Oklahoma City, OK 73116

**Effective Date of the Analysis:**

October 7, 2015

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

December 31, 2015

Mr. Dennis Shockley, Executive Director  
Oklahoma Housing Finance Agency  
100 NW 63<sup>rd</sup> Street, Ste. 200  
Oklahoma City, OK 73116

SUBJECT:       Housing Needs Assessment  
                  Adair County  
                  IRR - Tulsa/OKC File No. 140-2015-0014

Dear Mr. Shockley:

As per our Agreement with Oklahoma Housing Finance Agency (OHFA), we have completed a residential housing market analysis (the "Analysis") for use by OHFA and the Oklahoma Department of Commerce (ODOC). Per our Agreement, OHFA and ODOC shall have unrestricted authority to publish, disclose, distribute and otherwise use, in whole or in part, the study and reports, data or other materials included in the Analysis or otherwise prepared pursuant to the Agreement and no materials produced in whole, or in part, under the Agreement shall be subject to copyright in the United States or any other country. Integra Realty Resources – Tulsa/OKC will cause the Analysis (or any part thereof) and any other publications or materials produced as a result of the Agreement to include substantially the following statement on the first page of said document:

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Attached hereto, please find the Adair County Residential Housing Market Analysis. Analyst Maryam Moradian personally inspected the Adair County area during the month of October 2015 to collect the data used in the preparation of the Adair County Market Analysis. The University of Oklahoma College of Architecture Division of Regional and City Planning provided consultation, assemblage and analysis of the data for IRR-Tulsa/OKC.

Mr. Dennis Shockley  
Oklahoma Housing Finance Agency  
December 31, 2015

# Introduction and Executive Summary

This report is part of a Statewide Affordable Housing Market Study commissioned by the Oklahoma Department of Commerce (ODOC) in partnership with the Oklahoma Housing Finance Agency (OHFA), as an outgrowth of the 2013 tornado outbreak in Oklahoma. It was funded by the U.S. Department of Housing and Urban Development (USHUD) through the Community Development Block Grant – Disaster Recovery program (CDBG-DR). This study was conducted by a public/private partnership between Integra Realty Resources – Tulsa/OKC, the University of Oklahoma College of Architecture, Division of Regional and City Planning, and DeBruler Inc. IRR-Tulsa/OKC, The University of Oklahoma, and DeBruler Inc. also prepared a prior statewide study in 2001, also commissioned by ODOC in partnership with OHFA.

This study is a value-added product derived from the original 2001 statewide housing study that incorporates additional topics and datasets not included in the 2001 study, which impact affordable housing throughout the state. These topic areas include:

- Disaster Resiliency
- Homelessness
- Assessment of Fair Housing
- Evaluation of Residential Lead-Based Paint Hazards

These topics are interrelated in terms of affordable housing policy, housing development, and disaster resiliency and recovery. Homeless populations are more vulnerable in the event of a disaster, as are many of the protected classes under the Fair Housing Act. Lead-based paint is typically more likely to be present in housing units occupied by low-to-moderate income persons, and can also present an environmental hazard in the wake of a disaster. Effective affordable housing policy can mitigate the impact of natural and manmade disasters by encouraging the development and preservation of safe, secure, and disaster-resilient housing for Oklahoma’s most vulnerable populations.

## Housing Market Analysis Specific Findings:

1. The population of Adair County is projected to decline by -0.19% per year over the next five years (though the population of Stilwell is projected to grow by 0.49% per year over the same span).
2. Adair County is projected to need a total of 23 housing units for ownership and 27 housing units for rent over the next five years, in the Stilwell area.
3. Median Household Income in Adair County is estimated to be \$34,946 in 2015, compared with \$47,049 estimated for the State of Oklahoma. The poverty rate in Adair County is estimated to be 26.44%, compared with 16.85% for Oklahoma.
4. Homeowner and rental vacancy rates in Adair County are nearly identical to the state averages.
5. Home values and rental rates in Adair County are significantly lower than the state averages.
6. Median sale price for homes in Stilwell was \$49,100 in 2015, with a median price per square foot of \$30.34. The median sale price to list price ratio was 96.0%, with median days on market of 65 days.

7. Approximately 32.39% of renters and 20.57% of owners are housing cost overburdened.

**Disaster Resiliency Specific Findings:**

1. Create and maintain the county HMP
2. Apply for grants/funding to develop a county hazard mitigation plan.
3. Create a shelter registry for location of individual and business-based shelters (online or paper).
4. Tornadoes (1950 – 2014): Number: 55 Injuries:5 Fatalities:5 Damages (1996-2014): \$2,720,000.00
5. Social Vulnerability: Particularly elevated social vulnerability score at county level; at census tract level particular attention to eastern tracts where Stilwell and Westville are located.
6. Floodplain: Narrow part of Stilwell may have floodplain issues, Watts has floodplain area on eastern edge

**Homelessness Specific Findings**

1. Adair County is located in the Northeast Oklahoma Continuum of Care.
2. There are an estimated 383 homeless individuals in this area, 300 of which are identified as sheltered.
3. There is a disproportionately high number of homeless households comprised of children in this CoC (24 out of 300).
4. This area also has a high incidence of homeless victims of domestic violence (168).
5. The majority of homeless veterans are unsheltered.

**Fair Housing Specific Findings**

1. Units at Risk for Poverty: 676
2. Units in mostly Non-white Enclaves: 676
3. Units nearer Elevated Number of Disabled Persons: 177

**Lead-Based Paint Specific Findings**

4. We estimate there are 1,209 occupied housing units in Adair County with lead-based paint hazards.
5. 669 of those housing units are estimated to be occupied by low-to-moderate income households.
6. We estimate that 203 of those low-to-moderate income households have children under the age of 6 present.

**Report Format and Organization**

The first section of this report comprises the housing market analysis for Adair County. This section is divided into general area information, followed by population, household and income trends and analysis, then followed by area economic conditions. The next area of analysis concerns the housing stock of Adair County, including vacancy rates, construction activity and trends, and analyses of the homeowner and rental markets. This section is followed by five-year forecasts of housing need for

owners and renters, as well as specific populations such as low-to-moderate income households, the elderly, and working families.

The next section of this report addresses special topics of concern:

- Disaster Resiliency
- Homelessness
- Fair Housing
- Lead-Based Paint Hazards

This last section is followed by a summary of the conclusions of this report for Adair County.

# General Information

## Purpose and Function of the Market Study

The purpose of this market study is to evaluate the need for affordable housing units in Adair County, Oklahoma. The analysis will consider existing supply and projected demand and overall market trends in the Adair County area.

## Effective Date of Consultation

The Adair County area was inspected and research was performed during October, 2015. The effective date of this analysis is October 7, 2015. The date of this report is December 31, 2015. The market study is valid only as of the stated effective date or dates.

## Scope of the Assignment

1. The Adair County area was inspected during October, 2015. The inspection included visits to all significant population centers in the county and portions of the rural county areas.
2. Regional, city and neighborhood data is based on information retained from national, state, and local government entities; various Chambers of Commerce, news publications, and other sources of economic indicators.
3. Specific economic data was collected from all available public agencies. Population and household information was collected from national demographic data services as well as available local governments. Much data was gathered regarding market specific items from personal interviews.
4. Development of the applicable analysis involved the collection and interpretation of verified data from local property owners/managers, realtors, and other individuals active within the area real estate market.
5. The analyst's assemblage and analysis of the defined data provided a basis from which conclusions as to the supply of and demand for residential housing were made.

## Data Sources

Specific data sources used in this analysis include but are not limited to:

1. The 2000 and 2010 Decennial Censuses of Population and Housing
2. The 2009-2013 American Community Survey (ACS)
3. U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division
4. The United States Department of Labor, Bureau of Labor Statistics, including the Local Area Unemployment Statistics and the Quarterly Census of Employment and Wages programs
5. The U.S. Department of Housing and Urban Development, including the Comprehensive Housing Affordability Strategy (CHAS), and the 2013 Picture of Subsidized Households
6. Continuum of Care Assistance Programs

7. The National Oceanic and Atmospheric Administration
8. Nielsen SiteReports (formerly known as Claritas)
9. The Oklahoma State Department of Health
10. The Oklahoma Department of Human Services
11. The Federal Reserve Bank of Kansas City, Oklahoma City Branch
12. The Federal Reserve Bank of New York

# Adair County Analysis

## Area Information

The purpose of this section of the report is to provide a basis for analyzing and estimating trends relating to Adair County. The primary emphasis is concentrated on those factors that are of significance to residential development users. Residential and commercial development in the community is influenced by the following factors:

1. Population and economic growth trends.
2. Existing commercial supply and activity.
3. Natural physical elements.
4. Political policy and attitudes toward community development.

## Location

Adair County is located in eastern Oklahoma. The county is bordered on the north by Delaware County, on the west by Cherokee County, on the south by Sequoyah County, and on the east by Arkansas. The Adair County Seat is Stilwell, which is located in the southern part of the county. This location is approximately 97.5 miles southeast of Tulsa and 189 miles east of Oklahoma City.

Adair County has a total area of 577 square miles (573 square miles of land, and 4 square miles of water), ranking 69th out of Oklahoma's 77 counties in terms of total area. The total population of Adair County as of the 2010 Census was 22,683 persons, for a population density of 40 persons per square mile of land.

## Access and Linkages

The county has average accessibility to state and national highway systems. There are multiple national and state highway systems that run through Adair County. These are US-59, US-62, OK-100, OK-51, and OK-10. The nearest interstate highway is I-40, approximately 30.5 miles south of Stilwell. The county also has an intricate network of county roadways.

Public transportation is provided Ki Bois Area Transit System (KATS), which operates a demand-response service in Adair County and surrounding areas. The local market perceives public transportation as average compared to other communities in the region of similar size. However, the primary mode of transportation in this area is private automobiles by far.

There are no airports in or near Stilwell. The closest full service airport is Fort Smith Regional Airport, as well as Drake Field, located in Fayetteville, Arkansas. Further, the Sallisaw municipal airport is a short distance from Stilwell. In addition to the municipal and regional airports, the Tulsa International Airport is within driving distance of Stilwell.

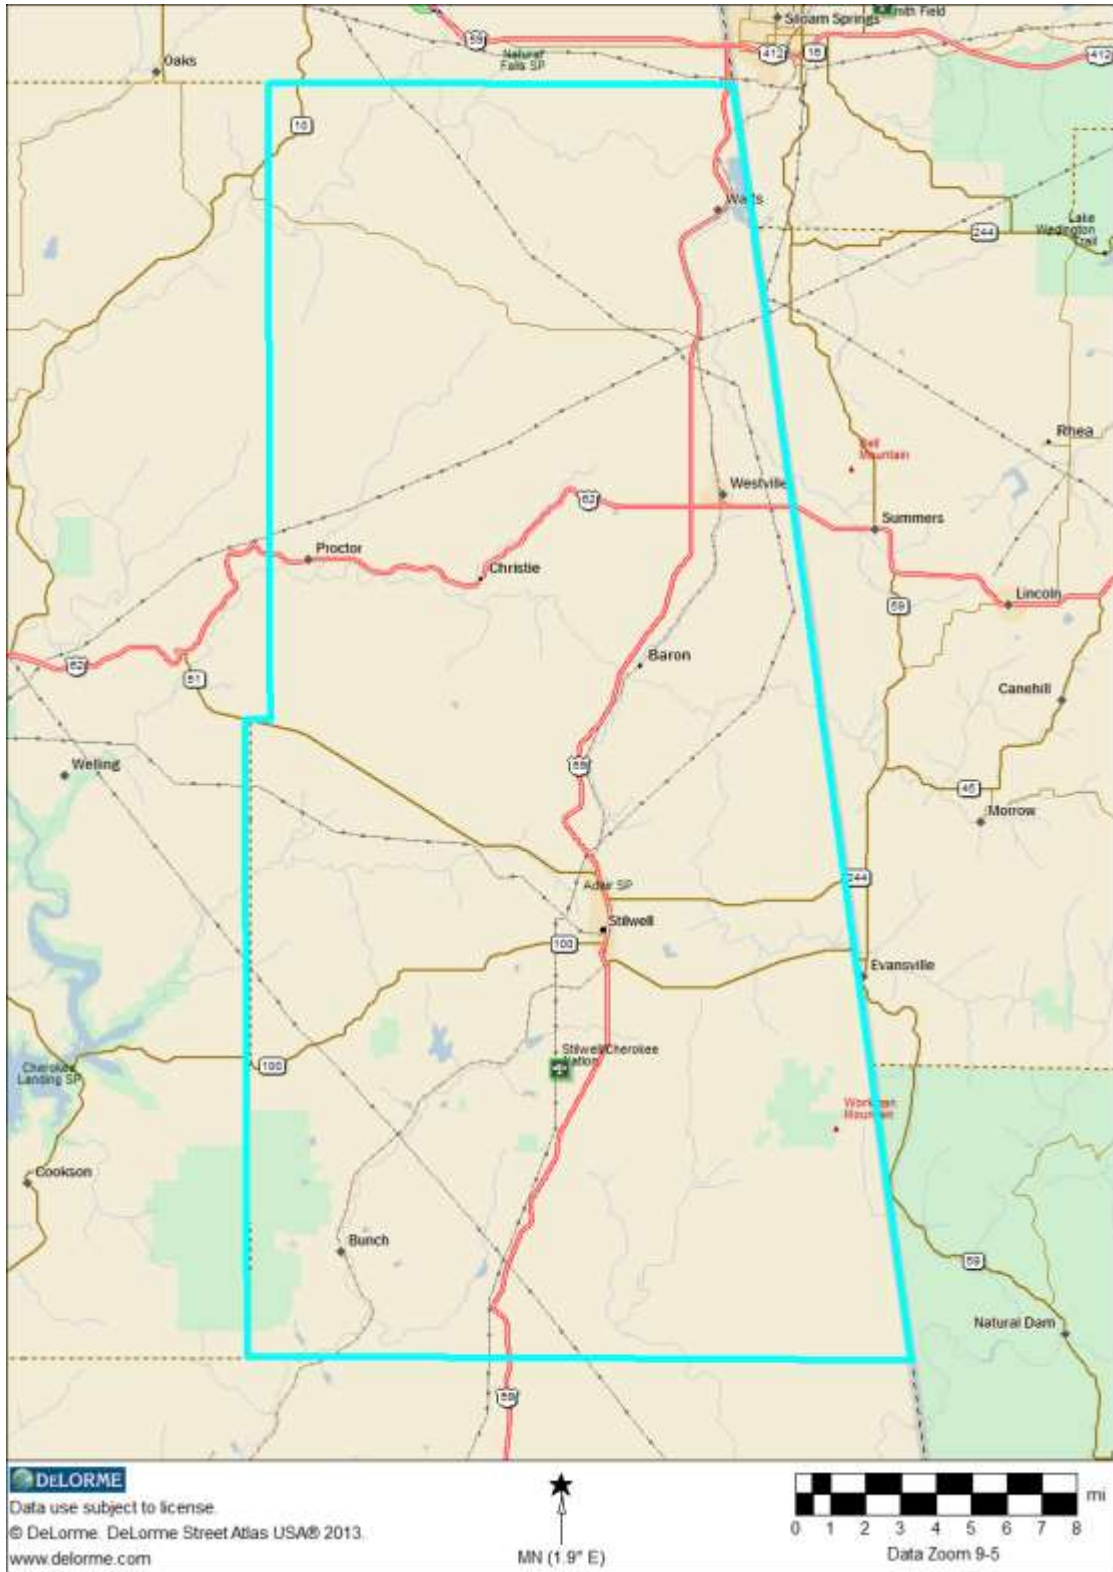

**Educational Facilities**

All of the county communities have public school facilities. Stilwell is served by Stilwell Public Schools. Stilwell Public Schools is comprised of one pre-k, elementary school, middle school, and high school. There are no higher education options within Stilwell, but Northeastern State University – Tahlequah, Carl Albert State University: Sallisaw Campus, and the University of Arkansas are all within proximity of the city.

