manner which is preventative so that these individuals' and families' needs are met before they become homeless.

The absence of affordable housing alternatives across some parts of the State is the largest threat to homelessness. In markets that are constrained by an aging housing stock or those that are rapidly growing, individuals and families who live on the economic margins are at risk for becoming homeless. Communities must work to ensure that zoning regulations promote the development of housing types serving all income levels, including the construction of affordable housing to meet the needs of the presently homeless and those at risk for becoming the same. Funding distributions should be targeted to communities with the highest needs who are willing to do what is necessary to meet the needs of the homeless and those at risk for the same.

Fair Housing

Summary

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity.

These findings are intended to aid the Oklahoma Housing Finance Agency (OHFA) determine the location of new affordable housing in relation to vulnerable populations and explore ways to expand the opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Key Findings:

- 70% of affordable housing units are located in census tracts marked by poverty
- 62% of affordable housing is located in census tracts where a majority of the residents are not white
- 13% of affordable housing units have no access to transit services and 56% have access to limited service, on-demand transit
- 2.6% of affordable housing units have limited access to a hospital
- 7.8% of affordable housing units are located in food deserts

Recommendations:

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

What is Fair Housing?

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. On one hand, this protects the ability of individuals to obtain housing regardless of personal characteristics such as race, skin color, national origin, gender, familial status, or disability. It also focuses attention on more subtle forms of discrimination that cluster low-income housing in ways that inhibit the ability of communities to access services and amenities that support self-sufficiency and autonomy.

Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity. In 2014, HUD released the Affirmatively Furthering Fair Housing (AFFH) rule for public comment. The draft rule

“directs HUD’s program participants to take significant actions to overcome historic patterns of segregation, achieve truly balanced and integrated living patterns, promote fair housing choice, and foster inclusive communities that are free from discrimination” (HUD 2015). In 2015, the United States Supreme Court provided legal support for actions taken to remedy patterns that impede the upward mobility and opportunity of low-income individuals and communities. In the case of Texas Department of Housing and Community Affairs v. The Inclusive Communities Project the court reiterated the need to address disparate impacts in considering the location of affordable housing and reinforced the importance of AFFH (Bostic 2015). Housing discrimination from this perspective is not only felt by individual residents, it can also be the result of actions that work to limit the opportunities to improve the quality of life in local communities.

Approach

In Oklahoma, a combination of federal and state programs work to support the opportunities provided to individuals and families who rest safely and comfortably in an apartment or home. Here we use publicly available data for units that are part of the Low Income Housing Tax Credit (LIHTC) Program, the Rural Rental Housing Loans, or OHFA administered programs such as Oklahoma Affordable Housing Tax Credit (AHTC), the HOME investment partnership program, the Section 8 Housing Choice Voucher Program, and multi-family bonds. Collectively, these programs represent state efforts to assist individuals who are unable to afford housing.

Indicators of disparate impact vary but seem to contingent upon the contextual characteristics of a particular neighborhood. In an effort to help communities investigate and understand community level disparate impacts, HUD created a Fair Housing Assessment Tool (http://www.huduser.gov/portal/affht_pt.html#affh). The assessment tool includes measures on indicators of disparate impacts based on the clustering of potentially vulnerable populations, including:

- Race/Ethnicity of Residents
- National Origin of Residents
- English Proficiency of Residents
- Job Accessibility
- Transit Accessibility
- Level of Poverty
- Environmental Exposure (e.g. pollution, crime, food, health care, etc.)
- Disability

This report uses the Fair Housing Assessment Tool in conjunction with readily available data to initiate a more thorough investigation of the potential for disparate impacts in the state. The findings are intended to aid the Oklahoma Housing Finance Agency regarding future location of new fair housing in relation to vulnerable populations and the future opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Data

Data for this report are compiled from a variety of sources including the United States Census, the University of Oklahoma Center for Spatial Analysis, and primary data collected as part of ongoing research efforts at the University of Oklahoma. Data are aggregated into census tracts and reported statewide as well as by county (see Appendix 1).

1. Urban/Rural

A majority of the affordable housing in Oklahoma is situated in rural communities. Urban communities including Edmond, Lawton, Norman, Oklahoma City, and Tulsa are home to just over 1/3 of the affordable housing units in the state.

	Total Affordable Housing Units	Situated an Urban Setting	Situated in a Rural Setting
OHFA	35,292	11,699 (33.1%)	23,593 (66.9%)
515	5,384	0	5,384 (100%)
LIHTC	23,537	8,255 (35.1%)	15,282 (64.9%)
Total	64,213	19,954 (31.1%)	44,259 (68.9%)

2. Poverty

Approximately 70% of affordable housing units in Oklahoma are located in census tracts where the number of residents living in poverty is above the state average. About half of these units are located in areas of extreme poverty, where the number of individuals who are economically vulnerable exceeds 994, more than one standard deviation (411) from the mean (583).

