

Housing Needs Assessment
Delaware County

Prepared For:

Oklahoma Housing Finance Agency
Oklahoma Department of Commerce
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

Effective Date of the Analysis:

November 13, 2015

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

December 31, 2015

Mr. Dennis Shockley, Executive Director
Oklahoma Housing Finance Agency
100 NW 63rd Street, Ste. 200
Oklahoma City, OK 73116

SUBJECT: Housing Needs Assessment
 Delaware County
 IRR - Tulsa/OKC File No. 140-2015-0034

Dear Mr. Shockley:

As per our Agreement with Oklahoma Housing Finance Agency (OHFA), we have completed a residential housing market analysis (the "Analysis") for use by OHFA and the Oklahoma Department of Commerce (ODOC). Per our Agreement, OHFA and ODOC shall have unrestricted authority to publish, disclose, distribute and otherwise use, in whole or in part, the study and reports, data or other materials included in the Analysis or otherwise prepared pursuant to the Agreement and no materials produced in whole, or in part, under the Agreement shall be subject to copyright in the United States or any other country. Integra Realty Resources – Tulsa/OKC will cause the Analysis (or any part thereof) and any other publications or materials produced as a result of the Agreement to include substantially the following statement on the first page of said document:

This "Statewide Affordable Housing Market Study" was financed in whole or in part by funds from the U.S. Department of Housing and Urban Development as administered by the Oklahoma Department of Commerce and Oklahoma Housing Finance Agency.

Attached hereto, please find the Delaware County Residential Housing Market Analysis. Analyst Salma Al Nairab personally inspected the Delaware County area during the month of November 2015 to collect the data used in the preparation of the Delaware County Market Analysis. The University of Oklahoma College of Architecture Division of Regional and City Planning provided consultation, assemblage and analysis of the data for IRR-Tulsa/OKC.

Mr. Dennis Shockley
Oklahoma Housing Finance Agency

Introduction and Executive Summary

This report is part of a Statewide Affordable Housing Market Study commissioned by the Oklahoma Department of Commerce (ODOC) in partnership with the Oklahoma Housing Finance Agency (OHFA), as an outgrowth of the 2013 tornado outbreak in Oklahoma. It was funded by the U.S. Department of Housing and Urban Development (USHUD) through the Community Development Block Grant – Disaster Recovery program (CDBG-DR). This study was conducted by a public/private partnership between Integra Realty Resources – Tulsa/OKC, the University of Oklahoma College of Architecture, Division of Regional and City Planning, and DeBruler Inc. IRR-Tulsa/OKC, The University of Oklahoma, and DeBruler Inc. also prepared a prior statewide study in 2001, also commissioned by ODOC in partnership with OHFA.

This study is a value-added product derived from the original 2001 statewide housing study that incorporates additional topics and datasets not included in the 2001 study, which impact affordable housing throughout the state. These topic areas include:

- Disaster Resiliency
- Homelessness
- Assessment of Fair Housing
- Evaluation of Residential Lead-Based Paint Hazards

These topics are interrelated in terms of affordable housing policy, housing development, and disaster resiliency and recovery. Homeless populations are more vulnerable in the event of a disaster, as are many of the protected classes under the Fair Housing Act. Lead-based paint is typically more likely to be present in housing units occupied by low-to-moderate income persons, and can also present an environmental hazard in the wake of a disaster. Effective affordable housing policy can mitigate the impact of natural and manmade disasters by encouraging the development and preservation of safe, secure, and disaster-resilient housing for Oklahoma’s most vulnerable populations.

Housing Market Analysis Specific Findings:

1. The population of Delaware County is projected to grow by 0.20% per year over the next five years, underperforming the State of Oklahoma.
2. Delaware County is projected to need a total of 210 housing units for ownership and 60 housing units for rent over the next five years.
3. Median Household Income in Delaware County is estimated to be \$39,229 in 2015, compared with \$47,049 estimated for the State of Oklahoma. The poverty rate in Delaware County is estimated to be 21.23%, compared with 16.85% for Oklahoma.
4. Homeowner and rental vacancy rates in Delaware County are higher than the state averages, though the rental vacancy rate in Grove is somewhat lower.
5. Home values and rental rates in Delaware County are also lower than the state averages, though home values in Grove are higher than the state as a whole.
6. Average sale price for homes in Grove was \$191,478 in 2015, with an average price per square foot of \$101.36. The average year of construction for homes sold in 2015 is estimated to be 1995.

7. Approximately 30.56% of renters and 23.56% of owners are housing cost overburdened.

Disaster Resiliency Specific Findings:

1. Tornadoes (1959-2014): Number: 49 Injuries:53 Fatalities:0 Damages (1996-2014): \$14,310,000.00
2. Social Vulnerability: Below state score at the county level; Delaware (town) at the census tract level has an elevated score.
3. Floodplain: Delaware County, Oklahoma experienced 20 floods from 05/09/1993 to 07/03/2004 that resulted in \$85,000 in property damage from flash floods. No injuries or deaths were reported.

Homelessness Specific Findings

1. Delaware County is located in the Northeast Oklahoma Continuum of Care.
2. There are an estimated 383 homeless individuals in this area, 300 of which are identified as sheltered.
3. There is a disproportionately high number of homeless households comprised of children in this CoC (24 out of 300).
4. This area also has a high incidence of homeless victims of domestic violence (168).
5. The majority of homeless veterans are unsheltered.

Fair Housing Specific Findings

1. Units at risk for poverty: 695
2. Units in mostly non-white enclaves: 285
3. Units nearer higher number of disabled persons: 712
4. Units further than 15 miles to a hospital: 28

Lead-Based Paint Specific Findings

5. We estimate there are 1,942 occupied housing units in Delaware County with lead-based paint hazards.
6. 966 of those housing units are estimated to be occupied by low-to-moderate income households.
7. We estimate that 259 of those low-to-moderate income households have children under the age of 6 present.

Report Format and Organization

The first section of this report comprises the housing market analysis for Delaware County. This section is divided into general area information, followed by population, household and income trends and analysis, then followed by area economic conditions. The next area of analysis concerns the housing stock of Delaware County, including vacancy rates, construction activity and trends, and analyses of the homeowner and rental markets. This section is followed by five-year forecasts of housing need for owners and renters, as well as specific populations such as low-to-moderate income households, the elderly, and working families.

The next section of this report addresses special topics of concern:

-
- Disaster Resiliency
 - Homelessness
 - Fair Housing
 - Lead-Based Paint Hazards

This last section is followed by a summary of the conclusions of this report for Delaware County.

General Information

Purpose and Function of the Market Study

The purpose of this market study is to evaluate the need for affordable housing units in Delaware County, Oklahoma. The analysis will consider existing supply and projected demand and overall market trends in the Delaware County area.

Effective Date of Consultation

The Delaware County area was inspected and research was performed during November, 2015. The effective date of this analysis is November 13, 2015. The date of this report is December 31, 2015. The market study is valid only as of the stated effective date or dates.

Scope of the Assignment

1. The Delaware County area was inspected during November, 2015. The inspection included visits to all significant population centers in the county and portions of the rural county areas.
2. Regional, city and neighborhood data is based on information retained from national, state, and local government entities; various Chambers of Commerce, news publications, and other sources of economic indicators.
3. Specific economic data was collected from all available public agencies. Population and household information was collected from national demographic data services as well as available local governments. Much data was gathered regarding market specific items from personal interviews.
4. Development of the applicable analysis involved the collection and interpretation of verified data from local property owners/managers, realtors, and other individuals active within the area real estate market.
5. The analyst's assemblage and analysis of the defined data provided a basis from which conclusions as to the supply of and demand for residential housing were made.

Data Sources

Specific data sources used in this analysis include but are not limited to:

1. The 2000 and 2010 Decennial Censuses of Population and Housing
2. The 2009-2013 American Community Survey (ACS)
3. U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division
4. The United States Department of Labor, Bureau of Labor Statistics, including the Local Area Unemployment Statistics and the Quarterly Census of Employment and Wages programs
5. The U.S. Department of Housing and Urban Development, including the Comprehensive Housing Affordability Strategy (CHAS), and the 2013 Picture of Subsidized Households
6. Continuum of Care Assistance Programs

7. The National Oceanic and Atmospheric Administration
8. Nielsen SiteReports (formerly known as Claritas)
9. The Oklahoma State Department of Health
10. The Oklahoma Department of Human Services
11. The Federal Reserve Bank of Kansas City, Oklahoma City Branch
12. The Federal Reserve Bank of New York

Delaware County Analysis

Area Information

The purpose of this section of the report is to provide a basis for analyzing and estimating trends relating to Delaware County. The primary emphasis is concentrated on those factors that are of significance to residential development users. Residential and commercial development in the community is influenced by the following factors:

1. Population and economic growth trends.
2. Existing commercial supply and activity.
3. Natural physical elements.
4. Political policy and attitudes toward community development.

Location

Delaware County is located in northeast Oklahoma. The eastern boundary of the county borders both Missouri and Arkansas. The Delaware County seat, Jay, is approximately 65 miles northeast of the Tulsa central business district, and 50 miles southwest of Joplin, Missouri.

Delaware County has a total area of 792 square miles (738 square miles of land, and 54 square miles of water), ranking 43rd out of Oklahoma's 77 counties in terms of total area. The total population of Delaware County as of the 2010 Census was 41,487 persons, for a population density of 56 persons per square mile of land.

Access and Linkages

The county is well located in relationship to state and national highway systems. Grove is located at the intersection of U.S. Highway 59 and State Highways 10 and 25. Interstate 44, the primary northeast/southwest highway in this part of the state, is accessible 12 miles north of Grove via U.S. Highway 59. Access to the Tulsa metropolitan area, Grove, and most rural parts of the county is easily accessible from the various state and federal highways. Additionally, the county has a well-maintained interior road system.

Public transportation is provided by Pelivan Transit, which is owned and operated by Grand Gateway Economic Development Association. Pelivan provides curb-to-curb demand response service, deviated fixed employment routes, and a trolley loop in Miami. Pelivan services the counties of Craig, Delaware, Mayes, northern Tulsa, Ottawa and Rogers, along with tribal transit services. The local market perceives public transportation as average compared to other communities in the region of similar size. However, the primary mode of transportation in this area is private automobiles by far.

The area is served by two local airports: Grove Municipal Airport and Grand Lakes Regional Airport. The nearest commercial airport is Tulsa International Airport, approximately 68 miles southwest of Grove.

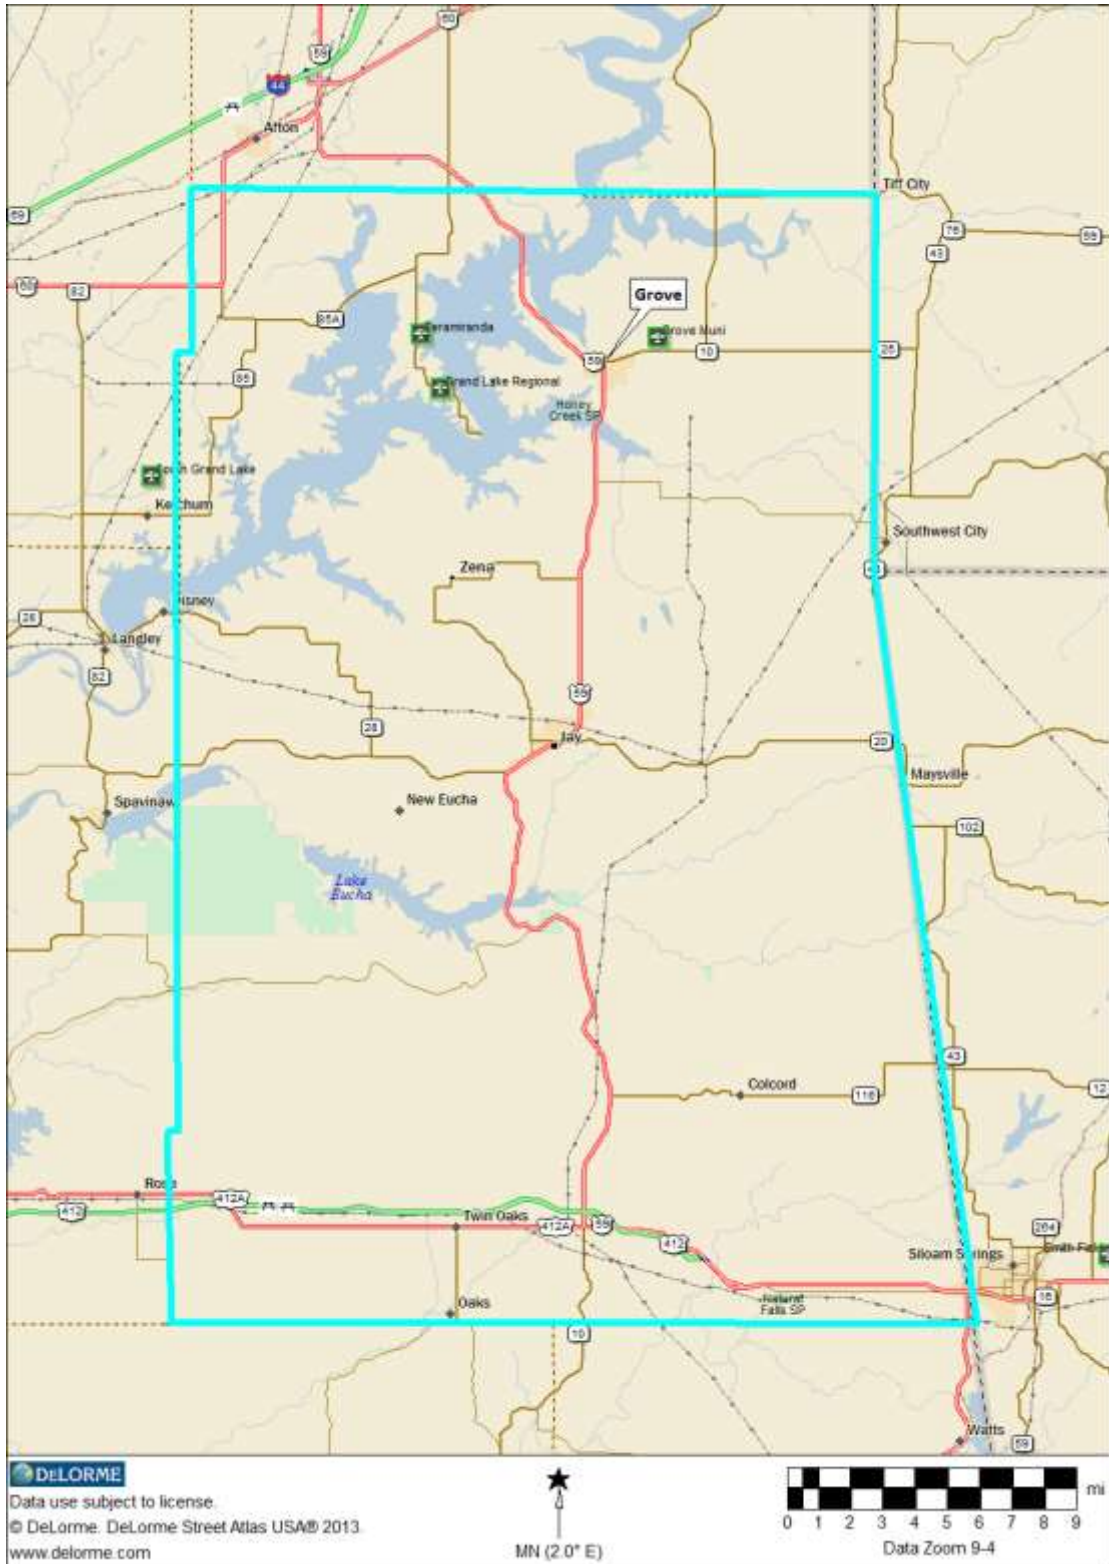

Educational Facilities

All of the county communities have public school facilities. In addition, Northeastern Oklahoma A&M has a branch located in Grove. Northeastern Technology Center has a branch campus in the town of Kansas (the main campus is in Pryor). Several other area colleges and universities are accessible to students including Northeastern Oklahoma A&M in Miami and Missouri Southern in Joplin, Missouri.

Medical Facilities

County medical services are provided by INTEGRIS Grove General Hospital, a 58-bed full-service hospital with intensive care rooms, private medical-surgical rooms, a comprehensive radiology department and four operating rooms. The current facility opened in 2009 at a reported cost of \$56 million. Local physicians and dentists offer additional professional services. The smaller county communities typically have either small out patient medical services or doctors offices in the community.

Demographic Analysis

Population and Households

The following table presents population levels and annualized changes in Delaware County and Oklahoma. This data is presented as of the 2000 Census, the 2010 Census, with 2015 and 2020 estimates and forecasts provided by Nielsen SiteReports.

Population Levels and Annual Changes							
	2000	2010	Annual	2015	Annual	2020	Annual
	Census	Census	Change	Estimate	Change	Forecast	Change
Grove	5,131	6,623	2.59%	6,908	0.85%	7,192	0.81%
Delaware County	37,077	41,487	1.13%	41,337	-0.07%	41,751	0.20%
State of Oklahoma	3,450,654	3,751,351	0.84%	3,898,675	0.77%	4,059,399	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

The population of Delaware County was 41,487 persons as of the 2010 Census, a 1.13% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Delaware County to be 41,337 persons, and projects that the population will show 0.20% annualized growth over the next five years.

The population of Grove was 6,623 persons as of the 2010 Census, a 2.59% annualized rate of change from the 2000 Census. As of 2015, Nielsen SiteReports estimates the population of Grove to be 6,908 persons, and projects that the population will show 0.81% annualized growth over the next five years.

The next table presents data regarding household levels in Delaware County over the same periods of time. This data is presented both for all households (family and non-family) as well as family households alone.

Households Levels and Annual Changes							
Total Households	2000	2010	Annual	2015	Annual	2020	Annual
	Census	Census	Change	Estimate	Change	Forecast	Change
Grove	2,286	2,996	2.74%	3,113	0.77%	3,259	0.92%
Delaware County	14,838	17,093	1.42%	17,158	0.08%	17,428	0.31%
State of Oklahoma	1,342,293	1,460,450	0.85%	1,520,327	0.81%	1,585,130	0.84%
Family Households	2000	2010	Annual	2015	Annual	2020	Annual
	Census	Census	Change	Estimate	Change	Forecast	Change
Grove	1,491	1,880	2.35%	1,988	1.12%	2,083	0.94%
Delaware County	10,767	11,808	0.93%	11,844	0.06%	12,014	0.29%
State of Oklahoma	921,750	975,267	0.57%	1,016,508	0.83%	1,060,736	0.86%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

As of 2010, Delaware County had a total of 17,093 households, representing a 1.42% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Delaware County to have 17,158 households. This number is expected to experience a 0.31% annualized rate of growth over the next five years.

As of 2010, Grove had a total of 2,996 households, representing a 2.74% annualized rate of change since the 2000 Census. As of 2015, Nielsen SiteReports estimates Grove to have 3,113 households. This number is expected to experience a 0.92% annualized rate of growth over the next five years.

Population by Race and Ethnicity

The next table presents data regarding the racial and ethnic composition of Delaware County based on the U.S. Census Bureau's American Community Survey.

2013 Population by Race and Ethnicity

Source: Nielsen SiteReports

As of 2015, Nielsen estimates that the median age of Grove is 48.5 years. This compares with the statewide figure of 36.6 years. Approximately 5.14% of the population is below the age of 5, while 30.45% is over the age of 62. Over the next five years, the population age 62 and above is forecasted to grow by 1.43% per year.

Compared with the state and the nation, Grove and Delaware County as a whole have relatively older populations, though the age 62 and over cohort is projected to grow at a slower rate than the population as a whole, which is contrary to state and national trends which are forecasting much faster growth in the senior population compared with the population at large.

Families by Presence of Children

The next table presents data for Delaware County regarding families by the presence of children.

2013 Family Type by Presence of Children Under 18 Years

	Grove		Delaware County

No Disabilities	988	49.15%	4,957	57.96%	290,398	57.72%
Total Number of Persons with Disabilities:	1,570	24.21%	8,492	20.71%	577,160	15.59%

Source: U.S. Census Bureau, 2009-2013 American Community Survey, Table C18108

Within Delaware County, 20.71% of the civilian non-institutionalized population has one or more disabilities, compared with 15.59% of Oklahomans as a whole. In Grove the percentage is 24.21%. Compared with the rest of the state, persons in Delaware County and particularly Grove are more likely to have one or more disabilities.

We have also compiled data for the veteran population of Delaware County by presence of disabilities, shown in the following table:

2013 Population by Veteran and Disability Status

	Grove		Delaware County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Civilian Population Age 18+ For Whom Poverty Status is Determined	5,357		31,935		2,738,788	
Veteran:	876	16.35%	4,284	13.41%	305,899	11.17%
With a Disability	370	42.24%	1,649	38.49%	100,518	32.86%
No Disability	506	57.76%	2,635	61.51%	205,381	67.14%
Non-veteran:	4,481	83.65%	27,651	86.59%	2,432,889	88.83%
With a Disability	1,177	26.27%	6,205	22.44%	430,610	17.70%
No Disability	3,304	73.73%	21,446	77.56%	2,002,279	82.30%

Source: 2009-2013 American Community Survey, Table C21007

Within Delaware County, the Census Bureau estimates there are 4,284 veterans, 38.49% of which have one or more disabilities (compared with 32.86% at a statewide level). In Grove, there are an estimated 876 veterans, 42.24% of which are estimated to have a disability. Like the population as a whole, veterans in Delaware County are more likely to have one or more disabilities compared with veterans in the rest of the state.