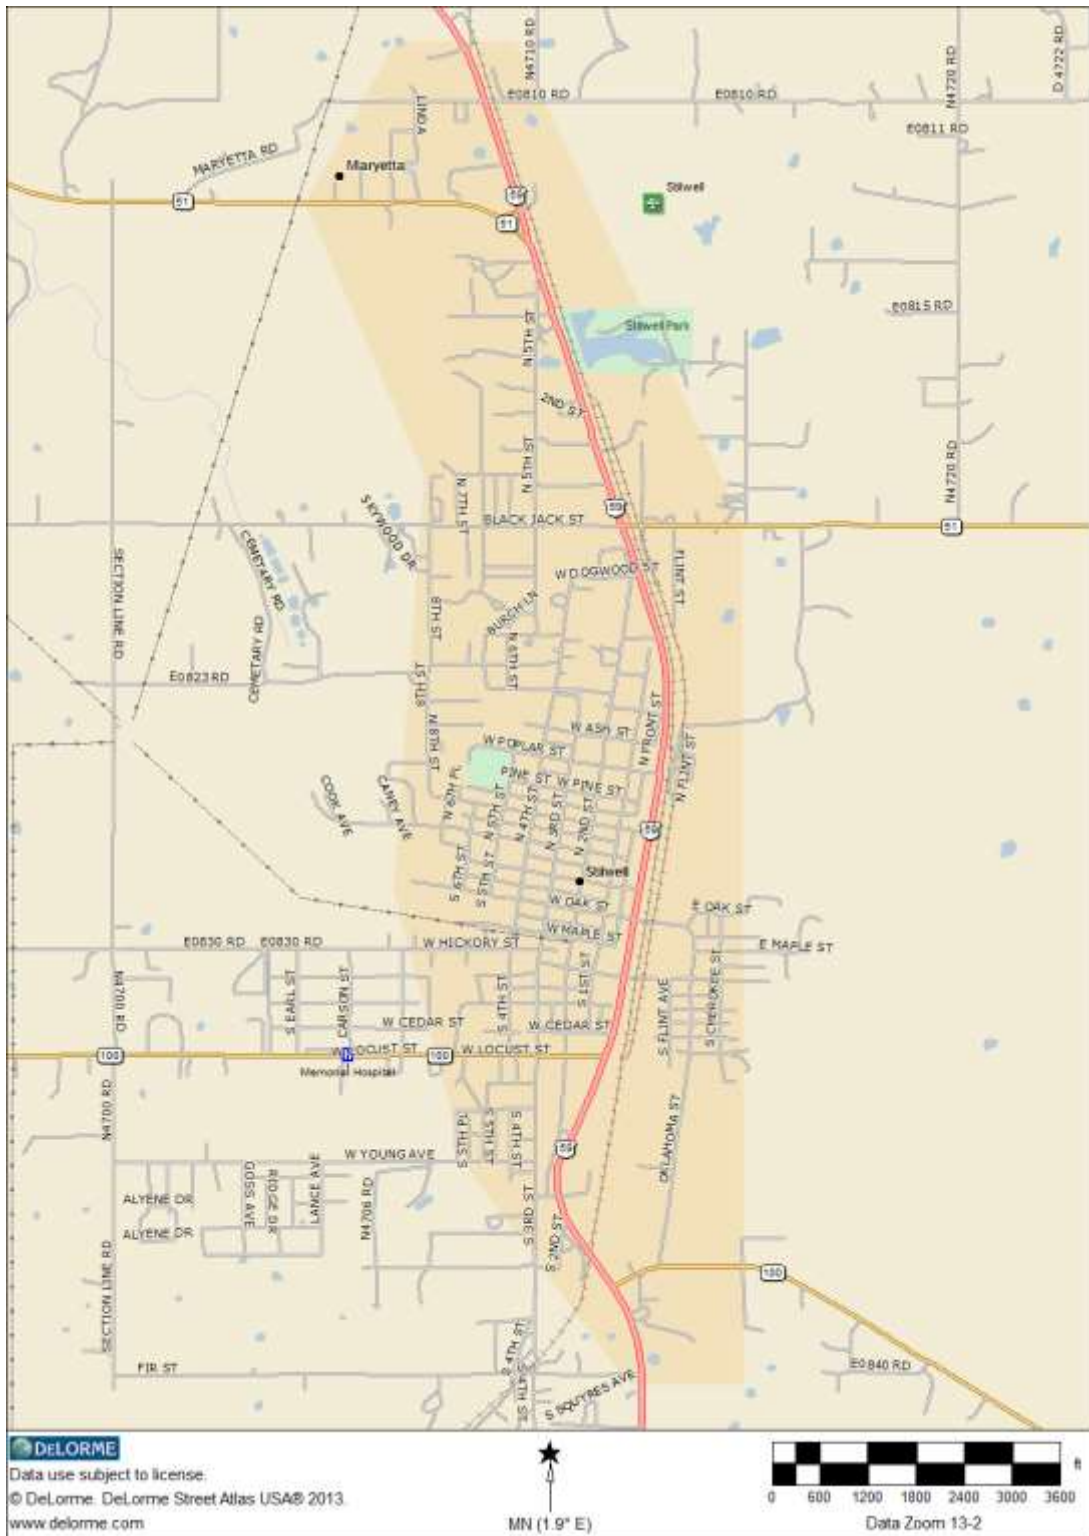

**Medical Facilities**

Medical services are provided by Stilwell Memorial Hospital, an acute-care hospital providing in and outpatient services, as well as an emergency unit. The smaller county communities typically have either small outpatient medical services or doctor's officing in the community.

### Stilwell Area Map

## Demographic Analysis

### Population and Households

The following table presents population levels and annualized changes in Adair County and Oklahoma. This data is presented as of the 2000 Census, the 2010 Census, with 2015 and 2020 estimates and forecasts provided by Nielsen SiteReports.

<b>Population Levels and Annual Changes</b>							
	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change	2020 Forecast	Annual Change
Stilwell	3,276	3,949	1.89%	4,055	0.53%	4,155	0.49%
Adair County	21,038	22,683	0.76%	22,009	-0.60%	21,801	-0.19%
State of Oklahoma	3,450,654	3,751,351	0.84%	3,898,675	0.77%	4,059,399	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

The population of Adair County was 22,683 persons as of the 2010 Census, a 0.76% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Adair County to be 22,009 persons, and projects that the population will show -0.19% annualized decline over the next five years.

The population of Stilwell was 3,949 persons as of the 2010 Census, a 1.89% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Stilwell to be 4,055 persons, and projects that the population will show 0.49% annualized growth over the next five years.

The next table presents data regarding household levels in Adair County over the same periods of time. This data is presented both for all households (family and non-family) as well as family households alone.

<b>Households Levels and Annual Changes</b>							
<b>Total Households</b>	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change	2020 Forecast	Annual Change
Stilwell	1,269	1,447	1.32%	1,513	0.90%	1,563	0.65%
Adair County	7,471	8,156	0.88%	7,909	-0.61%	7,836	-0.19%
State of Oklahoma	1,342,293	1,460,450	0.85%	1,520,327	0.81%	1,585,130	0.84%
<b>Family Households</b>	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change	2020 Forecast	Annual Change
Stilwell	809	917	1.26%	972	1.17%	1,003	0.63%
Adair County	5,567	5,982	0.72%	5,793	-0.64%	5,734	-0.20%
State of Oklahoma	921,750	975,267	0.57%	1,016,508	0.83%	1,060,736	0.86%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

As of 2010, Adair County had a total of 8,156 households, representing a 0.88% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Adair County to have 7,909 households. This number is expected to experience a -0.19% annualized rate of growth over the next five years.

As of 2010, Stilwell had a total of 1,447 households, representing a 1.32% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Stilwell to have 1,513 households. This number is expected to experience a 0.65% annualized rate of growth over the next five years.

### Population by Race and Ethnicity

The next table presents data regarding the racial and ethnic composition of Adair County based on the U.S. Census Bureau's American Community Survey.

<b>2013 Population by Race and Ethnicity</b>				
<b>Single-Classification Race</b>	<b>Stilwell</b>		<b>Adair County</b>

<b>Total Number of Persons with Disabilities:</b>	<b>742</b>	<b>19.15%</b>	<b>4,594</b>	<b>20.66%</b>	<b>577,160</b>	<b>15.59%</b>

Source: U.S. Census Bureau, 2009-2013 American Community Survey, Table C18108

Within Adair County, 20.66% of the civilian non-institutionalized population has one or more disabilities, compared with 15.59% of Oklahomans as a whole. In Stilwell the percentage is 19.15%. Compared with the rest of the state, the populations of Stilwell and Adair County are more likely to have one or more disabilities.

We have also compiled data for the veteran population of Adair County by presence of disabilities, shown in the following table:

**2013 Population by Veteran and Disability Status**

	Stilwell		Adair County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Civilian Population Age 18+ For Whom Poverty Status is Determined	2,626		16,098		2,738,788	
Veteran:	222	8.45%	1,674	10.40%	305,899	11.17%
With a Disability	100	45.05%	760	45.40%	100,518	32.86%
No Disability	122	54.95%	914	54.60%	205,381	67.14%
Non-veteran:	2,404	91.55%	14,424	89.60%	2,432,889	88.83%
With a Disability	571	23.75%	3,452	23.93%	430,610	17.70%
No Disability	1,833	76.25%	10,972	76.07%	2,002,279	82.30%

Source: 2009-2013 American Community Survey, Table C21007

Within Adair County, the Census Bureau estimates there are 1,674 veterans, 45.40% of which have one or more disabilities (compared with 32.86% at a statewide level). In Stilwell, there are an estimated 222 veterans, 45.05% of which are estimated to have a disability. Compared with the rest of the state, veterans in Stilwell and Adair County are significantly more likely to have disabilities.

### Group Quarters Population

The next table presents data regarding the population of Adair County living in group quarters, such as correctional facilities, skilled-nursing facilities, student housing and military quarters.

	Stilwell		Adair County	
	No.	Percent	No.	Percent
Total Population	3,949		22,683	
Group Quarters Population	92	2.33%	92	0.41%
Institutionalized Population	92	2.33%	92	0.41%
Correctional facilities for adults	25	0.63%	25	0.11%
Juvenile facilities	0	0.00%	0	0.00%
Nursing facilities/Skilled-nursing facilities	67	1.70%	67	0.30%
Other institutional facilities	0	0.00%	0	0.00%
Noninstitutionalized population	0	0.00%	0	0.00%
College/University student housing	0	0.00%	0	0.00%
Military quarters	0	0.00%	0	0.00%
Other noninstitutional facilities	0	0.00%	0	0.00%

Source: 2010 Decennial Census, Table P42

The percentage of the Adair County population in group quarters is significantly lower than the statewide figure, which was 2.99% in 2010.

## Household Income Levels

Data in the following chart shows the distribution of household income in Adair County, as well as median and average household income. Data for Oklahoma is included as a basis of comparison. This data is provided by Nielsen SiteReports for 2015.

<b>2015 Household Income Distribution</b>						
	<b>Stilwell</b>		<b>Adair County</b>		<b>State of Oklahoma</b>	
	<b>No.</b>	<b>Percent</b>	<b>No.</b>	<b>Percent</b>	<b>No.</b>	<b>Percent</b>

\$200,000 - \$249,999	1	0.07%	38	0.48%	18,661	1.23%
\$250,000 - \$499,999	1	0.07%	19	0.24%	20,487	1.35%
\$500,000+	1	0.07%	4	0.05%	7,454	0.49%
<b>Median Household Income</b>	\$28,486		\$34,946		\$47,049	
<b>Average Household Income</b>	\$37,312		\$44,746		\$63,390	

Source: Nielsen SiteReports

As shown, median household income for Adair County is estimated to be \$34,946 in 2015. By way of comparison, the median household income of Oklahoma is estimated to be \$47,049. For Stilwell, median household income is estimated to be \$28,486. Compared with the rest of the state, households in Stilwell and Adair County have significantly lower incomes, far more heavily concentrated in the income brackets below \$25,000. The income distribution can be better visualized by the following chart.

### Household Income Trend

Next we examine the long-term growth of incomes in Adair County, from the results of the 2000 Census (representing calendar year 1999), through the current 2015 estimates provided by Nielsen SiteReports. This data is then annualized into a compounded annual growth rate to estimate nominal annual household income growth over this period of time. We then compare the rate of annual growth with the rate of inflation over the same period of time (measured using the Consumer Price Index for all urban consumers, South Region, Size Class D, from May 1999 through May 2015). Subtracting the annual rate of inflation from the nominal rate of annual income growth yields a “real” rate of income growth which takes into account the effect of increasing prices of goods and services.

	1999 Median HH Income	2015 Median HH Income	Nominal Growth	Inflation Rate	Real Growth
Stilwell	\$18,555	\$28,486	2.72%	2.40%	0.32%
Adair County	\$24,881	\$34,946	2.15%	2.40%	-0.25%
State of Oklahoma	\$33,400	\$47,049	2.16%	2.40%	-0.23%

Sources: 2000 Decennial Census, Summary File 3, Table P53; Nielsen SiteReports; CPI All Urban Consumers, South Region, Size Class D

As shown, both Adair County and the State of Oklahoma as a whole saw negative growth in “real” median household income, once inflation is taken into account (Stilwell saw positive real income growth, however incomes remain notably lower than both the county and state). It should be noted

that this trend is not unique to Oklahoma or Adair County, but rather a national trend. Over the same period, the national median household income increased from \$41,994 to \$53,706 (for a nominal annualized growth rate of 1.55%) while the Consumer Price Index increased at an annualized rate of 2.26%, for a “real” growth rate of -0.72%.

### Poverty Rates

Overall rates of poverty in Adair County and Oklahoma are shown in the following table. This data is included from the 2013 American Community Survey, as well as the 2000 Census to show how these rates have changed over the last decade. We also include poverty rates for single-parent families by gender of householder.

	2000		Change (Basis Points)	2013 Poverty Rates for Single-Parent Families	
	Census	ACS		Male Householder	Female Householder
Stilwell	31.98%	35.67%	369	80.95%	78.77%
Adair County	23.21%	26.44%	324	51.39%	63.89%
State of Oklahoma	14.72%	16.85%	213	22.26%	47.60%

Sources: 2000 Decennial Census Table P87, 2009-2013 American Community Survey Tables B17001 & B17023

The poverty rate in Adair County is estimated to be 26.44% by the American Community Survey. This is an increase of 324 basis points since the 2000 Census. Within Stilwell, the poverty rate is estimated to be 35.67%. It should be noted that increasing poverty rates over this period of time is a national trend: between the 2000 Census and the 2013 American Community Survey, the poverty rate of the United States increased from 12.38% to 15.37%, an increase of 299 basis points.

## Economic Conditions

### Employment and Unemployment

The following table presents total employment figures and unemployment rates for Adair County, with figures for Oklahoma and the United States for comparison. This data is as of May 2015.

<b>Employment and Unemployment</b>						
	May-2010 Employment	May-2015 Employment	Annual Growth	May-2010 Unemp. Rate	May-2015 Unemp. Rate	Change (bp)
Adair County	7,993	7,853	-0.35%	10.4%	5.9%	-450
State of Oklahoma	1,650,748	1,776,187	1.48%	6.8%	4.4%	-240
United States (thsds)	139,497	149,349	1.37%	9.3%	5.3%	-400

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As of May 2015, total employment in Adair County was 7,853 persons. Compared with figures from May 2010, this represents annualized employment decline of -0.35% per year. The unemployment rate in May was 5.9%, a decrease of -450 basis points from May 2010, which was 10.4%. Over the last five years, both the statewide and national trends have been improving employment levels and declining unemployment rates, and Adair County has underperformed both the state and nation in these statistics.

### Employment Level Trends

The following chart shows total employment and unemployment levels in Adair County from January 2000 through May 2015, as reported by the Bureau of Labor Statistics, Local Area Unemployment Statistics program.

**Employment and Unemployment in Adair County  
January 2000 through May 2015**

*Source: Bureau of Labor Statistics, Local Area Unemployment Statistics*

As shown, total employment levels have generally trended upward from 2000 through the 3<sup>rd</sup> quarter of 2008, when employment levels began to decline due to the national economic recession. The significant drop in January 2010 is due to an adjustment to base employment levels on the part of the Bureau of Labor Statistics and does not represent an actual decline in local employment: however, employment levels continued to show declines over the next several years, with modest growth only within the last several months to its current level of 7,853 persons. The number of unemployed persons in May 2015 was 494, out of a total labor force of 8,347 persons.

**Unemployment Rate Trends**

The next chart shows historic unemployment rates for Adair County, as well as Oklahoma and the United States for comparison. This data covers the time period of January 2000 through May 2015, and has not been seasonally adjusted.

**Unemployment Rates in Adair County, Oklahoma and the United States  
January 2000 through May 2015**

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As shown, unemployment rates in Adair County have shown a great deal of volatility over the last fifteen years, but have in most cases been above the state and nation since 2009. Unemployment rates began to decline in 2013, to their current level of 5.9%, which remains above both state and national unemployment rates.

**Employment and Wages by Industrial Supersector**

The next table presents data regarding employment in Adair County by industry, including total number of establishments, average number of employees in 2014, average annual pay, and location quotients for each industry compared with the United States. This data is furnished by the Bureau of Labor Statistics, Quarterly Census of Employment and Wages program.

**Employees and Wages by Supersector - 2014**

Supersector	Establishments	Avg. No. of Employees	Percent of Total	Avg. Annual Pay	Location Quotient
Federal Government	8	41	0.90%	\$43,689	0.45
State Government	8	98	2.15%	\$34,989	0.65
Local Government	37	1,446	31.69%	\$29,912	3.14
Natural Resources and Mining	10	107	2.34%	\$30,971	1.55
Construction	14	44	0.96%	\$21,075	0.22
Manufacturing	18	1,094	23.98%	\$39,306	2.69
Trade, Transportation, and Utilities	66	645	14.14%	\$23,519	0.74

Other Services	11	83	1.82%	\$22,355	0.59
<b>Total</b>	<b>267</b>	<b>4,563</b>		<b>\$30,951</b>	<b>1.00</b>

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

**Employment Sectors - 2014**

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Among private employers, the largest percentage of persons (23.98%) are employed in Manufacturing. The average annual pay in this sector is \$39,306 per year. The industry with the highest annual pay is Manufacturing, with average annual pay of \$39,306 per year.

The rightmost column of the previous table provides location quotients for each industry for Adair County, as compared with the United States. Location quotients (LQs) are ratios used to compare the concentration of employment in a given industry to a larger reference, in this case the United States. They are calculated by dividing the percentage of employment in a given industry in a given geography (Adair County in this instance), by the percentage of employment in the same industry in the United States. For example, if manufacturing in a certain county comprised 10% of total employment, while in the United States manufacturing comprised 5% of total employment, the location quotient would be 2.0:

$$10\% (\text{county manufacturing } \%) / 5\% (\text{U.S. manufacturing } \%) = 2.0$$

Location quotients greater than 1.0 indicate a higher concentration of employment compared with the nation, and suggest that the industry in question is an important contributor to the local economic base. Quotients less than 1.0 indicate that the industry makes up a smaller share of the local economy than the rest of the nation.

Within Adair County, among all industries the largest location quotient is in Local Government, with a quotient of 3.14. Among private employers, the largest is Manufacturing, with a quotient of 2.69.

The next table presents average annual pay in Adair County by industry, in comparison with Oklahoma as a whole and the United States.

### Comparison of 2014 Average Annual Pay by Supersector

Supersector	Adair County	State of Oklahoma	United States	Percent of State	Percent of Nation
Federal Government	\$43,689	\$66,411	\$75,784	65.8%	57.6%

<i>Without Children &lt;18 Years:</i>	<i>262</i>	<i>37.32%</i>	<i>2,075</i>	<i>50.60%</i>	<i>361,841</i>	<i>48.90%</i>

Source: 2009-2013 American Community Survey, Table B23007

Within Adair County, there are 4,101 working families, 49.40% of which have children under the age of 18 present. This compares with 51.10% in Oklahoma as a whole.

## Major Employers

Major employers in the Adair County include Baldor Electric Motors, Tyson Foods, Mrs. Smith's Bakery, as well as local government, public education, Stilwell Memorial Hospital, recreation, and agriculture (notably strawberries).

## Commuting Patterns

### Travel Time to Work

The next table presents data regarding travel time to work in Adair County.

### Workers 16 Years and Over by Commuting Time to Work

	Stilwell		Adair County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
<b>Commuting Workers:</b>	<b>1,360</b>		<b>7,870</b>		<b>1,613,364</b>	
Less than 15 minutes	726	53.38%	2,525	32.08%	581,194	36.02%
15 to 30 minutes	207	15.22%	2,586	32.86%	625,885	38.79%
30 to 45 minutes	274	20.15%	1,714	21.78%	260,192	16.13%
45 to 60 minutes	64	4.71%	498	6.33%	74,625	4.63%
60 or more minutes	89	6.54%	547	6.95%	71,468	4.43%

Source: 2009-2013 American Community Survey, Table B08303

Within Adair County, the largest percentage of workers (32.86%) travel 15 to 30 minutes to work. Although Adair County has an active labor market, some persons living in the area commute to other labor markets in the region.