	Total Affordable Housing Units	Situated in Poverty	Situated in Extreme Poverty
OHFA	35,292	12,295 (34.8%)	12,464 (35.3%)
515	5,384	2,093 (38.9%)	1,839 (34.2%)
LIHTC	23,537	7,483 (31.8%)	8,924 (38.0%)
Total	64,213	21,796 (33.9%)	23,227 (36.2%)

3. Non-white Enclaves

Just over 60% of affordable housing units in Oklahoma are located in census tracts where a majority of the residents are non-white. With just fewer than 24% of the total affordable housing units in census tracts heavily populated with residents who are not white – identified as census tracts where the number of non-white residents is more than 1,595 - one standard deviation (653) greater than the mean (542).

	Total Affordable Housing Units	Situated in Majority Non-White Community	Situated in Heavily Non-White Community
OHFA	35,292	12,814 (36.3%)	7,907 (22.4%)
515	5,384	2,229 (41.4%)	1,288 (23.9%)
LIHTC	23,537	10,285 (43.7%)	5,677 (24.1%)
Total	64,213	25,328 (39.4%)	14,872 (23.2%)

4. Immigrant Enclaves

One-third of affordable housing units in Oklahoma are located in census tracts where more than the average number of residents are immigrants. About half of these units are located in areas dense with immigrants, where the number of individuals who are not citizen exceeds 349, more than one standard deviation (219) from the mean (130).

	Total Affordable Housing Units	Situated in Immigrant Enclave	Situated in Heavily Immigrant Enclave
OHFA	35,292	8,114 (23.0%)	3,358 (9.5%)
515	5,384	1,017 (18.9%)	159 (3.0%)
LIHTC	23,537	5,457 (23.2%)	3,364 (14.3%)
Total	64,213	14,588 (22.7%)	6,881 (10.7%)

5. Limited English Proficiency

Almost 17,000 existing affordable housing units in Oklahoma are located in census tracts where more residents than average do not speak English very well. A little more than half of these units are located in areas dense with individuals with limited English proficiency, where the number of individuals who speak English less than very well exceeds 380, more than one standard deviation (240) from the mean (140).

	Total Affordable Housing Units	Community with more than average number of Limited English Speakers	Community dense with limited English Speakers
OHFA	35,292	6,250 (17.7%)	3,122 (8.8%)
515	5,384	799 (14.8%)	240 (4.5%)
LIHTC	23,537	4,034 (17.1%)	3,475 (14.8%)
Total	64,213	11,083 (17.3%)	6,837 (10.6%)

6. Disability

Almost 60% of existing affordable housing units in Oklahoma are located in census tracts where more residents than average have a disability. A little more than half of these units are located in areas dense with individuals with a disability, where the number of individuals who are disabled is greater than 831, more than one standard deviation (289) from the mean (542).

	Total Affordable Housing Units	Community with more than average number of Disabled Residents	Community dense with Disabled Residents
OHFA	35,292	10,098 (28.6%)	10,722 (30.4%)
515	5,384	1,686 (31.3%)	2,594 (48.8%)
LIHTC	23,537	7,074 (30.1%)	6,289 (26.7%)
Total	64,213	18,858 (29.4%)	19,605 (30.5%)

7. Hospitals

There are no affordable housing units more than 30 miles from a hospital. Approximately 2.6% of affordable housing units are farther than 15 miles from the nearest hospital. As indicated by the larger percentage of Rural Rental Housing Loan units, most of these are located in rural areas.

	Total Affordable Housing Units	More than 15 miles to nearest hospital	More than 30 miles to nearest hospital
OHFA	35,292	628 (1.8%)	0
515	5,384	500 (9.3%)	0
LIHTC	23,537	532 (2.3%)	0
Total	64,213	1,660 (2.6%)	0

8. Grocery Stores

Approximately 7.8% of affordable housing units are in areas that are classified as food deserts. According to the United States Department of Agriculture, food deserts exist in urban environments further than 1 mile from a grocery store and in rural environments further than 10 miles from a grocery store (<https://apps.ams.usda.gov/fooddeserts/foodDeserts.aspx>).

	Total Affordable Housing Units	Urban > 1 Mile from nearest Grocer	Rural > 10 miles to nearest Grocer
OHFA	35,292	1,493 (4.2%)	1,097 (3.1%)
515	5,384	0	466 (8.7%)
LIHTC	23,537	1,175 (5.0%)	769 (3.3%)
Total	64,213	2,668 (4.2%)	2,332 (3.6%)

9. Transit

A little over 69% of affordable housing in Oklahoma is located in a census tract with limited or no access to transit services. This includes 8,367 affordable housing units in areas that lack public transit services all together as well as 36,363 units that are situated in areas that have on-demand transportation services that often have limited operation times and may only serve elderly and disabled populations or those going to a medical appointment.

	Total Affordable Housing Units	No Transit	Urban Transit	On-Demand Transit
OHFA	35,292	4,035 (11.4%)	11,265 (31.9%)	19,992 (56.6%)
515	5,384	767 (14.2%)	0	4,617 (85.8%)
LIHTC	23,537	3,565 (15.1%)	8,217 (34.9%)	11,755 (49.9%)
Total	64,213	8,367 (13.0%)	19,482 (30.3%)	36,363 (56.6%)

What does this mean for Oklahoma?