Group Quarters Population

The next table presents data regarding the population of Delaware County living in group quarters, such as correctional facilities, skilled-nursing facilities, student housing and military quarters.

	Grove		Delaware County	
	No.	Percent	No.	Percent
Total Population	6,623		41,487	
Group Quarters Population	133	2.01%	356	0.86%
Institutionalized Population	133	2.01%	321	0.77%
Correctional facilities for adults	0	0.00%	62	0.15%
Juvenile facilities	8	0.12%	39	0.09%
Nursing facilities/Skilled-nursing facilities	125	1.89%	220	0.53%
Other institutional facilities	0	0.00%	0	0.00%
Noninstitutionalized population	0	0.00%	35	0.08%
College/University student housing	0	0.00%	0	0.00%
Military quarters	0	0.00%	0	0.00%
Other noninstitutional facilities	0	0.00%	35	0.08%

Source: 2010 Decennial Census, Table P42

The percentage of the Delaware County population in group quarters is somewhat lower than the statewide figure, which was 2.99% in 2010.

Household Income Levels

Data in the following chart shows the distribution of household income in Delaware County, as well as median and average household income. Data for Oklahoma is included as a basis of comparison. This data is provided by Nielsen SiteReports for 2015.

2015 Household Income Distribution						
	Grove		Delaware County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Households by HH Income	3,113		17,158		1,520,327

\$200,000 - \$249,999	28	0.90%	141	0.82%	18,661	1.23%
\$250,000 - \$499,999	66	2.12%	169	0.98%	20,487	1.35%
\$500,000+	26	0.84%	71	0.41%	7,454	0.49%
Median Household Income	\$39,716		\$39,229		\$47,049	
Average Household Income	\$60,621		\$53,948		\$63,390	

Source: Nielsen SiteReports

As shown, median household income for Delaware County is estimated to be \$39,229 in 2015. By way of comparison, the median household income of Oklahoma is estimated to be \$47,049. For Grove, median household income is estimated to be \$39,716.

Household Income Trend

Next we examine the long-term growth of incomes in Delaware County, from the results of the 2000 Census (representing calendar year 1999), through the current 2015 estimates provided by Nielsen SiteReports. This data is then annualized into a compounded annual growth rate to estimate nominal annual household income growth over this period of time. We then compare the rate of annual growth with the rate of inflation over the same period of time (measured using the Consumer Price Index for all urban consumers, South Region, Size Class D, from May 1999 through May 2015). Subtracting the annual rate of inflation from the nominal rate of annual income growth yields a “real” rate of income growth which takes into account the effect of increasing prices of goods and services.

	1999 Median HH Income	2015 Median HH Income	Nominal Growth	Inflation Rate	Real Growth
Grove	\$28,464	\$39,716	2.10%	2.40%	-0.30%
Delaware County	\$27,996	\$39,229	2.13%	2.40%	-0.27%
State of Oklahoma	\$33,400	\$47,049	2.16%	2.40%	-0.23%

Sources: 2000 Decennial Census, Summary File 3, Table P53; Nielsen SiteReports; CPI All Urban Consumers, South Region, Size Class D

As shown, both Delaware County and the State of Oklahoma as a whole saw negative growth in “real” median household income, once inflation is taken into account. It should be noted that this trend is not unique to Oklahoma or Delaware County, but rather a national trend. Over the same period, the

national median household income increased from \$41,994 to \$53,706 (for a nominal annualized growth rate of 1.55%) while the Consumer Price Index increased at an annualized rate of 2.26%, for a “real” growth rate of -0.72%.

Poverty Rates

Overall rates of poverty in Delaware County and Oklahoma are shown in the following table. This data is included from the 2013 American Community Survey, as well as the 2000 Census to show how these rates have changed over the last decade. We also include poverty rates for single-parent families by gender of householder.

	2000 Census	2013 ACS	Change (Basis Points)	2013 Poverty Rates for Single-Parent Families	
				Male Householder	Female Householder
Grove	14.45%	16.50%	205	0.00%	72.61%
Delaware County	18.27%	21.23%	297	55.15%	51.95%
State of Oklahoma	14.72%	16.85%	213	22.26%	47.60%

Sources: 2000 Decennial Census Table P87, 2009-2013 American Community Survey Tables B17001 & B17023

The poverty rate in Delaware County is estimated to be 21.23% by the American Community Survey. This is an increase of 297 basis points since the 2000 Census. Within Grove, the poverty rate is estimated to be 16.50%. It should be noted that increasing poverty rates over this period of time is a national trend: between the 2000 Census and the 2013 American Community Survey, the poverty rate of the United States increased from 12.38% to 15.37%, an increase of 299 basis points.

Economic Conditions

Employment and Unemployment

The following table presents total employment figures and unemployment rates for Delaware County, with figures for Oklahoma and the United States for comparison. This data is as of May 2015.

Employment and Unemployment						
	May-2010 Employment	May-2015 Employment	Annual Growth	May-2010 Unemp. Rate	May-2015 Unemp. Rate	Change (bp)
Delaware County	15,998	17,166	1.42%	7.8%	4.7%	-310
State of Oklahoma	1,650,748	1,776,187	1.48%	6.8%	4.4%	-240
United States (thsds)	139,497	149,349	1.37%	9.3%	5.3%	-400

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As of May 2015, total employment in Delaware County was 17,166 persons. Compared with figures from May 2010, this represents annualized employment growth of 1.42% per year. The unemployment rate in May was 4.7%, a decrease of -310 basis points from May 2010, which was 7.8%. Over the last five years, both the statewide and national trends have been improving employment levels and declining unemployment rates, and Delaware County has mirrored these trends.

Employment Level Trends

The following chart shows total employment and unemployment levels in Delaware County from January 2000 through May 2015, as reported by the Bureau of Labor Statistics, Local Area Unemployment Statistics program.

**Employment and Unemployment in Delaware County
January 2000 through May 2015**

Source: Bureau of Labor Statistics, Local Area Unemployment Statistics

As shown, total employment levels have generally trended upward from 2000 the end of 2009. The sharp dip shown in January 2010 is not an actual decline in employment, but rather a recalibration on the part of the Bureau of Labor Statistics. However, since that time total employment in Delaware County had been effectively flat, excepting an upward trend in the last twelve months to the county’s current employment level of 17,166 persons. The number of unemployed persons in May 2015 was 856, out of a total labor force of 18,022 persons.

Unemployment Rate Trends

The next chart shows historic unemployment rates for Delaware County, as well as Oklahoma and the United States for comparison. This data covers the time period of January 2000 through May 2015, and has not been seasonally adjusted.

**Unemployment Rates in Delaware County, Oklahoma and the United States
January 2000 through May 2015**

Sources: Bureau of Labor Statistics, Local Area Unemployment Statistics and Current Population Survey

As shown, unemployment rates in Delaware County increased moderately from 2000 through 2003, and then generally declined until the 4th quarter of 2008 as the effects of the national economic recession were felt. Unemployment rates began to decline again in 2010, to their current level of 4.7%. On the whole, unemployment rates in Delaware County track very well with statewide figures but are typically somewhat above the state. Compared with the United States, unemployment rates in Delaware County and Oklahoma are and have historically been below the national average.

Employment and Wages by Industrial Supersector

The next table presents data regarding employment in Delaware County by industry, including total number of establishments, average number of employees in 2014, average annual pay, and location quotients for each industry compared with the United States. This data is furnished by the Bureau of Labor Statistics, Quarterly Census of Employment and Wages program.

Employees and Wages by Supersector - 2014

Supersector	Establishments	Avg. No. of Employees	Percent of Total	Avg. Annual Pay	Location Quotient
Federal Government	10	79	0.91%	\$51,422	0.46
State Government	12	149	1.72%	\$33,962	0.52
Local Government	44	2,376	27.44%	\$30,998	2.72
Natural Resources and Mining	11	52	0.60%	\$24,423	0.40
Construction	96	401	4.63%	\$31,003	1.04
Manufacturing	38	801	9.25%	\$33,328	1.04
Trade, Transportation, and Utilities	188	1,456	16.81%	\$25,672	0.88

Other Services	55	242	2.79%	\$22,966	0.90
Total	783	8,660		\$28,778	1.00

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Employment Sectors - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Among private employers, the largest percentage of persons (16.81%) are employed in Trade, Transportation, and Utilities. The average annual pay in this sector is \$25,672 per year. The industry with the highest annual pay is Information, with average annual pay of \$56,741 per year.

The rightmost column of the previous table provides location quotients for each industry for Delaware County, as compared with the United States. Location quotients (LQs) are ratios used to compare the concentration of employment in a given industry to a larger reference, in this case the United States. They are calculated by dividing the percentage of employment in a given industry in a given geography (Delaware County in this instance), by the percentage of employment in the same industry in the United States. For example, if manufacturing in a certain county comprised 10% of total employment, while in the United States manufacturing comprised 5% of total employment, the location quotient would be 2.0:

$$10\% (\text{county manufacturing \%}) / 5\% (\text{U.S. manufacturing \%}) = 2.0$$

Location quotients greater than 1.0 indicate a higher concentration of employment compared with the nation, and suggest that the industry in question is an important contributor to the local economic base. Quotients less than 1.0 indicate that the industry makes up a smaller share of the local economy than the rest of the nation.

Within Delaware County, among all industries the largest location quotient is in Local Government, with a quotient of 2.72. The local government sector includes tribal government. Among private employers, the largest is Leisure and Hospitality, with a quotient of 1.19.

The next table presents average annual pay in Delaware County by industry, in comparison with Oklahoma as a whole and the United States.

Comparison of 2014 Average Annual Pay by Supersector

Supersector	Delaware County	State of Oklahoma	United States	Percent of State	Percent of Nation
Federal Government	\$51,422	\$66,411	\$75,784	77.4%	67.9%
State Government	\$33,962	\$44,721	\$54,184	75.9%	62.7%
Local Government	\$30,998	\$36,300	\$46,146	85.4%	67.2%
Natural Resources and Mining	\$24,423	\$87,445	\$59,666	27.9%	40.9%
Construction	\$31,003	\$47,127	\$55,041	65.8%	56.3%
Manufacturing	\$33,328	\$53,614	\$62,977	62.2%	52.9%
Trade, Transportation, and Utilities	\$25,672	\$40,563	\$42,988	63.3%	59.7%
Information	\$56,741	\$54,513	\$90,804	104.1%	62.5%
Financial Activities	\$35,845	\$53,212	\$85,261	67.4%	42.0%
Professional and Business Services	\$35,422	\$47,890	\$66,657	74.0%	53.1%
Education and Health Services	\$31,823	\$41,536	\$45,951	76.6%	69.3%
Leisure and Hospitality	\$14,013	\$16,568	\$20,993	84.6%	66.8%
Other Services	\$22,966	\$31,669	\$33,935	72.5%	67.7%
Total	\$28,778	\$43,774	\$51,361	65.7%	56.0%

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

Average Annual Pay - 2014

Source: U.S. Bureau of Labor Statistics, Quarterly Census of Employment and Wages

In comparison with the rest of Oklahoma, Delaware County has lower average wages in Information, and lower average wages in each of the other employment sectors, very notably so in Natural Resources and Mining.

Working Families

The following table presents data on families by employment status, and presence of children.

Families by Employment Status and Presence of Children

Source: 2009-2013 American Community Survey, Table B23007

Within Delaware County, there are 7,606 working families, 43.11% of which have children under the age of 18 present. This compares with 51.10% in Oklahoma as a whole.

Major Employers

Major employers in the Delaware County area are presented in the following table, as reported by the Grove Area Chamber of Commerce.

Major Employers in Grove Area

Company	No. Employees
Simmons Foods Inc. (5 county, 3 state area)	3,980
INTEGRIS Grove General Hospital	354
Grove Public School System	324
Wal-Mart Supercenter	323
Grand Lake Casino	236
Wyandotte Casino	210
Northeast Oklahoma Electric Cooperative	200
Precision Machine & Manufacturing	145
Grove Nursing Center	119
Harp's	110
Lowe's #1752	103
City of Grove	92

Source: Grove Area Chamber of Commerce

As can be seen, the area has a variety of major employers in numerous industries. Recreation related to Grand Lake is another very significant employer in the area.

Commuting Patterns

Travel Time to Work

The next table presents data regarding travel time to work in Delaware County.

Workers 16 Years and Over by Commuting Time to Work

	Grove		Delaware County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Commuting Workers:	2,091		14,988		1,613,364	
Less than 15 minutes	1,235	59.06%	4,765	31.79%	581,194	36.02%
15 to 30 minutes	311	14.87%	4,629	30.88%	625,885	38.79%
30 to 45 minutes	257	12.29%	2,638	17.60%	260,192	16.13%
45 to 60 minutes	154	7.36%	1,269	8.47%	74,625	4.63%
60 or more minutes	134	6.41%	1,687	11.26%	71,468	4.43%

Source: 2009-2013 American Community Survey, Table B08303

Within Delaware County, the largest percentage of workers (31.79%) travel fewer than 15 minutes to work. Although Delaware County has an active labor market, it also serves to some extent as a bedroom community to the greater Oklahoma City metro area.

Means of Transportation

Data in the following table presents data regarding means of transportation for employed persons in Delaware County.

Workers 16 Years and Over by Means of Transportation to Work

	Grove		Delaware County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Workers Age 16+	2,158		15,785		1,673,026

Worked at Home	67	3.10%	797	5.05%	59,662	3.57%

Source: 2009-2013 American Community Survey, Table B08301

As shown, the vast majority of persons in Delaware County commute to work by private vehicle, with a small percentage of persons working from home.

Housing Stock Analysis

Existing Housing Units

The following table presents data regarding the total number of housing units in Delaware County. This data is provided as of the 2000 Census, the 2010 Census, with a 2015 estimate furnished by Nielsen SiteReports.

Total Housing Units					
	2000 Census	2010 Census	Annual Change	2015 Estimate	Annual Change
Grove	2,807	3,665	2.70%	3,781	0.63%
Delaware County	22,290	24,818	1.08%	25,030	0.17%
State of Oklahoma	1,514,400	1,664,378	0.95%	1,732,484	0.81%

Sources: 2000 and 2010 Decennial Censuses, Nielsen SiteReports

Since the 2010, Nielsen estimates that the number of housing units in Delaware County grew by 0.17% per year, to a total of 25,030 housing units in 2015. In terms of new housing unit construction, Delaware County underperformed Oklahoma as a whole between 2010 and 2015.

Housing by Units in Structure

The next table separates housing units in Delaware County by units in structure, based on data from the Census Bureau's American Community Survey.

2013 Housing Units by Units in Structure						
	Grove		Delaware County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	3,839		24,754		1,669,828	
1 Unit, Detached	2,752	71.69%	16,573	66.95%	1,219,987	73.06%
1 Unit, Attached	126	3.28%	480	1.94%	34,434	2.06%

Median Year Built:		1979		1979		1975
Overall Median Year Built:		1987		1984		1976

Sources: 2009-2013 American Community Survey, Tables B25035, B25036 & B25037

Within Delaware County, 18.30% of housing units were built after the year 2000. This compares with 15.22% statewide. Within Grove the percentage is 19.95%.

61.15% of housing units in Delaware County were built prior to 1990, while in Grove the percentage is 57.72%. These figures compare with the statewide figure of 72.78%.

Substandard Housing

The next table presents data regarding substandard housing in Delaware County. The two most commonly cited figures for substandard housing are a lack of complete plumbing, and/or a lack of a complete kitchen. We have also included statistics regarding homes heated by wood, although this is a less frequently cited indicator of substandard housing since some homes (particularly homes for seasonal occupancy) are heated by wood but otherwise not considered substandard.

The Census Bureau definition of inadequate plumbing is any housing unit lacking any one (or more) of the following three items:

1. Hot and cold running water

2. A flush toilet
3. A bathtub or shower

Inadequate kitchens are defined by the Census Bureau as housing units lacking any of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

2013 Substandard Housing Units

	Occupied	Inadequate Plumbing		Inadequate Kitchen		Uses Wood for Fuel	
	Units	Number	Percent	Number	Percent	Number	Percent
Grove	3,063	3	0.10%	15	0.49%	28	0.91%
Delaware County	16,589	79	0.48%	152	0.92%	1,872	11.28%
State of Oklahoma	1,444,081	7,035	0.49%	13,026	0.90%	28,675	1.99%

Sources: 2009-2013 American Community Survey, Tables B25040, B25048 & B25052

Within Delaware County, 0.48% of occupied housing units have inadequate plumbing (compared with 0.49% at a statewide level), while 0.92% have inadequate kitchen facilities (compared with 0.90% at a statewide level). It is likely that there is at least some overlap between these two figures, among units lacking both complete plumbing and kitchen facilities.

Vacancy Rates

The next table details housing units in Delaware County by vacancy and type. This data is provided by the American Community Survey.

2013 Housing Units by Vacancy

	Grove		Delaware County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent
Total Housing Units	3,839		24,754		1,669,828	
Total Vacant Units	776	20.21%	8,165	32.98%	225,747	13.52%
For rent	43	5.54%	384	4.70%	43,477	19.26%
Rented, not occupied	0	0.00%	82	1.00%	9,127	4.04%
For sale only	103	13.27%	637	7.80%	23,149	10.25%
Sold, not occupied	0	0.00%	40	0.49%	8,618	3.82%
For seasonal, recreational, or occasional use	519	66.88%	5,698	69.79%	39,475	17.49%
For migrant workers	0	0.00%	4	0.05%	746	0.33%
Other vacant	111	14.30%	1,320	16.17%	101,155	44.81%
Homeowner Vacancy Rate	4.58%		4.69%		2.31%	
Rental Vacancy Rate	4.49%		9.25%		8.24%	

Source: 2009-2013 American Community Survey, Tables B25001, B25003 & B25004

Within Delaware County, the overall housing vacancy rate is estimated to be 32.98%. The homeowner vacancy rate is estimated to be 4.69%, while the rental vacancy rate is estimated to be 9.25%.

In Grove, the overall housing vacancy rate is estimated to be 20.21%. The homeowner vacancy rate is estimated to be 4.58%, while the rental vacancy rate is estimated to be 4.49%.

Building Permits

The next table presents data regarding new residential building permits issued in Grove. This data is furnished by the U.S. Census Bureau Residential Construction Branch, Manufacturing and Construction Division. Please note that average costs reported only represent physical construction costs for the housing units, and do not include land prices, most soft costs (such as finance fees), or builder's profit.

Grove

New Residential Building Permits Issued, 2004-2014

Year	Single Family Units	Avg. Construction Cost	Multifamily Units	Avg. Multifamily Construction Cost
2004	49	\$221,864	23	\$70,565
2005	105	\$144,258	0	N/A
2006	79	\$159,379	0	N/A
2007	101	\$163,303	0	N/A
2008	27	\$133,950	0	N/A
2009	34	\$215,704	0	N/A
2010	24	\$205,583	0	N/A
2011	19	\$127,632	0	N/A
2012	12	\$179,500	0	N/A
2013	22	\$225,159	6	\$62,000
2014	28	\$174,643	0	N/A

Source: United States Census Bureau Building Permits Survey

In Grove, building permits for 529 housing units were issued between 2004 and 2014, for an average of 48 units per year. 94.52% of these housing units were single family homes, and 5.48% consisted of multifamily units.

New Construction Activity

For Ownership:

New home construction is occurring in many areas of Delaware County, much of it on or very near Grand Lake. In many cases these homes are constructed on rural, unplatted acreages or rural subdivisions, or in smaller communities in the county such as Jay. Within Grove, new construction has occurred in subdivisions such as Walnut Grove, Baycrest Village, Lighthouse Harbor, The Lodges at Melody Point, and Littlegate, among others.

Although there has been some relatively affordable housing constructed in Delaware County in recent years, much has consisted of high-end homes, in many cases intended for recreational occupancy. The

average sale price of homes built in Grove since 2010 (and sold after January 2014) is \$303,548 or \$129.85 per square foot, which is dramatically above what could be afforded by a person earning median household income in Grove, estimated to be \$39,716 in 2015.

For Rent:

New rental construction in Grove has been very limited in recent years, typically consisting of very small-scale duplex/fourplex development. A relatively large market-rate complex was constructed in 2010 in the nearby Monkey Island area called The Villas of Monkey Island. The property comprised 120 townhouse units, and was not well-received. The property has since been purchased and converted to condominiums for purchase.

Homeownership Market

This section will address the market for housing units for purchase in Delaware County, using data collected from both local and national sources.

Housing Units by Home Value

The following table presents housing units in Delaware County by value, as well as median home value, as reported by the Census Bureau's American Community Survey.