### Means of Transportation

Data in the following table presents data regarding means of transportation for employed persons in Adair County.

### Workers 16 Years and Over by Means of Transportation to Work

Other Means	0	0.00%	18	0.22%	14,442	0.86%
Worked at Home	56	3.95%	329	4.01%	59,662	3.57%

Source: 2009-2013 American Community Survey, Table B08301

As shown, the vast majority of persons in Adair County commute to work by private vehicle, with a small percentage of persons working from home.

## Housing Stock Analysis

### Existing Housing Units

The following table presents data regarding the total number of housing units in Adair County. This data is provided as of the 2000 Census, the 2010 Census, with a 2015 estimate furnished by Nielsen SiteReports.

<b>Total Housing Units</b>					
	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change
Stilwell	1,434	1,638	1.34%	1,723	1.02%
Adair County	8,348	9,142	0.91%	9,097	-0.10%
State of Oklahoma	1,514,400	1,664,378	0.95%	1,732,484	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

Since the 2010, Nielsen estimates that the number of housing units in Adair County declined by -0.10% per year, to a total of 9,097 housing units in 2015. In terms of new housing unit construction, Adair County underperformed Oklahoma as a whole between 2010 and 2015.

### Housing by Units in Structure

The next table separates housing units in Adair County by units in structure, based on data from the Census Bureau's American Community Survey.

<b>2013 Housing Units by Units in Structure</b>						
	<b>Stilwell</b>		<b>Adair County</b>		<b>State of Oklahoma</b>	
	<b>No.</b>	<b>Percent</b>	<b>No.</b>	<b>Percent</b>	<b>No.</b>	<b>Percent</b>

Median Year Built:		1977		1977		1975
<b>Overall Median Year Built:</b>		<b>1974</b>		<b>1978</b>		<b>1976</b>

Sources: 2009-2013 American Community Survey, Tables B25035, B25036 & B25037

Within Adair County, 11.99% of housing units were built after the year 2000. This compares with 15.22% statewide. Within Stilwell the percentage is 6.40%.

70.98% of housing units in Adair County were built prior to 1990, while in Stilwell the percentage is 75.86%. These figures compare with the statewide figure of 72.78%.

### Substandard Housing

The next table presents data regarding substandard housing in Adair County. The two most commonly cited figures for substandard housing are a lack of complete plumbing, and/or a lack of a complete kitchen. We have also included statistics regarding homes heated by wood, although this is a less frequently cited indicator of substandard housing since some homes (particularly homes for seasonal occupancy) are heated by wood but otherwise not considered substandard.

The Census Bureau definition of inadequate plumbing is any housing unit lacking any one (or more) of the following three items:

1. Hot and cold running water

2. A flush toilet
3. A bathtub or shower

Inadequate kitchens are defined by the Census Bureau as housing units lacking any of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

### 2013 Substandard Housing Units

	Occupied		Inadequate Plumbing		Inadequate Kitchen		Uses Wood for Fuel	
	Units	Number	Percent	Number	Percent	Number	Percent	
Stilwell	1,454	6	0.41%	16	1.10%	42	2.89%	
Adair County	8,046	35	0.43%	79	0.98%	1,521	18.90%	
State of Oklahoma	1,444,081	7,035	0.49%	13,026	0.90%	28,675	1.99%	

Sources: 2009-2013 American Community Survey, Tables B25040, B25048 & B25052

Within Adair County, 0.43% of occupied housing units have inadequate plumbing (compared with 0.49% at a statewide level), while 0.98% have inadequate kitchen facilities (compared with 0.90% at a statewide level). It is likely that there is at least some overlap between these two figures, among units lacking both complete plumbing and kitchen facilities.

### Vacancy Rates

The next table details housing units in Adair County by vacancy and type. This data is provided by the American Community Survey.

### 2013 Housing Units by Vacancy

	Stilwell		Adair County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
<b>Total Housing Units</b>	1,744		9,148		1,669,828

For rent	128	44.14%	217	19.69%	43,477	19.26%
Rented, not occupied	27	9.31%	32	2.90%	9,127	4.04%
For sale only	22	7.59%	131	11.89%	23,149	10.25%
Sold, not occupied	12	4.14%	54	4.90%	8,618	3.82%
For seasonal, recreational, or occasional use	14	4.83%	145	13.16%	39,475	17.49%
For migrant workers	0	0.00%	0	0.00%	746	0.33%
Other vacant	87	30.00%	523	47.46%	101,155	44.81%
<b>Homeowner Vacancy Rate</b>	3.14%		2.23%		2.31%	
<b>Rental Vacancy Rate</b>	13.59%		8.35%		8.24%	

Source: 2009-2013 American Community Survey, Tables B25001, B25003 & B25004

Within Adair County, the overall housing vacancy rate is estimated to be 12.05%. The homeowner vacancy rate is estimated to be 2.23%, while the rental vacancy rate is estimated to be 8.35%.

In Stilwell, the overall housing vacancy rate is estimated to be 16.63%. The homeowner vacancy rate is estimated to be 3.14%, while the rental vacancy rate is estimated to be 13.59%.

## Building Permits

The table presents data regarding new residential building permits issued in Stilwell. This data is furnished by the U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division. Please note that average costs reported only represent physical construction costs for the housing units, and do not include land prices, most soft costs (such as finance fees), or builder's profit.

### Stilwell

#### New Residential Building Permits Issued, 2004-2014

Year	Single Family Units	Avg. Construction Cost	Multifamily Units	Avg. Multifamily Construction Cost
2004	10	\$102,643	0	N/A
2005	5	\$101,280	0	N/A
2006	4	\$111,800	4	\$36,250
2007	5	\$108,268	0	N/A
2008	0	N/A	0	N/A
2009	4	\$40,000	0	N/A
2010	30	\$85,000	0	N/A
2011	0	N/A	0	N/A
2012	25	\$90,000	0	N/A
2013	0	N/A	0	N/A
2014	25	\$192,643	0	N/A

Source: United States Census Bureau Building Permits Survey

In Stilwell, building permits for 112 housing units were issued between 2004 and 2014, for an average of 10 units per year. 96.43% of these housing units were single family homes, and 3.57% consisted of multifamily units.

## New Construction Activity

### For Ownership:

New home construction in Adair County has been primarily limited to rural, unplatted acreages outside of Stilwell, though some infill construction has occurred in Stilwell, including the Southern Estates addition. Though some new construction appears reasonably affordable, the average sale price of homes built since 2005 in Adair County is \$166,000, or \$101.55 per square foot (for homes sold since January 2014), which is well above what could reasonably be afforded by households earning at or less than median household income for Adair County, which is estimated to be \$34,946 in 2015.

**For Rent:**

Stonebrook Park is an affordable rental housing development in Stilwell, comprising 48 single-family homes (in two phases) for family occupancy. Its second phase was recently completed. The property is for general occupancy and appears to have been well-received. Other new rental construction appears to have largely consisted of duplexes.

**Homeownership Market**

This section will address the market for housing units for purchase in Adair County, using data collected from both local and national sources.

**Housing Units by Home Value**

The following table presents housing units in Adair County by value, as well as median home value, as reported by the Census Bureau's American Community Survey.

<b>2013 Housing Units by Home Value</b>

<b>Median Home Value:</b>	<b>\$67,700</b>		<b>\$75,300</b>		<b>\$112,800</b>	

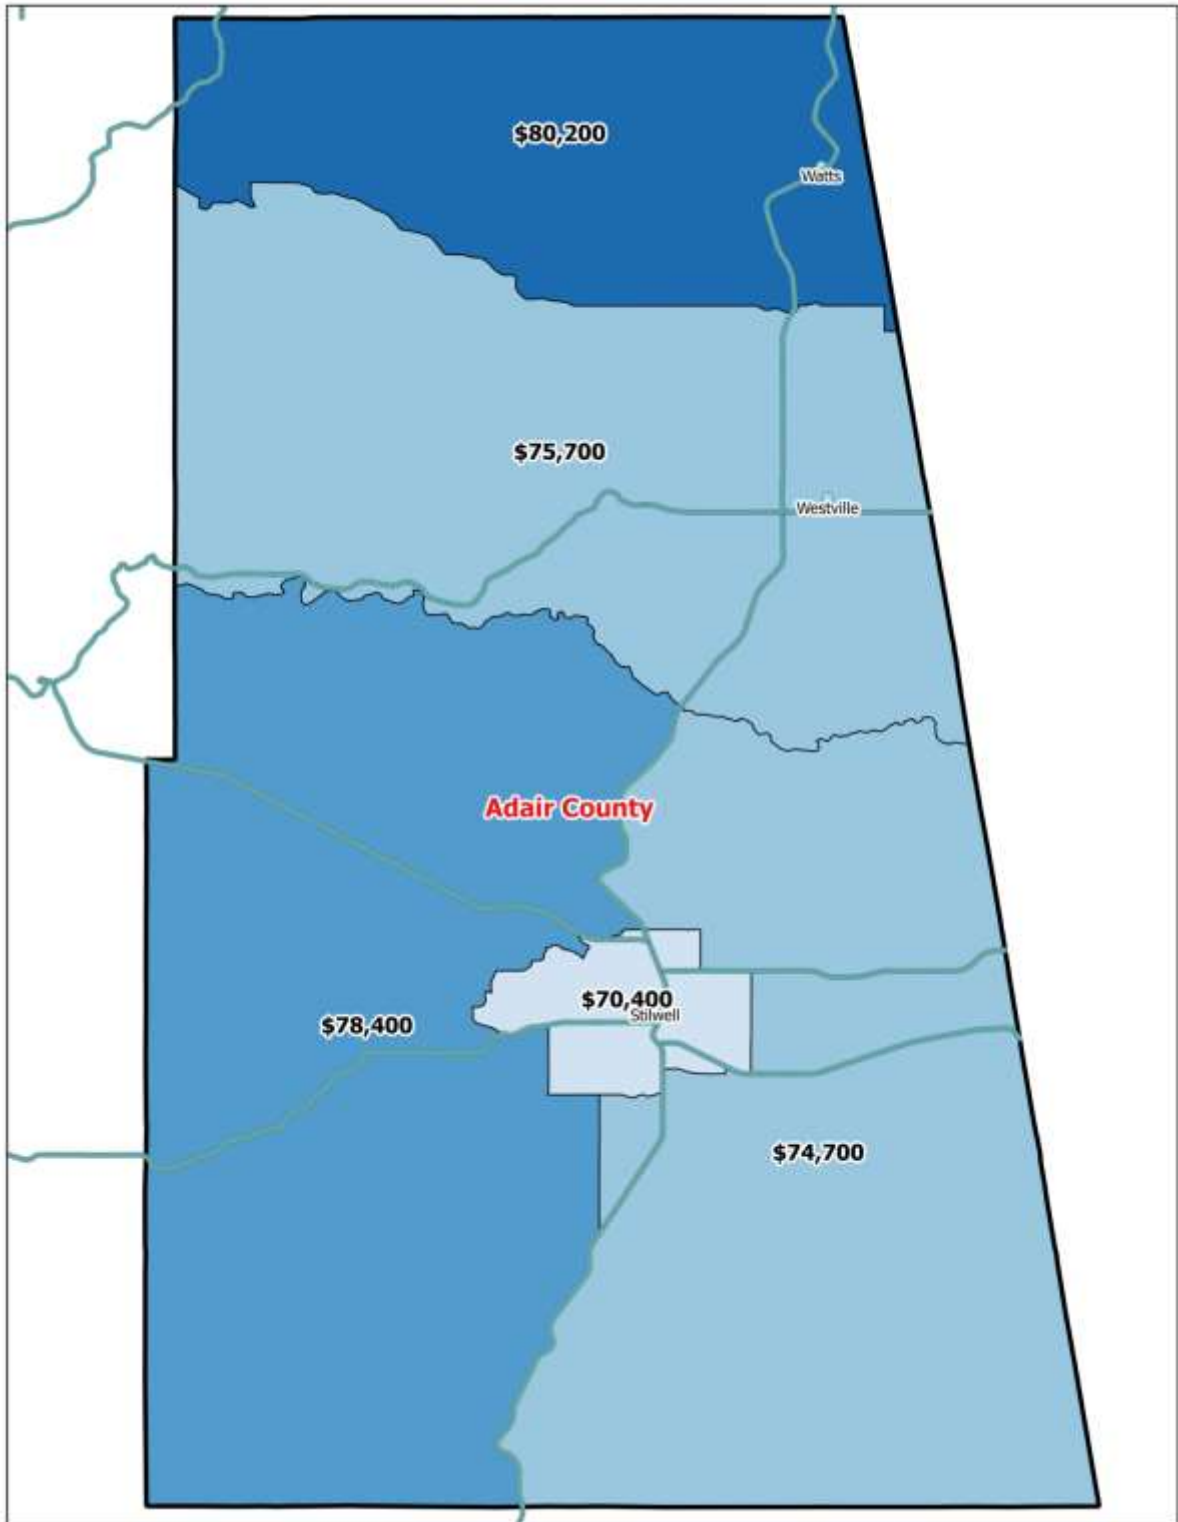

Sources: 2009-2013 American Community Survey, Tables B25075 and B25077

The median value of owner-occupied homes in Adair County is \$75,300. This is -33.2% lower than the statewide median, which is \$112,800. The median home value in Stilwell is estimated to be \$67,700.

The geographic distribution of home values in Adair County can be visualized by the following map. As can be seen, home values are largely consistent throughout the county, but slightly higher in the northern area of the county.

### Adair County Median Home Values by Census Tract

## Home Values by Year of Construction

The next table presents median home values in Adair County by year of construction. Note that missing data fields indicate the Census Bureau had inadequate data to estimate a median value that age bracket.

<b>2013 Median Home Value by Year of Construction</b>			
	<b>Stilwell Median Value</b>	<b>Adair County Median Value</b>	<b>State of Oklahoma Median Value</b>
<b>Total Owner-Occupied Units:</b>			
Built 2010 or Later	-	\$75,400	\$188,900
Built 2000 to 2009	\$164,100	\$97,900	\$178,000
Built 1990 to 1999	\$68,800	\$83,500	\$147,300

As can be seen, median home prices in Stilwell have varied considerably over the last five years. The median sale price was \$49,100 in 2015, for a median price per square foot of \$30.34/SF. The median sale price to list price ratio was 96.0%, with median days on market of 65 days.

**Foreclosure Rates**

The next table presents foreclosure rate data for Adair County, compiled by the Federal Reserve Bank of New York. This data is effective as of May 2014.

---

## Foreclosure Rates

Geography	% of Outstanding Mortgages in Foreclosure, May 2014
Adair County	4.8%
State of Oklahoma	2.1%
United States	2.1%
Rank among Counties in Oklahoma*:	1

\* Rank among the 64 counties for which foreclosure rates are available

Source: Federal Reserve Bank of New York, Community Credit Profiles

---

According to the data provided, the foreclosure rate in Adair County was 4.8% in May 2014. The county ranked 1 out of 64 counties in terms of highest foreclosure rates in Oklahoma. This rate compares with the statewide and nationwide foreclosure rates, both of which were 2.1%. With the highest foreclosure rate in the state, foreclosures have likely had a considerable impact on the housing market of Adair County. High rates of foreclosure can have a depressing effect on home values, lengthening days on market and making it more difficult for home buyers to secure financing.

## Rental Market

This section will discuss supply and demand factors for the rental market in Adair County, based on publicly available sources as well as our own surveys of landlords and rental properties in the area.

### Gross Rent Levels

The following table presents data regarding gross rental rates in Adair County. Gross rent is the sum of contract rent, plus all utilities such as electricity, gas, water, sewer and trash, as applicable (telephone, cable, and/or internet expenses are not included in these figures).

<b>2013 Rental Units by Gross Rent</b>						
	<b>Stilwell</b>		<b>Adair County</b>		<b>State of Oklahoma</b>

<b>Median Gross Rent</b>		<b>\$482</b>		<b>\$518</b>		<b>\$699</b>

Sources: 2009-2013 American Community Survey, Tables B25063 and B25064

Median gross rent in Adair County is estimated to be \$518, which is -25.9% less than Oklahoma's median gross rent of \$699/month. Median gross rent in Stilwell is estimated to be \$482.

#### Median Gross Rent by Year of Construction

The next table presents data from the American Community Survey regarding median gross rent by year of housing unit construction. Note that dashes in the table indicate the Census Bureau had insufficient data to provide a median rent figure for that specific data field.

### 2013 Median Gross Rent by Year of Construction

	Stilwell Median Rent	Adair County Median Rent	State of Oklahoma Median Rent
<b>Total Rental Units:</b>			
Built 2010 or Later	-	-	\$933
Built 2000 to 2009	\$456	\$487	\$841
Built 1990 to 1999	\$425	\$511	\$715
Built 1980 to 1989	\$404	\$503	\$693
Built 1970 to 1979	\$477	\$508	\$662
Built 1960 to 1969	\$524	\$513	\$689
Built 1950 to 1959	\$482	\$563	\$714
Built 1940 to 1949	-	\$530	\$673
Built 1939 or Earlier	-	\$703	\$651

Note: Dashes indicate the Census Bureau had insufficient data to estimate a median gross rent.

Source: 2009-2013 American Community Survey, Table 25111

The highest median gross rent in Adair County is among housing units constructed before 1939 (likely representing rental houses), which is \$703 per month. In order to be affordable, a household would need to earn at least \$28,120 per year to afford such a unit.

### Stilwell Rental Survey Data

The next table shows the results of our rental survey of Stilwell. Most of the multifamily property in Stilwell is subsidized in some form.

#### Stilwell Rental Properties

Name	Type	Bedrooms	Bathrooms	Rate	Vacancy
Hickory Village	USDA - Elderly	1	1	\$436	3.13%
Hickory Village	USDA - Elderly	2	1	\$483	3.13%
Savannah Park (Candle Ridge)	USDA / LIHTC - Elderly	1	1	30%	0.00%
Savannah Park (Candle Ridge)	USDA / LIHTC - Elderly	2	1	30%	0.00%
Davidson Heights	Project Based - Elderly	1	1	30%	0.00%
GardenWalk of Stilwell	USDA / LIHTC - Family	1	1	30%	N/A
GardenWalk of Stilwell	USDA / LIHTC - Family	2	2	30%	N/A
GardenWalk of Stilwell	USDA / LIHTC - Family	3	2	30%	N/A
Stilwell Senior Housing	LIHTC - Elderly	1	1	N/A	N/A
Stilwell Senior Housing	LIHTC - Elderly	2	1	N/A	N/A
Stonebrook Park of Stilwell	LIHTC - Family	3	2	N/A	N/A
Stonebrook Park of Stilwell	LIHTC - Family	4	2	N/A	N/A

The previous rent surveys encompass over two hundred rental units in six complexes. These properties are located throughout the community and provide a good indication of the availability and rental structure of multifamily property. Review of historical rental data indicates the comparable rental rates have been generally stable over the last several years. Stonebrook Park is the most recently constructed development, comprising three and four bedroom rental houses.