This report suggests a number of possible ways forward for the Oklahoma Housing Finance Agency as it continues to support quality low-income and workforce housing for residents of the state. Across a number of indicators of opportunity, affordable housing in the state clusters in ways that raise concerns about the opportunities available to affordable housing residents in comparison to other residents.

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

Moving ahead, Oklahoma should be wary of a narrowly focused vision focused solely on the problems of existing affordable housing and the integration of these residents into other communities. The relocation of residents harkens back to the physical and social destruction brought about by urban renewal. Such an approach pits efforts to enhance existing affordable housing through community development against efforts to build a more integrated and diverse society (Goetz 2015). Rather, Oklahoma has the opportunity to work closely with local municipalities to improve the conditions of current affordable housing communities while simultaneously advancing integration of low-income and workforce housing through the construction in new settings.

For future new development, a number of case studies and emerging scholarship on the importance of neighborhood effects provide guidance on possible ways forward for Oklahoma. For instance, in El Paso, Texas a public private partnership between the Housing Authority of the City of El Paso and private developers led to the development of a mixed income housing development. Eastside Crossings (<http://www.hacep.org/about-us/eastside-crossings>) provides 74 traditional affordable housing units, 79 affordable housing units, and 45 market rate units in partnership with the Texas Department of Housing and Community Affairs (Housing Authority of El Paso 2015). In Sacramento, partnership between private developers and the Capital Area Redevelopment Authority resulted in the adaptive reuse of a building listed on the National Register of Historic Buildings into affordable Housing (Vellinga 2015). Located in a dense, walkable, transit-oriented community, the Warehouse Artist Lofts (<http://www.rstreetwal.com>) are home to 116 units, 86 of which are affordable and 13,000 square feet of ground floor retail.

For existing affordable housing, strategies exist to help enhance localized opportunities and build a culture of community participation around housing. Across the nation, there is a need to refocus the discussion away from the deficits found in many communities to look for closely at opportunities (Lens 2015) and to think about the consequences of physical, social, and economic isolation (Clarke, Morenoff, Debbink, Golberstein, Elliott, & Lantz, 2014.).

The Oklahoma Housing Finance Agency may need to collaborate more closely with other governmental agencies to develop comprehensive strategies that not only improve existing housing but also work toward enhancing access to food, recreation, amenities, jobs, and quality schools. By doing so, OHFA could help build the social and physical resiliency of these communities so that residents would be empowered to choose for themselves whether or not they want to stay and be part of their existing community or move elsewhere in search of a better quality of life. A set of tools for doing some of this work is available through Policy Link (<http://www.policylink.org/equity-tools/equitable-development-toolkit/about-toolkit>). For those who are relocated due to circumstances that make staying in place impossible, intensive case management may be required to ensure that these residents avoid pitfalls and thrive in a new environment (Theodos, Popkin, Guernsey, & Getsinger, 2010). But evidence continues to suggest that stability, particularly in the lives of children, is an essential part of ensuring that everyone has the opportunity to succeed and thrive (HUD 2014).

Lead-Based Paint Hazards

Findings / Health and Well-being

Lead is known to be highly toxic particularly to young children 5 years of age and under. Excessive exposure results in reduced intelligence, impaired hearing, reduced stature and a host of other negative health effects. It is well documented that a common source of lead exposure for children is lead-based paint in older housing along with the dust and soil it generates. Children are exposed to lead-based paint most commonly by directly eating paint chips or indirectly by ingesting lead-contaminated house dust or soil through normal hand-to-mouth contact.

For purposes of this analysis, the federal definition of “lead-based paint hazard” at 24 CFR Part 35.86 was applied. Under this definition, lead-based paint hazard is defined as, “...any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as established by the appropriate Federal agency.”

It is noteworthy estimates presented can only be stated as dwellings that “potentially” have LBP hazards because there are no real-time surveys or studies of residential structures built prior to 1978. However, there have been previous estimations provided in the state’s Consolidated Plan.

Statewide Findings

Using methodology which will be discussed later in this section, we have estimated the number of housing units in Oklahoma with lead-based paint hazards as defined in 24 CFR Part 35.86. Our estimates are shown in the following table.

Lead-Based Paint Hazards in Oklahoma		
	Number	Percent
Total Housing Units	1,432,730	
Total Housing Units with Lead-Based Paint Hazards	240,229	16.8%
Owner-Occupied Units w/LBP Hazards	159,861	66.5%
Renter-Occupied Units w/LBP Hazards	80,368	33.5%
Housing Units w/LBP Hazards Occupied by Low-to-Moderate Income Households	113,931	47.4%
Housing Units w/LBP Hazards with Children < 6 Years of Age Present	37,426	15.6%
Housing Units w/LBP Hazards Occupied by LMI Households and Children < 6 Years of Age Present	19,761	52.8%

Sources: American Healthy Homes Survey Table 5-1 & CHASTables 12 & 13

As shown, we estimate that there are 240,229 housing units in Oklahoma containing lead-based paint hazards, representing 16.8% of Oklahoma’s total housing stock. 66.5% of those units are owner-occupied, while 33.5% are renter-occupied. Of the 240,229 housing units containing lead-based paint hazards, 113,931 units, or 47.4%, are occupied by households with low-to-moderate incomes as defined by HUD. Among all housing units with lead-based paint hazards, 37,426 units have children under the age of six present, and 52.8% of those units, or 19,761 units total, are households with low-to-moderate incomes. Exhibits 2 through 6, found at the end of this section, graphically summarize our statewide findings at a county level.