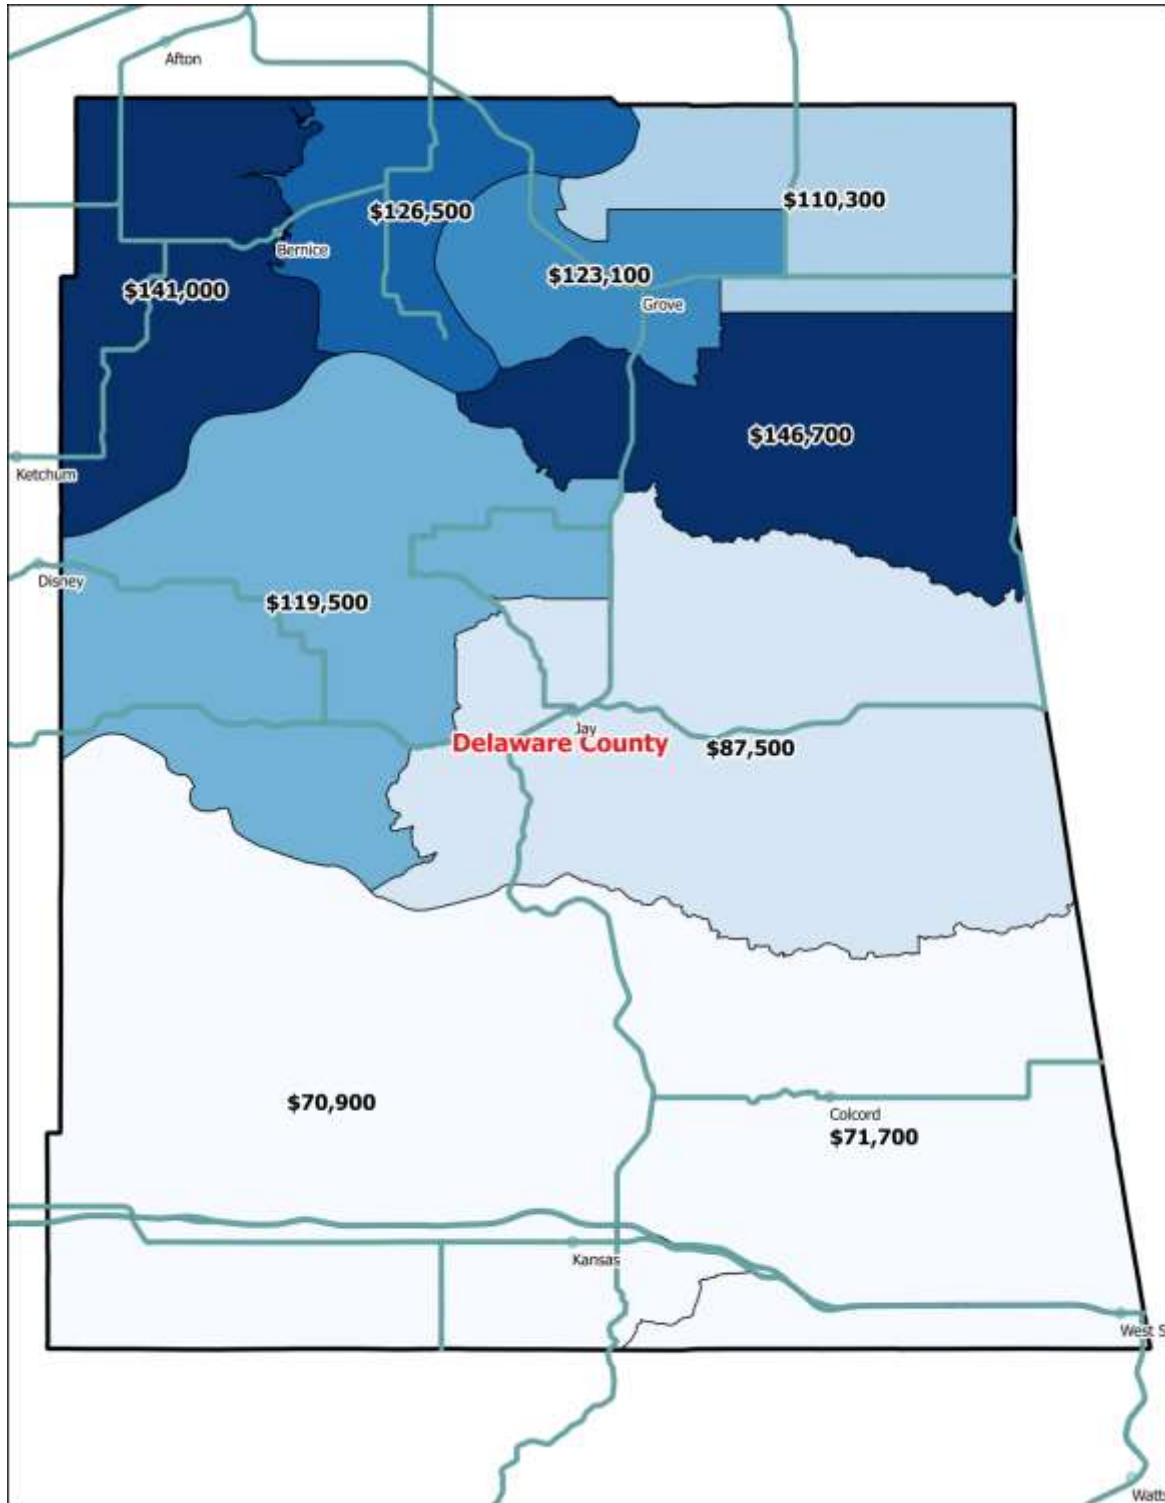

2013 Housing Units by Home Value						
	Grove		Delaware County		State of Oklahoma	
	No.	Percent	No.	Percent	No.	Percent

Median Home Value:	\$132,400		\$105,200		\$112,800	

Sources: 2009-2013 American Community Survey, Tables B25075 and B25077

The median value of owner-occupied homes in Delaware County is \$105,200. This is -6.7% lower than the statewide median, which is \$112,800. The median home value in Grove is estimated to be \$132,400, notably higher than both the countywide and statewide indications.

The geographic distribution of home values in Delaware County can be visualized by the following map. As can be seen, home values are significantly higher in the northern portion of the county near Grove and Grand Lake, than in the southern region of the county.

Delaware County Median Home Values by Census Tract

Home Values by Year of Construction

The next table presents median home values in Delaware County by year of construction. Note that missing data fields indicate the Census Bureau had inadequate data to estimate a median value that age bracket.

2013 Median Home Value by Year of Construction			
	Grove Median Value	Delaware County Median Value	State of Oklahoma Median Value
Total Owner-Occupied Units:			
Built 2010 or Later	-	\$169,700	\$188,900
Built 2000 to 2009	\$202,200	\$125,800	\$178,000
Built 1990 to 1999	\$150,800	\$122,800	\$147,300
Built 1980 to 1989	\$126,400	\$104,300	\$118,300
Built 1970 to 1979	\$117,600	\$93,100	\$111,900
Built 1960 to 1969	\$115,100	\$83,200	\$97,100
Built 1950 to 1959	\$79,600	\$96,700	\$80,300
Built 1940 to 1949	\$110,500	\$86,300	\$67,900
Built 1939 or Earlier	\$58,500	\$71,800	\$74,400

Note: Dashes indicate the Census Bureau had insufficient data to estimate a median value.

Grove Single Family Sales Activity

The next series of tables provides data regarding single family home sales activity in Grove. This data was furnished by County Records, Inc. from publicly available data.

Grove Single Family Sales Activity					
All Bedroom Types					
Year	2011	2012	2013	2014	YTD 2015
# of Units Sold	141	157	160	163	139
Average Sale Price	\$157,240	\$213,168	\$180,162	\$178,669	\$191,478
Average Square Feet	1,908	1,965	1,869	1,921	1,889
Average Price/SF	\$82.41	\$108.48	\$96.39	\$93.01	\$101.36
Average Year Built	1995	1996	1997	1993	1995

Source: Delaware County Assessor, via County Records, Inc.

Between 2011 and 2014, the average sale price grew by 3.25% per year. The average sale price in 2015 was \$191,478 for an average price per square foot of \$101.36. The average sale price has fluctuated somewhat depending on the number of high-value homes sold in a given year. The average year of construction for homes sold in 2015 is estimated to be 1995. We also note that data from the Northeast Oklahoma Board of REALTORS® reports a median sale to list price ratio of 94.57% for December 2015, with median days on market of 128 days, with a 10.63 month supply. This data is system-wide for the area covered by the Northeast Oklahoma Board of REALTORS® and not specific to the city of Grove.

Foreclosure Rates

The next table presents foreclosure rate data for Delaware County, compiled by the Federal Reserve Bank of New York. This data is effective as of May 2014.

Foreclosure Rates	
Geography	% of Outstanding Mortgages in Foreclosure, May 2014
Delaware County	2.3%
State of Oklahoma	2.1%
United States	2.1%
Rank among Counties in Oklahoma*:	28
* Rank among the 64 counties for which foreclosure rates are available	
Source: Federal Reserve Bank of New York, Community Credit Profiles	

According to the data provided, the foreclosure rate in Delaware County was 2.3% in May 2014. The county ranked 28 out of 64 counties in terms of highest foreclosure rates in Oklahoma. This rate compares with the statewide and nationwide foreclosure rates, both of which were 2.1%.

With an above-average foreclosure rate, it is likely that foreclosures have had some impact on the local housing market. High rates of foreclosure in a neighborhood can have a depressing effect on home values, lengthening marketing times and making it more difficult for potential homebuyers to secure financing.

Rental Market

This section will discuss supply and demand factors for the rental market in Delaware County, based on publicly available sources as well as our own surveys of landlords and rental properties in the area.

Gross Rent Levels

The following table presents data regarding gross rental rates in Delaware County. Gross rent is the sum of contract rent, plus all utilities such as electricity, gas, water, sewer and trash, as applicable (telephone, cable, and/or internet expenses are not included in these figures).

2013 Rental Units by Gross Rent						
	Grove		Delaware County		State of Oklahoma

\$1,500 to \$1,999	10	1.09%	39	1.06%	10,145	2.13%
\$2,000 or more	0	0.00%	7	0.19%	5,121	1.08%
No cash rent	171	18.69%	818	22.19%	43,236	9.10%
Median Gross Rent	\$661		\$601		\$699	

Sources: 2009-2013 American Community Survey, Tables B25063 and B25064

Median gross rent in Delaware County is estimated to be \$601, which is -14.0% less than Oklahoma's median gross rent of \$699/month. Median gross rent in Grove is estimated to be \$661.

Median Gross Rent by Year of Construction

The next table presents data from the American Community Survey regarding median gross rent by year of housing unit construction. Note that dashes in the table indicate the Census Bureau had insufficient data to provide a median rent figure for that specific data field.

2013 Median Gross Rent by Year of Construction

	Grove Median Rent	Delaware County Median Rent	State of Oklahoma Median Rent
Total Rental Units:			
Built 2010 or Later	-	\$1,069	\$933
Built 2000 to 2009	\$871	\$747	\$841
Built 1990 to 1999	\$695	\$619	\$715
Built 1980 to 1989	\$414	\$513	\$693
Built 1970 to 1979	\$675	\$638	\$662
Built 1960 to 1969	-	\$559	\$689
Built 1950 to 1959	\$333	\$574	\$714
Built 1940 to 1949	-	\$555	\$673
Built 1939 or Earlier	-	\$610	\$651

Note: Dashes indicate the Census Bureau had insufficient data to estimate a median gross rent.

Source: 2009-2013 American Community Survey, Table 25111

The highest median gross rent in Delaware County is among housing units constructed after 2010, which is \$1,069 per month. In order to be affordable, a household would need to earn at least \$42,760 per year to afford such a unit.

Grove Rental Survey Data

The next table shows the results of our rental survey of Grove. The data is divided between market rate properties, and affordable properties of all types (project-based Section 8, Low-Income Housing Tax Credit, USDA Rural Development, etc.)

Grove Rental Properties								
Name	Type	Year Built	Bedrooms	Bathrooms	Size (SF)	Rate	Rate/SF	Vacancy

Savannah Park	USDA / LIHTC - Elderly	1992	2	1	N/A	30%	N/A	0.00%

The previous rent surveys encompass nearly three hundred rental units in seven complexes. These properties are located throughout the community and provide a good indication of the availability and rental structure of multifamily property. Concessions such as free rent or no deposit were not evident in the competitive market survey. These inducements appear to have phased out over the market, and appear only sporadically at individual complexes to induce leasing activity in a particular unit type. Review of historical rental data indicates the comparable rental rates have increased in a predominant range of \$5 to \$10 per unit per month annually over the past 36 months.

Rental Market Vacancy – Grove

The developments outlined previously report occupancy levels typically above 95%. These occupancy levels are typical of well-maintained and poorly maintained properties alike. The ability of older, physically deteriorating facilities to maintain high occupancy levels reflects the lack of superior alternatives in the Grove market. The USDA units, according to property managers, typically stay well occupied. The overall market vacancy of rental housing units was reported at 4.49% by the Census Bureau as of the most recent American Community Survey.

Projected Housing Need

Consolidated Housing Affordability Strategy (CHAS)

This section will analyze data from the U.S. Department of Housing and Urban Development's Consolidated Housing Affordability Strategy (CHAS) dataset for Delaware County. This data is typically separated into household income thresholds, defined by HUD Area Median Family Income (HAMFI). HUD Area Median Family Income (HAMFI) is equivalent to Area Median Income (AMI) for the purposes of this report. This data is considered the best indicator of housing need available which separates need into household income thresholds as defined by HUD.

Cost Burden by Income Threshold

The next table presents CHAS data for Delaware County regarding housing cost burden as a percentage of household income. Renter costs are considered to be the sum of contract rent and any utilities not paid by the landlord (such as electricity, natural gas, and water, but not including telephone service, cable service, internet service, etc.). Homeowner costs include mortgage debt service (or similar debts such as deeds of trust or contracts for deed), utilities, property taxes and property insurance.

Households are considered to be cost overburdened if their housing costs (renter or owner) are greater than 30% of their gross household income. A household is "severely" overburdened if their housing costs are greater than 50% of their gross household income.

Delaware County : CHAS - Housing Cost Burden by HAMFI

Substandard Conditions / Overcrowding by Income Threshold

The following table summarizes data regarding substandard housing conditions and overcrowding, separated by owner/renter and HAMFI income threshold. Substandard housing conditions are defined by HUD as any housing unit lacking either complete plumbing or a complete kitchen.

A housing unit without “complete plumbing” is any housing unit lacking one or more of the following features (they do not need to all be present in the same room):

1. Hot and cold running water
2. A flush toilet
3. A bathtub or shower

A lack of a complete kitchen is any housing unit lacking any one or more of the three following items:

1. A sink with a faucet
2. A stove or range
3. A refrigerator

Households are considered to be “overcrowded” if the household has more than 1.0 persons per room (note that this definition is “room” including bedrooms, living rooms and kitchens, as opposed to only “bedrooms”), and is “severely overcrowded” if the household has more than 1.5 persons per room.

Cost Burden by Household Type

The following table provides a breakdown of households by HAMFI, and by household type and size, and by housing cost burden. The categories of household type provided by HUD are:

- Elderly Family: Households with two persons, either or both age 62 or over.
- Small Family: 2 persons, neither age 62 or over, or families with 3 or 4 persons of any age.
- Large Family: families with 5 or more persons.
- Elderly Non-Family (single persons age 62 or over, or unrelated elderly individuals)
- Non-Elderly, Non-Family: all other households.

Housing Problems by Household Type

The next set of tables presents data by household type and whether or not the household is experiencing **any** housing problems. Housing problems are defined by HUD as any household meeting any of the three following criteria:

1. Housing costs greater than 30% of income (cost-overburdened).
2. Living in a housing unit lacking complete plumbing or a complete kitchen (substandard housing unit).
3. Living in a housing unit with more than 1.0 persons per room (overcrowding).

Housing Problems by Race / Ethnicity

Data presented in the following tables summarizes housing problems (as previously defined), by HAMFI threshold, and by race/ethnicity, for Delaware County. Under CFR 91.305(b)(1)(ii)(2), racial or ethnic groups have disproportionate need if “the percentage of persons in a category of need who are members of a particular racial or ethnic group in a category of need is at least 10 percentage points higher than the percentage of persons in the category as a whole.”

CHAS Conclusions

The previous data notes many areas of need (and severe need) among the existing population of Delaware County. The greatest needs are among households with incomes less than 30% of Area Median Income. Several other areas of note:

- Among households with incomes less than 50% of Area Median Income, there are 905 renter households that are cost overburdened, and 1,470 homeowners that are cost overburdened.
- Among **elderly** households with incomes less than 50% of Area Median Income, there are 195 renter households that are cost overburdened, and 785 homeowners that are cost overburdened.
- 85.71% of Hispanic renters, and 100% of Pacific Islander, African-American and Asian renters with incomes less than 80% of Area Median Income have one or more housing problems.

- 100% of Asian and Pacific Islander homeowners with incomes less than 80% of Area Median Income have one or more housing problems.

Overall Anticipated Housing Demand

Future demand for housing units in Delaware County can be estimated from population and household growth. Population estimates are based on known factors such as noted increases in the city employment base and indications from demographic services. In this case we have considered data from both the U.S. Census Bureau and Nielsen SiteReports. The estimates of changes in households and population were presented in a previous section of this report. The anticipated future demand is estimated for Grove, as well as Delaware County as a whole. The calculations are shown in the following tables.

Grove Anticipated Demand

Households in Grove grew at an annually compounded rate of 2.74% from 2000 to 2010. Nielsen SiteReports estimates households have grown 0.77% per year since that time, and that households will grow 0.92% per year through 2020. For these reasons we will rely on the Nielsen SiteReports forecast of 0.92% per year in forecasting future household growth for Grove.

The percentage of owner households was estimated at 70.13% with renter households estimated at 29.87%, based on data from the U.S. Census Bureau. The estimated number of additional units needed to service increasing demand can be estimated by applying this percentage to the anticipated growth in households. It should be noted that this is an estimate of rental and owner requirements and should be relied upon only as a guideline for possible new demand. The calculations are shown below.

Future Housing Demand Estimates for Grove						
Year	2015	2016	2017	2018	2019	2020
Household Estimates	3,113	3,142	3,171	3,200	3,229	3,259
Owner %: 70.13%	2,183	2,203	2,223	2,244	2,265	2,285
Renter %: 29.87%	930	938	947	956	965	974
Total New Owner Households						102
Total New Renter Households						44

Based on an estimated household growth rate of 0.92% per year, Grove would require 102 new housing units for ownership, and 44 units for rent, over the next five years. Annually this equates to 20 units for ownership per year, and 9 units for rent per year.

Delaware County Anticipated Demand

Households in Delaware County grew at an annually compounded rate of 1.42% from 2000 to 2010. Nielsen SiteReports estimates households have grown 0.08% per year since that time, and that households will grow 0.31% per year through 2020. For these reasons we will rely on the Nielsen SiteReports forecast of 0.31% per year in forecasting future household growth for Delaware County.

The percentage of owner households was estimated at 77.77% with renter households estimated at 22.23%, based on data from the U.S. Census Bureau. The estimated number of additional units needed to service increasing demand can be estimated by applying this percentage to the anticipated growth

in households. It should be noted that this is an estimate of rental and owner requirements and should be relied upon only as a guideline for possible new demand. The calculations are shown below.

Future Housing Demand Estimates for Delaware County						
Year	2015	2016	2017	2018	2019	2020
Household Estimates	17,158	17,212	17,265	17,319	17,374	17,428
Owner %: 77.77%	13,345	13,386	13,428	13,470	13,512	13,555
Renter %: 22.23%	3,813	3,825	3,837	3,849	3,861	3,873
				Total New Owner Households		210
				Total New Renter Households		60

Based on an estimated household growth rate of 0.31% per year, Delaware County would require 210 new housing units for ownership, and 60 units for rent, over the next five years. Annually this equates to 42 units for ownership per year, and 12 units for rent per year.

Housing Demand – Population Subsets

This section will address 5-year forecasted needs and trends for population special population subsets for Delaware County. These forecasts are based on the previously forecasted overall trends for the next five years.

Housing Needs by Income Thresholds

The first table will address future housing needs and trends for households in Delaware County by income threshold: households within incomes below 30%, 50%, 60% and 80% of Area Median Income, by tenure (owner/renter). These forecasts are primarily based on HUD Consolidated Housing Affordability Strategy data presented previously. Households with incomes below 60% of Area Median Income (AMI) are estimated at 120% of the households at 50% of AMI. Note that these figures are cumulative and should not be added across income thresholds.

Delaware County: 2015-2020 Housing Needs by Income Threshold					
	Owner	Renter			
	Subset %	Subset %	Owners	Renters	Total
Total New Demand: 2015-2020	100.00%	100.00%	210	60	270
Less than 30% AMI	7.97%	21.25%	17	13	29
Less than 50% AMI	21.26%	40.28%	45	24	69
Less than 60% AMI	25.51%	48.33%	54	29	83
Less than 80% AMI	39.35%	59.44%	83	36	118

Elderly Housing Needs

The next table will address future housing needs and trends for households with elderly persons (age 62 and up). Like the previous table, this data is based on the overall trends previously defined, and the 2008-2012 CHAS data previously discussed (specifically CHAS Table 16). It is further broken down by income threshold and tenure.