**Rental Market Vacancy – Stilwell**

The affordable rental properties which reported their current occupancy all reported full occupancy with waiting lists, excepting Hickory Village which had one vacant unit (which was only waiting on approval of an application, the property also has a short waiting list). The overall market vacancy of rental housing units was reported at 13.59% by the Census Bureau as of the most recent American Community Survey. This figure includes rental properties of all types, including single-family houses. It is likely that vacancy is higher among market-rate rental houses than among affordable rental properties. We note that data from HUD indicates the overall occupancy rate of HUD-assisted rental units in Adair County is 95%, which further suggests that vacancy is primarily among market rate units while affordable rental units are well-occupied.

## Projected Housing Need

### Consolidated Housing Affordability Strategy (CHAS)

This section will analyze data from the U.S. Department of Housing and Urban Development's Consolidated Housing Affordability Strategy (CHAS) dataset for Adair County. This data is typically separated into household income thresholds, defined by HUD Area Median Family Income (HAMFI). HUD Area Median Family Income (HAMFI) is equivalent to Area Median Income (AMI) for the purposes of this report. This data is considered the best indicator of housing need available which separates need into household income thresholds as defined by HUD.

### Cost Burden by Income Threshold

The next table presents CHAS data for Adair County regarding housing cost burden as a percentage of household income. Renter costs are considered to be the sum of contract rent and any utilities not paid by the landlord (such as electricity, natural gas, and water, but not including telephone service, cable service, internet service, etc.). Homeowner costs include mortgage debt service (or similar debts such as deeds of trust or contracts for deed), utilities, property taxes and property insurance.

Households are considered to be cost overburdened if their housing costs (renter or owner) are greater than 30% of their gross household income. A household is "severely" overburdened if their housing costs are greater than 50% of their gross household income.

**Adair County : CHAS - Housing Cost Burden by HAMFI**

Household Income / Cost Burden	Owners		Renters	
	Number	Percent	Number	Percent

Source: 2008-2012 HUD Comprehensive Housing Affordability Strategy, Table 6

**Substandard Conditions / Overcrowding by Income Threshold**

The following table summarizes data regarding substandard housing conditions and overcrowding, separated by owner/renter and HAMFI income threshold. Substandard housing conditions are defined by HUD as any housing unit lacking either complete plumbing or a complete kitchen.

A housing unit without “complete plumbing” is any housing unit lacking one or more of the following features (they do not need to all be present in the same room):

1. Hot and cold running water
2. A flush toilet
3. A bathtub or shower

A lack of a complete kitchen is any housing unit lacking any one or more of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

Households are considered to be “overcrowded” if the household has more than 1.0 persons per room (note that this definition is “room” including bedrooms, living rooms and kitchens, as opposed to only “bedrooms”), and is “severely overcrowded” if the household has more than 1.5 persons per room.

<b>Adair County : CHAS - HAMFI by Substandard Conditions / Overcrowding</b>

**Cost Burden by Household Type**

The following table provides a breakdown of households by HAMFI, and by household type and size, and by housing cost burden. The categories of household type provided by HUD are:

- Elderly Family: Households with two persons, either or both age 62 or over.
- Small Family: 2 persons, neither age 62 or over, or families with 3 or 4 persons of any age.
- Large Family: families with 5 or more persons.
- Elderly Non-Family (single persons age 62 or over, or unrelated elderly individuals)
- Non-Elderly, Non-Family: all other households.

**Housing Problems by Household Type**

The next set of tables presents data by household type and whether or not the household is experiencing **any** housing problems. Housing problems are defined by HUD as any household meeting any of the three following criteria:

1. Housing costs greater than 30% of income (cost-overburdened).
2. Living in a housing unit lacking complete plumbing or a complete kitchen (substandard housing unit).
3. Living in a housing unit with more than 1.0 persons per room (overcrowding).

**Housing Problems by Race / Ethnicity**

Data presented in the following tables summarizes housing problems (as previously defined), by HAMFI threshold, and by race/ethnicity, for Adair County. Under CFR 91.305(b)(1)(ii)(2), racial or ethnic groups have disproportionate need if “the percentage of persons in a category of need who are members of a particular racial or ethnic group in a category of need is at least 10 percentage points higher than the percentage of persons in the category as a whole.”

**Adair County : CHAS - Housing Problems by Race / Ethnicity and HAMFI**

**CHAS Conclusions**

The previous data notes many areas of need (and severe need) among the existing population of Adair County. The greatest needs are among households with incomes less than 30% of Area Median Income. Several other areas of note:

- Among households with incomes less than 50% of Area Median Income, there are 700 renter households that are cost overburdened, and 630 homeowners that are cost overburdened.
- Among **elderly** households with incomes less than 50% of Area Median Income, there are 87 renter households that are cost overburdened, and 197 homeowners that are cost overburdened.

- 77.38% of Hispanic renters with incomes less than 80% of Area Median Income have one or more housing problems, and 100% of Asian homeowners with incomes less than 80% of Area Median Income have one or more housing problems.

## Housing Demand – Population Subsets

This section will address 5-year forecasted needs and trends for population special population subsets for Adair County. These forecasts are based on the previously forecasted overall trends for the next five years.

### Housing Needs by Income Thresholds

The first table will address future housing needs and trends for households in Adair County by income threshold: households within incomes below 30%, 50%, 60% and 80% of Area Median Income, by tenure (owner/renter). These forecasts are primarily based on HUD Consolidated Housing Affordability Strategy data presented previously. Households with incomes below 60% of Area Median Income (AMI) are estimated at 120% of the households at 50% of AMI. Note that these figures are cumulative and should not be added across income thresholds.

<b>Adair County: 2015-2020 Housing Needs by Income Threshold</b>					
	Owner	Renter			
	Subset %	Subset %	Owners	Renters	Total
Total New Demand: 2015-2020	100.00%	100.00%	23	27	50
Less than 30% AMI	11.04%	29.35%	3	8	10
Less than 50% AMI	25.47%	53.26%	6	14	20
Less than 60% AMI	30.56%	63.91%	7	17	24
Less than 80% AMI	45.77%	71.74%	11	19	30

### Elderly Housing Needs

The next table will address future housing needs and trends for households with elderly persons (age 62 and up). Like the previous table, this data is based on the overall trends previously defined, and the 2008-2012 CHAS data previously discussed (specifically CHAS Table 16). It is further broken down by income threshold and tenure.

<b>Adair County: 2015-2020 Housing Needs Age 62 and Up</b>					
	Owner	Renter	Elderly	Elderly	Elderly
	Subset %	Subset %	Owners	Renters	Total
Total New Elderly (62+) Demand: 2015-2020	30.37%	14.35%	7	4	11
Elderly less than 30% AMI	4.01%	5.00%	1	1	2
Elderly less than 50% AMI	11.13%	8.91%	3	2	5
Elderly less than 60% AMI	13.36%	10.70%	3	3	6
Elderly less than 80% AMI	17.81%	11.96%	4	3	7

### Housing Needs for Persons with Disabilities / Special Needs

The following table will address future trends and needs for households with at least one household member with at least one disability as identified by HUD CHAS Table 6 (hearing or vision impairments, ambulatory limitations, cognitive limitations, self-care limitations, or independent living limitations). As with the previous tables, this data is also further broken down by income threshold and tenure.

---

**Adair County: 2015-2020 Housing Needs for Persons with Disabilities**

---

	Owner Subset %	Renter Subset %	Disabled Owners	Disabled Renters	<b>Disabled Total</b>
Total New Disabled Demand (2015-2020)	44.08%	45.34%	10	12	<b>22</b>
Disabled less than 30% AMI	6.50%	14.10%	1	4	<b>5</b>
Disabled less than 50% AMI	14.51%	27.77%	3	7	<b>11</b>
Disabled less than 60% AMI	17.42%	33.32%	4	9	<b>13</b>
Disabled less than 80% AMI	24.58%	36.23%	6	10	<b>15</b>

---

**Housing Needs for Veterans**

This section will address housing needs for households with at least one veteran. This data is not available through HUD's Consolidated Housing Affordability Strategy, so we have instead relied on data from the U.S. Census Bureau, specifically the 2009-2013 American Community Survey, Table C21007. This data is further broken down by tenure, poverty status, and disability status.

---

**Adair County: 2015-2020 Housing Needs for Veterans**

---

	Owner Subset %	Renter Subset %	Veteran Owners	Veteran Renters	<b>Veteran Total</b>
Total New Demand (2015-2020)	100.00%	100.00%	23	27	50
Total Veteran Demand	10.40%	10.40%	2	3	<b>5</b>
Veterans with Disabilities	4.72%	4.72%	1	1	<b>2</b>
Veterans Below Poverty	1.80%	1.80%	0	0	<b>1</b>
Disabled Veterans Below Poverty	0.91%	0.91%	0	0	<b>0</b>

---

**Housing Needs for Working Families**

The final table addresses housing needs for working families. Working families are in this case defined as families (households with at least two members related by blood or marriage) with at least one person employed. Like the forecasts for veteran needs, this data cannot be extracted from the HUD CHAS tables, so we have again relied on the Census Bureau's American Community Survey (table B23007 in this instance). The data is further broken down by the presence of children (below the age of 18).

---

**Adair County: 2015-2020 Housing Needs for Working Families**

---

	Owner Subset %	Renter Subset %	Owners	Renters	<b>Total</b>
Total New Demand (2015-2020)	100.00%	100.00%	23	27	50
Total Working Families	50.97%	50.97%	12	14	<b>25</b>
Working Families with Children Present	25.18%	25.18%	6	7	<b>13</b>

---

**Population Subset Conclusions**

Based on population and household growth over the next five years, a total of 50 housing units will be needed in Adair County over the next five years. Of those units:

- 24 will be needed by households earning less than 60% of Area Median Income

- 6 will be needed by households age 62 and up, earning less than 60% of Area Median Income
- 13 will be needed by households with disabilities / special needs, earning less than 60% of Area Median Income
- One will be needed by veterans living below the poverty line
- 13 will be needed by working families with children present

This data suggests a need in Adair County for housing units that are both affordable and accessible to persons with disabilities / special needs, and working families with children present.

## Special Topics

## Adair County Disaster Resiliency Assessment

The purpose of this section is to assess at the county level key components of disaster resiliency. Housing location and quality as well as planning activities can help reduce impacts from disaster events and allow for faster recovery. Disasters can include tornadoes, extreme weather, high winds, as well as man-made events. These events may largely be inevitable, but the ability to reduce damage and casualties as well recovery can be improved with good planning.

### C.0 Comprehensive Plans & Hazard Mitigation Plans

There are 6 key cities within the county (Stilwell, Westville, Watts, Wauhillau, Oklahoma, Maryetta).

*Comprehensive plans are the guiding documents for cities of various sizes to address key aspects of their community from land use, transportation, environment, housing, and economic development.*

The other key plan for a city to manage, mitigate and plan for recovery related to disasters is a Hazard Mitigation Plan (or Emergency Management Plan). Often low density counties, the Hazard Mitigation Plan is done at the county level, though some cities may augment the county plan with a city plan.

Adair County does not have a current Hazard Mitigation Plan. The county does operate under the Oklahoma All Hazards Intrastate Mutual Aid Plan for emergency management and operations.

#### C.2.1.1. Historical Data on Natural Disasters and Other Hazards

Data on historical damages and casualties is typically collected as part of a Hazard Mitigation Plan preparation to determine the appropriate planning measures and actions to take before and after an event.

##### Flooding

All parts of the county may be subject to flash flooding, freeze-thaw flooding and extreme precipitation that can cause flooding, unrelated to the streams and rivers. Development in the floodplain, however, increases risk of damages and property loss potentially repeatedly.