Disaster Resiliency/ Economy and Society, Infrastructure and Environment

While communities strive to address lead-based paint hazards through education and removal when detected in connection with federally funded local housing rehabilitation initiatives, hazard detection and mitigation may have special considerations in terms of disaster resiliency.

Many disasters are accompanied by widespread damage to residential structures often times scattering building material debris across the landscape necessitating removal by heavy equipment and disposal in landfills. When building materials contaminated with lead-based paint become part of non-contaminated debris disposal, it presents an environmental hazard that can span well beyond recovery and rebuilding efforts.

Leadership and Strategy

Given the albeit large but finite number of potential housing units with lead hazards, the state and local communities may wish to consider initiatives aimed at reducing and/or eventually eliminating residential lead-based paint hazards, particularly in housing occupied by low and moderate income households with young children present. One such initiative could be the use of the state's various federal and state housing programs' competitive funding selection criteria. By designing rating criteria that specifically awards points to applicants that purposefully seek out properties within counties known to have higher percentages of lead hazards, housing developers along with those engaged in rehabilitation may be incentivized to engage in hazard mitigation.

State and local governments may wish to capitalize on the results of this study by using the data to support competitive applications to the Federal Home Loan Bank Topeka's Affordable Housing Program funding for owner occupied rehabilitation which, among other competitive rating criteria, awards points for the "Abatement of Hazardous Environmental Conditions". Similarly, this report's data may be used to document hazards and need in applications for competitive health care grants offered at the federal level.

Similar to initiatives undertaken by USHUD, the state may want to consider undertaking a real-time sample survey of homes built prior to 1978 across the state's community sizes and counties to more accurately ascertain the extent of the hazard and/or conducting real-time surveys of LBP Risk Assessors licensed by the ODEQ.

Survey of Previous Lead-based Paint Studies

Using a combination of US Census Bureau and US Department of Housing and Urban Development Comprehensive Housing Affordability Strategy data and age of housing stock built prior to 1980, the Oklahoma Department of Commerce's, "State of Oklahoma Five-Year E-Consolidated Plan FY 2014 – 2018" estimated 59% of the owner occupied and 65% of the renter occupied housing had the potential of containing lead-based paint. To address lead paint hazards, the Consolidated Plan recommended assessment of hazard presence be conducted at the point dwelling rehabilitation is undertaken and that nonprofits advise persons receiving federal rehabilitating assistance regarding the dangers of lead exposure.

At the national level, between 1998 and 2000, USHUD Office of Health Homes and Lead Hazard Control staff and the National Institute of Environmental Health Sciences conducted a real-time

random sampling of 831 permanently occupied housing units (multifamily, single family and mobile homes) taken from all 50 states and the District of Columbia. The results indicated an estimated 38 million (39% of the 96 million total housing units) of the nation's housing units had lead-based paint hazards. Of that total, 24 million had significant lead hazards with 1.2 million of those units occupied by low income families. It was further estimate that 35% of all low income housing had lead-based paint hazards. The study also noted the prevalence of lead-based paint increases with age of housing. However, most painted surfaces, even in older homes don't have lead paint. Geography was found to be related to the incidence of lead-based paint with the Northeast and Midwest having 2 times the prevalence of lead paint than the South and West. Finally, the study recommends "public-private sector resources be directed units posing the greatest risk" as a preventive measure to avoid lead poisoning.

In April 2011, the U.S. Department of Housing and Urban Development, Office of Healthy Homes and Lead Hazard Control updated its 1998-2000 nationwide report in its publication, "American Healthy Homes Survey, Lead and Arsenic Findings". This report, conducted from June 2005 through March 2006, estimated 37.1 million homes (34.9%) out of a total of 106 million total housing units have lead-based paint somewhere in the building. Of the 65.6 million homes built before 1978, 34.4 million (52%) have lead-based paint. The study reaffirmed the previous finding that the prevalence of lead-based paint is higher in the Northeast and Midwest parts of the United States than South and West. It also confirmed earlier finding that the incidence of lead-based paint increases with age of housing with 86% of the homes built prior to 1940 containing lead. An estimated 3.6 million homes with children less than 6 years of age have lead-based paint hazards of which 1.1 million are low income households. Of the 16.8 million homes with children under the age of 6, 5.7 million (34%) have lead-based paint, about the same incidence of lead-based paint in all homes.

In June 2006, the Oklahoma State Department of Health's Childhood Lead Poisoning Prevention Program (OCLPPP) received a 5-year project grant "Oklahoma Childhood Lead Poisoning Prevention Program Focusing in High Risk Groups". That program focused on communities evidencing high numbers of children 6-72 months of age who are at high risk for lead poisoning.