Delaware County: 2015-2020 Housing Needs Age 62 and Up					
	Owner	Renter	Elderly	Elderly	Elderly
	Subset %	Subset %	Owners	Renters	Total
Total New Elderly (62+) Demand: 2015-2020	44.59%	18.33%	94	11	105
Elderly less than 30% AMI	4.14%	2.92%	9	2	10
Elderly less than 50% AMI	11.14%	8.89%	23	5	29
Elderly less than 60% AMI	13.36%	10.67%	28	6	34
Elderly less than 80% AMI	19.97%	12.36%	42	7	49

Housing Needs for Persons with Disabilities / Special Needs

The following table will address future trends and needs for households with at least one household member with at least one disability as identified by HUD CHAS Table 6 (hearing or vision impairments, ambulatory limitations, cognitive limitations, self-care limitations, or independent living limitations). As with the previous tables, this data is also further broken down by income threshold and tenure.

Delaware County: 2015-2020 Housing Needs for Persons with Disabilities

	Owner Subset %	Renter Subset %	Disabled Owners	Disabled Renters	Disabled Total
Total New Disabled Demand (2015-2020)	37.98%	35.28%	80	21	101
Disabled less than 30% AMI	3.71%	8.61%	8	5	13
Disabled less than 50% AMI	11.10%	17.50%	23	11	34
Disabled less than 60% AMI	13.32%	21.00%	28	13	41
Disabled less than 80% AMI	18.33%	25.83%	38	16	54

Housing Needs for Veterans

This section will address housing needs for households with at least one veteran. This data is not available through HUD's Consolidated Housing Affordability Strategy, so we have instead relied on data from the U.S. Census Bureau, specifically the 2009-2013 American Community Survey, Table C21007. This data is further broken down by tenure, poverty status, and disability status.

Delaware County: 2015-2020 Housing Needs for Veterans

	Owner Subset %	Renter Subset %	Veteran Owners	Veteran Renters	Veteran Total
Total New Demand (2015-2020)	100.00%	100.00%	210	60	270
Total Veteran Demand	13.41%	13.41%	28	8	36
Veterans with Disabilities	5.16%	5.16%	11	3	14
Veterans Below Poverty	1.24%	1.24%	3	1	3
Disabled Veterans Below Poverty	0.52%	0.52%	1	0	1

Housing Needs for Working Families

The final table addresses housing needs for working families. Working families are in this case defined as families (households with at least two members related by blood or marriage) with at least one person employed. Like the forecasts for veteran needs, this data cannot be extracted from the HUD CHAS tables, so we have again relied on the Census Bureau's American Community Survey (table B23007 in this instance). The data is further broken down by the presence of children (below the age of 18).

Delaware County: 2015-2020 Housing Needs for Working Families

	Owner Subset %	Renter Subset %	Owners	Renters	Total
Total New Demand (2015-2020)	100.00%	100.00%	210	60	270
Total Working Families	45.85%	45.85%	96	28	124
Working Families with Children Present	19.77%	19.77%	42	12	53

Population Subset Conclusions

Based on population and household growth over the next five years, a total of 270 housing units will be needed in Delaware County over the next five years. Of those units:

- 83 will be needed by households earning less than 60% of Area Median Income

- 34 will be needed by households age 62 and up, earning less than 60% of Area Median Income
- 41 will be needed by households with disabilities / special needs, earning less than 60% of Area Median Income
- Three will be needed by veterans living below the poverty line
- 53 will be needed by working families with children present

This data suggests a need in Delaware County for housing units that are both affordable and accessible to persons with disabilities / special needs, and working families with children.

Special Topics

Delaware County Disaster Resiliency Assessment

The purpose of this section is to assess at the county level key components of disaster resiliency. Housing location and quality as well as planning activities can help reduce impacts from disaster events and allow for faster recovery. Disasters can include tornadoes, extreme weather, high winds, as well as man-made events. These events may largely be inevitable, but the ability to reduce damage and casualties as well recovery can be improved with good planning.

C.0 Comprehensive Plans & Hazard Mitigation Plans

There are two key communities within the county including the cities of Grove and Jay.

Grove had a population of 6,623 in 2010 Census and, while it does not appear to have a comprehensive plan available, the Delaware County Hazard Mitigation Plan (HMP) denotes that Grove practices comprehensive planning. Jay had a population of 2,248 in the 2010 Census and also does not have a comprehensive plan available. Several smaller unincorporated towns exist within the county that are too small to warrant creation of a comprehensive plan. Overall, the county population was 41,487 in the 2010 Census. Of these smaller communities, the towns of Bernice, Colcord, Kansas, Oaks, West Siloam Springs were involved in gathering information for the county to prepare the Delaware County Hazard Mitigation Plan with assistance from the Grand Gateway Economic Development Association (GGEDA). GGEDA is a cooperative created by local governments in seven counties in Northeastern Oklahoma. The Delaware County HMP will cover the rest of the towns in the county as they do not have their own HMPs.

The other key plan for a city to manage, mitigate and plan for recovery related to disasters is a **Hazard Mitigation Plan (HMP)**. Often in low density counties, the Hazard Mitigation Plan is done at the county level, though some cities may augment the county plan with a city plan. The Delaware County Hazard Mitigation Plan was adopted July 2nd, 2012 and is intended to be reviewed every two years and updated every five years. The City of Grove has its own HMP. The Delaware County HMP will cover the rest of the towns in

C.2.1.1. Historical Data on Natural Disasters and Other Hazards

Data on historical damages and casualties is typically collected as part of a **Hazard Mitigation Plan** preparation to determine the appropriate planning measures and actions to take before and after an event.

For this county the Hazard Mitigation Plan contains the following historic data on disasters and damages in the county:

1. Mitigation Strategies – Goals and Objectives	
Goal 1	To increase countywide ability to communicate and respond quickly and efficiently to disasters.
Objective	By providing interconnected mobile telecommunications to all areas of Delaware County through a collaborative countywide effort.

Goal 2	To enhance public awareness and understanding of hazard mitigation.
Objective	By seeking methods to provide funding for trainers and materials to implement ongoing community and public education and hazards awareness programs.
Goal 3	To reduce the impact of repetitive flooding in flood-prone areas of Delaware County
Objective	By encouraging development and implementation of programs to purchase, remove, and inhibit development and construction in flood-prone areas, and by addressing at-risk transportation routes.
Goal 4	To develop and educate responders and health care providers regarding mitigation measures for specific hazards.
Objective	By providing training opportunities to these personnel.
Goal 5	To enhance pre-disaster and prevention activities.
Objective	By providing training and other educational opportunities for the public.

1.	Lead Department	Mitigation Measures	Priority
A	Mayors of each community	Purchase and install additional outdoor warning devices as some current devices are not reaching all areas of the communities due to growth that has caused expansion beyond the capabilities of the original devices.	HIGH
B	Emergency Management Director and Delaware County	Identify a site for, and install a new communications tower to allow dependable communications between the Emergency Operations Center and the communities within the county.	HIGH
C	Emergency Management Director and Red Cross	Prepare a public education and awareness campaign. Distribute awareness and safety literature addressing all hazards to citizens as inserts in utility bills.	HIGH
D	County Commissioners	Apply rip/wrap to roads at several locations throughout the county to prevent deterioration of the roadbed due to erosion caused by heavy rains.	
E	County Flood Plain Coordinator and Emergency Management Director	Host educational workshops regarding flood insurance and the NFIP for the citizens of Delaware County.	LOW
F	Emergency Management Director and County Commissioners	Develop and distribute digital mapping of appropriate areas which impact disaster mitigation and disaster recovery.	HIGH

G	Delaware County Emergency Management Director	Update County-wide Mutual Aid Agreements.	
H	School District Superintendents	Construct Safe Rooms in County Schools.	HIGH
I	Oklahoma Forestry Service	Educate the public regarding ways to mitigate damages from drought and wildfire, i.e., prescribed burning to reduce fuel.	
J	Oklahoma Forestry Service	Purchase equipment, personnel, and training to combat wildfires in the county.	
K	Individual Fire Chiefs, County Commissioners	Acquire equipment, protective clothing, and training to contain any hazardous materials spill that is likely to occur.	
L	Mayors of Colcord, Kansas, Oaks, West Siloam Springs	Encourage the Towns of Colcord, Kansas, Oaks, and West Siloam Springs to enroll into the National Flood Insurance Program and meet mitigation criteria for enrollment.	
M	County Commissioners	Apply for grants through the Oklahoma Department of Environmental Quality and the Solid Waste Institute for funds to remove tires that are collection and breeding avenues for mosquito and other varmints.	LOW
N	County Commissioners	Construct a storm safe structure to house the County Emergency Operations Center.	

Dam Failure Risk

There are 7 dams in Delaware County. None are designated as “high hazard” by the Oklahoma Water Resources Board meaning there are no occupied dwellings immediately downstream. Of the 7 dams, 3 are mentioned in the HMP. The Grand River Dam Authority (GRDA) operates two dams on the Grand River forming the Grand Lake of the Cherokees: the Pensacola Dam and the Disney Dam. The Robert S. Kerr Dam forms Lake Hudson. GRDA has a security, warning, and evacuation plan in place. In case of flooding or damage incident occurrence, GRDA’s emergency plan includes a warning and county-wide evacuation protocol. There is no history of failure of the dams in Delaware County.

Drought

No drought events were reported in the **Delaware County, Oklahoma** HMP for the reporting period of **01/01/1950 to 03/31/2005**.

Appendix A identified the following drought events:

- 1953-54 – Drought
- 1996 – Drought caused county-wide, pasture and crop damage.
- 1998 – Drought and army worms cause excessive crop damage.
- Jan/Feb 1996 – Drought/Wildfire
- Fall 2000 – Drought/Wildfire

- 2001 – Drought resulted in a 60 percent reduction in yield of hay, pastures and crops for a total of \$10 million in damages.

Temperature Extremes – Extreme Heat

No temperature extremes were reported in **Delaware County, Oklahoma** HMP for the reporting period of **01/01/1950** to **03/31/2005**.

Flood

There are two types of floods, both which can occur in Delaware County. First, flash floods, which result from localized heavy rain falls. Second, riverine floods occur after extended periods of rain over several days or weeks. Riverine floods generally can be forecast in advance, and proper precautions taken to save lives and mitigate some though certainly not all, property losses.

Per Appendix A, a flood in the **Spring of 2000** resulted from 17 inches of rain that washed out roads and bridges.

Delaware County has also experienced flooding following an EF-3 tornado and severe thunderstorm on May 22, 2011. Waters reached flood stage by May 23, 2011 (NOAA).

Delaware County, Oklahoma experienced 20 floods from **05/09/1993** to **07/03/2004** that resulted in \$85,000 in property damage from flash floods. No injuries or deaths were reported.

Hailstorm

Due to Oklahoma's rapidly changing climate, large-scale hailstorms are especially prevalent. All parts of Delaware County are equally vulnerable to hailstorms. **31 HAIL** event(s) were reported in **Delaware County, Oklahoma** between **05/08/1961** and **07/08/2004** with hail size of at least **1.5 inch(es)** and **168 HAIL** events between **01/01/1950** and **03/31/2005** with hail size of at least **0.5 inches**.

Since most hail losses are insured or go unreported, no loss figures are estimated for those events. In Delaware County, a total of \$24,000 in property damage was reported from hail damage. Appendix A identified a hail storm in 1993 that damaged cars and roofs.

Hazardous Materials Events

Delaware County's location makes it a transportation route. The only hazardous materials events to date involved tractor trailer accident spills and one gasoline spill from a boat. Spills can be potentially serious hazards in that they could result in contamination of one of the lakes in the area which are used for water supply for most of the county.

Lightning

Delaware County, Oklahoma reported **4 lightning** events from **12/03/1993** to **10/06/2002** that resulted in **1 death** and \$150,000 in property damage.

Tornado & Wind

Tornadoes and high winds are combined in profile because of similarities in potential damage and mitigation measures. All of Delaware County is equally susceptible to tornado and high wind damages.

Due to the County wide probability every structure has equal probability to be struck by a tornado or high wind.

10 Significant TORNADO(s) (F2 or intensity of greater) were reported in **Delaware County, Oklahoma** between **03/24/1954** and **05/08/1989**. No deaths, 3 injuries were reported over that extended time period. No deaths or injuries have occurred from Tornados since 1989.

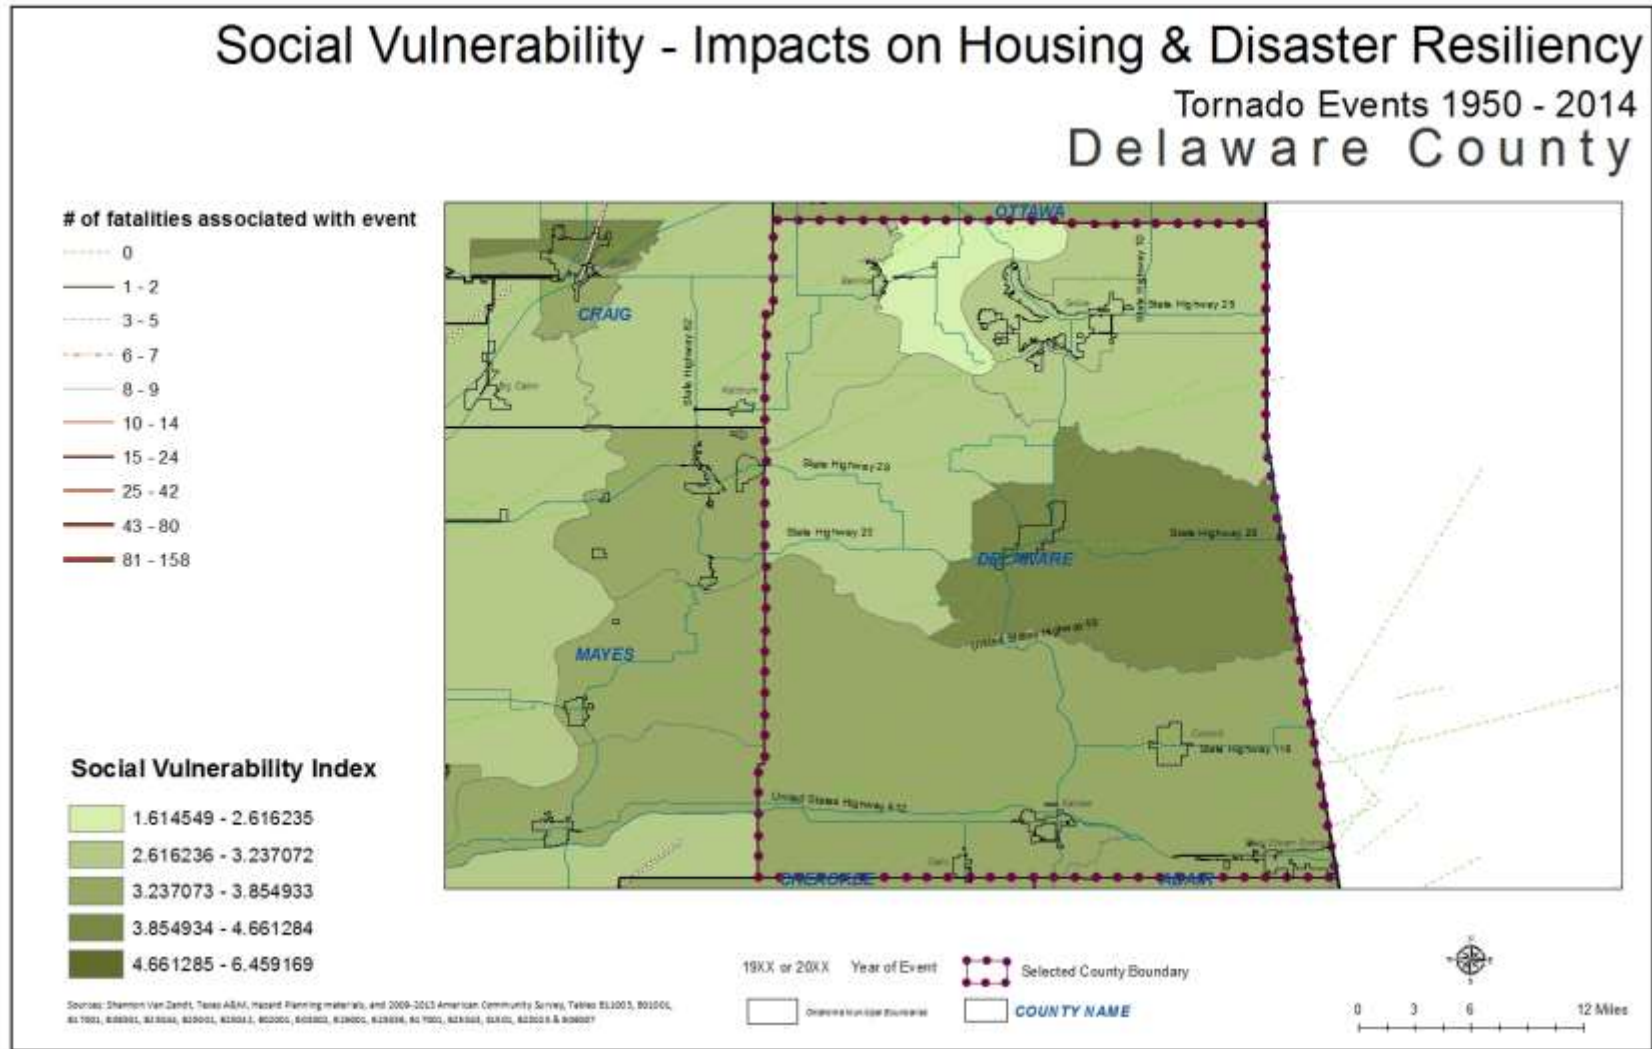

Per Appendix A, the following tornadoes occurred in Delaware County, Oklahoma:

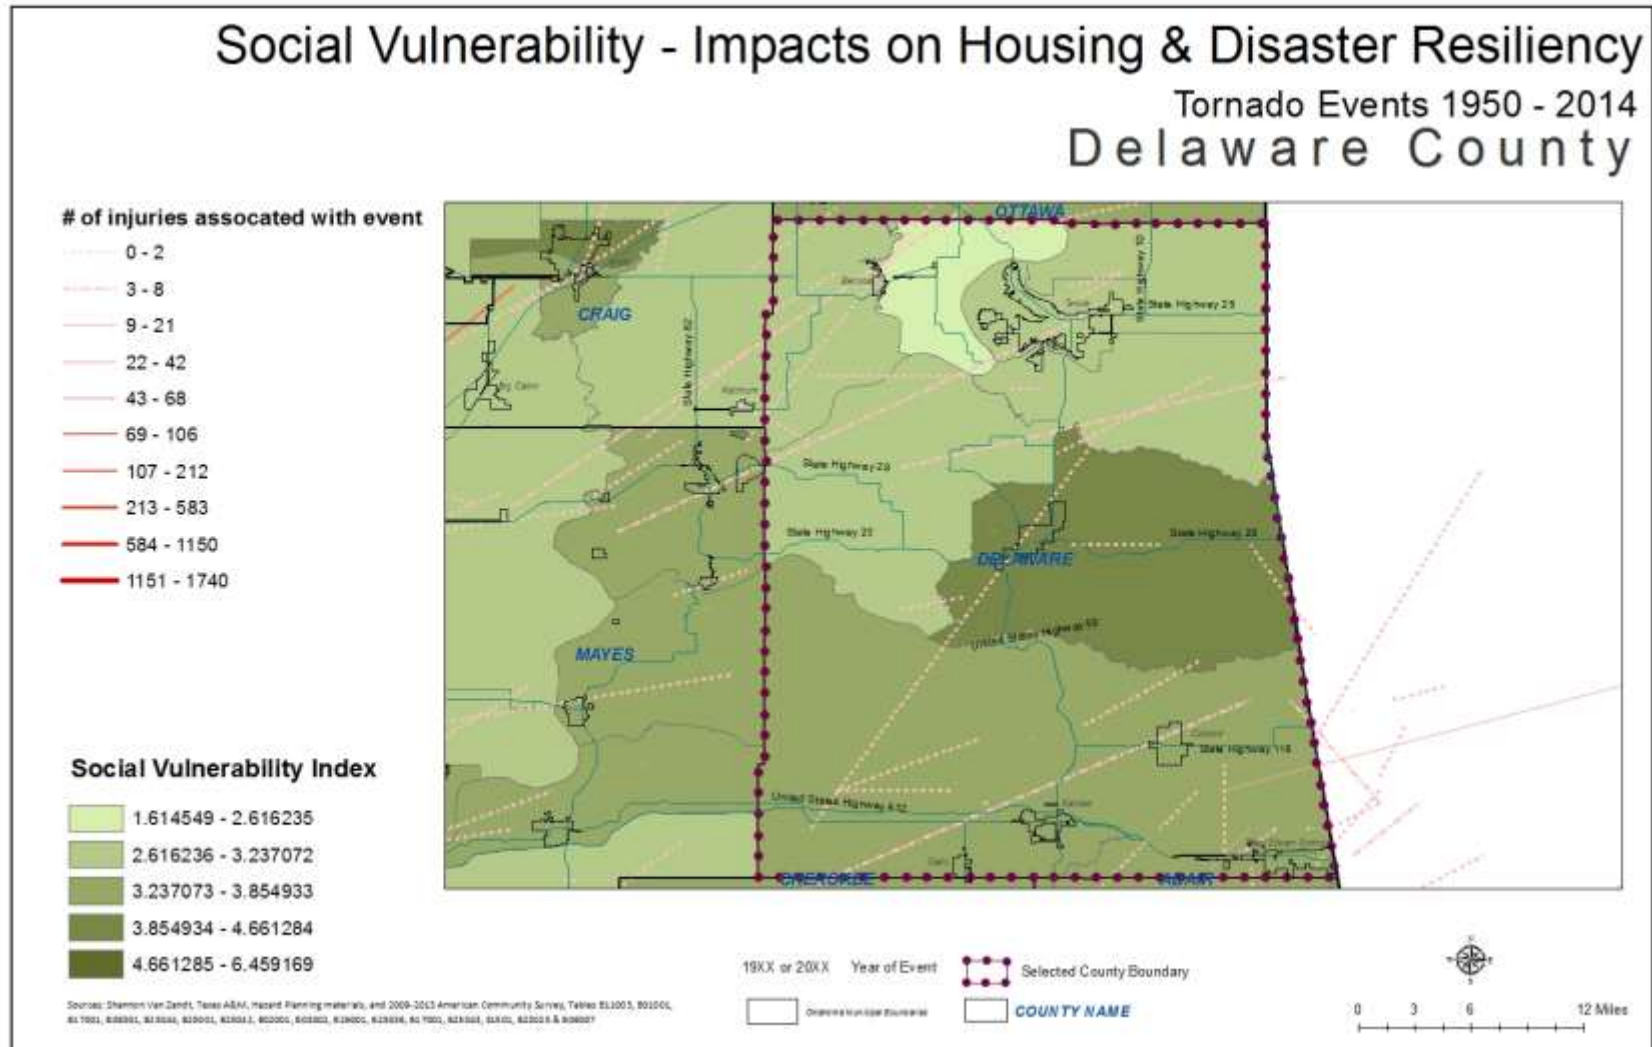

- 1943 – Tornado in the towns of Bernice and Grove with numerous injuries and deaths.
- 1971 – Tornado in the towns of Bernice and Grove resulted in **3 deaths**.
- 1984 – Tornado in Delaware County resulted in the loss of homes.
- Spring 1992 – Tornado in Delaware County resulted in the loss of many homes.
- 1993 – Tornado