### Stilwell

FEMA's National Flood Hazard Layer <http://fema.maps.arcgis.com/>

### Westville

FEMA's National Flood Hazard Layer <http://fema.maps.arcgis.com/>

## Watts

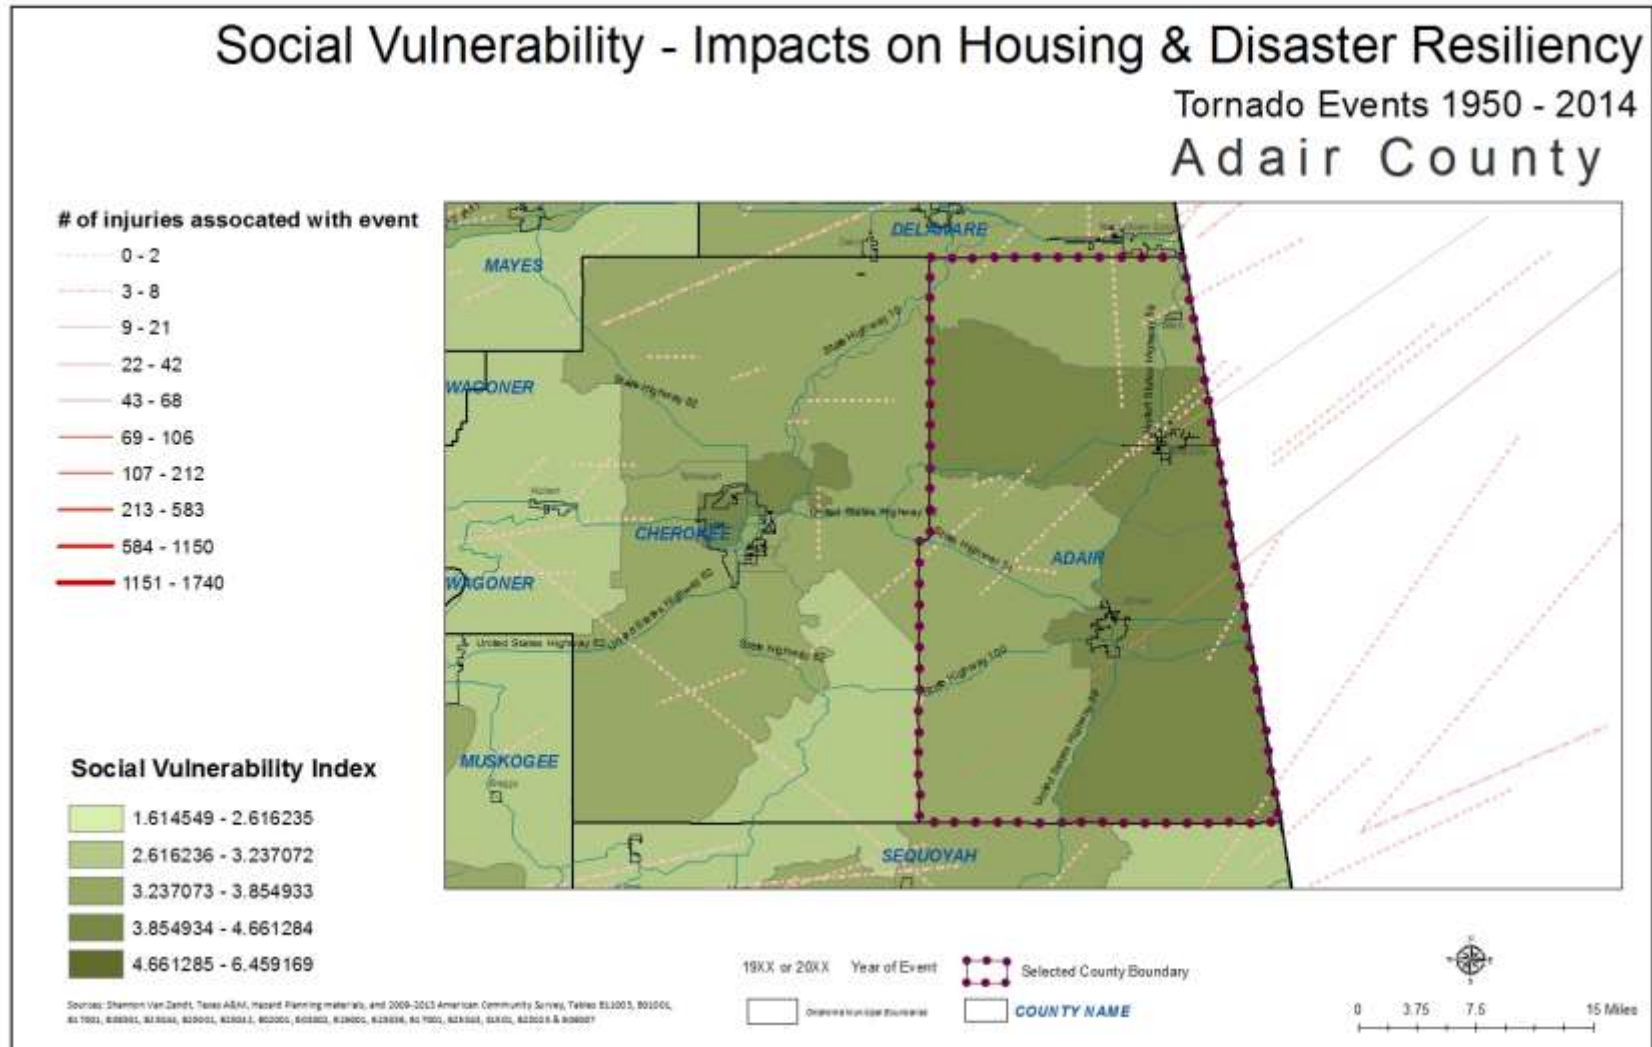

FEMA's National Flood Hazard Layer <http://fema.maps.arcgis.com/>

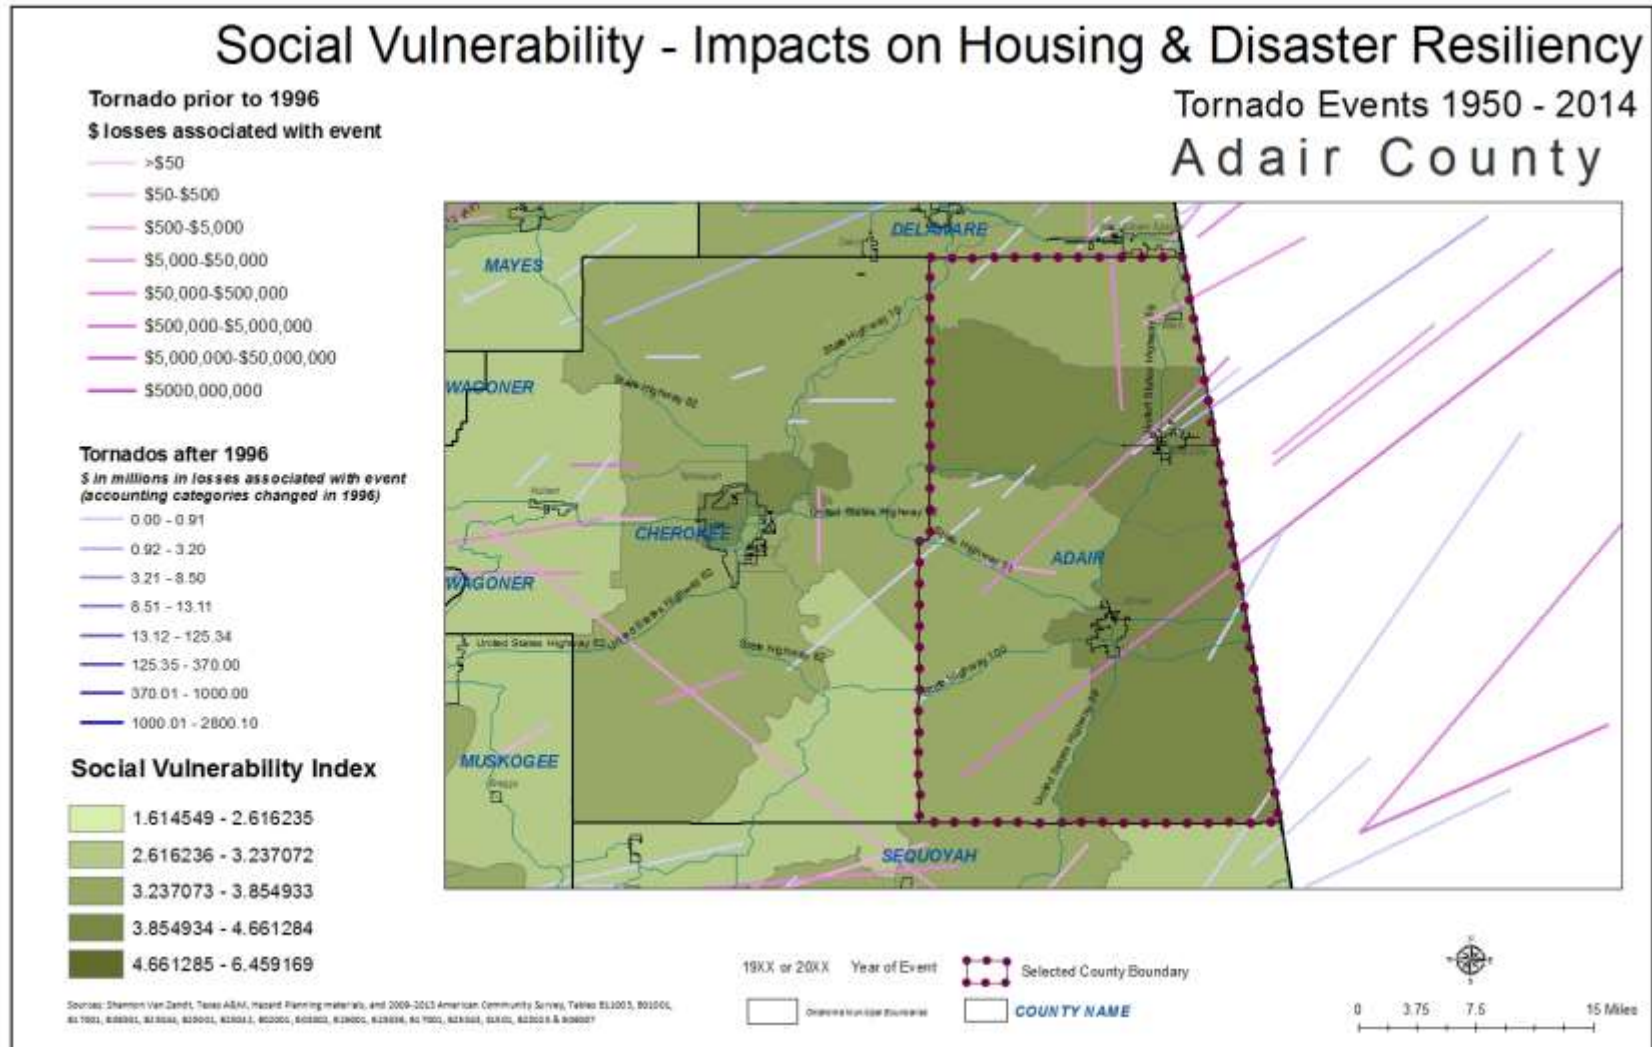

## Tornadoes

NOAA data shows the following historic data on disaster events for the county:

Historic data on tornados between 1961-2014 there are 24 tornados documented. There were 55 injuries that occurred connected to these tornados, with 45 of those injuries happening in the 1970 tornado. There were 5 fatalities connected to tornadoes during this time period, 4 of which occurred in 2010. Property losses between 1961-1996 ranged from \$221,500-\$2,215,000. Accounting for losses estimated changed in 1996. The losses estimated between 1996-2014 was \$2,720,000.

**C.2.1.2; C.2.1.6; C.2.1.7;C.2.1.8 Shelters from Disaster Event**

No registry for county or county seat (Stilwell) was available.

**C.2.1.3 Public Policy and Governance to Build Disaster Resiliency**

Not available.

**C.2.1.4 Local Emergency Response Agency Structure**

Not available.

**C.2.1.5 Threat & Hazard Warning Systems**

No warning systems (outdoor sirens, notification systems) were noted specifically.

Facebook notifications are maintained.

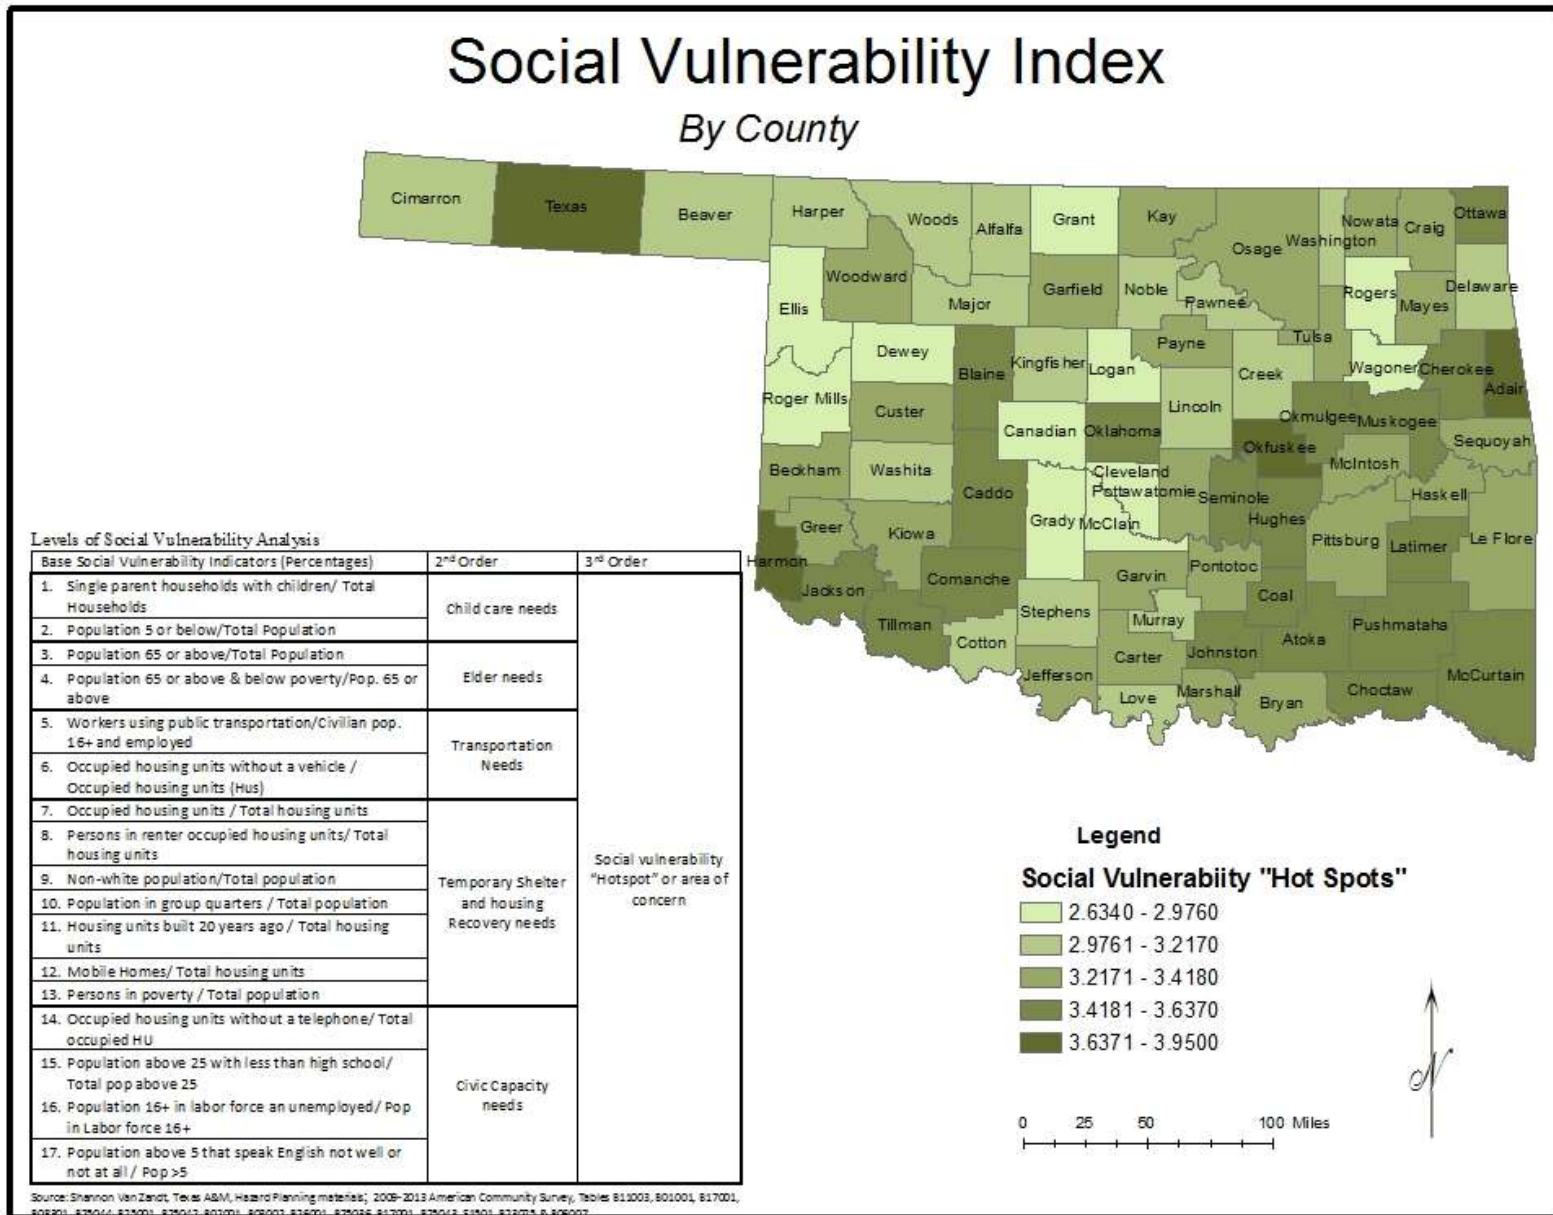

**Social Vulnerability**

Based on the research work done by the Texas A&M University Hazard Reduction and Recovery Center, an added component is being included in this section. Social vulnerability can place households at a further disadvantage during and after a disaster. This analysis is assessing for the county the levels of social vulnerability based on demographic indicators to highlight 'hotspots' or counties that have higher social vulnerability. That combined with Hazard Mitigation Plans – or lack thereof – can highlight places where additional work is needed to reduce impacts on households.

**Social Vulnerability Analysis - Adair County**

Base Social Vulnerability Indicators (%)		2nd Order	3rd Order
1.) Single Parent Households	15.05%	0.219	<b>3.916 Social Vulnerability 'Hotspot' or Area of Concern</b>

### Adair County

**Tornado Magnitude**

**Social Vulnerability Index**

19XX or 20XX Year of Event

Selected County Boundary

County Municipal Boundaries

COUNTY NAME

Source: Shannon Van Zandt, Texas A&M, Hazard Planning materials, and 2009-2013 American Community Survey, Tables S1503, S0503, S1703, S0803, S2304, S2505, S2901, S0902, S2603, S2504, S1705, S2504, S2901, S2305 & S0907

Social vulnerability combined with the devastating impacts of a natural or man-made disaster can compound a household's ability to recover and in fact can place those individuals at an even greater gap or disadvantage prior to the event (Shannon Van Zandt, Texas A&M, Hazard Planning).

This county falls above average per this index for social vulnerability when comparing as a county to other counties in the state. Looking at the census tract level, the eastern portion of the county is even further noted as having elevated social vulnerability factors. This includes the Stilwell and Westville areas.

**Recommendations for this county:**

- Continue to update and maintain the county HMP and include attention to areas within the county that in addition to physical vulnerability may have compounding social vulnerability factors.
- Efforts to strengthen building codes related to tornadoes and natural disasters should be considered.
- Planning for shelters from disaster events for multifamily, HUD and LIHTC units, in addition to all housing in the community should be incorporated with any effort to increase housing.

## Homelessness

### By Continuum of Care

Oklahoma is comprised of eight Continuums of Care (CoC). These entities manage the provision of services to the homeless, among other functions. By definition, CoCs involve nonprofit homeless providers; victim service providers; faith-based organizations; governments; businesses; advocates; public housing agencies; school districts; social service providers; mental health agencies; hospitals; universities; affordable housing developers; law enforcement and other organizations that serve the homeless and those at risk of becoming homeless (Continuum of Care Network pamphlet, 2015). These entities are governed by a community plan that helps them deliver services to the homeless and/or to prevent a return to the homeless. CoCs provide a variety of services aimed at outreach, engagement and assessment, including emergency shelter, rapid re-housing, transitional housing, and permanent housing, among others (Continuum of Care Network pamphlet, 2015).

The data below describes the characteristics of those receiving or eligible for the CoC in which Adair County is located. This data is collected by the CoCs on last day of January each year and reported on an annual basis. It is currently the best source of data available at the State level of understanding the demographics of these populations.

### OK 505 Northeast Oklahoma

OK 505 represents the northeast region of Oklahoma, including Craig, Ottawa, Delaware, Cherokee, Adair, Sequoyah, Washington, Nowata, Rogers, Mayes, and Wagoner counties. There is a disproportionately high number of homeless households comprised of children in this CoC (24 out of 300). Eight of these 24 child only households are unsheltered. This area also has a high incidence of homeless victims of domestic violence (168). This group, for the most part, appears to be finding shelter. However, of the homeless veterans (51), the majority are unsheltered (30). The population of homeless substance abusers is also significant in this CoC (122). They, too, are finding shelter with only 10 reported instances of the failure to find shelter.

This CoC has invested in the creation of a significant number of temporary and permanent units of shelter for homeless individuals and family. There are 449 units of temporary housing available to individual and families in this region year around. An additional 90 units of permanent housing are available to homeless families and individuals. There exists a need for more units of rapid rehousing for veterans given the current population of unsheltered vets.

<i>OK 505 Northeast OK</i>	<b>Emergency Shelter(sheltered)</b>	<b>Transitional Housing(sheltered)</b>	<b>Unsheltered</b>	<b>Total</b>

### **COC Conclusion**

Each of the CoC's represents a unique area. It's important to note that the Point In Time data serves as a baseline. It is likely that the homeless population is much larger than counted. Generally, the State's homeless population is over the age of 24. In some areas of the State, there is a disproportionately high rate of homeless youth. More detailed exploration is necessary to understand the reasons which led them to this State and the needs of homeless youth. Domestic violence victims comprise a significant portion of the homeless population in the State. In some areas, the presence of social service providers for this subpopulation has reduced homeless rates. The same is true with respect to homeless veterans. As anticipated, the majority of the homeless population across the state can be classified as: mentally ill, chronically homeless, and chronic substance abusers. The needs of these difficult to house homeless must remain a priority across the State.

### **A Snap Shot of Homelessness in the State**

Point in Time data was last collected on January 29, 2015 across the State. On that date, counts revealed a homeless populations of more than 3,000 residents. The majority of those counted (2,603 individuals) were classified as households without children. The majority of this group lives in emergency shelters (1,652) or transitional housing (376) with 575 classified as unsheltered.

The number of households with children is seemingly small totaling 343. The vast majority of those in this classification live at emergency shelters (201) or transitional housing (104) with only 38 classified as unsheltered. Homeless service providers in Oklahoma City and Tulsa emphasized that this group was likely undercounted across the State because they are less visible than other categories of homeless. They emphasized that emergency shelters, as presently designed, do not meet the needs of families with children in terms of both privacy and safety.

The Point in Time data reveals less than 100 households comprised of only children. Of these 74 counted households, 35 live in emergency shelters and 39 are unsheltered. This population is likely significantly undercounted as youth who are homeless typically seek to avoid identification for fear of being returned to their homes. These young people often have specific needs for supportive services that are difficult to deliver because the population remains unseen. Homeless advocates in the State hold up Tulsa as a good example of the State for serving homeless youth. OKC's Be the Change is also a leader in identifying and providing needed service to homeless youth in the metropolitan region. The problem of homeless youth is not just isolated to large urban areas. Mid-sized and smaller cities also look for innovative ways to service. Cities like El Reno and Enid have their own drop in centers for homeless youth. Social networks in smaller cities fill similar functions.

Oklahoma City public schools also tracks homeless students within the district. There are homeless students attending 78 elementary and middle schools in Oklahoma City. This data suggests that the majority of the city's homeless students are African American or Hispanic. There are 664 homeless African American students, 724 homeless Hispanic students, and 254 homeless Caucasian students. There are ten high schools in OKC that have reported having homeless students. Douglass and Capitol Hill high schools have the highest homeless student populations. Douglass has 50 homeless African American students. Capitol Hill has 49 homeless Hispanic students. The majority of these students can be classified as "couch homeless" or doubled up, meaning that they are finding

shelter with extended family members, friends, and other non-relatives for a brief amount of time due to hardship.