In order to more effectively target high-risk areas and populations, the OCLPPP identified 21 high-risk target area (HRTA) zip codes (see Exhibit #1) located within Oklahoma, Tulsa, Muskogee, Jackson, Okmulgee, Ottawa, Kay, Garfield, and Hughes counties. These 21 zip codes were narrowed from a list of 57 zip codes out of the state's approximately 700 zip codes that with populations of 5,000 or more persons; greater than or equal to 22% of housing stock built prior to 1950; and, greater than or equal to 18% of children under the age of 6 years living below the poverty level.

The 57 zip codes were further compared and evaluated based on selected characteristics such as EBL cases and proportion of minority population. Zip codes with higher EBL prevalence and/or minority populations (Hispanic/African American/American Indian) were ranked higher and given the designation as HRTA zip codes.

Le Flore County Findings

The number of housing units in Le Flore County containing lead-based paint hazards can be estimated by applying the percentages of housing units with such hazards reported by the American Healthy

Homes Survey, to the number of occupied homes in Le Flore County, by year of construction. The following table presents the percentage of housing units in the Census Bureau South Region based on the AHHS findings.

Housing Units in the South Census Region with Lead-Based Paint Hazards by Year of Construction			
Year of Construction	No. of Housing Units (000s)	Units w/ LBP Hazards (000s)	Percent of Units w/ LBP Hazards
1978-2005	18,625	664	3.6%
1960-1977	11,724	1,311	11.2%
1940-1959	5,575	2,145	38.5%
1939 or Earlier	3,072	1,947	63.4%
Total	38,996	6,067	15.6%

Source: U.S. Dept. of Housing and Urban Development, American Healthy Homes Survey, Table 5-1

These percentages can then be applied to the number of housing units in Le Flore County, by year of construction and by tenure (owner-occupied versus renter-occupied), as reported by HUD's Comprehensive Housing Affordability Strategy (CHAS) data for Le Flore County.

Total Housing Units in Le Flore County with Lead-Based Paint Hazards by Tenure			
Total Owner-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	6,891	3.57%	246
1960-1977	3,924	11.18%	439
1940-1959	1,820	38.48%	700
1939 or Earlier	1,065	63.38%	675
Total	13,700	15.03%	2,060
Total Renter-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	2,242	3.57%	80
1960-1977	1,593	11.18%	178
1940-1959	725	38.48%	279
1939 or Earlier	415	63.38%	263
Total	4,975	16.08%	800
Total Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	9,133	3.57%	326
1960-1977	5,517	11.18%	617
1940-1959	2,545	38.48%	979
1939 or Earlier	1,480	63.38%	938
Total	18,675	15.31%	2,860

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

Finally, we can use the same methodology to estimate the number of housing units in Le Flore County with lead-based paint hazards, occupied by households with low-to-moderate incomes, by tenure:

**Housing Units in Le Flore County with Lead-Based Paint Hazards by Tenure,
Occupied by Low-Income Families**

Owner-Occupied Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,080	3.57%	38
1960-1977	716	11.18%	80
1940-1959	415	38.48%	160
1939 or Earlier	275	63.38%	174
Total	2,485	18.21%	452

Renter-Occupied Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	759	3.57%	27
1960-1977	707	11.18%	79
1940-1959	250	38.48%	96
1939 or Earlier	245	63.38%	155
Total	1,960	18.24%	358

Total Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,838	3.57%	66
1960-1977	1,422	11.18%	159
1940-1959	665	38.48%	256
1939 or Earlier	520	63.38%	330
Total	4,445	18.22%	810

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

**Housing Units in Le Flore County with Lead-Based Paint Hazards by Tenure,
Occupied by Moderate-Income Families**

Owner-Occupied Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,007	3.57%	36
1960-1977	689	11.18%	77
1940-1959	355	38.48%	137
1939 or Earlier	295	63.38%	187
Total	2,345	18.61%	436

Renter-Occupied Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	441	3.57%	16
1960-1977	275	11.18%	31
1940-1959	150	38.48%	58
1939 or Earlier	50	63.38%	32
Total	915	14.84%	136

Total Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,447	3.57%	52
1960-1977	963	11.18%	108
1940-1959	505	38.48%	194
1939 or Earlier	345	63.38%	219
Total	3,260	17.55%	572

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

To conclude, we estimate that there are a total of 2,860 homes in Le Flore County containing lead-based paint hazards, 2,060 owner-occupied and 800 renter-occupied. Of the 2,860 homes in the county estimated to have lead-based paint hazards, 810 are estimated to be occupied by households with low-incomes (incomes less than 50% of Area Median Income), and 572 are estimated to be occupied by households with moderate incomes (between 50% and 80% of Area Median Income), for a total of 1,382 housing units in Le Flore County with lead-based paint hazards occupied by households with low or moderate incomes.