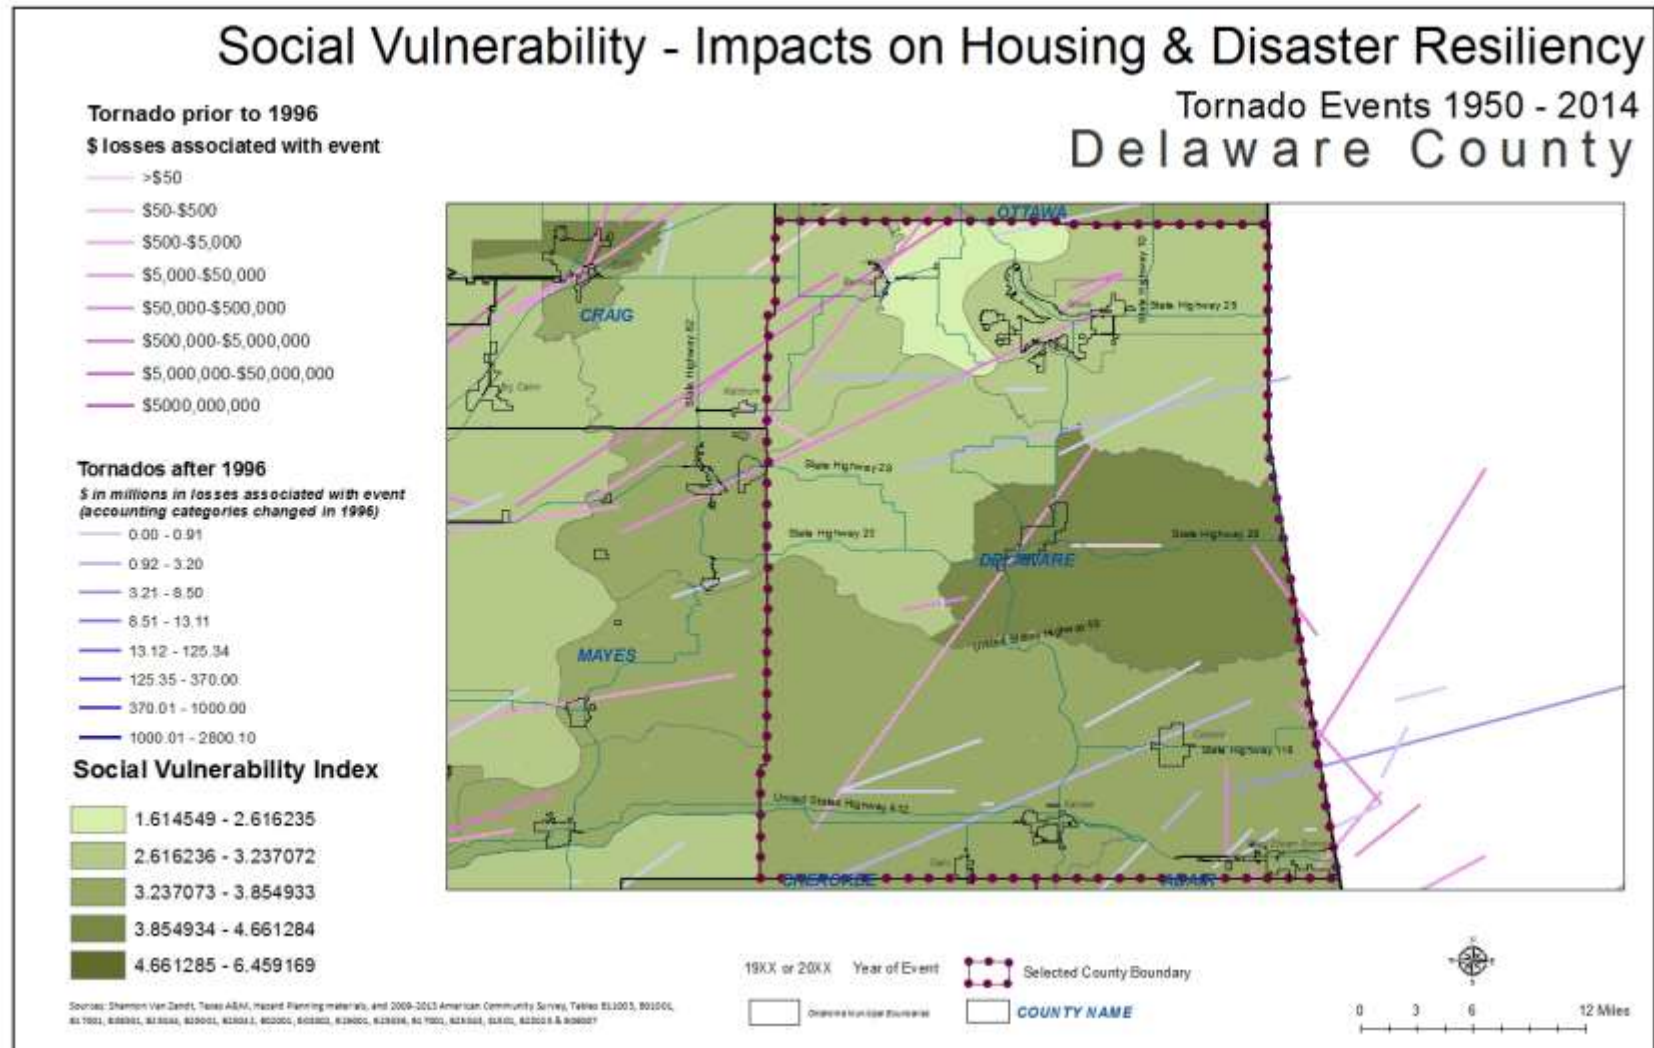

A search of the NOAA website identified additional tornadoes with records going back to 1904 that indicated 16 tornadoes resulting in 12 deaths and 256 injuries over a 107-year history resulting in an average of 0.15 tornadoes per year. NOAA also identified an additional EF-3 tornado occurred in Delaware County on May 22, 2011.

Thunderstorms and high winds accounted for one additional injury and a total of \$1.157 million in property damage.

For all the county profiles for this study we are providing maps of the historic tornados mapped over the developed social vulnerability index. This is in addition to the data prepared and summarized from the HMP in this section.

Water Outage

Appendix A of the **Delaware County, Oklahoma** HMP identified a water outage for the town of Colcord that lasted for 10 days during 2001.

Wild and Forest Fires

No wild or forest fires were reported in the **Delaware County, Oklahoma** HMP during the reporting period of **01/01/1950** to **03/31/2005**.

Appendix A identified a wildfire in November 1989 that resulted in loss of property, crops and forest.

Winter Storms

Appendix A of the **Delaware County, Oklahoma** HMP identified the following:

- A winter ice/snow storm in March 1989 with heavy snowfall in which 100+ chicken houses were lost and a total of \$1 million in damages.
- A winter snowstorm in 1992 caused the loss of truss structures.
- A winter ice/snow storm on December 25, 2000 caused county-wide destruction including damage to chicken houses and to wildlife.
- A winter ice storm in 2001 caused damage to roads and power lines in excess of \$10 million.

Per Appendix B of the HMP, 12 heavy snow events and 5 ice storms from **11/25/1993** to **12/09/1993** that resulted in \$22,000 in property damage.

C.2.1.2; C.2.1.6; C.2.1.7;C.2.1.8 Shelters from Disaster Event

The HMP for Delaware County states that there is currently only one public storm shelter in Delaware County located in the community of Bernice. The lack of community shelters is in part due to age and hazard risk of the older facilities that were previously used as shelters. There are currently no safe room facilities at any of the Delaware County school buildings. Each school has a disaster safety and evacuation plan in effect. Information on FEMA's Safe Room Grants has been disseminated to Delaware County school superintendents. These important safety items currently fall short of the desired county goal. There is no specific discussion about direct measures to provide safe rooms or shelters for lower income, multifamily, or HUD units.

The HMP states that proper sheltering is encouraged and recommends developing informational printed material for educational programs to alert citizens to the appropriate procedures for sheltering in the community storm shelter. Safe rooms and underground tornado shelters are encouraged, yet the plan states that in-home sheltering in the area has been examined by the Delaware County Hazardous Mitigation Plan Committee (DCHMPC) and found to be inadequate. Citizen interest is on the rise. The DCHMPC recognizes that having information on the locations of in-home shelters would be extremely useful to Emergency Response Personnel and of special importance in the rural areas of the county.

Mitigation Project H of the HMP calls for encouraging the inclusion of safe rooms in any future construction of school buildings. The school district superintendents are to take the lead.

C.2.1.3 Public Policy and Governance to Build Disaster Resiliency

The State of Oklahoma has not granted to counties broad regulatory powers to enact and enforce building codes, building inspections, subdivision regulations and growth management initiatives. Delaware County does have power to regulate all platting of land, all construction of dwelling units or commercial or industrial structures and all future development within a delineated floodplain area, except land held in trust by the United States for Native Americans.

C.2.1.4 Local Emergency Response Agency Structure

The Hazard Mitigation Plan prioritized mitigation actions and addressed how the actions will be implemented and administered, including the responsible department, existing and potential resources and timeframe to complete each action.

C.2.1.5 Threat & Hazard Warning Systems

Within the mitigation measures of the HMP, the Mayors of each of the incorporated communities are tasked with ensuring that additional outdoor warning devices are purchased and installed (Mitigation Project A). The Emergency Management Director will ensure that an additional communications tower is installed as funding is available (Mitigation Project B).

Social Vulnerability

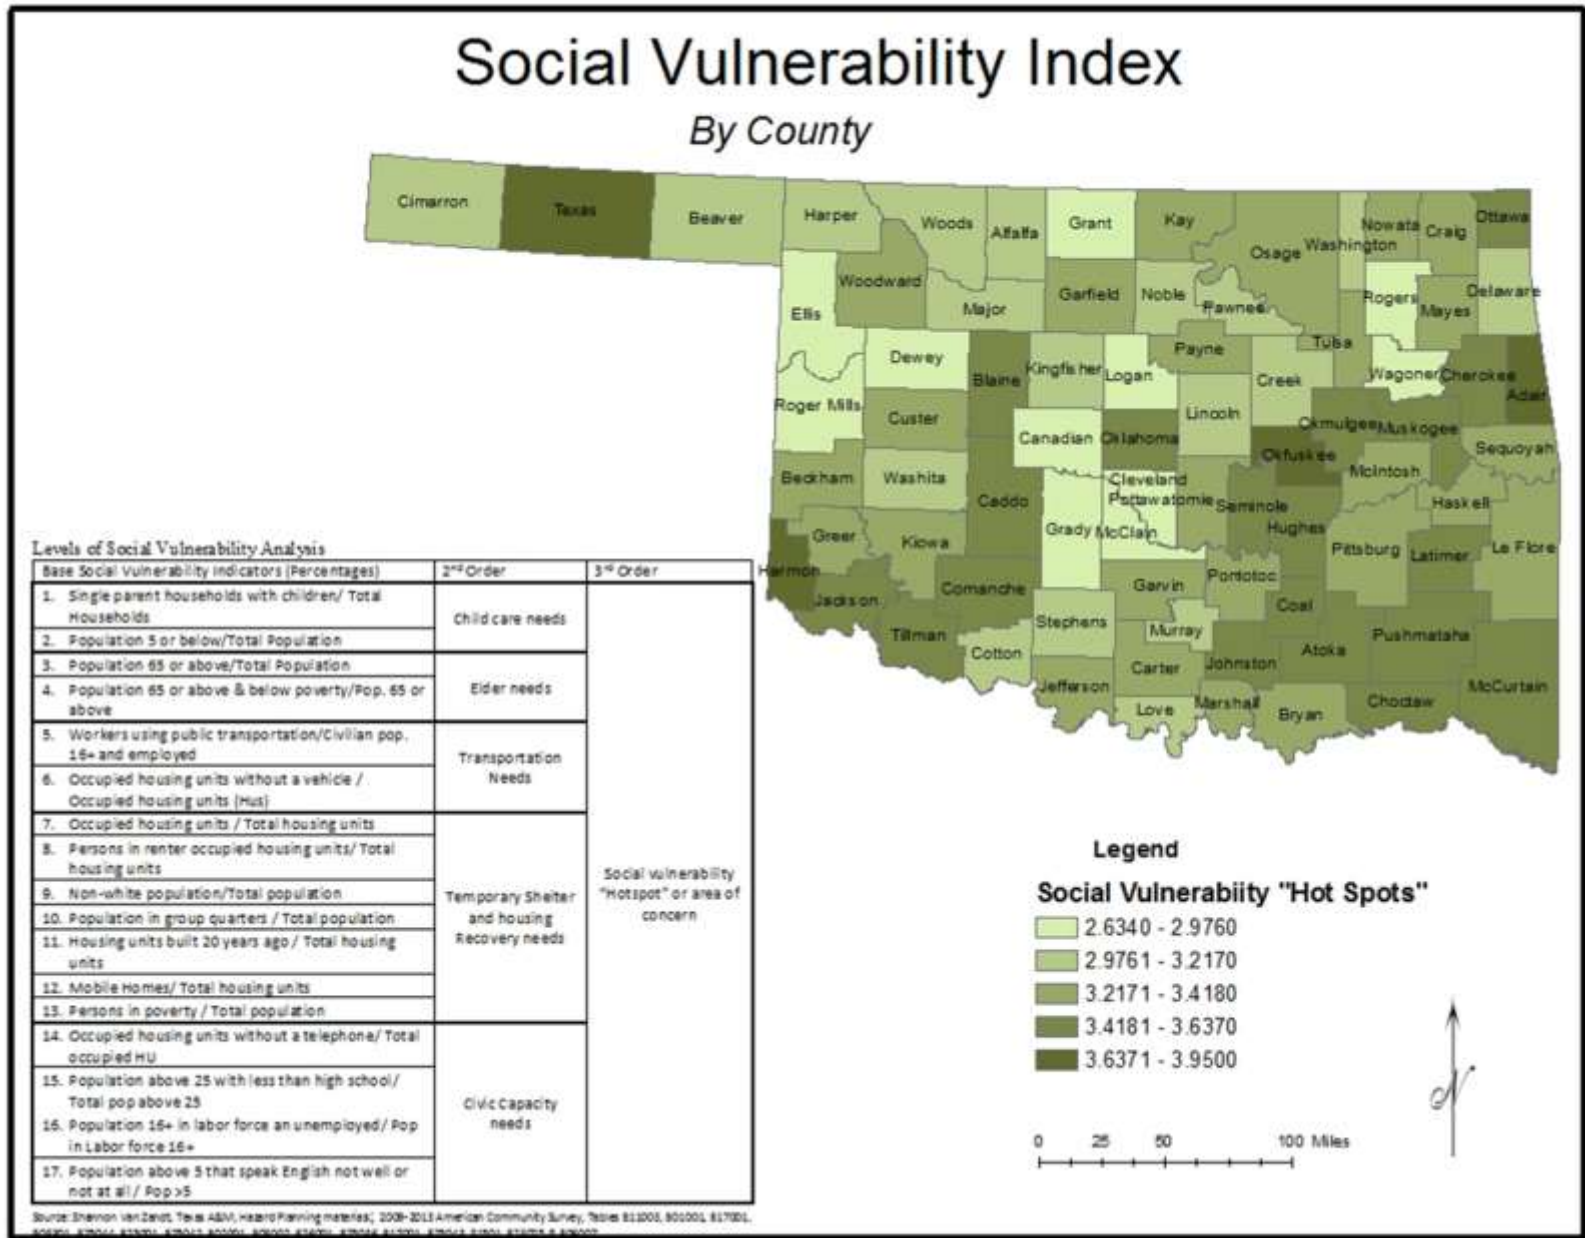

Based on the research work done by the Texas A&M University Hazard Reduction and Recovery Center, an added component is being included in this section. Social vulnerability can place households at a further disadvantage during and after a disaster. This analysis is assessing for the county the levels of social vulnerability based on demographic indicators to highlight ‘hotspots’ or counties that have higher social vulnerability. That combined with Hazard Mitigation Plans – or lack thereof – can highlight places where additional work is needed to reduce impacts on households.