The majority of Oklahoma's homeless population is over 24 years old. This classification system is not particularly useful in helping to assess the number and needs of the elderly population, which is reported to be a substantial subset of this population.

The Point in Time data categorizes the homeless population into two categories: Hispanic/Latino and Non-Hispanic/Non-Latino. The lion's share of homeless in Oklahoma are Non-Hispanic/Non-Latino (3,528). In Oklahoma City, 62% of the homeless served are classified a Caucasian. Twenty-five percent of the homeless population is African American. Seven percent of the homeless in OKC identify as Native American. Less than one percent of those identified as homeless in OKC are Asian. By contrast, a relative small fraction of the State's homeless population is Hispanic/Latino. The Point in Time data identified a relatively small Hispanic homeless population, including less than 250 individuals. This follows OKC counts that identify 7% of the city's homeless population as Hispanic. Homeless advocates in OKC indicate that social networks, including churches and extended families, keep the number of homeless in the Hispanic population proportionately lower than their Non-Hispanic/Non-Latino counterparts. However, these individual likely classify as "couch homeless" and are in a continued state of being vulnerable to becoming homeless.

The PIT data indicates that are more homeless males (2,237) than females (1,535). This follows national trends. Care should be taken when interpreting this data, as women are less likely to participate in Point in Time counts. There is a growing population of homeless in Oklahoma that identifies as transgender. PIT data identified 5 individuals identifying as transgender. This population is likely much higher and will continue to grow due to family and national attitudes about this population. Transgender populations may require special housing accommodations, especially in the emergency shelter context, to provide for their social and emotional needs.

Another group of homeless individuals that merits special consideration in the distribution of resources is those identified as having special needs. This classification includes persons with "physical, mental or behavioral disabilities, persons with HIV/AIDS and/or persons with alcohol or drug addictions. The Point in Time data estimates that there are nearly 1300 homeless persons with special needs in OKC alone.

The Point in Time data is coarse and does not do an effectively track homeless populations with specific needs, such as those persons who are homeless and living with HIV/AIDS. This special population of homeless is likely growing in Oklahoma. According to the Oklahoma State Department of Health there were an estimated 5,375 cases of persons living with HIV/AIDS by the end of 2013. There were a total of 437 newly diagnosed HIV/AIDS cases in 2013 for the state of Oklahoma. The vast majority of populations living with HIV/AIDS (nearly 72%) reside in urban areas. In OKC alone, the Point in Time data identified at least 25 homeless individuals living with HIV/AIDS. This is likely an undercount. Based on this information and anecdotal data from homeless service providers, special effort must be made to understand the housing, medical, and supportive services needs of homeless persons living with HIV/AIDS.

Shelter is crucial for homeless persons with HIV/AIDS in the management of this illness. However, traditional shelter setting(s) may not be suitable to house this population. Those with suppressed immune systems are vulnerable to the spread of infectious diseases which may be present in open shelters. In addition, shelter personally may not be properly trained in handling AIDS related issues. For these reasons, as well as resources made available by the federal government, homeless persons living with HIV/AIDs are often given housing choice vouchers, created by HOPWA, so that they secure housing on the private market. This can be challenging in constrained rental markets like Norman, for example, where affordable housing options are limited. It is estimated that more than 60 individuals living in OKC with HIV/AIDs are homeless because they have been unable to find a landlord that will accept their housing choice voucher.

**State Name: Oklahoma****Point-in Time Date: 1/29/2015****Summary by household type reported:**

	Sheltered		Unsheltered	Total
	Emergency Shelter	Transitional Housing*

## Rural Areas

Homelessness in the rural areas of the State is much more difficult to calculate. Given the population density of the State, the majority of services that serve the homeless are concentrated in urban and semi-urban areas. Even if beds are available, many rural homeless lack knowledge about the services or a means to travel to receive the same. As a part of this study, OU students were dispatched into the 77 counties in the State to, among other issues, attempt to understand the degree to which there is rural homelessness in the State. Their qualitative inquiries yielded very little data, in part, because rural homeless is difficult to identify and often ignored. For the purposes of this report, a literature review was prepared on the topic of rural homelessness in the United States. The goals of this academic review is to assist policymakers and service providers in the State in uncovering the dimensions of this illusive population.

In the U.S., the rural homeless population is predominantly Caucasian. This population is comprised of single mothers, widowed wives and husbands, divorced and separated men and women, and young people. A study examining rural homelessness in Ohio found that nearly 40% of those who classify as homeless were divorced, separated, or widowed (First, Richard J., John C. Rife, and Beverly G. Toomey, 1994, pg. 101). Ohio's rural homeless were also relatively young. Close to 80% of homeless population in this study was between the ages of 18 and 39 years old (First et al, 1994, pg. 101). Rural homelessness is often less visible than urban homelessness because these populations commonly take shelter are at a friend's house, in their vehicles, or on abandoned properties. These populations can also be found on "...campgrounds or in hollows, desert canyons, farmers' fields, state parks, and highway rest areas" (Milbourne and Cloke, 2006, pg. 17).

The causes of rural homelessness mirror, in most ways, the plight of the urban homeless. The study of homelessness in rural Ohio revealed family problems and substance abuse issues as primary causes of rural homelessness. The incidence of homelessness resulting from situations of domestic violence is high in rural areas (Cummins et al, 1998). Substance abuse issues are a common cause for homelessness in rural America. The literature reveals that this population tends to be homeless because they have isolated themselves from family and people who want to help (First et al, 1994). In the case of both domestic violence and substance abuse, it is often difficult for these individuals to find shelter and the supportive services they require in rural areas where options are limited, if available at all. The thought of moving to an urban area to find both shelter and supportive services is sometimes not considered at all by these vulnerable populations.

Rural areas are also more prone to the kind of poverty that puts individuals and families at risk for homelessness. The number of people living at or below the poverty line in rural places is higher than anywhere else in the United States (Moore, 2001). The statement "rural homelessness is a microcosm of national economic and political developments" cannot be truer for American rural communities (Vissing, 1996, pg. 103). The disinvestment of small towns and their inability to attract long-term sustainable business development, cripples a small town's economy. In effect, this is a main contributor for why poverty is such a common theme for rural communities. As a result, the State should carefully consider its investments in rural Oklahoma. While there is a need for shelter in these places, the construction of this housing type should be weighed with long term opportunities for employment in the area.

It is not surprising that rural areas typically lack both emergency shelters and temporary housing options. Services that provide temporary housing and provide relief and support services for those who cannot find food are virtually nonexistent in rural communities across the United States (Moore, 2001). Sheltering the homeless is undercapitalized in rural areas because communities do not see a concentration of homeless individuals (Vissing, 1996, pg. 146). As a result, the homeless must satisfice where they are. For instance, for families who are homeless, some of them use a friend's house to store clothes or to seek shelter, while some receive assistance from churches (Cummins et al, 1998). Others migrate to urban areas where services are available and more accessible (Rollinson, Paul A., and John T. Pardeck, 2006).

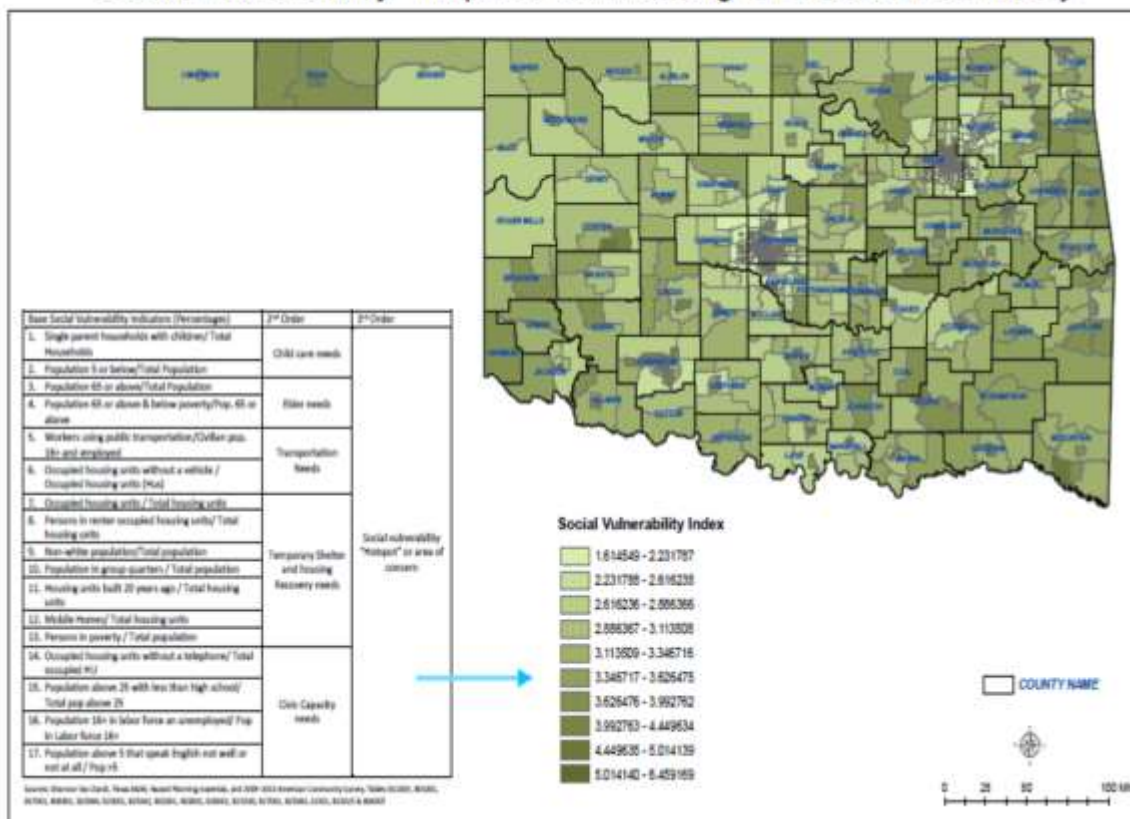

The absence of affordable housing in rural areas is a root cause of homelessness (Levinson, David, and Marcy Ross, 2007). In fact, it was noticed that many of the people were receiving monetary assistance or previously had some money saved up to spend on housing, but these measures were not enough to keep them afloat (First et al, 1994, pg. 101). Housing costs rise in rural areas typically rise as a result of competition for a limited amount of housing stock. In some rural areas, low income families are spending 70% of their household incomes on housing, sometimes substandard housing (Vissing, 1996, pg. 124). As Levinson et al explain, "housing costs are lower but so are incomes, with the result of placing a heavier rent burden in the community" (Levinson, David, and Marcy Ross, 2007, pg. 45). Renters in rural communities, as a result, are far more susceptible to becoming homeless than their urban or suburban counterparts because they do not have the financial safety net sometimes associated with homeownership (Fitchen, 1991, pg. 193).

While this brief review of the literature describes the state of homelessness across rural America, many of the lessons learned are easily translated to an Oklahoma context. The condition and supply of affordable housing units is relatively poor in many rural portions of the State. Rent burden, as more fully characterized in the Consolidated Housing Affordability Strategy (CHAS) section of this report, is high. This leaves families living and working in relatively weak economies vulnerable to homelessness. Once homeless, supportive services in these areas are relatively limited, especially for the chronically homeless, those with substance abuse problems, and victims of domestic violence. Services available to these populations in urban areas may not be attractive to individuals and families who are accustomed to life in rural communities. Where practicable, more consideration must be given to providing supportive services and temporary and permanent housing to homeless populations wishing to remain in rural areas.

### At Risk For Homelessness

Poverty is the primary factor that places Oklahoma families at risk of being homeless. There are many factors experienced by those living in poverty which leave residents more or less vulnerable to homelessness. For the purposes of this study, a social vulnerability index has been constructed to measure the likelihood or risk that residents living in poverty might find themselves homeless. This index includes factors such as single headed households, concentration of young and elderly residents, the reliance on public transportation, private vehicle availability, racial composition, housing type, presence or absence of a telephone in the household, amongst other factors. This index is additive and seeks to understand the collective impact of these factors in estimating the vulnerability of a local population. While employed in more significant detail in the section of this report focusing on disaster resiliency, this tool is useful in identifying areas of the State where populations may be most vulnerable to homelessness. The index utilized in this section is different from the one crafted in the Disaster Resiliency chapter of this report in that it estimates social vulnerability at the county level, rather than by census tract. The decision to study vulnerability to homelessness at the county level was made to help policymakers understand, more generally, where resources and economic interventions are most necessary to stave off the potential effects of homelessness. This maps presents vulnerability to homelessness on the county level, depicting the most vulnerable counties in dark green.

### Social Vulnerability - Impacts on Housing & Disaster Resiliency

The Oklahoma families most likely at risk are those living in public and subsidized housing. They live below the poverty line. Even those who are employed, remain vulnerable to homeless because an unexpected expense, like a medical emergency, threatens their ability to pay for their share of rent owed or utilities. A missed payment can easily lead to eviction and homeless.

Through the U.S. Department of Housing and Urban Development, Oklahoma service providers have been vested with more than 24,000 housing choice vouchers. Their spatial distribution is outlined below. Of significance is the size of the waiting lists for public housing units and housing choice vouchers in cities across the State. These individuals are the most vulnerable to being homeless.

		Authorized Vouchers	Public Housing Waiting List	Voucher waiting list
Ada	OK024	110	Unknown	Unknown
Bristow	OK033	87	Unknown	Unknown
Broken Bow	OK006	217	Unknown	Unknown

Oklahoma		24,612		

## Findings and Recommendations

There remains a significant homeless population in the urban and rural areas of Oklahoma. This population is very likely significantly undercounted in the Point In Time data. Local homeless advocates and service providers are highly aware of this undercount and are using innovative tools to find and serve the homeless. One example of these extra efforts to identify homeless populations is the data being collected by schools about the number of youth who are homeless or “couch” homeless. In this study, the research team also considered those families living at the economic margins and makes the case for the need for funding to support the housing needs of those that live a pay check or two from being homeless.

Those living with HIV/AIDS tend to underreport their status and needs. Given the cost of medical care these individuals face, the need for permanent and stable housing is critical. Housing providers must work to ensure that there are enough units for this undercounted population. Working with county health care providers, OHFA is much more likely to accurately estimate the size and needs of this population of homeless and potentially homeless persons. Special care must be taken to ascertain the barriers these individuals face when using vouchers to secure housing in the marketplace.

Victims of domestic violence require housing and supportive services across the State. CoCs with high supportive services tend to better accommodate the housing needs of these population. Cleveland County provides a good model for the State. However, many homeless victims of domestic violence live in rural areas that are underserved. Efforts must be undertaken to work with social services providers, schools, churches, and the police to help identify these individuals and to lead them to available housing and supportive services.

While not mentioned in the PIT data, estimates must be prepared to calculate the number and needs of homeless populations with felonies. In particular, there has been a rise nationally in the number of homeless sex offenders. Zoning regulations and discrimination from the private market has pushed many registered sex offenders to the periphery of many communities. This population must not be forgotten by policymakers.

The size of the homeless veteran population is decreasing as a result of national initiatives to end homelessness for veterans in Oklahoma. The needs of homeless veterans appear to be highest in areas of the State near VA facilities. Permanent housing should be constructed at a higher rate in these areas to meet demand. Care should be taken to make certain that the housing constructed is built to meet the psychological needs of veterans, particularly those suffering from PTSD.

Rural homelessness, in general, is a challenge to assess and characterize. The rate of homelessness in rural areas is most likely much higher than annual counts demonstrate. The majority of rural homeless likely find shelter out of public view. Some may shelter in their cars, in undeveloped areas or in the homes of those who allow them to stay. They are not likely to find their way to urban areas given their lack of transportation options and preferences for rural living. Programs that are developed to provide housing for the rural homeless must be developed to allow sheltering in place where possible.

Waiting lists for public housing and section 8 vouchers are high across the State. This is not uncommon to Oklahoma. However, when we are considering the size of the population that is at risk to homelessness, these waiting lists are an important factor to consider. Resources should be spent in a manner which is preventative so that these individuals' and families' needs are met before they become homeless.

The absence of affordable housing alternatives across some parts of the State is the largest threat to homelessness. In markets that are constrained by an aging housing stock or those that are rapidly growing, individuals and families who live on the economic margins are at risk for becoming homeless. Communities must work to ensure that zoning regulations promote the development of housing types serving all income levels, including the construction of affordable housing to meet the needs of the presently homeless and those at risk for becoming the same. Funding distributions should be targeted to communities with the highest needs who are willing to do what is necessary to meet the needs of the homeless and those at risk for the same.

## Fair Housing

### Summary

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity.

These findings are intended to aid the Oklahoma Housing Finance Agency (OHFA) determine the location of new affordable housing in relation to vulnerable populations and explore ways to expand the opportunities available to help communities of existing affordable housing achieve self-sufficiency.

### Key Findings:

- 70% of affordable housing units are located in census tracts marked by poverty
- 62% of affordable housing is located in census tracts where a majority of the residents are not white
- 13% of affordable housing units have no access to transit services and 56% have access to limited service, on-demand transit
- 2.6% of affordable housing units have limited access to a hospital
- 7.8% of affordable housing units are located in food deserts

### Recommendations:

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

### What is Fair Housing?

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. On one hand, this protects the ability of individuals to obtain housing regardless of personal characteristics such as race, skin color, national origin, gender, familial status, or disability. It also focuses attention on more subtle forms of discrimination that cluster low-income housing in ways that inhibit the ability of communities to access services and amenities that support self-sufficiency and autonomy.

Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity. In 2014, HUD released the Affirmatively Furthering Fair Housing (AFFH) rule for public comment. The draft rule

“directs HUD’s program participants to take significant actions to overcome historic patterns of segregation, achieve truly balanced and integrated living patterns, promote fair housing choice, and foster inclusive communities that are free from discrimination” (HUD 2015). In 2015, the United States Supreme Court provided legal support for actions taken to remedy patterns that impede the upward mobility and opportunity of low-income individuals and communities. In the case of Texas Department of Housing and Community Affairs v. The Inclusive Communities Project the court reiterated the need to address disparate impacts in considering the location of affordable housing and reinforced the importance of AFFH (Bostic 2015). Housing discrimination from this perspective is not only felt by individual residents, it can also be the result of actions that work to limit the opportunities to improve the quality of life in local communities.

### Approach

In Oklahoma, a combination of federal and state programs work to support the opportunities provided to individuals and families who rest safely and comfortably in an apartment or home. Here we use publicly available data for units that are part of the Low Income Housing Tax Credit (LIHTC) Program, the Rural Rental Housing Loans, or OHFA administered programs such as Oklahoma Affordable Housing Tax Credit (AHTC), the HOME investment partnership program, the Section 8 Housing Choice Voucher Program, and multi-family bonds. Collectively, these programs represent state efforts to assist individuals who are unable to afford housing.