Lead-Based Paint Hazards in Homes with Children Present

Using the same methodology, we can estimate the number of housing units in Le Flore County occupied by households with children under the age of six present. For this analysis we apply the lead-based paint hazards percentages from the American Healthy Homes Survey to the data in HUD CHAS Table 13, which details housing units by year of construction, household income, and presence of children under the age of six. The data is presented in the following table:

Housing Units in Le Flore County with Lead-Based Paint Hazards with Children under Age 6 Present Occupied by Low or Moderate-Income Families			
Housing Units < 50% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	423	3.57%	15
1940-1977	337	19.98%	67
1939 or Earlier	80	63.38%	51
Total	840	15.85%	133
Housing Units 50%-80% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	337	3.57%	12
1940-1977	219	19.98%	44
1939 or Earlier	55	63.38%	35
Total	610	14.84%	91
Total LMI Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	759	3.57%	27
1940-1977	556	19.98%	111
1939 or Earlier	135	63.38%	86
Total	1,450	15.42%	224
Total Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,741	3.57%	62
1940-1977	1,340	19.98%	268
1939 or Earlier	230	63.38%	146
Total	3,310	14.36%	475

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 13

As shown, we estimate there are 475 housing units in Le Flore County with lead-based paint hazards and children under the age of six present, and that 224 of those housing units are occupied by families with low to moderate incomes.

Exhibit #1

Map 2: High-Risk Target Areas (HRTA) Zip Codes for Childhood Lead Poisoning

Legend

- High-Risk Target Area (HRTA) Zip Codes
- Other Zip Codes

Notes

The OCLPPP has identified 21 HRTA zip codes in Oklahoma. These zip codes are located in Garfield, Hughes, Jackson, Kay, Muskogee, Oklahoma, Okmulgee, Ottawa, and Tulsa Counties.

The HRTA zip codes include 73106, 73107, 73108, 73109, 73111, 73117, 73119, 73129, 73521, 73701, 74104, 74106, 74110, 74115, 74127, 74354, 74401, 74403, 74447, 74631, and 74848.

The HRTA zip codes are identified using the following criteria:

- 1- Zip codes having the highest proportion of pre-1950 housing;
- 2- Zip codes having the highest proportion of children under six years of age living in poverty;
- 3- Zip codes having high elevated blood lead level (EBLL) prevalence rate; and
- 4- Zip codes having the highest proportion of minority populations.

Conclusions

The previous analysis has attempted to describe the state of the residential housing market in Le Flore County, Oklahoma. Where possible, information regarding the population centers of the county was included to assess need on a community level. Much of the information is based on demographic information from local authorities and national information services. However, personal interviews were performed with property owners and managers, real estate professionals, and community officials in an effort to substantiate information from the national organizations and understand current market conditions. Several important issues regarding housing have become apparent through this analysis and are identified below.

Le Flore County saw positive population and household growth between the 2000 Census and the 2010 Census, as did the city of Poteau. Since 2010, estimates from both Nielsen SiteReports as well as the Census Bureau show stable to declining population levels. However, population and household growth forecasts through the year 2020 project positive net growth in both Le Flore County and Poteau, and some new housing will be necessary to meet this demand.

Le Flore County has a relatively high rate of renters with high rent costs (37.39%) as well as homeowners with high ownership costs (20.38%). The county's poverty rate is also significantly above the state, at 22.24% compared with 16.85% statewide.

In terms of disaster resiliency we note that 59 tornadoes have impacted the county between 1959 and 2014, with 147 injuries and 20 fatalities combined, including notable tornado activity in 2013. Floodplains are an issue in Le Flore County, with notable housing unit development in or very near floodplains in the communities of Spiro, Shady Point, Panama and Poteau.

Le Flore County is located within the Southeastern Oklahoma Continuum of Care (CoC), which provides services to the area's homeless populations among other functions. Throughout the entire Southeastern Oklahoma CoC, there are an estimated 442 homeless persons, 225 of which are estimated to be sheltered. Many in the region are chronically homeless (73 persons) and other notable subpopulations include the mentally ill and chronic substance abusers.

In terms of fair housing issues, many affordable housing units are located in areas at risk for poverty, and in areas near elevated numbers of persons with disabilities. 166 affordable housing units are located more than 15 miles from a hospital.

Due to the age of the county's housing stock, lead-based paint hazards are an issue, with an estimated 2,860 occupied housing units with such hazards, and 475 of those units occupied by low-to-moderate income households with children under the age of 6 present.

In summary, it is apparent that new housing in several categories is required in Le Flore County. Although projected population and household growth is relatively low, there remains need for housing for households that are rent (or ownership cost) overburdened; we note that all affordable housing in Poteau that was willing to disclose their current occupancy reported full occupancy with waiting lists.

Housing accessible to persons with disabilities should be an additional focus: over 20% of the population of Le Flore County has one or more disabilities. We also note that the population of persons age 62 and up is projected to increase 1.83% *per year* over the next five years; future housing development should take the specific needs of seniors into consideration as well. In summary, though future household growth forecasts for Le Flore County are relatively low, there is still housing need among households and families experiencing high housing costs, among persons with disabilities, and among seniors age 62 and up.