Social Vulnerability Analysis - Delaware County

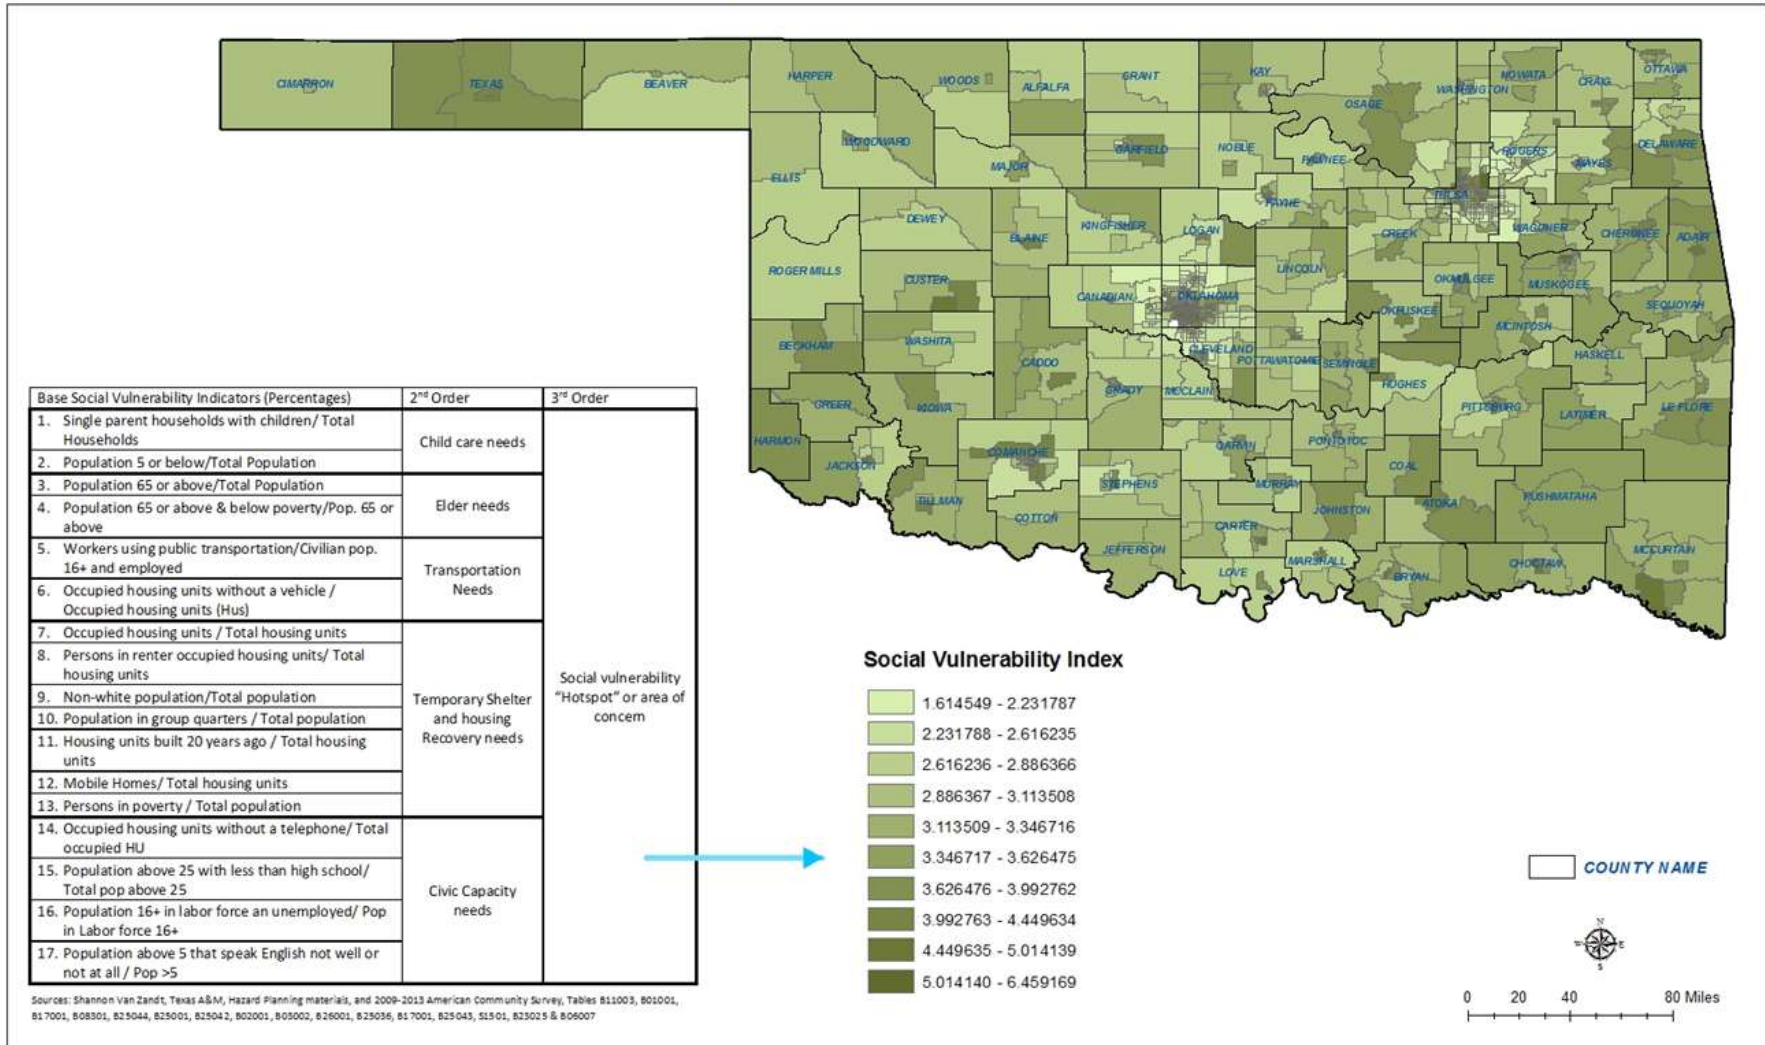

Base Social Vulnerability Indicators (%)		2nd Order	3rd Order
1.) Single Parent Households	10.35%	0.156	3.11 Social Vulnerability 'Hotspot' or Area of Concern
2.) Population Under 5	5.21%	(Child Care Needs)	
3.) Population 65 or Above	21.13%	0.304	
4.) Population 65 or Above & Below Poverty Rate	9.28%	(Elder Needs)	
5.) Workers Using Public Transportation	0.05%	0.039	
6.) Occupied Housing Units w/o Vehicle	3.88%	(Transportation Needs)	
7.) Housing Unit Occupancy Rate	67.02%	2.333 (Temporary Shelter and Housing Recovery Needs)	
8.) Rental Occupancy Rate	22.23%		
9.) Non-White Population	34.41%		
10.) Population in Group Quarters	1.12%		
11.) Housing Units Built Prior to 1990	61.15%		
12.) Mobile Homes, RVs, Vans, etc.	26.19%		
13.) Poverty Rate	21.23%	0.278 (Civic Capacity Needs)	
14.) Housing Units Lacking Telephones	1.92%		
15.) Age 25+ With Less Than High School Diploma	15.40%		
16.) Unemployment Rate	8.95%		
17.) Age 5+ Which Cannot Speak English Well or Not At All	1.50%

COUNTY NAME

Sources: Shannon Van Zandt, Texas A&M, Hazard Planning materials, and 2009-2013 American Community Survey, Tables B11003, B01001, B17001, B08501, B25044, B25001, B25042, B02001, B03002, B26001, B25036, B17001, B25043, S1501, B23025 & B06007

Social vulnerability combined with the devastating impacts of a natural or man-made disaster can compound a household's ability to recover and in fact can place those individuals at an even greater gap or disadvantage prior to the event (Shannon Van Zandt, Texas A&M, Hazard Planning).

This county falls below the state score per this index for social vulnerability when comparing as a county to other counties in the state (low score means less social vulnerability issues). However, the Town of Delaware and the area to the east of the town, fall in an elevated socially vulnerable census tract. This may mean people living in this area may be more negatively impacted by a disaster event given their current needs.

Recommendations for this county:

- Continue to update and maintain the county HMP and include attention to areas within the county that in addition to physical vulnerability may have compounding social vulnerability factors.
- Efforts to strengthen building codes related to tornadoes and natural disasters should be considered.
- Planning for shelters from disaster events for multifamily, HUD and LIHTC units, in addition to all housing in the community should be incorporated with any effort to increase housing.
- As recommended in the FEMA approval document, provide potential dollars loss estimates to vulnerable structures for each hazard profiled except flood and earthquake (Grove HMP).
- Provide methodology for all other hazards profiled (Grove HMP).
- Provide general overview of land uses and more detailed information of future land use and development trends (Grove HMP).

Homelessness

By Continuum of Care

Oklahoma is comprised of eight Continuums of Care (CoC). These entities manage the provision of services to the homeless, among other functions. By definition, CoCs involve nonprofit homeless providers; victim service providers; faith-based organizations; governments; businesses; advocates; public housing agencies; school districts; social service providers; mental health agencies; hospitals; universities; affordable housing developers; law enforcement and other organizations that serve the homeless and those at risk of becoming homeless (Continuum of Care Network pamphlet, 2015). These entities are governed by a community plan that helps them deliver services to the homeless and/or to prevent a return to the homeless. CoCs provide a variety of services aimed at outreach, engagement and assessment, including emergency shelter, rapid re-housing, transitional housing, and permanent housing, among others (Continuum of Care Network pamphlet, 2015).

The data below describes the characteristics of those receiving or eligible for the CoC in which Delaware County is located. This data is collected by the CoCs on last day of January each year and reported on an annual basis. It is currently the best source of data available at the State level of understanding the demographics of these populations.

OK 505 Northeast Oklahoma

OK 505 represents the northeast region of Oklahoma, including Craig, Ottawa, Delaware, Cherokee, Adair, Sequoyah, Washington, Nowata, Rogers, Mayes, and Wagoner counties. There is a disproportionately high number of homeless households comprised of children in this CoC (24 out of 300). Eight of these 24 child only households are unsheltered. This area also has a high incidence of homeless victims of domestic violence (168). This group, for the most part, appears to be finding shelter. However, of the homeless veterans (51), the majority are unsheltered (30). The population of homeless substance abusers is also significant in this CoC (122). They, too, are finding shelter with only 10 reported instances of the failure to find shelter.

This CoC has invested in the creation of a significant number of temporary and permanent units of shelter for homeless individuals and family. There are 449 units of temporary housing available to individual and families in this region year around. An additional 90 units of permanent housing are available to homeless families and individuals. There exists a need for more units of rapid rehousing for veterans given the current population of unsheltered vets.

<i>OK 505 Northeast OK</i>	Emergency Shelter(sheltered)	Transitional Housing(sheltered)	Unsheltered	Total
Households without children	155	33	47	235
Households with at least 1 adult & 1 child	29	3	9	41
Households with only children	16	0	8	24
total homeless households	200	36	64	300
Persons in households without children	156	33	47	236
persons age 18-24	32	3	19	54
persons over age 24	124	30	28	182
Persons in households with at least 1 adult & 1 child	87	8	28	123
children under age 18	55	4	17	76

COC Conclusion

Each of the CoC's represents a unique area. It's important to note that the Point In Time data serves as a baseline. It is likely that the homeless population is much larger than counted. Generally, the State's homeless population is over the age of 24. In some areas of the State, there is a disproportionately high rate of homeless youth. More detailed exploration is necessary to understand the reasons which led them to this State and the needs of homeless youth. Domestic violence victims comprise a significant portion of the homeless population in the State. In some areas, the presence of social service providers for this subpopulation has reduced homeless rates. The same is true with respect to homeless veterans. As anticipated, the majority of the homeless population across the state can be classified as: mentally ill, chronically homeless, and chronic substance abusers. The needs of these difficult to house homeless must remain a priority across the State.

A Snap Shot of Homelessness in the State

Point in Time data was last collected on January 29, 2015 across the State. On that date, counts revealed a homeless populations of more than 3,000 residents. The majority of those counted (2,603 individuals) were classified as households without children. The majority of this group lives in emergency shelters (1,652) or transitional housing (376) with 575 classified as unsheltered.

The number of households with children is seemingly small totaling 343. The vast majority of those in this classification live at emergency shelters (201) or transitional housing (104) with only 38 classified as unsheltered. Homeless service providers in Oklahoma City and Tulsa emphasized that this group was likely undercounted across the State because they are less visible than other categories of homeless. They emphasized that emergency shelters, as presently designed, do not meet the needs of families with children in terms of both privacy and safety.

The Point in Time data reveals less than 100 households comprised of only children. Of these 74 counted households, 35 live in emergency shelters and 39 are unsheltered. This population is likely significantly undercounted as youth who are homeless typically seek to avoid identification for fear of being returned to their homes. These young people often have specific needs for supportive services that are difficult to deliver because the population remains unseen. Homeless advocates in the State hold up Tulsa as a good example of the State for serving homeless youth. OKC's Be the Change is also a leader in identifying and providing needed service to homeless youth in the metropolitan region. The problem of homeless youth is not just isolated to large urban areas. Mid-sized and smaller cities also look for innovative ways to service. Cities like El Reno and Enid have their own drop in centers for homeless youth. Social networks in smaller cities fill similar functions.

Oklahoma City public schools also tracks homeless students within the district. There are homeless students attending 78 elementary and middle schools in Oklahoma City. This data suggests that the majority of the city's homeless students are African American or Hispanic. There are 664 homeless African American students, 724 homeless Hispanic students, and 254 homeless Caucasian students. There are ten high schools in OKC that have reported having homeless students. Douglass and Capitol Hill high schools have the highest homeless student populations. Douglass has 50 homeless African American students. Capitol Hill has 49 homeless Hispanic students. The majority of these students can be classified as "couch homeless" or doubled up, meaning that they are finding

shelter with extended family members, friends, and other non-relatives for a brief amount of time due to hardship.

The majority of Oklahoma's homeless population is over 24 years old. This classification system is not particularly useful in helping to assess the number and needs of the elderly population, which is reported to be a substantial subset of this population.

The Point in Time data categorizes the homeless population into two categories: Hispanic/Latino and Non-Hispanic/Non-Latino. The lion's share of homeless in Oklahoma are Non-Hispanic/Non-Latino (3,528). In Oklahoma City, 62% of the homeless served are classified a Caucasian. Twenty-five percent of the homeless population is African American. Seven percent of the homeless in OKC identify as Native American. Less than one percent of those identified as homeless in OKC are Asian. By contrast, a relative small fraction of the State's homeless population is Hispanic/Latino. The Point in Time data identified a relatively small Hispanic homeless population, including less than 250 individuals. This follows OKC counts that identify 7% of the city's homeless population as Hispanic. Homeless advocates in OKC indicate that social networks, including churches and extended families, keep the number of homeless in the Hispanic population proportionately lower than their Non-Hispanic/Non-Latino counterparts. However, these individual likely classify as "couch homeless" and are in a continued state of being vulnerable to becoming homeless.

The PIT data indicates that are more homeless males (2,237) than females (1,535). This follows national trends. Care should be taken when interpreting this data, as women are less likely to participate in Point in Time counts. There is a growing population of homeless in Oklahoma that identifies as transgender. PIT data identified 5 individuals identifying as transgender. This population is likely much higher and will continue to grow due to family and national attitudes about this population. Transgender populations may require special housing accommodations, especially in the emergency shelter context, to provide for their social and emotional needs.

Another group of homeless individuals that merits special consideration in the distribution of resources is those identified as having special needs. This classification includes persons with "physical, mental or behavioral disabilities, persons with HIV/AIDS and/or persons with alcohol or drug addictions. The Point in Time data estimates that there are nearly 1300 homeless persons with special needs in OKC alone.

The Point in Time data is coarse and does not do an effectively track homeless populations with specific needs, such as those persons who are homeless and living with HIV/AIDS. This special population of homeless is likely growing in Oklahoma. According to the Oklahoma State Department of Health there were an estimated 5,375 cases of persons living with HIV/AIDS by the end of 2013. There were a total of 437 newly diagnosed HIV/AIDS cases in 2013 for the state of Oklahoma. The vast majority of populations living with HIV/AIDS (nearly 72%) reside in urban areas. In OKC alone, the Point in Time data identified at least 25 homeless individuals living with HIV/AIDS. This is likely an undercount. Based on this information and anecdotal data from homeless service providers, special effort must be made to understand the housing, medical, and supportive services needs of homeless persons living with HIV/AIDS.

Shelter is crucial for homeless persons with HIV/AIDS in the management of this illness. However, traditional shelter setting(s) may not be suitable to house this population. Those with suppressed immune systems are vulnerable to the spread of infectious diseases which may be present in open shelters. In addition, shelter personally may not be properly trained in handling AIDS related issues. For these reasons, as well as resources made available by the federal government, homeless persons living with HIV/AIDs are often given housing choice vouchers, created by HOPWA, so that they secure housing on the private market. This can be challenging in constrained rental markets like Norman, for example, where affordable housing options are limited. It is estimated that more than 60 individuals living in OKC with HIV/AIDs are homeless because they have been unable to find a landlord that will accept their housing choice voucher.

State Name: Oklahoma

Point-in Time Date: 1/29/2015

Total	2,309	690	778	3,777

Rural Areas

Homelessness in the rural areas of the State is much more difficult to calculate. Given the population density of the State, the majority of services that serve the homeless are concentrated in urban and semi-urban areas. Even if beds are available, many rural homeless lack knowledge about the services or a means to travel to receive the same. As a part of this study, OU students were dispatched into the 77 counties in the State to, among other issues, attempt to understand the degree to which there is rural homelessness in the State. Their qualitative inquiries yielded very little data, in part, because rural homeless is difficult to identify and often ignored. For the purposes of this report, a literature review was prepared on the topic of rural homelessness in the United States. The goals of this academic review is to assist policymakers and service providers in the State in uncovering the dimensions of this illusive population.

In the U.S., the rural homeless population is predominantly Caucasian. This population is comprised of single mothers, widowed wives and husbands, divorced and separated men and women, and young people. A study examining rural homelessness in Ohio found that nearly 40% of those who classify as homeless were divorced, separated, or widowed (First, Richard J., John C. Rife, and Beverly G. Toomey, 1994, pg. 101). Ohio's rural homeless were also relatively young. Close to 80% of homeless population in this study was between the ages of 18 and 39 years old (First et al, 1994, pg. 101). Rural homelessness is often less visible than urban homelessness because these populations commonly take shelter are at a friend's house, in their vehicles, or on abandoned properties. These populations can also be found on "...campgrounds or in hollows, desert canyons, farmers' fields, state parks, and highway rest areas" (Milbourne and Cloke, 2006, pg. 17).

The causes of rural homelessness mirror, in most ways, the plight of the urban homeless. The study of homelessness in rural Ohio revealed family problems and substance abuse issues as primary causes of rural homelessness. The incidence of homelessness resulting from situations of domestic violence is high in rural areas (Cummins et al, 1998). Substance abuse issues are a common cause for homelessness in rural America. The literature reveals that this population tends to be homeless because they have isolated themselves from family and people who want to help (First et al, 1994). In the case of both domestic violence and substance abuse, it is often difficult for these individuals to find shelter and the supportive services they require in rural areas where options are limited, if available at all. The thought of moving to an urban area to find both shelter and supportive services is sometimes not considered at all by these vulnerable populations.

Rural areas are also more prone to the kind of poverty that puts individuals and families at risk for homelessness. The number of people living at or below the poverty line in rural places is higher than anywhere else in the United States (Moore, 2001). The statement "rural homelessness is a microcosm of national economic and political developments" cannot be truer for American rural communities (Vissing, 1996, pg. 103). The disinvestment of small towns and their inability to attract long-term sustainable business development, cripples a small town's economy. In effect, this is a main contributor for why poverty is such a common theme for rural communities. As a result, the State should carefully consider its investments in rural Oklahoma. While there is a need for shelter in these places, the construction of this housing type should be weighed with long term opportunities for employment in the area.

It is not surprising that rural areas typically lack both emergency shelters and temporary housing options. Services that provide temporary housing and provide relief and support services for those who cannot find food are virtually nonexistent in rural communities across the United States (Moore, 2001). Sheltering the homeless is undercapitalized in rural areas because communities do not see a concentration of homeless individuals (Vissing, 1996, pg. 146). As a result, the homeless must satisfice where they are. For instance, for families who are homeless, some of them use a friend's house to store clothes or to seek shelter, while some receive assistance from churches (Cummins et al, 1998). Others migrate to urban areas where services are available and more accessible (Rollinson, Paul A., and John T. Pardeck, 2006).

The absence of affordable housing in rural areas is a root cause of homelessness (Levinson, David, and Marcy Ross, 2007). In fact, it was noticed that many of the people were receiving monetary assistance or previously had some money saved up to spend on housing, but these measures were not enough to keep them afloat (First et al, 1994, pg. 101). Housing costs rise in rural areas typically rise as a result of competition for a limited amount of housing stock. In some rural areas, low income families are spending 70% of their household incomes on housing, sometimes substandard housing (Vissing, 1996, pg. 124). As Levinson et al explain, "housing costs are lower but so are incomes, with the result of placing a heavier rent burden in the community" (Levinson, David, and Marcy Ross, 2007, pg. 45). Renters in rural communities, as a result, are far more susceptible to becoming homeless than their urban or suburban counterparts because they do not have the financial safety net sometimes associated with homeownership (Fitchen, 1991, pg. 193).

While this brief review of the literature describes the state of homelessness across rural America, many of the lessons learned are easily translated to an Oklahoma context. The condition and supply of affordable housing units is relatively poor in many rural portions of the State. Rent burden, as more fully characterized in the Consolidated Housing Affordability Strategy (CHAS) section of this report, is high. This leaves families living and working in relatively weak economies vulnerable to homelessness. Once homeless, supportive services in these areas are relatively limited, especially for the chronically homeless, those with substance abuse problems, and victims of domestic violence. Services available to these populations in urban areas may not be attractive to individuals and families who are accustomed to life in rural communities. Where practicable, more consideration must be given to providing supportive services and temporary and permanent housing to homeless populations wishing to remain in rural areas.

At Risk For Homelessness

Poverty is the primary factor that places Oklahoma families at risk of being homeless. There are many factors experienced by those living in poverty which leave residents more or less vulnerable to homelessness. For the purposes of this study, a social vulnerability index has been constructed to measure the likelihood or risk that residents living in poverty might find themselves homeless. This index includes factors such as single headed households, concentration of young and elderly residents, the reliance on public transportation, private vehicle availability, racial composition, housing type, presence or absence of a telephone in the household, amongst other factors. This index is additive and seeks to understand the collective impact of these factors in estimating the vulnerability of a local population. While employed in more significant detail in the section of this report focusing on disaster resiliency, this tool is useful in identifying areas of the State where populations may be most vulnerable to homelessness. The index utilized in this section is different from the one crafted in the Disaster Resiliency chapter of this report in that it estimates social vulnerability at the county level, rather than by census tract. The decision to study vulnerability to homelessness at the county level was made to help policymakers understand, more generally, where resources and economic interventions are most necessary to stave off the potential effects of homelessness. This maps presents vulnerability to homelessness on the county level, depicting the most vulnerable counties in dark green.

Social Vulnerability - Impacts on Housing & Disaster Resiliency

The Oklahoma families most likely at risk are those living in public and subsidized housing. They live below the poverty line. Even those who are employed, remain vulnerable to homeless because an unexpected expense, like a medical emergency, threatens their ability to pay for their share of rent owed or utilities. A missed payment can easily lead to eviction and homeless.

Through the U.S. Department of Housing and Urban Development, Oklahoma service providers have been vested with more than 24,000 housing choice vouchers. Their spatial distribution is outlined below. Of significance is the size of the waiting lists for public housing units and housing choice vouchers in cities across the State. These individuals are the most vulnerable to being homeless.

		Authorized Vouchers	Public Housing Waiting List	Voucher waiting list

Oklahoma		24,612		

Findings and Recommendations

There remains a significant homeless population in the urban and rural areas of Oklahoma. This population is very likely significantly undercounted in the Point In Time data. Local homeless advocates and service providers are highly aware of this undercount and are using innovative tools to find and serve the homeless. One example of these extra efforts to identify homeless populations is the data being collected by schools about the number of youth who are homeless or “couch” homeless. In this study, the research team also considered those families living at the economic margins and makes the case for the need for funding to support the housing needs of those that live a pay check or two from being homeless.

Those living with HIV/AIDS tend to underreport their status and needs. Given the cost of medical care these individuals face, the need for permanent and stable housing is critical. Housing providers must work to ensure that there are enough units for this undercounted population. Working with county health care providers, OHFA is much more likely to accurately estimate the size and needs of this population of homeless and potentially homeless persons. Special care must be taken to ascertain the barriers these individuals face when using vouchers to secure housing in the marketplace.