Indicators of disparate impact vary but seem to contingent upon the contextual characteristics of a particular neighborhood. In an effort to help communities investigate and understand community level disparate impacts, HUD created a Fair Housing Assessment Tool ([http://www.huduser.gov/portal/affht\\_pt.html#affh](http://www.huduser.gov/portal/affht_pt.html#affh)). The assessment tool includes measures on indicators of disparate impacts based on the clustering of potentially vulnerable populations, including:

- Race/Ethnicity of Residents
- National Origin of Residents
- English Proficiency of Residents
- Job Accessibility
- Transit Accessibility
- Level of Poverty
- Environmental Exposure (e.g. pollution, crime, food, health care, etc.)
- Disability

This report uses the Fair Housing Assessment Tool in conjunction with readily available data to initiate a more thorough investigation of the potential for disparate impacts in the state. The findings are intended to aid the Oklahoma Housing Finance Agency regarding future location of new fair housing in relation to vulnerable populations and the future opportunities available to help communities of existing affordable housing achieve self-sufficiency.

### Data

Data for this report are compiled from a variety of sources including the United States Census, the University of Oklahoma Center for Spatial Analysis, and primary data collected as part of ongoing research efforts at the University of Oklahoma. Data are aggregated into census tracts and reported statewide as well as by county (see Appendix 1).

#### 1. Urban/Rural

A majority of the affordable housing in Oklahoma is situated in rural communities. Urban communities including Edmond, Lawton, Norman, Oklahoma City, and Tulsa are home to just over 1/3 of the affordable housing units in the state.

	Total Affordable Housing Units	Situated an Urban Setting	Situated in a Rural Setting
OHFA	35,292	11,699 (33.1%)	23,593 (66.9%)
515	5,384	0	5,384 (100%)
LIHTC	23,537	8,255 (35.1%)	15,282 (64.9%)
Total	64,213	19,954 (31.1%)	44,259 (68.9%)

2. Poverty

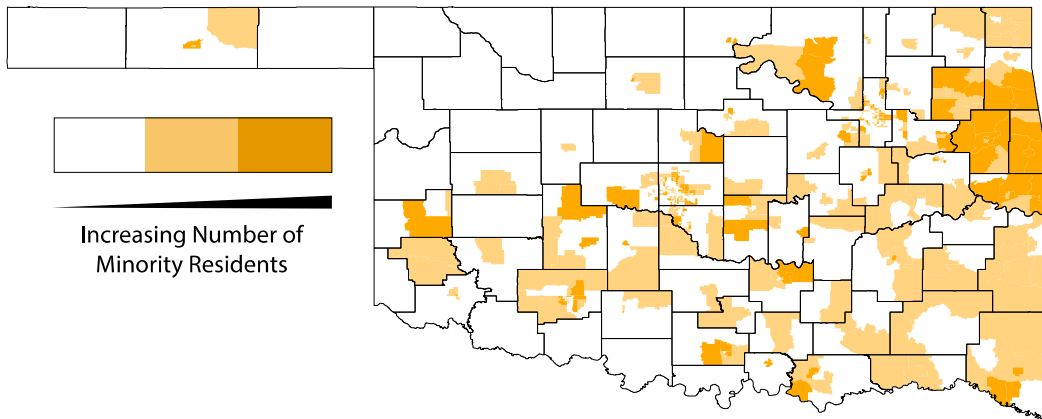

Approximately 70% of affordable housing units in Oklahoma are located in census tracts where the number of residents living in poverty is above the state average. About half of these units are located in areas of extreme poverty, where the number of individuals who are economically vulnerable exceeds 994, more than one standard deviation (411) from the mean (583).

	Total Affordable Housing Units	Situated in Poverty	Situated in Extreme Poverty
OHFA	35,292	12,295 (34.8%)	12,464 (35.3%)
515	5,384	2,093 (38.9%)	1,839 (34.2%)
LIHTC	23,537	7,483 (31.8%)	8,924 (38.0%)
Total	64,213	21,796 (33.9%)	23,227 (36.2%)

### 3. Non-white Enclaves

Just over 60% of affordable housing units in Oklahoma are located in census tracts where a majority of the residents are non-white. With just fewer than 24% of the total affordable housing units in census tracts heavily populated with residents who are not white – identified as census tracts where the number of non-white residents is more than 1,595 - one standard deviation (653) greater than the mean (542).

	Total Affordable Housing Units	Situated in Majority Non-White Community	Situated in Heavily Non-White Community
OHFA	35,292	12,814 (36.3%)	7,907 (22.4%)
515	5,384	2,229 (41.4%)	1,288 (23.9%)
LIHTC	23,537	10,285 (43.7%)	5,677 (24.1%)
Total	64,213	25,328 (39.4%)	14,872 (23.2%)

#### 4. Immigrant Enclaves

One-third of affordable housing units in Oklahoma are located in census tracts where more than the average number of residents are immigrants. About half of these units are located in areas dense with immigrants, where the number of individuals who are not citizen exceeds 349, more than one standard deviation (219) from the mean (130).

	Total Affordable Housing Units	Situated in Immigrant Enclave	Situated in Heavily Immigrant Enclave
OHFA	35,292	8,114 (23.0%)	3,358 (9.5%)
515	5,384	1,017 (18.9%)	159 (3.0%)
LIHTC	23,537	5,457 (23.2%)	3,364 (14.3%)
Total	64,213	14,588 (22.7%)	6,881 (10.7%)

5. Limited English Proficiency

Almost 17,000 existing affordable housing units in Oklahoma are located in census tracts where more residents than average do not speak English very well. A little more than half of these units are located in areas dense with individuals with limited English proficiency, where the number of individuals who speak English less than very well exceeds 380, more than one standard deviation (240) from the mean (140).

	Total Affordable Housing Units	Community with more than average number of Limited English Speakers	Community dense with limited English Speakers
OHFA	35,292	6,250 (17.7%)	3,122 (8.8%)
515	5,384	799 (14.8%)	240 (4.5%)
LIHTC	23,537	4,034 (17.1%)	3,475 (14.8%)
Total	64,213	11,083 (17.3%)	6,837 (10.6%)

6. Disability

Almost 60% of existing affordable housing units in Oklahoma are located in census tracts where more residents than average have a disability. A little more than half of these units are located in areas dense with individuals with a disability, where the number of individuals who are disabled is greater than 831, more than one standard deviation (289) from the mean (542).

	Total Affordable Housing Units	Community with more than average number of Disabled Residents	Community dense with Disabled Residents
OHFA	35,292	10,098 (28.6%)	10,722 (30.4%)
515	5,384	1,686 (31.3%)	2,594 (48.8%)
LIHTC	23,537	7,074 (30.1%)	6,289 (26.7%)
Total	64,213	18,858 (29.4%)	19,605 (30.5%)

7. Hospitals

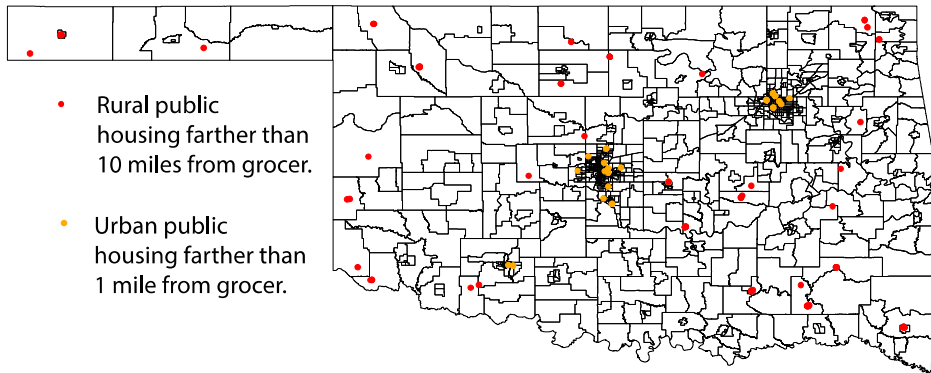

There are no affordable housing units more than 30 miles from a hospital. Approximately 2.6% of affordable housing units are farther than 15 miles from the nearest hospital. As indicated by the larger percentage of Rural Rental Housing Loan units, most of these are located in rural areas.

	Total Affordable Housing Units	More than 15 miles to nearest hospital	More than 30 miles to nearest hospital
OHFA	35,292	628 (1.8%)	0
515	5,384	500 (9.3%)	0
LIHTC	23,537	532 (2.3%)	0
Total	64,213	1,660 (2.6%)	0

8. Grocery Stores

Approximately 7.8% of affordable housing units are in areas that are classified as food deserts. According to the United States Department of Agriculture, food deserts exist in urban environments further than 1 mile from a grocery store and in rural environments further than 10 miles from a grocery store (<https://apps.ams.usda.gov/fooddeserts/foodDeserts.aspx>).

	Total Affordable Housing Units	Urban > 1 Mile from nearest Grocer	Rural > 10 miles to nearest Grocer
OHFA	35,292	1,493 (4.2%)	1,097 (3.1%)
515	5,384	0	466 (8.7%)
LIHTC	23,537	1,175 (5.0%)	769 (3.3%)
Total	64,213	2,668 (4.2%)	2,332 (3.6%)

9. Transit

A little over 69% of affordable housing in Oklahoma is located in a census tract with limited or no access to transit services. This includes 8,367 affordable housing units in areas that lack public transit services all together as well as 36,363 units that are situated in areas that have on-demand transportation services that often have limited operation times and may only serve elderly and disabled populations or those going to a medical appointment.

	Total Affordable Housing Units	No Transit	Urban Transit	On-Demand Transit
OHFA	35,292	4,035 (11.4%)	11,265 (31.9%)	19,992 (56.6%)
515	5,384	767 (14.2%)	0	4,617 (85.8%)
LIHTC	23,537	3,565 (15.1%)	8,217 (34.9%)	11,755 (49.9%)
Total	64,213	8,367 (13.0%)	19,482 (30.3%)	36,363 (56.6%)

**What does this mean for Oklahoma?**

This report suggests a number of possible ways forward for the Oklahoma Housing Finance Agency as it continues to support quality low-income and workforce housing for residents of the state. Across a number of indicators of opportunity, affordable housing in the state clusters in ways that raise concerns about the opportunities available to affordable housing residents in comparison to other residents.

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

Moving ahead, Oklahoma should be wary of a narrowly focused vision focused solely on the problems of existing affordable housing and the integration of these residents into other communities. The relocation of residents harkens back to the physical and social destruction brought about by urban renewal. Such an approach pits efforts to enhance existing affordable housing through community development against efforts to build a more integrated and diverse society (Goetz 2015). Rather, Oklahoma has the opportunity to work closely with local municipalities to improve the conditions of current affordable housing communities while simultaneously advancing integration of low-income and workforce housing through the construction in new settings.

For future new development, a number of case studies and emerging scholarship on the importance of neighborhood effects provide guidance on possible ways forward for Oklahoma. For instance, in El Paso, Texas a public private partnership between the Housing Authority of the City of El Paso and private developers led to the development of a mixed income housing development. Eastside Crossings (<http://www.hacep.org/about-us/eastside-crossings>) provides 74 traditional affordable housing units, 79 affordable housing units, and 45 market rate units in partnership with the Texas Department of Housing and Community Affairs (Housing Authority of El Paso 2015). In Sacramento, partnership between private developers and the Capital Area Redevelopment Authority resulted in the adaptive reuse of a building listed on the National Register of Historic Buildings into affordable Housing (Vellinga 2015). Located in a dense, walkable, transit-oriented community, the Warehouse Artist Lofts (<http://www.rstreetwal.com>) are home to 116 units, 86 of which are affordable and 13,000 square feet of ground floor retail.

For existing affordable housing, strategies exist to help enhance localized opportunities and build a culture of community participation around housing. Across the nation, there is a need to refocus the discussion away from the deficits found in many communities to look for closely at opportunities (Lens 2015) and to think about the consequences of physical, social, and economic isolation (Clarke, Morenoff, Debbink, Golberstein, Elliott, & Lantz, 2014.).

The Oklahoma Housing Finance Agency may need to collaborate more closely with other governmental agencies to develop comprehensive strategies that not only improve existing housing but also work toward enhancing access to food, recreation, amenities, jobs, and quality schools. By doing so, OHFA could help build the social and physical resiliency of these communities so that residents would be empowered to choose for themselves whether or not they want to stay and be part of their existing community or move elsewhere in search of a better quality of life. A set of tools for doing some of this work is available through Policy Link (<http://www.policylink.org/equity-tools/equitable-development-toolkit/about-toolkit>). For those who are relocated due to circumstances that make staying in place impossible, intensive case management may be required to ensure that these residents avoid pitfalls and thrive in a new environment (Theodos, Popkin, Guernsey, & Getsinger, 2010). But evidence continues to suggest that stability, particularly in the lives of children, is an essential part of ensuring that everyone has the opportunity to succeed and thrive (HUD 2014).

## Lead-Based Paint Hazards

### Findings / Health and Well-being

Lead is known to be highly toxic particularly to young children 5 years of age and under. Excessive exposure results in reduced intelligence, impaired hearing, reduced stature and a host of other negative health effects. It is well documented that a common source of lead exposure for children is lead-based paint in older housing along with the dust and soil it generates. Children are exposed to lead-based paint most commonly by directly eating paint chips or indirectly by ingesting lead-contaminated house dust or soil through normal hand-to-mouth contact.

For purposes of this analysis, the federal definition of “lead-based paint hazard” at 24 CFR Part 35.86 was applied. Under this definition, lead-based paint hazard is defined as, “...any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as established by the appropriate Federal agency.”

It is noteworthy estimates presented can only be stated as dwellings that “potentially” have LBP hazards because there are no real-time surveys or studies of residential structures built prior to 1978. However, there have been previous estimations provided in the state’s Consolidated Plan.

### Statewide Findings

Using methodology which will be discussed later in this section, we have estimated the number of housing units in Oklahoma with lead-based paint hazards as defined in 24 CFR Part 35.86. Our estimates are shown in the following table.

<b>Lead-Based Paint Hazards in Oklahoma</b>		
	Number	Percent
Total Housing Units	1,432,730	
Total Housing Units with Lead-Based Paint Hazards	240,229	16.8%
Owner-Occupied Units w/LBP Hazards	159,861	66.5%
Renter-Occupied Units w/LBP Hazards	80,368	33.5%
Housing Units w/LBP Hazards Occupied by Low-to-Moderate Income Households	113,931	47.4%
Housing Units w/LBP Hazards with Children < 6 Years of Age Present	37,426	15.6%
Housing Units w/LBP Hazards Occupied by LMI Households and Children < 6 Years of Age Present	19,761	52.8%

Sources: American Healthy Homes Survey Table 5-1 & CHASTables 12 & 13

As shown, we estimate that there are 240,229 housing units in Oklahoma containing lead-based paint hazards, representing 16.8% of Oklahoma’s total housing stock. 66.5% of those units are owner-occupied, while 33.5% are renter-occupied. Of the 240,229 housing units containing lead-based paint hazards, 113,931 units, or 47.4%, are occupied by households with low-to-moderate incomes as defined by HUD. Among all housing units with lead-based paint hazards, 37,426 units have children under the age of six present, and 52.8% of those units, or 19,761 units total, are households with low-to-moderate incomes. Exhibits 2 through 6, found at the end of this section, graphically summarize our statewide findings at a county level.

**Disaster Resiliency/ Economy and Society, Infrastructure and Environment**

While communities strive to address lead-based paint hazards through education and removal when detected in connection with federally funded local housing rehabilitation initiatives, hazard detection and mitigation may have special considerations in terms of disaster resiliency.

Many disasters are accompanied by widespread damage to residential structures often times scattering building material debris across the landscape necessitating removal by heavy equipment and disposal in landfills. When building materials contaminated with lead-based paint become part of non-contaminated debris disposal, it presents an environmental hazard that can span well beyond recovery and rebuilding efforts.

**Leadership and Strategy**

Given the albeit large but finite number of potential housing units with lead hazards, the state and local communities may wish to consider initiatives aimed at reducing and/or eventually eliminating residential lead-based paint hazards, particularly in housing occupied by low and moderate income households with young children present. One such initiative could be the use of the state's various federal and state housing programs' competitive funding selection criteria. By designing rating criteria that specifically awards points to applicants that purposefully seek out properties within counties known to have higher percentages of lead hazards, housing developers along with those engaged in rehabilitation may be incentivized to engage in hazard mitigation.

State and local governments may wish to capitalize on the results of this study by using the data to support competitive applications to the Federal Home Loan Bank Topeka's Affordable Housing Program funding for owner occupied rehabilitation which, among other competitive rating criteria, awards points for the "Abatement of Hazardous Environmental Conditions". Similarly, this report's data may be used to document hazards and need in applications for competitive health care grants offered at the federal level.

Similar to initiatives undertaken by USHUD, the state may want to consider undertaking a real-time sample survey of homes built prior to 1978 across the state's community sizes and counties to more accurately ascertain the extent of the hazard and/or conducting real-time surveys of LBP Risk Assessors licensed by the ODEQ.

**Survey of Previous Lead-based Paint Studies**

Using a combination of US Census Bureau and US Department of Housing and Urban Development Comprehensive Housing Affordability Strategy data and age of housing stock built prior to 1980, the Oklahoma Department of Commerce's, "State of Oklahoma Five-Year E-Consolidated Plan FY 2014 – 2018" estimated 59% of the owner occupied and 65% of the renter occupied housing had the potential of containing lead-based paint. To address lead paint hazards, the Consolidated Plan recommended assessment of hazard presence be conducted at the point dwelling rehabilitation is undertaken and that nonprofits advise persons receiving federal rehabilitating assistance regarding the dangers of lead exposure.

At the national level, between 1998 and 2000, USHUD Office of Health Homes and Lead Hazard Control staff and the National Institute of Environmental Health Sciences conducted a real-time

random sampling of 831 permanently occupied housing units (multifamily, single family and mobile homes) taken from all 50 states and the District of Columbia. The results indicated an estimated 38 million (39% of the 96 million total housing units) of the nation's housing units had lead-based paint hazards. Of that total, 24 million had significant lead hazards with 1.2 million of those units occupied by low income families. It was further estimate that 35% of all low income housing had lead-based paint hazards. The study also noted the prevalence of lead-based paint increases with age of housing. However, most painted surfaces, even in older homes don't have lead paint. Geography was found to be related to the incidence of lead-based paint with the Northeast and Midwest having 2 times the prevalence of lead paint than the South and West. Finally, the study recommends "public-private sector resources be directed units posing the greatest risk" as a preventive measure to avoid lead poisoning.