Addendum A
Acknowledgments

The Housing Needs Assessment research team extends a special thanks to the following individuals and organizations for their many contributions of data, program information and time that helped make this project possible:

University of Oklahoma Intern Team

David A. Puckett

Experience

Senior Director with Integra Realty Resources - Oklahoma, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since May 2002, Mr. Puckett has performed appraisal services consisting of narrative and summary real estate appraisals. All types of real property are encompassed-apartments, garden office buildings, manufacturing and warehouse industrial buildings, mobile home parks, restaurants and retail structures. Valuations and market studies have been prepared on proposed and existing structures. Appraisals have been made for estates, mortgage financing, equity participation and due diligence support. Prior to his employ at Integra Realty Resources - Oklahoma, Mr. Puckett was an employee of the University of Oklahoma Center for Business and Economic Development, working as a data analyst for the All County Affordable Housing Study commissioned by the Oklahoma Department of Commerce. Responsibilities included demographic, economic and real estate data collection from federal, state and local sources, as well as interviews of regional planning district, county and municipal officials, real estate market experts and local economic development experts. Mr. Puckett was responsible for site visits of 23 of the 77 Oklahoma counties, and personally authored 18 of the final reports. As an employee of IRR-Oklahoma, Mr. Puckett also performed the site visits and authored the final reports for four of the nine entitlement cities: Tulsa, Broken Arrow, Shawnee and Lawton. Mr. Puckett has also completed numerous housing market studies for use in applications for Federal Low-Income Housing Tax Credits in Oklahoma, Kansas, Missouri and Arkansas, and has performed market studies and appraisals for use in H.U.D.'s Multifamily Accelerated Processing (M.A.P.) program. Clients served include corporations, financial institutions, investment firms and public/private agencies.

Integra Realty Resources, Inc.

Corporate Profile

Integra Realty Resources, Inc. offers the most comprehensive property valuation and counseling coverage in North America with over 60 independently owned and operated offices located throughout the United States and the Caribbean. Integra was created for the purpose of combining the intimate knowledge of well-established local firms with the powerful resources and capabilities of a national company. Integra offers integrated technology, national data and information systems, as well as standardized valuation models and report formats for ease of client review and analysis. Integra's local offices have an average of 25 years of service in the local market, and virtually all are headed by a Senior Managing Director who is an MAI member of the Appraisal Institute.

INVITED LECTURES

University of Oklahoma
Department of Geography & Sustainability, Spring Colloquium
"Walking & Biking: Active Transportation and the Built Environment" January 2014

Kansas State University – Big 12 Fellowship

- The messiness of random sampling spatially Oct. 21, 2013
- Watershed Functions & Impacts from Development Oct. 21, 2013
- Creating an audit tool and operationalizing data Oct. 23, 2013
- Bicycle Facility Design & Planning Oct. 23, 2013
- Observational Methods Oct. 23, 2013
- Pedestrian Planning and Design: How does the environment we live in impact our lives? Oct. 2013
- Office workers – Sedentary by Practice: How can we integrate physical activity as part of daily routines at work – Formal presentation to faculty and students Oct. 2013

Department of Biostatistics and Epidemiology College of Public Health,
University of Oklahoma Health Sciences Center

- Planning, Built Environment, and Public Health: How does the environment we live in impact our lives? March 11, 2013

GRANT FUNDING

Received Ed Cline Faculty Development Award (\$1450), Spring 2014
Received Big 12 Faculty Fellowship Program Award (\$2500) June 2013
Received College of Architecture IT recipient (\$3450) July 2013
Sooner Parents Mini-Grant Funding (\$500) for student mentoring –prepared and submitted to assist RCPL Student Planning Association July 2013
Received Junior Faculty Research (\$7,000) for summer research on rural planning and physical activity opportunities. University of Oklahoma, Summer 2012
Robert Wood Johnson Active Living Research Dissertation Grant (\$25,000), Texas A&M University, 2007

SERVICE

University-Level Service

- Advisory Committee Course Management Systems (ACCMS) Spring 2013

College-Level Service

- Graduate Liaison for Regional & City Planning Division (Fall 2013 – present)
- Graduate Research & Curriculum Committee (Fall 2013 – present)
- RCPL orientation (Fall 2010- present)
- Search committee for new RCPL hires, new LA hire (Summer 2011, Summer 2012, Spring 2013, Spring 2014)
- IT Committee (member since 2012), Chair (Fall 2013-Spring 2014)
- Model Shop Committee (member since 2012-Fall 2013)
- RCPL website (2011- present)
- GHGI committee (Gould Hall Green Initiative) (Fall 2011)
- Co-hosting and arranging guest seminar: Dr. Chanam Lee – "The Built Environment and Disparities in Physical Activity", December 2012.

SERVICE

State-level / City-Level Service

- President – Health Equity Caucus, subgroup of Oklahoma Public Health Association
- APA/AICP member
- Bicycle Advisory Committee, City of Norman – Committee member (Spring 2013 – 2016)

National-Level Service

- Secretary/Treasurer of Faculty Women’s Interest Group (FWIG), committee under Association of Collegiate Schools of Planning (ACSP).
- CDC Weight of the Nation Conference planning, Built Environment & Transportation Subcommittee
- Reviewer for Journal of Physical Activity and Health

Bryce C. Lowery, PhD

Academic Experience

Assistant Professor	2014 - present
<i>College of Architecture – Division of Regional and City Planning</i>	
<i>University of Oklahoma – Norman, OK</i>	