Victims of domestic violence require housing and supportive services across the State. CoCs with high supportive services tend to better accommodate the housing needs of these population. Cleveland County provides a good model for the State. However, many homeless victims of domestic violence live in rural areas that are underserved. Efforts must be undertaken to work with social services providers, schools, churches, and the police to help identify these individuals and to lead them to available housing and supportive services.

While not mentioned in the PIT data, estimates must be prepared to calculate the number and needs of homeless populations with felonies. In particular, there has been a rise nationally in the number of homeless sex offenders. Zoning regulations and discrimination from the private market has pushed many registered sex offenders to the periphery of many communities. This population must not be forgotten by policymakers.

The size of the homeless veteran population is decreasing as a result of national initiatives to end homelessness for veterans in Oklahoma. The needs of homeless veterans appear to be highest in areas of the State near VA facilities. Permanent housing should be constructed at a higher rate in these areas to meet demand. Care should be taken to make certain that the housing constructed is built to meet the psychological needs of veterans, particularly those suffering from PTSD.

Rural homelessness, in general, is a challenge to assess and characterize. The rate of homelessness in rural areas is most likely much higher than annual counts demonstrate. The majority of rural homeless likely find shelter out of public view. Some may shelter in their cars, in undeveloped areas or in the homes of those who allow them to stay. They are not likely to find their way to urban areas given their lack of transportation options and preferences for rural living. Programs that are developed to provide housing for the rural homeless must be developed to allow sheltering in place where possible.

Waiting lists for public housing and section 8 vouchers are high across the State. This is not uncommon to Oklahoma. However, when we are considering the size of the population that is at risk to homelessness, these waiting lists are an important factor to consider. Resources should be spent in a manner which is preventative so that these individuals' and families' needs are met before they become homeless.

The absence of affordable housing alternatives across some parts of the State is the largest threat to homelessness. In markets that are constrained by an aging housing stock or those that are rapidly growing, individuals and families who live on the economic margins are at risk for becoming homeless. Communities must work to ensure that zoning regulations promote the development of housing types serving all income levels, including the construction of affordable housing to meet the needs of the presently homeless and those at risk for becoming the same. Funding distributions should be targeted to communities with the highest needs who are willing to do what is necessary to meet the needs of the homeless and those at risk for the same.

Fair Housing

Summary

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity.

These findings are intended to aid the Oklahoma Housing Finance Agency (OHFA) determine the location of new affordable housing in relation to vulnerable populations and explore ways to expand the opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Key Findings:

- 70% of affordable housing units are located in census tracts marked by poverty
- 62% of affordable housing is located in census tracts where a majority of the residents are not white
- 13% of affordable housing units have no access to transit services and 56% have access to limited service, on-demand transit
- 2.6% of affordable housing units have limited access to a hospital
- 7.8% of affordable housing units are located in food deserts

Recommendations:

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

What is Fair Housing?

Fair housing addresses discrimination in the provision of housing as well as discrimination in access to opportunities provided by the location of affordable housing. On one hand, this protects the ability of individuals to obtain housing regardless of personal characteristics such as race, skin color, national origin, gender, familial status, or disability. It also focuses attention on more subtle forms of discrimination that cluster low-income housing in ways that inhibit the ability of communities to access services and amenities that support self-sufficiency and autonomy.

Recent actions by the United States Department of Housing and Urban Development (HUD) and the United States Supreme Court focus our attention on localized access to opportunity. In 2014, HUD released the Affirmatively Furthering Fair Housing (AFFH) rule for public comment. The draft rule

“directs HUD’s program participants to take significant actions to overcome historic patterns of segregation, achieve truly balanced and integrated living patterns, promote fair housing choice, and foster inclusive communities that are free from discrimination” (HUD 2015). In 2015, the United States Supreme Court provided legal support for actions taken to remedy patterns that impede the upward mobility and opportunity of low-income individuals and communities. In the case of Texas Department of Housing and Community Affairs v. The Inclusive Communities Project the court reiterated the need to address disparate impacts in considering the location of affordable housing and reinforced the importance of AFFH (Bostic 2015). Housing discrimination from this perspective is not only felt by individual residents, it can also be the result of actions that work to limit the opportunities to improve the quality of life in local communities.

Approach

In Oklahoma, a combination of federal and state programs work to support the opportunities provided to individuals and families who rest safely and comfortably in an apartment or home. Here we use publicly available data for units that are part of the Low Income Housing Tax Credit (LIHTC) Program, the Rural Rental Housing Loans, or OHFA administered programs such as Oklahoma Affordable Housing Tax Credit (AHTC), the HOME investment partnership program, the Section 8 Housing Choice Voucher Program, and multi-family bonds. Collectively, these programs represent state efforts to assist individuals who are unable to afford housing.

Indicators of disparate impact vary but seem to contingent upon the contextual characteristics of a particular neighborhood. In an effort to help communities investigate and understand community level disparate impacts, HUD created a Fair Housing Assessment Tool (http://www.huduser.gov/portal/affht_pt.html#affh). The assessment tool includes measures on indicators of disparate impacts based on the clustering of potentially vulnerable populations, including:

- Race/Ethnicity of Residents
- National Origin of Residents
- English Proficiency of Residents
- Job Accessibility
- Transit Accessibility
- Level of Poverty
- Environmental Exposure (e.g. pollution, crime, food, health care, etc.)
- Disability

This report uses the Fair Housing Assessment Tool in conjunction with readily available data to initiate a more thorough investigation of the potential for disparate impacts in the state. The findings are intended to aid the Oklahoma Housing Finance Agency regarding future location of new fair housing in relation to vulnerable populations and the future opportunities available to help communities of existing affordable housing achieve self-sufficiency.

Data

Data for this report are compiled from a variety of sources including the United States Census, the University of Oklahoma Center for Spatial Analysis, and primary data collected as part of ongoing research efforts at the University of Oklahoma. Data are aggregated into census tracts and reported statewide as well as by county (see Appendix 1).

1. Urban/Rural

A majority of the affordable housing in Oklahoma is situated in rural communities. Urban communities including Edmond, Lawton, Norman, Oklahoma City, and Tulsa are home to just over 1/3 of the affordable housing units in the state.

	Total Affordable Housing Units	Situated an Urban Setting	Situated in a Rural Setting
OHFA	35,292	11,699 (33.1%)	23,593 (66.9%)
515	5,384	0	5,384 (100%)
LIHTC	23,537	8,255 (35.1%)	15,282 (64.9%)
Total	64,213	19,954 (31.1%)	44,259 (68.9%)

2. Poverty

Approximately 70% of affordable housing units in Oklahoma are located in census tracts where the number of residents living in poverty is above the state average. About half of these units are located in areas of extreme poverty, where the number of individuals who are economically vulnerable exceeds 994, more than one standard deviation (411) from the mean (583).

	Total Affordable Housing Units	Situated in Poverty	Situated in Extreme Poverty
OHFA	35,292	12,295 (34.8%)	12,464 (35.3%)
515	5,384	2,093 (38.9%)	1,839 (34.2%)
LIHTC	23,537	7,483 (31.8%)	8,924 (38.0%)
Total	64,213	21,796 (33.9%)	23,227 (36.2%)

3. Non-white Enclaves

Just over 60% of affordable housing units in Oklahoma are located in census tracts where a majority of the residents are non-white. With just fewer than 24% of the total affordable housing units in census tracts heavily populated with residents who are not white – identified as census tracts where the number of non-white residents is more than 1,595 - one standard deviation (653) greater than the mean (542).

	Total Affordable Housing Units	Situated in Majority Non-White Community	Situated in Heavily Non-White Community
OHFA	35,292	12,814 (36.3%)	7,907 (22.4%)
515	5,384	2,229 (41.4%)	1,288 (23.9%)
LIHTC	23,537	10,285 (43.7%)	5,677 (24.1%)
Total	64,213	25,328 (39.4%)	14,872 (23.2%)

4. Immigrant Enclaves

One-third of affordable housing units in Oklahoma are located in census tracts where more than the average number of residents are immigrants. About half of these units are located in areas dense with immigrants, where the number of individuals who are not citizen exceeds 349, more than one standard deviation (219) from the mean (130).

	Total Affordable Housing Units	Situated in Immigrant Enclave	Situated in Heavily Immigrant Enclave
OHFA	35,292	8,114 (23.0%)	3,358 (9.5%)
515	5,384	1,017 (18.9%)	159 (3.0%)
LIHTC	23,537	5,457 (23.2%)	3,364 (14.3%)
Total	64,213	14,588 (22.7%)	6,881 (10.7%)

5. Limited English Proficiency

Almost 17,000 existing affordable housing units in Oklahoma are located in census tracts where more residents than average do not speak English very well. A little more than half of these units are located in areas dense with individuals with limited English proficiency, where the number of individuals who speak English less than very well exceeds 380, more than one standard deviation (240) from the mean (140).

	Total Affordable Housing Units	Community with more than average number of Limited English Speakers	Community dense with limited English Speakers
OHFA	35,292	6,250 (17.7%)	3,122 (8.8%)
515	5,384	799 (14.8%)	240 (4.5%)
LIHTC	23,537	4,034 (17.1%)	3,475 (14.8%)
Total	64,213	11,083 (17.3%)	6,837 (10.6%)

6. Disability

Almost 60% of existing affordable housing units in Oklahoma are located in census tracts where more residents than average have a disability. A little more than half of these units are located in areas dense with individuals with a disability, where the number of individuals who are disabled is greater than 831, more than one standard deviation (289) from the mean (542).

	Total Affordable Housing Units	Community with more than average number of Disabled Residents	Community dense with Disabled Residents
OHFA	35,292	10,098 (28.6%)	10,722 (30.4%)
515	5,384	1,686 (31.3%)	2,594 (48.8%)
LIHTC	23,537	7,074 (30.1%)	6,289 (26.7%)
Total	64,213	18,858 (29.4%)	19,605 (30.5%)

7. Hospitals

There are no affordable housing units more than 30 miles from a hospital. Approximately 2.6% of affordable housing units are farther than 15 miles from the nearest hospital. As indicated by the larger percentage of Rural Rental Housing Loan units, most of these are located in rural areas.

	Total Affordable Housing Units	More than 15 miles to nearest hospital	More than 30 miles to nearest hospital
OHFA	35,292	628 (1.8%)	0
515	5,384	500 (9.3%)	0
LIHTC	23,537	532 (2.3%)	0
Total	64,213	1,660 (2.6%)	0

8. Grocery Stores

Approximately 7.8% of affordable housing units are in areas that are classified as food deserts. According to the United States Department of Agriculture, food deserts exist in urban environments further than 1 mile from a grocery store and in rural environments further than 10 miles from a grocery store (<https://apps.ams.usda.gov/fooddeserts/foodDeserts.aspx>).

	Total Affordable Housing Units	Urban > 1 Mile from nearest Grocer	Rural > 10 miles to nearest Grocer
OHFA	35,292	1,493 (4.2%)	1,097 (3.1%)
515	5,384	0	466 (8.7%)
LIHTC	23,537	1,175 (5.0%)	769 (3.3%)
Total	64,213	2,668 (4.2%)	2,332 (3.6%)

9. Transit

A little over 69% of affordable housing in Oklahoma is located in a census tract with limited or no access to transit services. This includes 8,367 affordable housing units in areas that lack public transit services all together as well as 36,363 units that are situated in areas that have on-demand transportation services that often have limited operation times and may only serve elderly and disabled populations or those going to a medical appointment.

	Total Affordable Housing Units	No Transit	Urban Transit	On-Demand Transit
OHFA	35,292	4,035 (11.4%)	11,265 (31.9%)	19,992 (56.6%)
515	5,384	767 (14.2%)	0	4,617 (85.8%)
LIHTC	23,537	3,565 (15.1%)	8,217 (34.9%)	11,755 (49.9%)
Total	64,213	8,367 (13.0%)	19,482 (30.3%)	36,363 (56.6%)

What does this mean for Oklahoma?

This report suggests a number of possible ways forward for the Oklahoma Housing Finance Agency as it continues to support quality low-income and workforce housing for residents of the state. Across a number of indicators of opportunity, affordable housing in the state clusters in ways that raise concerns about the opportunities available to affordable housing residents in comparison to other residents.

Continued efforts to improve the quality of life for affordable housing residents and reduce discrimination associated with affordable housing will likely need to include strategies that integrate new affordable housing as well as support existing communities of affordable housing. This will likely include public policies and funding designed to integrate low-income and workforce housing into a more diverse set of communities. Additionally, those living existing affordable housing communities need increased opportunities to stay in place, become self-sufficient, and participate in determining the future of their neighborhood. OHFA may consider partnering with other state, non-profit, and for-profit agencies to explore strategies for helping communities thrive economically, socially, and environmentally.

Moving ahead, Oklahoma should be wary of a narrowly focused vision focused solely on the problems of existing affordable housing and the integration of these residents into other communities. The relocation of residents harkens back to the physical and social destruction brought about by urban renewal. Such an approach pits efforts to enhance existing affordable housing through community development against efforts to build a more integrated and diverse society (Goetz 2015). Rather, Oklahoma has the opportunity to work closely with local municipalities to improve the conditions of current affordable housing communities while simultaneously advancing integration of low-income and workforce housing through the construction in new settings.

For future new development, a number of case studies and emerging scholarship on the importance of neighborhood effects provide guidance on possible ways forward for Oklahoma. For instance, in El Paso, Texas a public private partnership between the Housing Authority of the City of El Paso and private developers led to the development of a mixed income housing development. Eastside Crossings (<http://www.hacep.org/about-us/eastside-crossings>) provides 74 traditional affordable housing units, 79 affordable housing units, and 45 market rate units in partnership with the Texas Department of Housing and Community Affairs (Housing Authority of El Paso 2015). In Sacramento, partnership between private developers and the Capital Area Redevelopment Authority resulted in the adaptive reuse of a building listed on the National Register of Historic Buildings into affordable Housing (Vellinga 2015). Located in a dense, walkable, transit-oriented community, the Warehouse Artist Lofts (<http://www.rstreetwal.com>) are home to 116 units, 86 of which are affordable and 13,000 square feet of ground floor retail.

For existing affordable housing, strategies exist to help enhance localized opportunities and build a culture of community participation around housing. Across the nation, there is a need to refocus the discussion away from the deficits found in many communities to look for closely at opportunities (Lens 2015) and to think about the consequences of physical, social, and economic isolation (Clarke, Morenoff, Debbink, Golberstein, Elliott, & Lantz, 2014.).

The Oklahoma Housing Finance Agency may need to collaborate more closely with other governmental agencies to develop comprehensive strategies that not only improve existing housing but also work toward enhancing access to food, recreation, amenities, jobs, and quality schools. By doing so, OHFA could help build the social and physical resiliency of these communities so that residents would be empowered to choose for themselves whether or not they want to stay and be part of their existing community or move elsewhere in search of a better quality of life. A set of tools for doing some of this work is available through Policy Link (<http://www.policylink.org/equity-tools/equitable-development-toolkit/about-toolkit>). For those who are relocated due to circumstances that make staying in place impossible, intensive case management may be required to ensure that these residents avoid pitfalls and thrive in a new environment (Theodos, Popkin, Guernsey, & Getsinger, 2010). But evidence continues to suggest that stability, particularly in the lives of children, is an essential part of ensuring that everyone has the opportunity to succeed and thrive (HUD 2014).

Lead-Based Paint Hazards

Findings / Health and Well-being

Lead is known to be highly toxic particularly to young children 5 years of age and under. Excessive exposure results in reduced intelligence, impaired hearing, reduced stature and a host of other negative health effects. It is well documented that a common source of lead exposure for children is lead-based paint in older housing along with the dust and soil it generates. Children are exposed to lead-based paint most commonly by directly eating paint chips or indirectly by ingesting lead-contaminated house dust or soil through normal hand-to-mouth contact.

For purposes of this analysis, the federal definition of “lead-based paint hazard” at 24 CFR Part 35.86 was applied. Under this definition, lead-based paint hazard is defined as, “...any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as established by the appropriate Federal agency.”

It is noteworthy estimates presented can only be stated as dwellings that “potentially” have LBP hazards because there are no real-time surveys or studies of residential structures built prior to 1978. However, there have been previous estimations provided in the state’s Consolidated Plan.

Statewide Findings

Using methodology which will be discussed later in this section, we have estimated the number of housing units in Oklahoma with lead-based paint hazards as defined in 24 CFR Part 35.86. Our estimates are shown in the following table.

Lead-Based Paint Hazards in Oklahoma		
	Number	Percent
Total Housing Units	1,432,730	
Total Housing Units with Lead-Based Paint Hazards	240,229	16.8%
Owner-Occupied Units w/LBP Hazards	159,861	66.5%
Renter-Occupied Units w/LBP Hazards	80,368	33.5%
Housing Units w/LBP Hazards Occupied by Low-to-Moderate Income Households	113,931	47.4%
Housing Units w/LBP Hazards with Children < 6 Years of Age Present	37,426	15.6%
Housing Units w/LBP Hazards Occupied by LMI Households and Children < 6 Years of Age Present	19,761	52.8%

Sources: American Healthy Homes Survey Table 5-1 & CHASTables 12 & 13

As shown, we estimate that there are 240,229 housing units in Oklahoma containing lead-based paint hazards, representing 16.8% of Oklahoma’s total housing stock. 66.5% of those units are owner-occupied, while 33.5% are renter-occupied. Of the 240,229 housing units containing lead-based paint hazards, 113,931 units, or 47.4%, are occupied by households with low-to-moderate incomes as defined by HUD. Among all housing units with lead-based paint hazards, 37,426 units have children under the age of six present, and 52.8% of those units, or 19,761 units total, are households with low-to-moderate incomes. Exhibits 2 through 6, found at the end of this section, graphically summarize our statewide findings at a county level.

Disaster Resiliency/ Economy and Society, Infrastructure and Environment

While communities strive to address lead-based paint hazards through education and removal when detected in connection with federally funded local housing rehabilitation initiatives, hazard detection and mitigation may have special considerations in terms of disaster resiliency.

Many disasters are accompanied by widespread damage to residential structures often times scattering building material debris across the landscape necessitating removal by heavy equipment and disposal in landfills. When building materials contaminated with lead-based paint become part of non-contaminated debris disposal, it presents an environmental hazard that can span well beyond recovery and rebuilding efforts.

Leadership and Strategy

Given the albeit large but finite number of potential housing units with lead hazards, the state and local communities may wish to consider initiatives aimed at reducing and/or eventually eliminating residential lead-based paint hazards, particularly in housing occupied by low and moderate income households with young children present. One such initiative could be the use of the state's various federal and state housing programs' competitive funding selection criteria. By designing rating criteria that specifically awards points to applicants that purposefully seek out properties within counties known to have higher percentages of lead hazards, housing developers along with those engaged in rehabilitation may be incentivized to engage in hazard mitigation.

State and local governments may wish to capitalize on the results of this study by using the data to support competitive applications to the Federal Home Loan Bank Topeka's Affordable Housing Program funding for owner occupied rehabilitation which, among other competitive rating criteria, awards points for the "Abatement of Hazardous Environmental Conditions". Similarly, this report's data may be used to document hazards and need in applications for competitive health care grants offered at the federal level.

Similar to initiatives undertaken by USHUD, the state may want to consider undertaking a real-time sample survey of homes built prior to 1978 across the state's community sizes and counties to more accurately ascertain the extent of the hazard and/or conducting real-time surveys of LBP Risk Assessors licensed by the ODEQ.

Survey of Previous Lead-based Paint Studies

Using a combination of US Census Bureau and US Department of Housing and Urban Development Comprehensive Housing Affordability Strategy data and age of housing stock built prior to 1980, the Oklahoma Department of Commerce's, "State of Oklahoma Five-Year E-Consolidated Plan FY 2014 – 2018" estimated 59% of the owner occupied and 65% of the renter occupied housing had the potential of containing lead-based paint. To address lead paint hazards, the Consolidated Plan recommended assessment of hazard presence be conducted at the point dwelling rehabilitation is undertaken and that nonprofits advise persons receiving federal rehabilitating assistance regarding the dangers of lead exposure.

At the national level, between 1998 and 2000, USHUD Office of Health Homes and Lead Hazard Control staff and the National Institute of Environmental Health Sciences conducted a real-time

random sampling of 831 permanently occupied housing units (multifamily, single family and mobile homes) taken from all 50 states and the District of Columbia. The results indicated an estimated 38 million (39% of the 96 million total housing units) of the nation's housing units had lead-based paint hazards. Of that total, 24 million had significant lead hazards with 1.2 million of those units occupied by low income families. It was further estimate that 35% of all low income housing had lead-based paint hazards. The study also noted the prevalence of lead-based paint increases with age of housing. However, most painted surfaces, even in older homes don't have lead paint. Geography was found to be related to the incidence of lead-based paint with the Northeast and Midwest having 2 times the prevalence of lead paint than the South and West. Finally, the study recommends "public-private sector resources be directed units posing the greatest risk" as a preventive measure to avoid lead poisoning.