In April 2011, the U.S. Department of Housing and Urban Development, Office of Healthy Homes and Lead Hazard Control updated its 1998-2000 nationwide report in its publication, "American Healthy Homes Survey, Lead and Arsenic Findings". This report, conducted from June 2005 through March 2006, estimated 37.1 million homes (34.9%) out of a total of 106 million total housing units have lead-based paint somewhere in the building. Of the 65.6 million homes built before 1978, 34.4 million (52%) have lead-based paint. The study reaffirmed the previous finding that the prevalence of lead-based paint is higher in the Northeast and Midwest parts of the United States than South and West. It also confirmed earlier finding that the incidence of lead-based paint increases with age of housing with 86% of the homes built prior to 1940 containing lead. An estimated 3.6 million homes with children less than 6 years of age have lead-based paint hazards of which 1.1 million are low income households. Of the 16.8 million homes with children under the age of 6, 5.7 million (34%) have lead-based paint, about the same incidence of lead-based paint in all homes.

In June 2006, the Oklahoma State Department of Health's Childhood Lead Poisoning Prevention Program (OCLPPP) received a 5-year project grant "Oklahoma Childhood Lead Poisoning Prevention Program Focusing in High Risk Groups". That program focused on communities evidencing high numbers of children 6-72 months of age who are at high risk for lead poisoning.

In order to more effectively target high-risk areas and populations, the OCLPPP identified 21 high-risk target area (HRTA) zip codes (see Exhibit #1) located within Oklahoma, Tulsa, Muskogee, Jackson, Okmulgee, Ottawa, Kay, Garfield, and Hughes counties. These 21 zip codes were narrowed from a list of 57 zip codes out of the state's approximately 700 zip codes that with populations of 5,000 or more persons; greater than or equal to 22% of housing stock built prior to 1950; and, greater than or equal to 18% of children under the age of 6 years living below the poverty level.

The 57 zip codes were further compared and evaluated based on selected characteristics such as EBLL cases and proportion of minority population. Zip codes with higher EBLL prevalence and/or minority populations (Hispanic/African American/American Indian) were ranked higher and given the designation as HRTA zip codes.

### **Adair County Findings**

The number of housing units in Adair County containing lead-based paint hazards can be estimated by applying the percentages of housing units with such hazards reported by the American Healthy Homes

Survey, to the number of occupied homes in Adair County, by year of construction. The following table presents the percentage of housing units in the Census Bureau South Region based on the AHHS findings.

<b>Housing Units in the South Census Region with Lead-Based Paint Hazards by Year of Construction</b>			
Year of Construction	No. of Housing Units (000s)	Units w/ LBP Hazards (000s)	Percent of Units w/ LBP Hazards
1978-2005	18,625	664	3.6%
1960-1977	11,724	1,311	11.2%
1940-1959	5,575	2,145	38.5%
1939 or Earlier	3,072	1,947	63.4%
<b>Total</b>	<b>38,996</b>	<b>6,067</b>	<b>15.6%</b>

Source: U.S. Dept. of Housing and Urban Development, American Healthy Homes Survey, Table 5-1

These percentages can then be applied to the number of housing units in Adair County, by year of construction and by tenure (owner-occupied versus renter-occupied), as reported by HUD's Comprehensive Housing Affordability Strategy (CHAS) data for Adair County.

<b>Total Housing Units in Adair County with Lead-Based Paint Hazards by Tenure</b>			
Total Owner-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	2,605	3.57%	93
1960-1977	1,841	11.18%	206
1940-1959	865	38.48%	333
1939 or Earlier	330	63.38%	209
<b>Total</b>	<b>5,640</b>	<b>14.90%</b>	<b>841</b>
Total Renter-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	950	3.57%	34
1960-1977	806	11.18%	90
1940-1959	315	38.48%	121
1939 or Earlier	195	63.38%	124
<b>Total</b>	<b>2,265</b>	<b>16.28%</b>	<b>369</b>
Total Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	3,554	3.57%	127
1960-1977	2,646	11.18%	296
1940-1959	1,180	38.48%	454
1939 or Earlier	525	63.38%	333
<b>Total</b>	<b>7,905</b>	<b>15.30%</b>	<b>1,209</b>

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

Finally, we can use the same methodology to estimate the number of housing units in Adair County with lead-based paint hazards, occupied by households with low-to-moderate incomes, by tenure:

---

**Housing Units in Adair County with Lead-Based Paint Hazards by Tenure,  
Occupied by Low-Income Families**

---

Owner-Occupied Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	519	3.57%	19

Total Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	588	3.57%	21
1960-1977	522	11.18%	58
1940-1959	220	38.48%	85
1939 or Earlier	100	63.38%	63
<b>Total</b>	<b>1,430</b>	<b>15.90%</b>	<b>227</b>

Sources: American Healthy Homes Survey Table 5-1 &amp; CHAS Table 12

To conclude, we estimate that there are a total of 1,209 homes in Adair County containing lead-based paint hazards, 841 owner-occupied and 369 renter-occupied. Of the 1,209 homes in the county estimated to have lead-based paint hazards, 442 are estimated to be occupied by households with low-incomes (incomes less than 50% of Area Median Income), and 227 are estimated to be occupied by households with moderate incomes (between 50% and 80% of Area Median Income), for a total of 669 housing units in Adair County with lead-based paint hazards occupied by households with low or moderate incomes.

### Lead-Based Paint Hazards in Homes with Children Present

Using the same methodology, we can estimate the number of housing units in Adair County occupied by households with children under the age of six present. For this analysis we apply the lead-based paint hazards percentages from the American Healthy Homes Survey to the data in HUD CHAS Table 13, which details housing units by year of construction, household income, and presence of children under the age of six. The data is presented in the following table:

<b>Housing Units in Adair County with Lead-Based Paint Hazards with Children under Age 6 Present Occupied by Low or Moderate-Income Families</b>			
Housing Units < 50% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	304	3.57%	11
1940-1977	271	19.98%	54
1939 or Earlier	12	63.38%	8
<b>Total</b>	<b>587</b>	<b>12.36%</b>	<b>73</b>
Housing Units 50%-80% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	176	3.57%	6
1940-1977	119	19.98%	24
1939 or Earlier	25	63.38%	16
<b>Total</b>	<b>320</b>	<b>14.33%</b>	<b>46</b>
Total LMI Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	481	3.57%	17
1940-1977	390	19.98%	78
1939 or Earlier	37	63.38%	23
<b>Total</b>	<b>907</b>	<b>13.05%</b>	<b>118</b>
Total Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	808	3.57%	29
1940-1977	722	19.98%	144
1939 or Earlier	47	63.38%	30
<b>Total</b>	<b>1,577</b>	<b>12.86%</b>	<b>203</b>

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 13

As shown, we estimate there are 203 housing units in Adair County with lead-based paint hazards and children under the age of six present, and that 118 of those housing units are occupied by families with low to moderate incomes.

## Conclusions

The previous analysis has attempted to describe the state of the residential housing market in Adair County, Oklahoma. Where possible, information regarding the population centers of the county was included to assess need on a community level. Much of the information is based on demographic information from local authorities and national information services. However, personal interviews were performed with property owners and managers, real estate professionals, and community officials in an effort to substantiate information from the national organizations and understand current market conditions. Several important issues regarding housing have become apparent through this analysis and are identified below.

Adair County experienced population and household growth between 2000 and 2010, particularly in the area of Stilwell. Since that time, data from the Census Bureau and Nielsen SiteReports shows some decline in Adair County as a whole, but continued growth in Stilwell, and it is projected that growth will continue in Stilwell over the next five years. Some new housing will be needed in the Stilwell area to meet this demand.

Adair County has a relatively moderate rate of renters with high rent costs (32.39%), though the rate of cost overburdened homeowners (20.57%) is slightly higher than Oklahoma's as a whole. The county's poverty rate is also well above the state, at 26.44% compared with 16.85% statewide. Poverty is even more prevalent in Stilwell, at 35.67%.

In terms of disaster resiliency we note that 55 tornadoes have impacted the county between 1959 and 2014, with 5 injuries and 5 fatalities combined. We recommend the creation of a hazard mitigation plan, and a registry of individual and business-based shelters.

Adair County is located within the Northeast Oklahoma Continuum of Care (CoC), which provides services to the area's homeless populations among other functions. Throughout the entire Northeast Oklahoma CoC, there are an estimated 383 homeless persons, 300 of which are estimated to be sheltered. This Continuum of Care has a disproportionately high number of homeless households entirely comprised of children under the age of 18, and a high incidence of homeless victims of domestic violence. We also note that the majority of homeless veterans in this region are unsheltered.

In terms of fair housing issues, many affordable housing units are located in areas at risk for poverty, in primarily non-white enclaves, and in areas with high numbers of persons with one or more disabilities.

Due to the age of the county's housing stock, lead-based paint hazards are an issue, with an estimated 1,209 occupied housing units with such hazards, and 203 of those units occupied by low-to-moderate income households with children under the age of 6 present.

In summary, it is apparent that new housing in several categories is required in Adair County. Although projected population and household growth is relatively low, there remains need for housing for households that are rent (or ownership cost) overburdened; we note that all affordable housing in

Stilwell that was willing to disclose their current occupancy reported full or nearly occupancy with waiting lists. Housing accessible to persons with disabilities should be an additional focus: over 20% of the population of Adair County has one or more disabilities. We also note that the population of persons age 62 and up is projected to increase 1.54% *per year* over the next five years; future housing development should take the specific needs of seniors into consideration as well. In summary, though future household growth forecasts for Adair County are relatively low, there is still housing need among households and families experiencing high housing costs, among persons with disabilities, and among seniors age 62 and up.

## **Qualifications**

# Owen S. Ard, MAI

## Experience

Senior Managing Director of Integra Realty Resources - Tulsa/OKC, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since 1984, Mr. Ard has performed appraisal services consisting of narrative and summary real estate appraisals, ad valorem tax protests, consulting, litigation support services, market and feasibility studies, reviews, market study analyses and appraisals in connection with allocation of tax credits, brokerage services for commercial and residential transactions, property management, and expert litigation testimony. All types of real property are encompassed -apartments, ranches, theaters, hotel/motel, multi-purpose and resort properties, golf courses, high-rise and garden office buildings, manufacturing facilities, warehousing and distribution centers, nursing homes, assisted living facilities, banks, shopping centers and malls, residential subdivisions, industrial parks, and sports arenas. Valuations and market studies have been prepared on proposed, partially completed, renovated and existing structures. Appraisals have been made for condemnation purposes, estates, mortgage financing, equity participation and due diligence support. Clients served include corporations, law firms, financial institutions, investment firms and public/private agencies.

# David A. Puckett

## Experience

Senior Director with Integra Realty Resources - Oklahoma, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since May 2002, Mr. Puckett has performed appraisal services consisting of narrative and summary real estate appraisals. All types of real property are encompassed-apartments, garden office buildings, manufacturing and warehouse industrial buildings, mobile home parks, restaurants and retail structures. Valuations and market studies have been prepared on proposed and existing structures. Appraisals have been made for estates, mortgage financing, equity participation and due diligence support. Prior to his employ at Integra Realty Resources - Oklahoma, Mr. Puckett was an employee of the University of Oklahoma Center for Business and Economic Development, working as a data analyst for the All County Affordable Housing Study commissioned by the Oklahoma Department of Commerce. Responsibilities included demographic, economic and real estate data collection from federal, state and local sources, as well as interviews of regional planning district, county and municipal officials, real estate market experts and local economic development experts. Mr. Puckett was responsible for site visits of 23 of the 77 Oklahoma counties, and personally authored 18 of the final reports. As an employee of IRR-Oklahoma, Mr. Puckett also performed the site visits and authored the final reports for four of the nine entitlement cities: Tulsa, Broken Arrow, Shawnee and Lawton. Mr. Puckett has also completed numerous housing market studies for use in applications for Federal Low-Income Housing Tax Credits in Oklahoma, Kansas, Missouri and Arkansas, and has performed market studies and appraisals for use in H.U.D.'s Multifamily Accelerated Processing (M.A.P.) program. Clients served include corporations, financial institutions, investment firms and public/private agencies.

# Integra Realty Resources, Inc.

## Corporate Profile

Integra Realty Resources, Inc. offers the most comprehensive property valuation and counseling coverage in North America with over 60 independently owned and operated offices located throughout the United States and the Caribbean. Integra was created for the purpose of combining the intimate knowledge of well-established local firms with the powerful resources and capabilities of a national company. Integra offers integrated technology, national data and information systems, as well as standardized valuation models and report formats for ease of client review and analysis. Integra's local offices have an average of 25 years of service in the local market, and virtually all are headed by a Senior Managing Director who is an MAI member of the Appraisal Institute.

INVITED LECTURES

---

University of Oklahoma  
Department of Geography & Sustainability, Spring Colloquium  
"Walking & Biking: Active Transportation and the Built Environment" January 2014

Kansas State University – Big 12 Fellowship

- The messiness of random sampling spatially Oct. 21, 2013
- Watershed Functions & Impacts from Development Oct. 21, 2013
- Creating an audit tool and operationalizing data Oct. 23, 2013
- Bicycle Facility Design & Planning Oct. 23, 2013
- Observational Methods Oct. 23, 2013
- Pedestrian Planning and Design: How does the environment we live in impact our lives? Oct. 2013
- Office workers – Sedentary by Practice: How can we integrate physical activity as part of daily routines at work – Formal presentation to faculty and students Oct. 2013

Department of Biostatistics and Epidemiology College of Public Health,  
University of Oklahoma Health Sciences Center

- Planning, Built Environment, and Public Health: How does the environment we live in impact our lives? March 11, 2013

GRANT FUNDING

---

Received Ed Cline Faculty Development Award (\$1450), Spring 2014  
Received Big 12 Faculty Fellowship Program Award (\$2500) June 2013  
Received College of Architecture IT recipient (\$3450) July 2013  
Sooner Parents Mini-Grant Funding (\$500) for student mentoring –prepared and submitted to assist RCPL Student Planning Association July 2013  
Received Junior Faculty Research (\$7,000) for summer research on rural planning and physical activity opportunities. University of Oklahoma, Summer 2012  
Robert Wood Johnson Active Living Research Dissertation Grant (\$25,000), Texas A&M University, 2007

SERVICE

---

*University-Level Service*

- Advisory Committee Course Management Systems (ACCMS) Spring 2013

*College-Level Service*

- Graduate Liaison for Regional & City Planning Division (Fall 2013 – present)
- Graduate Research & Curriculum Committee (Fall 2013 – present)
- RCPL orientation (Fall 2010- present)
- Search committee for new RCPL hires, new LA hire (Summer 2011, Summer 2012, Spring 2013, Spring 2014)
- IT Committee (member since 2012), Chair (Fall 2013-Spring 2014)
- Model Shop Committee (member since 2012-Fall 2013)
- RCPL website (2011- present)
- GHGI committee (Gould Hall Green Initiative) (Fall 2011)
- Co-hosting and arranging guest seminar: Dr. Chanam Lee – "The Built Environment and Disparities in Physical Activity", December 2012.

SERVICE

---

*State-level / City-Level Service*

- President – Health Equity Caucus, subgroup of Oklahoma Public Health Association
- APA/AICP member
- Bicycle Advisory Committee, City of Norman – Committee member (Spring 2013 – 2016)

*National-Level Service*

- Secretary/Treasurer of Faculty Women’s Interest Group (FWIG), committee under Association of Collegiate Schools of Planning (ACSP).
- CDC Weight of the Nation Conference planning, Built Environment & Transportation Subcommittee
- Reviewer for Journal of Physical Activity and Health

**BACKGROUND SUMMARY**

Executive Manager with extensive experience in public sector resource design, management and evaluation. Knowledge and skills include: structuring and design of state and local service programs and initiatives, developing written proposals for project financing, identifying community economic development resources and training.

**EXPERIENCE**

**DeBruler, Inc.**

Vice President, Oklahoma City, August 2001 to Present

Provide services including:

- ✓ Researching public and private resources and preparing applications for financial assistance in response to client requests for economic and community development projects.
- ✓ Technical assistance to nonprofits and units of local government regarding federal and state resources and structuring project-beneficial partnerships; preparing strategic and business plans for public and private sector entities.
- ✓ Group facilitation services.
- ✓ Technical training for nonprofits and units of local government regarding federal and state financial assistance programs. Conducting organizational assessments and developing capacity building curriculums.

**Oklahoma Housing Finance Agency**

Team Leader, Housing Development Team, Oklahoma City, July 1998 to July 2001

Provided direct supervision and oversight of sixteen staff engaged in the administration of multiple federal and state affordable housing program resources.

While employed by the agency:

- ✓ Reorganized state's Single Family Mortgage Revenue Bond, Low-income Housing Tax Credit, HOME Investment Partnerships and Housing Trust Fund Programs into a single work unit.
- ✓ Streamlined Low-income Housing Tax Credit Program administrative rules to provide for market responsive design flexibility.
- ✓ Streamlined affordable housing resources by developing a singular application package and process for the agency's affordable housing development resources and established e-information network.
- ✓ Facilitated the development of working partnerships between the state's nonprofit and for-profit housing development organizations and agency's mortgage revenue bond lenders.
- ✓ Financed the development of affordable housing by leveraging public sector development funds with private investments.

- ✓ Facilitated legislative task force on rural affordable housing issues and devised legislative and programmatic actions to spur rural development.
- ✓ Developed, financed and implemented the state's first statewide affordable housing market analysis in partnership with a major university center.
- ✓ Drafted enabling legislation, capitalized and implemented state's Housing Trust Fund.

**Oklahoma Department of Commerce**

Program Manager/Department Head, Oklahoma City, March 1988 to July 1998

- ✓ In response to market-based demand, directed a team of professional agency staff with diverse skills, in the redesign of the state's HOME Investment Partnerships Program from primarily rehabilitation services to the production of rural affordable housing units.
- ✓ Led HOME Program administrative team in the relocation of the Program from its state agency environment to the Oklahoma Housing Finance Agency, a public trust.
- ✓ Leveraged HOME Program development resources with other public and private debt capital to finance the development of rural affordable housing statewide.
- ✓ Formulated and implemented a legislative agenda to enact and capitalizing the state's Housing Trust Fund.
- ✓ Provided daily oversight and administration for several state administered federal programs including: U.S. Department of Energy State Energy Program, Community Development Block Grant, Home Investment Partnerships, Rental Rehabilitation, Solar Energy and Energy Conservation Bank, and State Appropriated Funds for regional councils of government.