Education

Doctor of Philosophy – Policy, Planning, and Development	2014
<i>Sol Price School of Public Policy</i>	
<i>University of Southern California - Los Angeles, CA</i>	
<i>Dissertation: Social Construction of the Experience Economy: The spatial ecology of outdoor advertising in Los Angeles</i>	
Jack Dyckman Award - Best Dissertation in Planning & Development	
Committee:	David Sloane, PhD Tridib Banerjee, PhD Pierrette Hondagneu-Sotelo, PhD (Sociology)
Master of Landscape Architecture	2008
<i>College of Environmental Design</i>	
<i>California State Polytechnic University - Pomona, CA</i>	
Master of Science – Environmental Policy and Behavior	2000
<i>School of Natural Resources and Environment</i>	
<i>University of Michigan - Ann Arbor, MI</i>	
Bachelor of Arts – Economics and Environmental Studies	1996
<i>Dornsife College of Letters, Arts, and Sciences</i>	
<i>University of Southern California - Los Angeles, CA</i>	

Publications

The Prospects and Problems of Integrating Sketch Maps with Geographic Information Systems (GIS) to Understand Environmental Perception: A case study of mapping youth fear in Los Angeles gang neighborhoods	2014
<i>Environment and Planning B: Planning and Design</i> 41(2): 251-271. Curtis, J.W., E. Shiao, B. Lowery, D. Sloane, K. Hennigan and A. Curtis	
The Prevalence of Harmful Content on Outdoor Advertising in Los Angeles: Land use, community characteristics, and the spatial inequality of a public health nuisance	2014
<i>American Journal of Public Health</i> 104(4): 658–664. Lowery, B.C. and D.C. Sloane	

Presentations

**From Regional Center to Sign District:
 Regulating outdoor advertising in Los Angeles, 1881-2012**
Association of Collegiate Schools of Planning – Philadelphia, PA – November 1, 2014
 with David Sloane

- Do Farmers' Markets Improve the Availability of Healthy Foods for All Communities?**
A case study of 19 markets in Los Angeles.

BACKGROUND SUMMARY

Executive Manager with extensive experience in public sector resource design, management and evaluation. Knowledge and skills include: structuring and design of state and local service programs and initiatives, developing written proposals for project financing, identifying community economic development resources and training.

EXPERIENCE

DeBruler, Inc.

Vice President, Oklahoma City, August 2001 to Present

Provide services including:

- ✓ Researching public and private resources and preparing applications for financial assistance in response to client requests for economic and community development projects.
- ✓ Technical assistance to nonprofits and units of local government regarding federal and state resources and structuring project-beneficial partnerships; preparing strategic and business plans for public and private sector entities.
- ✓ Group facilitation services.
- ✓ Technical training for nonprofits and units of local government regarding federal and state financial assistance programs. Conducting organizational assessments and developing capacity building curriculums.

Oklahoma Housing Finance Agency

Team Leader, Housing Development Team, Oklahoma City, July 1998 to July 2001

Provided direct supervision and oversight of sixteen staff engaged in the administration of multiple federal and state affordable housing program resources.

While employed by the agency:

- ✓ Reorganized state's Single Family Mortgage Revenue Bond, Low-income Housing Tax Credit, HOME Investment Partnerships and Housing Trust Fund Programs into a single work unit.
- ✓ Streamlined Low-income Housing Tax Credit Program administrative rules to provide for market responsive design flexibility.
- ✓ Streamlined affordable housing resources by developing a singular application package and process for the agency's affordable housing development resources and established e-information network.
- ✓ Facilitated the development of working partnerships between the state's nonprofit and for-profit housing development organizations and agency's mortgage revenue bond lenders.
- ✓ Financed the development of affordable housing by leveraging public sector development funds with private investments.

- ✓ Facilitated legislative task force on rural affordable housing issues and devised legislative and programmatic actions to spur rural development.
- ✓ Developed, financed and implemented the state's first statewide affordable housing market analysis in partnership with a major university center.
- ✓ Drafted enabling legislation, capitalized and implemented state's Housing Trust Fund.

Oklahoma Department of Commerce

Program Manager/Department Head, Oklahoma City, March 1988 to July 1998

- ✓ In response to market-based demand, directed a team of professional agency staff with diverse skills, in the redesign of the state's HOME Investment Partnerships Program from primarily rehabilitation services to the production of rural affordable housing units.
- ✓ Led HOME Program administrative team in the relocation of the Program from its state agency environment to the Oklahoma Housing Finance Agency, a public trust.
- ✓ Leveraged HOME Program development resources with other public and private debt capital to finance the development of rural affordable housing statewide.
- ✓ Formulated and implemented a legislative agenda to enact and capitalizing the state's Housing Trust Fund.
- ✓ Provided daily oversight and administration for several state administered federal programs including: U.S. Department of Energy State Energy Program, Community Development Block Grant, Home Investment Partnerships, Rental Rehabilitation, Solar Energy and Energy Conservation Bank, and State Appropriated Funds for regional councils of government.

City of Oklahoma City January 1984 to February 1988

Division Head, Code Inspections Division/Department of Environmental Services

Assistant Superintendent, Utility Services Division/Water Department

Administrative Assistant, Street Maintenance Division, Public Works Department

Management Intern, Personnel Department

EDUCATION

Masters of Public Administration, University of Oklahoma 1983

Bachelor of Arts Political Science, University of Oklahoma, 1979