In April 2011, the U.S. Department of Housing and Urban Development, Office of Healthy Homes and Lead Hazard Control updated its 1998-2000 nationwide report in its publication, "American Healthy Homes Survey, Lead and Arsenic Findings". This report, conducted from June 2005 through March 2006, estimated 37.1 million homes (34.9%) out of a total of 106 million total housing units have lead-based paint somewhere in the building. Of the 65.6 million homes built before 1978, 34.4 million (52%) have lead-based paint. The study reaffirmed the previous finding that the prevalence of lead-based paint is higher in the Northeast and Midwest parts of the United States than South and West. It also confirmed earlier finding that the incidence of lead-based paint increases with age of housing with 86% of the homes built prior to 1940 containing lead. An estimated 3.6 million homes with children less than 6 years of age have lead-based paint hazards of which 1.1 million are low income households. Of the 16.8 million homes with children under the age of 6, 5.7 million (34%) have lead-based paint, about the same incidence of lead-based paint in all homes.

In June 2006, the Oklahoma State Department of Health's Childhood Lead Poisoning Prevention Program (OCLPPP) received a 5-year project grant "Oklahoma Childhood Lead Poisoning Prevention Program Focusing in High Risk Groups". That program focused on communities evidencing high numbers of children 6-72 months of age who are at high risk for lead poisoning.

In order to more effectively target high-risk areas and populations, the OCLPPP identified 21 high-risk target area (HRTA) zip codes (see Exhibit #1) located within Oklahoma, Tulsa, Muskogee, Jackson, Okmulgee, Ottawa, Kay, Garfield, and Hughes counties. These 21 zip codes were narrowed from a list of 57 zip codes out of the state's approximately 700 zip codes that with populations of 5,000 or more persons; greater than or equal to 22% of housing stock built prior to 1950; and, greater than or equal to 18% of children under the age of 6 years living below the poverty level.

The 57 zip codes were further compared and evaluated based on selected characteristics such as EBLL cases and proportion of minority population. Zip codes with higher EBLL prevalence and/or minority populations (Hispanic/African American/American Indian) were ranked higher and given the designation as HRTA zip codes.

Delaware County Findings

The number of housing units in Delaware County containing lead-based paint hazards can be estimated by applying the percentages of housing units with such hazards reported by the American

Healthy Homes Survey, to the number of occupied homes in Delaware County, by year of construction. The following table presents the percentage of housing units in the Census Bureau South Region based on the AHHS findings.

Housing Units in the South Census Region with Lead-Based Paint Hazards by Year of Construction			
Year of Construction	No. of Housing Units (000s)	Units w/ LBP Hazards (000s)	Percent of Units w/ LBP Hazards
1978-2005	18,625	664	3.6%
1960-1977	11,724	1,311	11.2%
1940-1959	5,575	2,145	38.5%
1939 or Earlier	3,072	1,947	63.4%
Total	38,996	6,067	15.6%

Source: U.S. Dept. of Housing and Urban Development, American Healthy Homes Survey, Table 5-1

These percentages can then be applied to the number of housing units in Delaware County, by year of construction and by tenure (owner-occupied versus renter-occupied), as reported by HUD's Comprehensive Housing Affordability Strategy (CHAS) data for Delaware County.

Total Housing Units in Delaware County with Lead-Based Paint Hazards by Tenure			
Total Owner-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	7,775	3.57%	277
1960-1977	2,966	11.18%	332
1940-1959	995	38.48%	383
1939 or Earlier	670	63.38%	425
Total	12,405	11.42%	1,416
Total Renter-Occupied Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,876	3.57%	67
1960-1977	1,085	11.18%	121
1940-1959	440	38.48%	169
1939 or Earlier	265	63.38%	168
Total	3,665	14.34%	525
Total Housing Units	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	9,650	3.57%	344
1960-1977	4,050	11.18%	453
1940-1959	1,435	38.48%	552
1939 or Earlier	935	63.38%	593
Total	16,070	12.08%	1,942

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

Finally, we can use the same methodology to estimate the number of housing units in Delaware County with lead-based paint hazards, occupied by households with low-to-moderate incomes, by tenure:

**Housing Units in Delaware County with Lead-Based Paint Hazards by Tenure,
Occupied by Low-Income Families**

Owner-Occupied Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,469	3.57%	52
1960-1977	621	11.18%	69
1940-1959	325	38.48%	125
1939 or Earlier	195	63.38%	124
Total	2,610	14.19%	370

Renter-Occupied Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	700	3.57%	25
1960-1977	585	11.18%	65
1940-1959	140	38.48%	54
1939 or Earlier	125	63.38%	79
Total	1,550	14.42%	223

Total Housing Units < 50% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	2,169	3.57%	77
1960-1977	1,206	11.18%	135
1940-1959	465	38.48%	179
1939 or Earlier	320	63.38%	203
Total	4,160	14.28%	594

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

**Housing Units in Delaware County with Lead-Based Paint Hazards by Tenure,
Occupied by Moderate-Income Families**

Owner-Occupied Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,412	3.57%	50
1960-1977	509	11.18%	57
1940-1959	140	38.48%	54
1939 or Earlier	205	63.38%	130
Total	2,265	12.85%	291

Renter-Occupied Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	382	3.57%	14
1960-1977	239	11.18%	27
1940-1959	90	38.48%	35
1939 or Earlier	10	63.38%	6
Total	720	11.28%	81

Total Housing Units 50%-80% AMI	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,793	3.57%	64
1960-1977	747	11.18%	84
1940-1959	230	38.48%	88
1939 or Earlier	215	63.38%	136
Total	2,985	12.47%	372

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 12

To conclude, we estimate that there are a total of 1,942 homes in Delaware County containing lead-based paint hazards, 1,416 owner-occupied and 525 renter-occupied. Of the 1,942 homes in the county estimated to have lead-based paint hazards, 594 are estimated to be occupied by households with low-incomes (incomes less than 50% of Area Median Income), and 372 are estimated to be occupied by households with moderate incomes (between 50% and 80% of Area Median Income), for a total of 966 housing units in Delaware County with lead-based paint hazards occupied by households with low or moderate incomes.

Lead-Based Paint Hazards in Homes with Children Present

Using the same methodology, we can estimate the number of housing units in Delaware County occupied by households with children under the age of six present. For this analysis we apply the lead-based paint hazards percentages from the American Healthy Homes Survey to the data in HUD CHAS Table 13, which details housing units by year of construction, household income, and presence of children under the age of six. The data is presented in the following table:

Housing Units in Delaware County with Lead-Based Paint Hazards with Children under Age 6 Present Occupied by Low or Moderate-Income Families			
Housing Units < 50% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	438	3.57%	16
1940-1977	341	19.98%	68
1939 or Earlier	59	63.38%	37
Total	838	14.46%	121
Housing Units 50%-80% AMI w/ Children under 6 Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	157	3.57%	6
1940-1977	138	19.98%	28
1939 or Earlier	14	63.38%	9
Total	309	13.59%	42
Total LMI Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	595	3.57%	21
1940-1977	479	19.98%	96
1939 or Earlier	73	63.38%	46
Total	1,147	14.22%	163
Total Housing Units w/ Children Present	Total Housing Units	Percent w/LBP Hazards	Number w/LBP Hazards
1978 or Later	1,262	3.57%	45
1940-1977	816	19.98%	163
1939 or Earlier	81	63.38%	51
Total	2,159	12.01%	259

Sources: American Healthy Homes Survey Table 5-1 & CHAS Table 13

As shown, we estimate there are 259 housing units in Delaware County with lead-based paint hazards and children under the age of six present, and that 163 of those housing units are occupied by families with low to moderate incomes.

Exhibit #1

Map 2: High-Risk Target Areas (HRTA) Zip Codes for Childhood Lead Poisoning

Legend

- High-Risk Target Area (HRTA) Zip Codes
- Other Zip Codes

Notes

The OCLPPP has identified 21 HRTA zip codes in Oklahoma. These zip codes are located in Garfield, Hughes, Jackson, Kay, Muskogee, Oklahoma, Okmulgee, Ottawa, and Tulsa Counties.

The HRTA zip codes include 73106, 73107, 73108, 73109, 73111, 73117, 73119, 73129, 73521, 73701, 74104, 74106, 74110, 74115, 74127, 74354, 74401, 74403, 74447, 74631, and 74848.

The HRTA zip codes are identified using the following criteria:

- 1- Zip codes having the highest proportion of pre-1950 housing;
- 2- Zip codes having the highest proportion of children under six years of age living in poverty;
- 3- Zip codes having high elevated blood lead level (EBLL) prevalence rate; and
- 4- Zip codes having the highest proportion of minority populations.

Conclusions

The previous analysis has attempted to describe the state of the residential housing market in Delaware County, Oklahoma. Where possible, information regarding the population centers of the county was included to assess need on a community level. Much of the information is based on demographic information from local authorities and national information services. However, personal interviews were performed with property owners and managers, real estate professionals, and community officials in an effort to substantiate information from the national organizations and understand current market conditions. Several important issues regarding housing have become apparent through this analysis and are identified below.

Delaware County has undergone steady growth over the last fifteen years, in terms of population, households and employment levels. New population and employment growth has been met with new housing construction, primarily for ownership, and typically comprising higher-end homes. The average price of homes constructed since 2010 in Grove is estimated to be \$303,548, which is well above what could be afforded by a household earning at or less than median household income for Delaware County (\$39,229 in 2015).

Delaware County has a relatively moderate rate of renters with high rent costs (30.56%), though the percentage of homeowners with high housing costs is higher than the state average. The county's poverty rate is also well above the state, at 21.23% compared with 16.85% statewide.

In terms of disaster resiliency we note that 49 tornadoes have impacted the county between 1959 and 2014, with 53 injuries and no fatalities, and that the National Climatic Data Center notes 20 flood events in Delaware County since 1993.

Delaware County is located within the Northeast Oklahoma Continuum of Care (CoC), which provides services to the area's homeless populations among other functions. Throughout the entire Northeast Oklahoma CoC, there are an estimated 383 homeless persons, 300 of which are estimated to be sheltered. This Continuum of Care has a disproportionately high number of homeless households entirely comprised of children under the age of 18, and a high incidence of homeless victims of domestic violence. We also note that the majority of homeless veterans in this region are unsheltered.

In terms of fair housing issues, many affordable housing units are located in areas at risk for poverty, in primarily non-white enclaves, and in areas with high numbers of persons with one or more disabilities. 28 affordable housing units are located more than 15 miles from a hospital.

Due to the age of the county's housing stock, lead-based paint hazards are an issue, with an estimated 1,942 occupied housing units with such hazards, and 259 of those units occupied by low-to-moderate income households with children under the age of 6 present.

In summary, it is apparent that new housing in several categories is required in Delaware County. While the upper end of the market is being satisfied, the lower end of the population that requires rental and moderate cost ownership property has a more limited product available. As the population

continues to grow in Delaware County as a whole, this demand will continue to increase. We estimate the county will need 210 housing units for ownership and 60 housing units for rent over the next five years, in order to accommodate projected population and household growth. These units should include a mixture of both market rate rental units, affordable housing units, and housing for ownership affordable to a range of incomes.

Addendum A

Acknowledgments

The Housing Needs Assessment research team extends a special thanks to the following individuals and organizations for their many contributions of data, program information and time that helped make this project possible:

University of Oklahoma Intern Team

Derrick “Rhys” Wilson, Eyakem Gulilat, Chase Phillips, Jane Wyrick, Charlotte Adcock, Sam Shreder, Jacquelyn Porter, Amy Wilson, Kevin Wang, Lora Gwartney, Forrest Bennett, Maryam Moradian, Salma Al Nairab

David A. Puckett

Experience

Senior Director with Integra Realty Resources - Oklahoma, a full service valuation and consulting firm. Actively engaged in real estate valuation and consulting assignments since May 2002, Mr. Puckett has performed appraisal services consisting of narrative and summary real estate appraisals. All types of real property are encompassed-apartments, garden office buildings, manufacturing and warehouse industrial buildings, mobile home parks, restaurants and retail structures. Valuations and market studies have been prepared on proposed and existing structures. Appraisals have been made for estates, mortgage financing, equity participation and due diligence support. Prior to his employ at Integra Realty Resources - Oklahoma, Mr. Puckett was an employee of the University of Oklahoma Center for Business and Economic Development, working as a data analyst for the All County Affordable Housing Study commissioned by the Oklahoma Department of Commerce. Responsibilities included demographic, economic and real estate data collection from federal, state and local sources, as well as interviews of regional planning district, county and municipal officials, real estate market experts and local economic development experts. Mr. Puckett was responsible for site visits of 23 of the 77 Oklahoma counties, and personally authored 18 of the final reports. As an employee of IRR-Oklahoma, Mr. Puckett also performed the site visits and authored the final reports for four of the nine entitlement cities: Tulsa, Broken Arrow, Shawnee and Lawton. Mr. Puckett has also completed numerous housing market studies for use in applications for Federal Low-Income Housing Tax Credits in Oklahoma, Kansas, Missouri and Arkansas, and has performed market studies and appraisals for use in H.U.D.'s Multifamily Accelerated Processing (M.A.P.) program. Clients served include corporations, financial institutions, investment firms and public/private agencies.

Integra Realty Resources, Inc.

Corporate Profile

Integra Realty Resources, Inc. offers the most comprehensive property valuation and counseling coverage in North America with over 60 independently owned and operated offices located throughout the United States and the Caribbean. Integra was created for the purpose of combining the intimate knowledge of well-established local firms with the powerful resources and capabilities of a national company. Integra offers integrated technology, national data and information systems, as well as standardized valuation models and report formats for ease of client review and analysis. Integra's local offices have an average of 25 years of service in the local market, and virtually all are headed by a Senior Managing Director who is an MAI member of the Appraisal Institute.

Student Planning Award for the Pinellas County Post Disaster Ordinance Drafting Project from the Florida Chapter of the American Planning Association, Fall, 2011.

Award for Service as the University Liaison to the Florida Chapter of the American Planning Association, Fall, 2010.

Teacher of the year award by the UF Student Planning Association, April, 2010.

Best paper in the real estate valuation category by the Appraisal Institute with Kimberly Geideman and Shan Gao, Fall, 2009.

Excellence in Teach Award by the College of Architecture of Texas A & M University, September, 2005.

Student Planning Award by the Texas Chapter of the American Planning Association, Fall, 2007.

Early Dissertation Research Grant to Study the Effects of Intergenerational Planning on Relocation Grief from the U.S. Department of Housing and Urban Development, November, 2003.

COURSES TAUGHT:

Principles and Practice of Urban Planning (graduate level, at the University of Oklahoma)

Land Use Controls (graduate level, at the University of Oklahoma)

Sociology of Housing (graduate level, at the University of Oklahoma with Dean Charles Graham)

Growth Management Powers II (graduate-law course, at the University of Florida)

Growth Management Powers I (graduate-law course, at the University of Florida)

Affordable Housing Law (graduate-law course, at the University of Florida)

Planning History and Theory (graduate level, at the University of Florida and Texas A&M University)

Land Use Planning Law (law school, at the University of Florida College of Law)

Land Development Law (graduate level, at Texas A&M University)
Historic Preservation Law (graduate level, at Texas A&M University)
Introduction to Urban Planning (undergraduate level, at Texas A&M University and Florida State University)
Attorney-Client Communications (undergraduate level, at Florida State University)
Legal Communications (undergraduate level, at Florida State University)
Environmental Law (continuing education, at Rutgers University)
Historic Preservation Law (continuing education, at Rutgers University)
Ordinance Drafting (continuing education, at Rutgers University)

INVITED LECTURES

University of Oklahoma
Department of Geography & Sustainability, Spring Colloquium
"Walking & Biking: Active Transportation and the Built Environment" January 2014

Kansas State University – Big 12 Fellowship

- The messiness of random sampling spatially Oct. 21, 2013
- Watershed Functions & Impacts from Development Oct. 21, 2013
- Creating an audit tool and operationalizing data Oct. 23, 2013
- Bicycle Facility Design & Planning Oct. 23, 2013
- Observational Methods Oct. 23, 2013
- Pedestrian Planning and Design: How does the environment we live in impact our lives? Oct. 2013
- Office workers – Sedentary by Practice: How can we integrate physical activity as part of daily routines at work – Formal presentation to faculty and students Oct. 2013

Department of Biostatistics and Epidemiology College of Public Health,
University of Oklahoma Health Sciences Center

- Planning, Built Environment, and Public Health: How does the environment we live in impact our lives? March 11, 2013

GRANT FUNDING

Received Ed Cline Faculty Development Award (\$1450), Spring 2014
Received Big 12 Faculty Fellowship Program Award (\$2500) June 2013
Received College of Architecture IT recipient (\$3450) July 2013
Sooner Parents Mini-Grant Funding (\$500) for student mentoring –prepared and submitted to assist RCPL Student Planning Association July 2013
Received Junior Faculty Research (\$7,000) for summer research on rural planning and physical activity opportunities. University of Oklahoma, Summer 2012
Robert Wood Johnson Active Living Research Dissertation Grant (\$25,000), Texas A&M University, 2007

SERVICE

University-Level Service

- Advisory Committee Course Management Systems (ACCMS) Spring 2013

College-Level Service

- Graduate Liaison for Regional & City Planning Division (Fall 2013 – present)
- Graduate Research & Curriculum Committee (Fall 2013 – present)
- RCPL orientation (Fall 2010- present)
- Search committee for new RCPL hires, new LA hire (Summer 2011, Summer 2012, Spring 2013, Spring 2014)
- IT Committee (member since 2012), Chair (Fall 2013-Spring 2014)
- Model Shop Committee (member since 2012-Fall 2013)
- RCPL website (2011- present)
- GHGI committee (Gould Hall Green Initiative) (Fall 2011)
- Co-hosting and arranging guest seminar: Dr. Chanam Lee – "The Built Environment and Disparities in Physical Activity", December 2012.

SERVICE

State-level / City-Level Service

- President – Health Equity Caucus, subgroup of Oklahoma Public Health Association
- APA/AICP member
- Bicycle Advisory Committee, City of Norman – Committee member (Spring 2013 – 2016)

National-Level Service

- Secretary/Treasurer of Faculty Women’s Interest Group (FWIG), committee under Association of Collegiate Schools of Planning (ACSP).
- CDC Weight of the Nation Conference planning, Built Environment & Transportation Subcommittee
- Reviewer for Journal of Physical Activity and Health

BACKGROUND SUMMARY

Executive Manager with extensive experience in public sector resource design, management and evaluation. Knowledge and skills include: structuring and design of state and local service programs and initiatives, developing written proposals for project financing, identifying community economic development resources and training.

EXPERIENCE

DeBruler, Inc.

Vice President, Oklahoma City, August 2001 to Present

Provide services including:

- ✓ Researching public and private resources and preparing applications for financial assistance in response to client requests for economic and community development projects.
- ✓ Technical assistance to nonprofits and units of local government regarding federal and state resources and structuring project-beneficial partnerships; preparing strategic and business plans for public and private sector entities.
- ✓ Group facilitation services.
- ✓ Technical training for nonprofits and units of local government regarding federal and state financial assistance programs. Conducting organizational assessments and developing capacity building curriculums.

Oklahoma Housing Finance Agency

Team Leader, Housing Development Team, Oklahoma City, July 1998 to July 2001

Provided direct supervision and oversight of sixteen staff engaged in the administration of multiple federal and state affordable housing program resources.

While employed by the agency:

- ✓ Reorganized state's Single Family Mortgage Revenue Bond, Low-income Housing Tax Credit, HOME Investment Partnerships and Housing Trust Fund Programs into a single work unit.
- ✓ Streamlined Low-income Housing Tax Credit Program administrative rules to provide for market responsive design flexibility.
- ✓ Streamlined affordable housing resources by developing a singular application package and process for the agency's affordable housing development resources and established e-information network.
- ✓ Facilitated the development of working partnerships between the state's nonprofit and for-profit housing development organizations and agency's mortgage revenue bond lenders.
- ✓ Financed the development of affordable housing by leveraging public sector development funds with private investments.

- ✓ Facilitated legislative task force on rural affordable housing issues and devised legislative and programmatic actions to spur rural development.
- ✓ Developed, financed and implemented the state's first statewide affordable housing market analysis in partnership with a major university center.
- ✓ Drafted enabling legislation, capitalized and implemented state's Housing Trust Fund.

Oklahoma Department of Commerce

Program Manager/Department Head, Oklahoma City, March 1988 to July 1998

- ✓ In response to market-based demand, directed a team of professional agency staff with diverse skills, in the redesign of the state's HOME Investment Partnerships Program from primarily rehabilitation services to the production of rural affordable housing units.
- ✓ Led HOME Program administrative team in the relocation of the Program from its state agency environment to the Oklahoma Housing Finance Agency, a public trust.
- ✓ Leveraged HOME Program development resources with other public and private debt capital to finance the development of rural affordable housing statewide.
- ✓ Formulated and implemented a legislative agenda to enact and capitalizing the state's Housing Trust Fund.
- ✓ Provided daily oversight and administration for several state administered federal programs including: U.S. Department of Energy State Energy Program, Community Development Block Grant, Home Investment Partnerships, Rental Rehabilitation, Solar Energy and Energy Conservation Bank, and State Appropriated Funds for regional councils of government.

City of Oklahoma City January 1984 to February 1988

Division Head, Code Inspections Division/Department of Environmental Services

Assistant Superintendent, Utility Services Division/Water Department

Administrative Assistant, Street Maintenance Division, Public Works Department

Management Intern, Personnel Department

EDUCATION

Masters of Public Administration, University of Oklahoma 1983

Bachelor of Arts Political Science, University of Oklahoma, 1979
